It has been enlarged by the removal of the partition wall, which formerly divided it; and the low ceiling having been replaced by one presenting a graceful curve at the sides, the hall has thus been heightened. The pure-white finish, with centre- and corner-pieces of neat design, adds much to the general effect. Due regard has been paid to the matter of ventilation. All the expense of the papering, painting, and re-plastering was borne by the company. Gas has been introduced; and the walls hung with a profusion of pictures,—all manifesting good taste in the selection and arrangement. Everything is neat, light and airy, there being nothing gaudy or objectionable in any respect to offend the most fastidious taste. Altogether it is a most pleasant place for a quiet meeting in which to transact the business of the company, or for the more lively social dance in which their lady friends participate. Two of the pictures, by the way, we noticed by the card attached were presented by the ladies.

Possibly other companies have done as well in this respect; if so, our citizens need not confine their commendations of the Fire Department to the labors of its members in times of danger; for this disposition to improve and beautify their places of meeting speaks loudly for the good taste and cultivation of those concerned.

No. 2 is now having a new uniform made by Mr. J. Woodman Moses,—which will be completed in season for them to appear in it at their Annual Ball on Thanksgiving eve.

SUNDAY EVENING LECTURES.—Rev. A. J. Patterson proposes to deliver at the Universalist Church, a course of Sunday evening lectures, embracing the following subjects, viz.: The Home; the Saloon; the Prison; the Work Shop; the Printing Office; the Masonic Lodge, or Social and Benevolent Associations; the School House; the Church; the Flag and the Cross.

The first lecture of the course will be delivered next Sunday evening at 7 o'clock. Subject—The Home.

☞ The official list of casualties in Co. G, 10th N. H. regiment, at the battle near Fair Oaks, Oct. 27, includes the following names not previously reported:—Corp. Horace H. Adams, wounded; Corp. Henry L. Adlington, missing. The latter was before reported as wounded.

☞ The resignation of Mark F. Wentworth, Colonel of the 32d Maine, has been accepted.

☞ Do not fail to read Mr. F. H. BLECKER'S Notice, headed "$10 a Day."

— A miniature telegraph office, designed for a present to the Emperor of Russia, has been prepared by an artisan in New York. It consists of complete telegraph apparatus, all embraced within the compass of a morocco case eight inches in length, six inches in width, and three and a half inches in depth.

THE WORLD MOVES.—Lexington, Ky., situate in the heart of the large and rich slaveholding region of the State, the county seat of her largest slaveholding county, voted for Abraham Lincoln, the man who stands upon a platform which pledges him to remove slavery from the land. Will not a fact like this induce those Northern conservatives who are still in favor of sparing slavery, to "orient" themselves anew?

—— The first Wednesday of January has been selected as the time to hold the State Convention for nominating a candidate for Governor by the Union men of the State.

— The N. Y. Times says a villainous scheme for the capture of the steamers on the Pacific coast by a gang of pirates, who concerted the plot at Havana under instructions from Mallory, the rebel Secretary of the navy, has been frustrated.

— A meeting of Union men in Brooklyn L. I., telegraphed to the President at 12 o'clock election night, the gratifying returns from various sections of the country, and in a few minutes the answer came flashing back: "Sing 'Old Hundred.'"

— A man was recently drafted in Jackson Township, Indiana, who was also drawn in another township. It is ascertained that he had served two years in the army, and had been dead six months. He is probably exempt.

— A California paper before the election had an editorial headed, "look out for tal lying," whereupon a second advised the editor to "keep the admonition at the head of his columns, that his readers might not be too much astonished." Queer people, those California knights of the quill.

— The Herald says that the James Mill, Newburyport, dividend for November is 20 per cent., which make 35 per cent. for the year 1864. In the few years last past, it has paid 181 per cent.; or on its capital stock of $250,000, it has paid the stockholders in that time $422,000. In addition to this is a large reserve fund, which is enough added to its dividends to make double its capital.

— The much-boasted English iron-clad Warrior has been taken into Portsmouth harbor to be dismantled, having ceased to be an effective vessel of war. The London Morning Post says she was built at an enormous cost, is almost new, and has never up to the present done any service which could not have been just as well performed by the oldest tub in her Majesty's dockyards. They will try to tinker her into some degree of efficiency.

No vocabulary can furnish language sufficiently strong in commendation of that excellent and indispensable article known as the J. Monroe Taylor Gold Medal Soap. The lady having aught to do in any household department, from the wash tub to the finest needle work, should not fail to supply herself with a year's stock. It only requires a person to use it once to use it their whole life. Most of the grocers sell it. 29

He is the happiest who does most to make others happy. The inventor of Herrick Allen's Gold Medal Saleratus must be the happiest man in existence, for we hazard nothing in saying that the use of the Gold Medal Saleratus cannot fail to make a happy household. Our better half says she does not fear of our ever frowning, as long as she can get the genuine Herrick Allen's. We say success to the inventor, and if everybody knew how good it is, no other would be used. A good many of our Merchants have it. Their depot is 112 Liberty Street, New York.

☞ Special attention is asked to Hunnewell's preparations, advertised on our inside columns. They are based on true medical laws, used very largely by Physicians, and most undoubted testimonials are in the hands of the proprietor, always open to inspection. Let Portsmouth and its vicinity bear testimony by a confidence to test them, which will be sacred.

Notice.

All persons are hereby forbid trusting any one on my account, as I shall pay no bill contracted after this date without my written order.

SAVE YOUR FUEL!

THE MODEL COOK.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

The subscriber has reduced the prices of the Model Cook Stoves FIVE DOLLARS each, to conform to the decline in gold.

Morning Chronicle.

"Papa, didn't you whip me once for biting little Tommy?" "Yes, my child; you hurt him much." "Well, then, papa, you ought to whip sister's music master, too. He bit sister yesterday afternoon, right on the mouth; and I know it hurt her, because she put her arms around his neck and tried to choke him."

Mr. Reynolds, the dramatist, once met a free and easy actor, who told him that he had passed three festive days at the seat of the Marquis and Marchioness of——, without an invitation. He had gone there on the assumption that, as my lord and lady were not on speaking terms, each would suppose that the other had asked him and so it turned out.

— An apology for the absence of a distinguished guest at the Winslow banquet, Boston, it is said was given in the following lucid manner: The Chairman of the Naval Committee, who intended to be present, is prevented from being here by something which kept him away."

Houses and Lands.

Desirable Estate on Middle Street
FOR SALE.
The new and convenient DWELLING HOUSE, No. 45 Middle street, recently erected by Mr. JOHN CASWELL, is offered for sale. The house has just been built of the best materials, in a most careful and perfect manner. The situation is high and dry; the cellar built of Biddeford granite, being one of the very best in the city. The house possesses many advantages. Situate on one of the most pleasant avenues in the city, with a fine prospect from either side of the dwelling, amid pure and healthy surroundings, the location is one seldom found in the market.

The ROOMS are conveniently arranged, the stories being of good height, windows of fine proportions, and all the finish of the kind found in a first-class house.

THE MAGEE
COOKING STOVE.

The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the
CELEBRATED AND UNEQUALLED
"MAGEE COOK STOVE,
as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. The oven plates are covered with plaster, which renders it equal to the old-fashioned brick oven for perfection in baking.

There is a new style and very superior broiler and heat iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the extension top there is a large copper Reservoir for hot water; also a large tin warming closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.

The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shoveling up of the ashes is entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.

For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.

We would refer to the following purchasers:

"MAGEE'S PATENT"
VENTILATING & AIR-WARMING
FURNACES.
The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.

For economy, purity of air and ease of management it has no equal, producing a current of warm air, mild and agreeable—and at none of the air which comes in contact with the fire-pot is used for respiration, the tendency to produce headaches so much complained of in other furnaces, is entirely obviated.

The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.

To accomplish this many complicated and expensive heating arrangements have been constructed, some possessing but little improvement over former methods, while others have proved a total failure. The reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the
MAGEE FURNACE.
The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of cold air through the fire-pot, which ignites them as they pass through the coal, thus saving at least 20 per cent. of the properties of the heat in the fuel.

No heating apparatus with the smoke-pipe or flue on the top of the dome can be made to consume the gases of the coal, as they pass off with a large amount of the heat generated, making the chimney a source of great wastefulness.

This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.

These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.

For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.

They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of the best Furnace in the world,—and would refer them to the following named gentlemen, who have them now in use:

Samuel Cleaves, Esq.,	Albert R. Hatch, Esq.,
Aaron H. Hill,	Charles H. Mendum,
Henry F. Wendell,	John Sise, and others.

DR. W. R. MERWIN & CO.'S COLUMN
FOR THE
CHEROKEE MEDICINES.
Cherokee Cure, the great Indian Medicine,

An unfailing cure for Spermatorrhœa, Seminal Weakness, Nocturnal Emissions, and all diseases caused by self-pollution; such as Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Trembling, Wakefulness, Eruptions on the Face, Pale Countenance, Insanity, Consumption, and all the direful complaints caused by departing from the path of nature.

☞ This medicine is a simple vegetable extract and one on which all can rely, as it has been used in our practice for many years, and with thousands treated it has not failed in a single instance. Its curative powers have been sufficient to gain victory over the most stubborn cases.

☞ To those who have trifled with their constitution, until they think themselves beyond the reach of medical aid, we would say, *Despair not!* the CHEROKEE CURE will restore you to health and vigor, and after all quack doctors have failed!

☞ For full particulars, get a circular from any drug store in the country, or write the proprietors, who will mail free to any one desiring the same, a full treatment in pamphlet form.

☞ Price, $2 per bottle or three bottles for $5, and forwarded by express to all parts of the world.

Sold by all respectable druggists everywhere.

CHEROKEE REMEDY
—AND—
CHEROKEE INJECTION,
Compounded from Roots, Barks & Leaves

CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys, Stone in the Bladder, Strictures, Gravel, Gleet, Gonorrhœa, and is especially recommended in those cases of Fluor Albus or Whites in females where all the old nauseous medicines have failed.

It is prepared in a highly concentrated form, the dose only being from one to two tablespoonfuls three times per day.

It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all of its original purity and vigor; thus removing from the system all pernicious causes which have induced disease.

CHEROKEE INJECTION is intended as an ally or assistant to the CHEROKEE REMEDY, and should be used in conjunction with that medicine in all cases of GONORRHŒA, GLEET, Fluor Albus or Whites. Its effects are *healing, soothing and demulcent;* removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the *cheap quack injections.*

☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to full vigor and strength.

For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.

Price—CHEROKEE REMEDY $2 per bottle or three bottles for $5.

CHEROKEE PILLS!

Health Preserver!!
CERTAIN AND SAFE.

They cure or obviate those numerous diseases that spring from irregularity, by removing the irregularity itself.

They cure Suppressed, Excessive and Painful Menstruation.

They cure Green Sickness (Chlorosis).

They cure Nervous and Spinal Affections, pains in the back and lower parts of the body, Dizziness, Fatigue on slight exertion, Palpitation of the Heart, Lowness of Spirits, Hysteria, Sick Headache, Giddiness, &c., &c. In a word, by removing the irregularity, they remove the cause and with it ALL the effects that spring from it.

Composed of simple vegetable extracts, they contain nothing deleterious to any constitution, however delicate, their function being to substitute strength for weakness, which, when properly used, they never fail to do.

They may be safely used at any age and at any period, *except during the first three months,* during which the unfortunate failure of their action would infallibly *prevent* pregnancy.

All letters seeking information or advice will be promptly, freely and discreetly answered.

Full directions accompany each box.

☞ Price $1 per box, or six boxes for $5.

Sent by mail, postage free, on receipt of price.

DR. WRIGHT'S
REJUVENATING ELIXIR.
OR ESSENCE OF LIFE.
Prepared from Pure Vegetable Extracts,
Containing nothing injurious to the most delicate.

"As the Phœnix rises from the ashes of its fire, animated with new life,"—so does this Elixir rejuvenate the system and overcome DISEASE.

The Rejuvenating Elixir is the result of modern discoveries in the Vegetable kingdom; being an entirely new and abstract method of cure, irrespective of all the old and worn-out systems.

This medicine restores to many tired and robust health the poor debilitated, worn-down and despairing devotee of sensual pleasure.

The listless enervated youth, the over-tasked man of business, the victim of nervous depression, the individual suffering from general debility, or from weakness of a single organ, will all find immediate and permanent relief by the use of this Elixir or Essence of Life.

☞ Price, $2 per bottle, or three bottles for $5, and forwarded by express, on receipt of money, to any address.

Sold by all druggists everywhere.

SUCCESS.

Success to thee, SHERMAN, a nation is praying
With fervent devotions for you,
And hands are now busy in weaving to crown you,
The garlands of victory new;
The eyes of the Northland in fond expectation
Are gazing intently on thee,
And thousands are wishing with heartfelt emotion,
Success to thine army and thee.

Success to thy heroes, thy battle-scarred heroes,
And their banners of "Red, White and Blue;"
May the goddess of victory smile now upon them,
And bare their standards anew.
From the bars of their prisons, half-dying with hunger,
Our boys are now praying for thee,
And hearts that were feeble are madly exultant,
At the advent of freedom and thee.

HOW TO KEEP A COW.—How to keep a cow economically is a problem that many a family in the suburbs of all cities would be glad to solve. It must be done in connection with a garden. It is idle to think of pasturage. That is a waste of manure, and for the garden that is worth a considerable portion of the cash necessary to pay out for forage. If you have half an acre of ground you can keep a cow and grow all the vegetables you need by purchasing two tuns of hay, or its equivalent, in a year. Indeed, we are not sure but you may get through with one, which is only half the allowance of the Winter months. But you may gain the other by growing Indian corn as a second crop after all early vegetables, and with that you may have rye growing at the same time, which will give feed early in the Spring which may be cut in time to plant several other crops. Four square rods of corn, planted in close drills, just as early as possible, upon well manured ground, will give green food by the time the rye is gone. The stubble turned under gives a fair coat of manure. The corn will also be followed by another crop, not of corn, but some kind of vegetables for use or sale. For instance, cucumbers for pickles, and with these, sown about the 10th of August, a crop of white turnips, and with the turnips rye, for soiling and manure.

If you intend to make the garden in great part support a cow, keep no pig. Teach the cow to eat all the slops and garbage of the kitchen. Don't waste a leaf of cabbage beets, carrots, parsnips, celery, nor any other green thing. Every pea and bean pod and vine, and every potato or turnip paring, and every green corn husk and cob, and even green potato tops, will be eaten with avidity by the cow in the stable. And in the stable you must keep her all the time. You need not fear any unhealthiness if you keep it cleanly. Let the floor be earth and use fresh earth every day for bedding, and every day you will gain a pile of rich manure. With careful economy you will be surprised to see what a cow will learn to eat, and how cheaply you can keep a cow and a garden. Try it.— *N. Y. Tribune.*

SUCCESS OF A SHIPMASTER.—Capt. Gorham F. Bassett arrived at Boston, Wednesday, from Singapore, having completed with this trip his twenty-second voyage to the East Indies, as master. In all these voyages he has never (says the Journal) lost a spar which he could not replace from the ship, nor called upon the underwriters for a cent. He has always acted as supercargo as well as master, and has brought to that port over $10,000,000 worth of merchandise purchased by himself. He has never made a longer passage than 119 days, and has made the trip from the East Indies in 80 days. Capt. Bassett is about forty-five years of age. It would be difficult to find a parallel for such remarkable success in long and dangerous voyages.

VERNATELLA.
Warranted to make the Soles of Boots and Shoes water and dampness proof, and wear one-third longer.
VERNATELLA
Is a preparation from Copper, having no grease, linseed oil, or anything of the kind, and when the soles are once saturated with it, water can no more get through them than through copper itself. **Price 25 Cents Per Bottle,**
at retail everywhere.
But its cost to the purchaser is really nothing, as it makes soles wear enough longer to more than pay for it, leaving as a net gain the making of them Water and Dampness Proof, and the preservation thereby of that priceless gem, the health.

☞ LADIES, READ THIS! ☜
SAVE YOUR HEALTH.
Use Vernatella on the Soles of Your Shoes. It makes them as water proof and thereby protects your feet from dampness, for the ground is always more or less moist, either from rain or the morning and evening dew.

American and Foreign Patents.
R. H. EDDY,
SOLICITOR OF PATENTS,
Late Agent of U. S. Patent Office, Washington, (under the Act of 1837.)
76 State street, opposite Kilby street,
Boston.

After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.

The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere The Testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional service so moderate.

The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.

These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.

All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.

TESTIMONIALS.

"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.

"I have no hesitation in assuring inventors that they cannot employ a person *more competent* and *trustworthy*, and more capable of putting their applications in form to secure for them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents

Mr. R. H Eddy has made for me THIRTEEN applications, on all but ONE of which patents have been granted, and that is *now pending*. Such unmistakable proof of great talent and ability on his part leads me to recommend *all* inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."
JOHN TAGGART.

During eight months, the subscriber, in course of his large practice, made on *three* rejected applications SIXTEEN APPEALS, EVERY ONE of whom was decided in *his favor*, by the Commissioner of Patents.

The Old Established Hospital.
No. 5 Beaver Street, Albany, N. Y.
QUICK CURES AND LOW PRICES.
Over Twenty Thousand Patients Cured Annually!

DR. J. TELLER continues to be confidentially and successfully consulted on all forms of private diseases, at his old Established Hospital, No. 5 Beaver Street, Albany, N. Y. Twenty years devoted to this one particular branch of practice, enables him to perform cures such as no other Physician can, and his facilities are such (living in correspondence with the most eminent Physicians of the Old World,) of obtaining the safest as well as the latest remedies for these diseases, offer inducements to the unfortunate of a quick and rapid cure, to be obtained at no other office in America.

In Syphilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and Spermatic Cords Bubo, Ulcerated Throat and Nose, Tender Shin Bones, Cutaneous Eruptions, Blotches, Ulcers, Abscesses, and all other impurities of the system, are perfectly under the control of the Doctor's Medicines, and have been tested in more than 20,000 cases annually, with immense Success.

YOUNG MEN.

Young Men addicted to secret habits, who have impaired their vigor and destroyed the vigor of their minds, thus depriving themselves of the pleasure of the Married Life, are notified that in consulting Dr. J. Teller, they will find a safe counselor and a Physician who has cured thousands, in almost every part of the United States, who applied to Dr. T. broken down in health, and rejoice in all that makes life desirable and man happy. The reader is of course aware that the delicacy of this subject will prevent a more minute description of this terrible disease.

DR. TELLER'S GREAT WORK.

A book for everybody.—Startling disclosures Dr. Teller's great work for the Married or those contemplating marriage—200 pages with full plates—price 25 cts Sent to all parts, under seal, by mail, post paid. 50,000 copies sold the past year. This work should be read by the Married Young. A lecture on Love, or how to choose a Partner—a complete work on Midwifery, it contains hundreds of secrets, never before published.—Warranted to be worth three times the amount asked for it. 25 cents, in specie or postage stamps, inclosed, will secure a copy by return mail. Dr Teller has devoted a lifetime to the cure of those diseases upon which his books treat.

TO THE LADIES.

Dr. TELLER still remains the only Agency in America, for the sale of Dr. Vichois Italian Female Monthly Pills. The sale of more than 20,000 boxes establishes their reputation as a female remedy, unprocured, and far in advance of every other medicine—for stoppages, irregularities, and other obstructions in females.

Caution.—Married ladies in certain delicate situations should avoid their use. For reasons see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent, by mail or express, to any part of the world, secure from curiosity or damage.

Office hours from 8 A. M. to 8 P. M., and on Sundays from 2 to 5 P. M.

N. B.—Persons at a distance can be cured at home by addressing a letter to Dr. J. Teller, enclosing a remittance. Medicines securely packed from observation, sent to any part of the world. All cases warranted. No charge for advice.—N. B.—No students or boys employed. Notice this, address all letters to

MONDAY, NOVEMBER 21ST, 1864.

WAIT, PATIENTLY.—The Manchester Union has a singular editorial, from which we make these extracts:

Wait!—This is all that Democrats have to do just now, in a political sense. It is not possible that we have been wrong, yet we are defeated. Day by day, it will become apparent to *all* that a terrible mistake has been committed by the re-election of Mr. Lincoln; and before any State votes again, thousands will wish to make the *best* amends the condition will allow. *Alas!* for the country, the mistake is *fatal*; but for the Democratic party, it is *the* best thing that could have happened.

We cannot say with *certainty*, whether the editor or writer of the above intended to tell the truth *or* a falsehood. If falsehood were intended, it is a decided success; for the millions of Union citizens in our land deem *it* the exact *opposite* of the truth.

It he meant it for truth, it contains some strange assertions and *fatal* admissions. The claim that a party is so wise and righteous that it cannot *possibly* be wrong, would be a remarkable assumption in any view; but when made by the party of Vallandigham and the Woods, including the New York rioters, guilty of arson, murder and treason, it is absurd and preposterous.

This, however, must be forgiven, to any one who is sufficiently ignorant or vain to urge such a claim.

Not so the fatal admission. Look at it: "The election of Mr. Lincoln is *fatal* to the country"—i. e. it destroys it:—"but the *best* thing for the Democratic party." Here is an admission or assertion that the party is to rise by means of the country's ruin.

And if the item means to tell the truth, will any one tell us why the democratic *party* voted against Mr. Lincoln at all? Why should *they* if his election is their salvation? Why was it that the infallibly wise democratic party,—that "cannot possibly be wrong," should have paid so much money, and labored so hard, and maintained so many papers to lie and libel against the President and the freemen? when by doing nothing the same result might have been reached.

But seriously, such pretences are false. The advocates and allies of the slave power and the rebels, have failed, as they deserved to fail. The *advice* of the piece however, is excellent, for the party to wait. The item closes thus:—

We have now only to *wait* for the success which much labor has failed to achieve.

It would be a fine thing for the country if they would wait—a long time—patiently, as good citizens, and not as aids of the rebellion. U. T.

☞ A few days since the U. S. Provost Marshal at St. Louis received an anonymous letter stating that a conspiracy was in progress to assassinate Generals Rosecrans, McNeil and other officials, and that the leaders could be found at the residence of Mr. George H. Grover, No. 18 Clark avenue. The United States police proceeded to the place named, and arrested George R. Moore, a clerk; Dr. C. F. Mercer, a refugee from southeast Missouri; S. Gilkerson, and McDowell and Freeman, the two latter clerks in the British Consul's office; also three female members of the family. After being examined before the Provost Marshal, part of the prisoners were released on bond, and the others were sent to the military prison.

PRIZE MONEY.—From the 1st of June, 1863, to the present time, a period of between fifteen and sixteen months, U. S. Marshal Keyes has paid over to the U. S. Treasurer, as the proceeds of captured blockade runners, adjudicated at Boston, over five million dollars. In these prize cases the expenses were very small, thus materially increasing the amount to be distributed. In one case a single blockade runner netted, with the cargo, upwards of three hundred thousand dollars.

☞ Sec. Seward, being serenaded in Washington, after election, made a speech, closing with the following paragraph:

I advise you to go and see the Secretary of the Treasury and the Secretary of War, and keep them in good humor, for if the Secretary of the Treasury should fail us we might "come to grief," and if the Secretary of War should continue as indisposed as he has been for a few days, I should be seriously apprehensive as to what should become of us. You cannot do better than also to call and stir up my excellent compatriot, Gideon Welles, and tell him, if it is possible for him to open the port of Wilmington, I shall be thereby assisted in the care of foreign relations.

☞ Perley writes from Washington a little item, too good to be lost:

One of our wealthy citizens, who has in his day made a good deal of money by transactions with Uncle Sam, conceived the patriotic idea of inviting the three ex-Presidents—Peirce, Fillmore, and Buchanan—to attend the inauguration of McClellan, on the 4th of March next. He has even had three spacious bed-rooms newly furnished for his illustrious guests, but as he cannot treat them to the entertainment at which they were expected to assist, they will probably not appear.

THE REBELLION.

New Orleans correspondence says our forces have been withdrawn from the post on the Atchafalaya river, not being needed there any longer.

The Raleigh Confederate announces the evacuation of Washington, N. C., and its occupation by the Federals; also the safe arrival of the Tallahassee at Wilmington.

Great excitement again prevails at Memphis in consequence of reports that Beauregard is marching again with a large force from Corinth.

Gen. Burnside has taken command of the 9th corps.

The Washington Republican states that the rebel forces under Ewell and Early have retreated in haste up the Shenandoah Valley, hotly pursued by Sheridan. It is the opinion of officers in. Sheridan's army that Ewell would leave a force at Lynchburg just sufficient to guard the head of the Valley, and send his main force to aid Bragg in repelling the anticipated advance of Sherman.

The N. Y. Herald's Hilton Head correspondence of the 15th says a report had just come down the river that Sherman was marching on Savannah, and that the inhabitants of that city were fleeing in dismay.

The Charleston papers say the Yankees are mounting a new gun, reported to be of the Ames (seven mile) pattern, at Battery Wagner. The city is shelled every night.

Lee is said to be sending some of his soldiers to oppose Sherman.

Rome, Ga., has been abandoned by our troops, after the buildings useful to the rebels had been destroyed. The rebels report Hood to be in position to march into Middle or West Tennessee. Gen. Gillem has been defeated by a superior force under Breckinridge, near Bull's Gap, and lost 400 men taken prisoners. The rebels claim that they also captured 10 stands of colors, 6 guns with caissons and horses complete, 30 loaded wagons, and medical supplies.

The following batch of facts and guesses was received

By Telegraph—Sunday noon.

From the Shenandoah Valley we have confirmatory intelligence of the retreat of Early's forces. They commenced breaking camp at Fisher's Hill on Monday last and fell back in the direction of Staunton. It is not known positively that they retreated down to Lynchburg. Mosby's gang has had several fights with detachments of our forces near Winchester. The citizens of Upper Maryland are arming themselves to prevent the burning of Hagerstown by these guerrillas, who have threatened to lay waste that section of country in retaliation for the destruction of property in the Valley.

It is stated that a draft of a proclamation, offering a full pardon to all rebels, except Davis and sundry other leaders, upon condition that they return to their allegiance to the Union without making any claims whatever, either as relates to Slavery or to the future movements of the authorities at Washington, till the re-organization of their State governments,—has been forwarded by Pres. Lincoln to certain prominent men in New York. It was received on Saturday, and is under discussion.

There are vague rumors in New York that another pirate has been operating near our coast. Several gunboats were hastily sent to sea on Saturday afternoon and evening, to protect the New Orleans and California steamers which sailed on that day.

Considerable credence is accorded in New York to the statement made by the Washington Intelligencer that the President will send peace commissioners to Richmond. It is reported that the Brazilian minister has demanded the release of the pirate Florida, and that a protest from New York merchants against such release has been forwarded to Washington.

The N. Y. Commercial's dispatch says: 'Gen. Sherman has fooled the rebels by making them think he is going to Mobile. There are many indications that he has gone to Millen, at the junction of the railroad leading from Augusta, and towards Savannah."

Passengers from City Point say that active operations may be expected at any moment. The rebels refused on Saturday to exchange papers.

A special dispatch from Washington says the President has sent for Gen. Grant to hold a consultation.

— Those who send apples to the soldiers should not send those eatable now, for they go to a warmer climate, heat during the passage, and will not be worth the freight when they reach their destination. Nothing but winter apples should be sent.

— In the foreign news, a few days since, was reported the loss of the steamship Jura, which on the 3rd inst. ran aground and went to pieces in the Mersey river. She belonged to that unfortunate "Montreal Ocean Steamship Company," and makes the ninth total wreck of steamers belonging to them since 1857.

— New batteries of artillery have been sent to Early from Richmond; one report says twenty-seven guns. They were marked "Lieut. Gen. Early." Some wag wrote over this, "Maj. Gen Phil. Sheridan, care of—" very much to the indignation of the rebel commander.

THE UNPRECEDENTED POPULARITY

Which has attended the introduction of our brands of

CALIFORNIA WINES

Is a flattering tribute to their purity and fine qualities.

THE STATE FAIR

At Indianapolis, where our Wines came into competition with all the best WESTERN WINES, have just awarded us a *SILVER MEDAL.*

At the OHIO STATE FAIR we took *Five Premiums* out of six.

Surgeon General Dale, after a careful and searching chemical analysis of our wines, pronounces them PURE.

The leading portion of the American Press have extolled their merits; and the unanimous verdict of those who use them is, that

They are the Best.

HALE'S
Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the means of all. At last after a long course of chemical experiments, he found that by adding to these *five* other ingredients, each one valuable in itself, he not only obtained the desired results but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the general public as a safe, pleasant and infallible remedy.

PRICE, 50 CENTS PER BOTTLE.

For sale by B. Hutchings, Portsmouth, and all Druggists.

"A Wonderful Discovery."

DR. TEBBETS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "DYE," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new HAIR in all cases on BALD HEADS, when the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "HAIRGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With it every "GRAY HEAD" in New England can be restored in less than sixty days.

THACHER, opposite the Post Office and 12 Market Square, Agent for Portsmouth.—Geo. C. Goodwin, No. 38 Hanover street, Boston, Wholesale Agent for New England, and sold by Druggists everywhere. TEBBETS BROTHERS, Druggists and Chemists, Proprietors, Manchester, N. H. Jel—tf

THE PORTSMOUTH POETS.—This collection of Poems by Portsmouth writers, to be published by Messrs. Walker, Wise & Co., Boston, is passing rapidly through the press, and is already in a good state of forwardness. Messrs. A. M. Payson and Albert Laighton, the editors, have devoted much time to the compilation and arrangement of the materials for the book; and the result will be, we doubt not, a work in which all "the Sons," whether now residing here or in other places, can take a deep and personal interest. Judging from some of the proof-sheets, which we have had an opportunity to glance at, the book will be issued in a style entirely satisfactory to the subscribers, while its intrinsic merits will be by no means slight. We anticipate that it will be found very creditable to our city, and that those whose attention has not previously been attracted to the matter, will be surprised that so many fine poems,—some of them oft-quoted and long familiar,—have been written by our Portsmouth Poets. Subscriptions for the work are still received, and those who have not already put down their names would do well to attend to it at once, if they wish to be sure of copies.

THE UNION CONVENTIONS in this, the 1st, N. H. district, are to be held as follows: Congressional, at the City Hall, Dover, on Wednesday, Dec. 21, at 11 A. M; Councillor, at the Town Hall, Exeter, on Tuesday, Jan. 17, at 12 M.; Senatorial, at the Court House, Portsmouth, on Wednesday, Jan. 18, at 11 A. M.; County, at the Town Hall, Exeter, on Tuesday, Jan. 17, at 11 A. M.

☞ We learn that Hon. Charles H. Peaslee is the Democratic candidate for Mayor of this city.

Messrs. Bidwell & Pike present the ever-popular play of Ingomar at the Temple to-night. They are having good houses, as has been the case throughout their stay in this city.

NEW HAMPSHIRE ITEMS.

The Keene Republican says they have a foot of snow on the ground.

—— The "Concord Savings Bank" is closing its business, and will distribute the funds among the depositors.

—— The young men of Lebanon have organized a Home Guard. The arms are to be purchased by the citizens.

—— The Keene Sentinel gives a rumor that two companies are about to open the lead vein in Surry mountain.

—— John C. Wilson has been appointed Assistant State Agent at Washington for New Hampshire.

—— The Savings Bank at Walpole was robbed on Friday night of $10,400 in U S. Bonds, and $2,800 in Cheshire railroad bonds.

—— Rev. A. J. Canfield, for the last three years pastor of the Universalist Society in Concord, has received a call from the Fourth Street Universalist Society of Brooklyn, N. Y.

—— A Natchez letter notes the arrival there of exchanged prisoners from Red River, including a number of the 8th New Hampshire Regiment, which is stationed at Natchez. Their comrades gave them a warm reception.

—— The Lebanon Free Press says: The town of Grantham probably contains more old men in proportion to its population, than any other town in the State. There are 174 names on the check list; three are 99 years of age; five are from 80 to 90, and 15 are from 60 to 70. These all voted at the recent election with two exceptions. The average of the twenty-three who are above 70, is over 77 1-2.

—— The Boston Advertiser's Washington dispatch states that all New Hampshire soldiers, in the field, hospital or elsewhere, are to have a dinner on Thanksgiving Day at the expense of the State. As the time is so short for preparation, parties in Washington suggested that a dinner be given on Christmas, but Governor Gilmore tersely telegraphed—"Thanksgiving Day is better," and accordingly measures were at once taken to furnish it on that day.

—— In New Ipswich on Sunday evening, Nov. 6th, the Congregational Chapel, a small building, occupied by the church for evening meetings, valued at $400, was burned. No insurance. On Monday, Nov. 7th, a barn in the same town, owned by John Preston, Esq., was burnt. The barn contained hay to the amount of $75, one hog worth $25, and five or six cords of hard wood. Whole loss estimated at $550. No insurance. The engine, owing to the hose being stopped up by some designing person, could not be used without considerable delay.

—Says a New Orleans correspondent: "Campbell's slave pen is now a rebel prison. 'Get in dar ye'self,' said a colored woman, as she saw the rebel prisoners filing into the old pen. 'Use to put us in dar. Get dar ye'self, now. De Lord's comin,' sure.'"

A THRILLING SCENE AT THE DEPOT.—Conductor Fleming's train, Monday, brought from the north a distinguished passenger, the veritable "fat woman" who was one of the attractions at Barnum's museum in New York. As she weighs over 600 pounds she rode in the baggage car. After the arrival of the train in this city, a platform, carpeted so that she shouldn't slip, was placed from the side door of the car, and her ladyship invited to descend. But just at the critical moment when she had fairly stepped upon the platform, the fireman on the engine, not knowing the situation, began to back the train, and—"what a fall was there!" The gallant efforts of Mr. Fleming and his two or three assistants were well meant but futile. If she had been a pretty woman of the ordinary size, of course it would have been proper for the conductor to receive her gracefully in his arms—but the thought of it in this case! The active exertions employed did not save her from falling, but did prevent her from rolling under the train, of which catastrophe she was at one moment in imminent danger. So the fat woman still lives.—*Springfield Republican.*

HEAVY REVENUE STAMP.—A mortgage deed was left at the Registry office in Portland on Friday, on which were U. S. Revenue Stamps to the amount of *fifteen hundred dollars*. It was the morigage of the Atlantic & St. Lawrence Railroad, to secure the payment of the company's bonds of April 1st, 1851, which, by a vote of the Stockholders at the last annual meeting, have been renewed. The renewed bonds, for which this mortgage is given, amount to £100,000 sterling, and are dated Oct. 1st, 1864, payable at the office of the company in London in five years from date, or at the election of the Company at any time thereafter, not exceeding twenty years from this date, with interest at the rate of three per cent. half yearly. This mortgage is subject to the prior mortgage given to the city of Portland. The trustees named in this mortgage are Hon. John B. Brown, of Portland, and Charles J Brydges and Joseph Hickson, Esqs., of Montreal.—*Portland Press.*

Gen. Butler is the hero of the day. His administration at New York, during the election, has done more for his fame than a victory in the field. He entered the city covered with the curses of those who sought his blood, and had sworn that he should never go up Broadway alive. He maintained the peace of the city by his silent influence, when riot would have been a terrible disaster; and when he left, he had won the good will of all parties, and his departure was marked by a splendid ovation at which ten thousand persons of the first character, were present; and he was allowed to foretell the benignant and merciful policy of the administration, which now seeks peace and a stay to bloodshed, while all said—"Butler, God bless him." His career has really been glorious among the cities. He saved Annapolis; he captured Baltimore; he took New Orleans, and did more for it, as even the rebels admit, than any man ever did before: he governed Norfolk, when it was a nest of traitors—vipers hissing in their wrath; and now he places the name of New York on his banner. There is no wonder that his friends should talk of him as "our Butler."—*Newburyport Herald.*

—It is proposed to have a celebration in Washington on Fore-fathers' Day under the auspices of the Massachusetts Association. Senator Sumner has been invited to deliver an address.

No vocabulary can furnish language sufficiently strong in commendation of that excellent and indispensable article known as the J. Monroe Taylor Gold Medal Soap. The lady having aught to do in any household department, from the wash tub to the finest needle work, should not fail to supply herself with a year's stock. It only requires a person to use it once to use it their whole life. Most of the grocers sell it. 29

He is the happiest who does most to make others happy. The inventor of Herrick Allen's Gold Medal Saleratus must be the happiest man in existence, for we hazard nothing in saying that the use of the Gold Medal Saleratus cannot fail to make a happy household. Our better half says she does not fear of our ever frowning, so long as she can get the genuine Herrick Allen's. We say success to the inventor, and if everybody knew how good it is, no other would be used. A good many of our Merchants have it. Their depot is 112 Liberty Street, New York.

☞ Special attention is asked to Hunnewell's preparations, advertised on our inside columns. They are based on true medical laws, used very largely by Physicians, and most undoubted testimonials are in the hands of the proprietor, always open to inspection. Let Portsmouth and its vicinity bear testimony by a confidence to test them, which will be sacred.

THE MODEL COOK.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

The subscriber has reduced the prices of the Model Cook Stoves FIVE DOLLARS each, to conform to the decline in gold.

From the Portsmouth Journal.

OUR FARM.

In common with many others we have an interest in some acres on the west side of this City, and in company with some friends, we visited our Farm this week, to see the harvest home, and the surroundings.

The City Farm, which is an important matter, for the Mayor's care, as well as for that of the Superintendant, appears to have been well looked after and well conducted the last year, and now presents a rich return of products. There has been raised about 160 tons of hay,—enough for the stock of the farm, and many tons to spare. There are in the stalls as handsome a collection of neat stock as any barn in this vicinity can exhibit. Five yoke of oxen, nine cows, and some young cattle, are there all in good condition.

Connected with the barn and well protected from the cold, is the capacious vegetable room. Here are several tons of the best squashes, and large bins of carrots ruta-bagas mangel-wurtzels, turnips, beets, &c., as well as a cord or two of cabbages. In all about 20 tons. In the corn house, the long yellow traces of perfect ears was equal to any gold display when that article was within possession. But the rise in gold has placed a value of a thousand dollars on the 500 bushels of corn this year stored. In this room the full bins of other grain and beans show that there will be no lack. The product of fruit was not large this year. A neat cider-mill enables them to put the refuse apples all to use. In another room, the tobacco leaf and chickory roots were hung up to dry. The tobacco serves for use in the house, and saves an expense of $50 for this article. About forty hogs and pigs promise many barrels of good pork for future use.

In the house are now eighty-two inmates—this is below the usual average at this season of the year. The cleanliness that marks every part of the house, and the contentment that generally rests upon the countenances of the inmates, show that the Superintendant, Mr. Norton, and his good wife, well understand and perform their duties.

In the last two years, about 800 feet of good stone wall has been built on the southside of the farm, on Woodbury street. The work has been wholly done by the farm workmen. Woodbury street has been widened to 60 feet, and decidely improved.

In former years, the wood for out-door pensioners has been carried to the Farm to be sawed, occloning much trouble and expense. The wood, of which about 200 cords are annually used by the city, is now stored in the rear of the Court House, and is there sawed by the city, when the horses and teamsters are not needed for out work. This is a decided improvement on the old system, for which the Mayor and Overseers should have due credit.

Monsieur Dubois.—One of the most pleasant gentlemen of the day is this good hearted Frenchman, who is now laboring in aid of the Seaman's Fair, and after it closes to aid in the Seaman's interest in another important department. The Monsieur, on his way to Portsmouth this week, was seated in the cars behind two politicians, who discussed the topics of the day, with more warmth than depth. Turning around one said, "I suppose, sir, you don't understand what we are talking about." "Oh, no," he replied, "do you?"

M. Dubois proposes to give a lecture in the Temple, in this city, on the last evening in November, 30th. The Boston Transcript says: "He is as unrivalled in lecturing as he is in conversation; full to overflowing of ready wit, and facetious illustration, and bound to make an audience feel as happy as he evidently always does. In the excess of his good humor, he sometimes calls himself a polar bear, alluding to the grizzly character of his beard, but instead of being a bear he is quite a lion wherever he is known. No more original character has recently visited Boston as a lecturer."

MARKET STREET,

THE MAGEE COOKING STOVE.

The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the

CELEBRATED AND UNEQUALLED

MAGEE COOK STOVE,

as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. The oven plates are covered with plaster, which renders it equal to the old-fashioned brick oven for perfection in baking.

There is a new style and very superior broiler and sad-iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the extension top there is a large copper Reservoir for hot water; also a large tin warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.

The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shovelling up of the ashes is entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.

For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.

We would refer to the following purchasers:

"MAGEE'S PATENT"

VENTILATING & AIR WARMING

FURNACES.

The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.

For economy, purity of air and ease of management it has no equal, producing a current of warm air, pleasant and agreeable—and as none of the air which comes in contact with the fire-pots is used for respiration, the tendency to produce headaches so much complained of in other furnaces, is entirely obviated.

The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.

To accomplish this many complicated and expensive heating arrangements have been constructed, some possessing but little improvement over former methods, while many have proved a total failure. The reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the

MAGEE FURNACE.

The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of cold air through the fire-pot, which ignites them as they pass off from the coal, thus saving at least 30 per cent. of the properties of the heat in the fuel.

No heating apparatus with the smoke-pipe or flue on the top of the cone can be made to consume the gases of the coal, as they pass off with a large amount of the heat generated, making the chimney the hottest part of your dwelling.

This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.

These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.

For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.

They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of the best Furnace in the world,—and would refer them to the following named gentlemen, who have these now in use:

Samuel Cleaves, Esq.,	Albert R. Hatch, Esq.,
Aaron H. Hill,	Charles H. Mendum,
Henry F. Wendell,	John Sise, and others.

DR. W. R. MERWIN & CO.'S COLUMN FOR THE

CHEROKEE MEDICINES.

Cherokee Cure, the great Indian Medicine,

COMPOUNDED FROM

ROOTS, BARKS AND LEAVES.

An unfailing cure for Spermatorrhœa, Seminal Weakness, Nocturnal Emissions, and all diseases caused by self-pollution; such as Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Trembling, Wakefulness, Eruptions on the Face, Pale Countenance, Insanity, Consumption, and all the direful complaints caused by departing from the path of nature.

☞ This medicine is a simple vegetable extract and one on which all can rely, as it has been used in our practice for many years, and with thousands treated it has not failed in a single instance. Its curative powers have been sufficient to gain victory over the most stubborn cases.

☞ To those who have trifled with their constitution, until they think themselves beyond the reach of medical aid, we would say, *Despair not*, the CHEROKEE CURE will restore you to health and vigor, and alter all quack doctors have failed!

☞ For full particulars, get a circular from any drug store in the country, or write the proprietors, who will mail free to any one desiring the same, a full treatment in pamphlet form.

☞ Prices, $2 per bottle or three bottles for $5, and forwarded by express to all parts of the world.

Sold by all respectable druggists everywhere.

CHEROKEE REMEDY

—AND—

CHEROKEE INJECTION,

Compounded from Roots, Barks & Leaves.

CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys, Stone in the Bladder, Strictures, Gravel, Gleet, Gonorrhœa, and is especially recommended in those cases of Fluor Albus (or Whites in females) where all the old nauseous medicines have failed.

It is prepared in a highly concentrated form, the dose only being from one to two tablespoonfuls three times per day.

It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all of its original purity and vigor; thus removing from the system all pernicious causes which have induced disease.

CHEROKEE INJECTION is intended as an ally or assistant to the CHEROKEE REMEDY, and should be used in conjunction with that medicine in all cases of Gonorrhœa, Gleet, Fluor Albus or Whites—its effects are healing, soothing and demulcent; removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the *cheap quack injections.*

☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to full vigor and strength.

For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.

Price—CHEROKEE REMEDY, $2 per bottle or three bottles for $5.

THE COFFEE BEAN.—Efforts are to be made to introduce the culture of the coffee bean into the Connecticut Valley—a product said to be the best substitute for coffee yet discovered. A man in Berkshire county, Mass., has the seed, and it is believed that the article can be as profitably produced as tobacco. There is no question but that coffee will grow in that latitude, but the point is the flavor. Tea grows in Pennsylvania, but it is very poor tea; tobacco grows in Connecticut, but it is Connecticut tobacco, not Havana. Coffee grown in Massachusetts will doubtless be a substitute for the genuine article.

FEEDING POTATO TOPS.—An old correspondent of the Maine Farmer, says—"I stock my tops, when pulled green, in the same manner that I do my beans, and when sufficiently dry to save, remove them to the barn as winter feed for stock; considering them worth something more than their weight of potatoes or turnips, by giving them one, two or three fodderings per week. I know of no vegetable substance they will eat more readily, and I think it healthy for them also fed.

The editor of the Belfast Journal has got into trouble for some ungallant remarks, about a strong minded woman being seen in the streets in bloomers. In the words of the poet,

"Barney, let the gals alone."

we admonish him, and commend him to the teachings of the elder Weller: "Sammy, beware of the vimmen."—*Gardiner Journal.*

Mr. Camp became enthusiastic, and holding out his brawny hands, cried out exultingly:

"What does that look like?"

"That," interposed Mr. Ames, with a peculiar sniff, "that looks as though you were out of soap."

ALL IS NOT GOLD THAT GLITTERS.—A gentleman, who came on the Boston train yesterday, informs us that a splendidly dressed lady, all smiles and fancy ringlets, got into the cars, and taking a seat near him, spread her flounces profusely, nearly covering him. She was chatty, pretty, and well perfumed. At the first station she left, and soon after he discovered that his pocket had been cut open, and a pocket-book containing $3 had been abstracted.—*Portland Adv.*

This is the style in which the fair ones in some parts of Yorkshire convey the hint to backward swains. "Why don't you get married?" said a young lady the other day to a bachelor friend, who was down there on a visit. "I've been trying for the last ten years to find some one who would be silly enough to have me," was the reply. Then you haven't been down our way," was the insinuating rejoinder.

American and Foreign Patents.
R. H. EDDY,
SOLICITOR OF PATENTS,
Late Agent of U. S. Patent Office, Washington, (under the Act of 1837.)
76 State street, opposite Kilby street,
Boston.
After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with dispatch. Research made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.
The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The Testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional service so moderate.
The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.
These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.
All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.
TESTIMONIALS.
"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.
"I have no hesitation in assuring inventors that they cannot employ a person *more competent and trustworthy*, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents
Mr. R. H. Eddy has made for me THIRTEEN applications, on all but ONE of which patents have been granted, and that is now *pending*. Such unmistakeable proof of great talent and ability on his part leads me to recommend *all* inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."
JOHN TAGGART.
During eight months, the subscriber, in course of his large practice, made on *twice* rejected applications SIXTEEN APPEALS, EVERY ONE of them was decided in *his favor*, by the Commissioner of Patents.

The Old Established Hospital.
No. 5 Beaver Street, Albany, N. Y.
QUICK CURES AND LOW PRICES.
Over Twenty Thousand Patients Cured Annually!
DR. J. TELLER continues to be confidentially and successfully consulted on all forms of private diseases, at his old Established Hospital, No. 5 Beaver Street, Albany, N. Y. Twenty years devoted to this one particular branch of practice, enables him to perform cures such as no other Physician can, and his facilities are such (being in correspondence with the most eminent Physicians of the Old World,) of obtaining the safest as well as the latest remedies for these diseases, offer inducements to the unfortunate of a quick and rapid cure, to be obtained at no other office in America.
In Syphilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and Spermatic Cords, Bubo, Ulcerated Throat, Sore Nose, Tender Shin Bones, Cutaneous Eruptions, Biles, Ulcers, Abscesses, and all other diseases of the system, are perfectly under the control of the Doctor's Medicines, and have been tested in more than 20,000 cases annually, with immense Success.
YOUNG MEN.
Young Men addicted to secret habits, who have impaired their healths and destroyed the vigor of their minds, thus depriving themselves of the pleasure of the Married Life, are notified that in consulting Dr. J. Teller, they will find a friend to counsel and a physician who has succored thousands, in almost every part of the United States, who applied to Dr. T. broken down in health, now spotless in blood, manhood made desirable and man happy. The readers of this are aware that the delicacy of this subject will prevent a more minute description of this terrible disease.
DR. TELLER'S GREAT WORK.
A book for everybody.—Startling disclosures. Dr. TELLER's great work for the Married or those contemplating marriage—200 pages—full of plates—price $2, sent to all parts, sealed and free by mail, post paid. 50,000 copies sold the past year. The single Married and the Married Happy. A treatise on the nature, how to choose a Partner—a complete work on Midwifery. It contains hundreds of secrets, never before published.—Warranted to be worth three times the amount asked for it. 25 cents, in specie or postage stamps, inclosed, will secure a copy by return mail. Dr TELLER has devoted a lifetime to the cure of those diseases upon which his books treat.
TO THE LADIES.
DR. TELLER still remains the only Agency in America, for the sale of Dr. Valois's Italian Female Monthly Pills. The sale of more than 20,000 boxes establishes their reputation as a female remedy, unapproached, and far in advance of every other medicine—for stoppages, irregularities, and other obstructions in females.
CAUTION.—Married ladies in certain delicate situations should avoid using their use. For reasons see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent, by mail or express, to any part of the world, secure from curiosity or damage.
Office hours from 9 A. M. to 8 P. M., and on Sundays from 9 to 5 P. M.
N. B.—Persons at a distance can be cured at home by addressing a letter to Dr. J. Teller, enclosing a remittance. Medicines securely packed from observation, sent to any part of the world. All cases warranted. No charge for advice.—N. B.—No students or boys employed. Notice this, address all letters to

JOY AND THANKSGIVING.

"Truly God is good to Israel, even to such as are of a clean heart." So sung the Hebrew Psalmist two thousand years ago and more; and those persons who have the clean heart and the single eye, can see this truth and rejoice in it to-day. In the midst of "a great fight of afflictions" which our nation brought upon itself by a course of wickedness such as God never suffers to go unpunished,—we are made glad through the display of the Divine Goodness in a fruitful season crowned with a favorable and competent harvest; in our past success and present strength in the field and on the ocean; and last but not least, in the result of the election, which shows where the National Heart is.

This result is not a mere defeat of one party by the superior numbers of another,—but something vastly better and greater: it is the voice of good men of all former parties, uniting to sustain their Union, Constitution and Government in the hour of peril,—and in due time to improve them all, by rooting up all such noxious plants as injure man and dishonor his Maker. It is a favorable answer to the united prayer of millions of christian people of all denominations; and in its strength and quietness is a great blessing.

The re-election of a plain honest man, without the slightest amount of favor with aristocrats or snobs, is a gratifying circumstance. Libellous scribblers had called him hard names, "tyrant, despot, ape, smutty joker:" all false, though some dupes swallowed the trash. Joker he is, but never smutty; nothing that could soil the character or wound the conscience, has been reported of him. But the great body of the people discarned long ago that he is an honest man: and that element, with good common sense, fair executive ability, and a reliant spirit, carried him ahead of the local candidates, so that his election is a sweep of the country. East, West, North, all have confidence in Abraham Lincoln; and so the fact is again made apparent to the American people that honesty is an element of greater power than capacity. This discovery ought not to be forgotten in future elections. With an abler man the Republicans might have utterly failed. Much as the masses of mankind respect great talents, their chief homage is awarded to honest men.

How shall our joy and thankfulness be exhibited? Answer—on the day of National and State Thanksgiving let us go into the temples of worship, filling the churches with thankful songs, and loading the altars with gifts. Let all loyal men, who have the National Flag, and who rejoice in the National Life, display their colors at mast head on that day, (if fair)—and so encourage one another and the public, by the outer show, while the families make merry within.

But most important of all are the every day duties,—of showing our sympathy with the bereaved, whose loved ones have fallen in their effort to save our land from ruin;—of showing admiration of their deeds by our kindness to those they leave behind;—and of showing our love of country, by doing what in us lies toward reforming its morals and its institutions, and so promoting its permanent prosperity. U. T.

FROM JAPAN.—Official advices of Oct. 18th from Yokohama confirm the report of the opening of the Inland Sea of Japan by the Allied fleet, after a brief engagement. The Allies lost 12 killed and 54 wounded, and the Japanese from 200 to 300 killed and wounded. The steamer Sea King, chartered by Minister Pruyn to accompany the fleet to represent the United States, did good execution with her 32-pounder Parrott gun. She was afterwards sold to the Japanese Government for $108,000. The indemnity to Americans is expected to reach $200,000. The Commissioners of the Allies were to meet the Japanese officials at Kanagawa, Oct. 19th, to adjust the amounts of indemnities to the various nations. The forts are to be dismantled. It is believed that the Japanese Government will henceforth be able to keep the unruly Nobles in check.

A SHORT HONEYMOON.—In the Goderich; C. W., Police Court, on Thursday, James Gifford, of Colborne, was placed at the bar, charged by his wife, of 16 years of age, with having assaulted her, by striking her in the face with his fists. The parties had been married not quite a month. Gifford's complaint of his wife was that she would not talk enough to him, and, before they were a week married, he kicked her out of the bed, and otherwise ill-used her. The Mayor fined Gifford $5 and costs, and ordered him to keep the peace for one year.

— Lieut. Leger Greenfield, who was captured at Chicago for attempting to release rebel prisoners there, is a British officer, and was on John Morgan's staff during one of his robbing raids.

☞ The National Sailors' Fair, at the Boston Theatre, is announced to positively close to-night. Admission is only fifty cents this evening. A large number of fine paintings and other articles are to be sold at auction there to-day. Everybody ought to visit that Fair. The total net proceeds are expected to count up $200,000 or so. We did hope the result would net a quarter of a million; and we think it would, but for the bad weather. We shall give a detailed report of the Portsmouth table, in a day or two.

The mammoth Ox, Gen. Grant, at the Fair, is a most magnificent specimen of the bovine—worth going twice as far as Boston to see. He is of the purest white, every hair of him; and "perfect in every form and feature." Weight 4000 pounds, height 6 feet 6 inches, length to root of tail 13 feet, girth 11 feet, age 8 years. He is up for raffle for $2000,—400 shares at $5; and the Boston butchers offer $1000 for his carcase, and the Museum $500 for his snowy hide. But he is too young and handsome to be slaughtered; and we hope somebody may draw him who will allow the public to enjoy a sight of him a little longer. We know *one* man who won't let him be made beef, if he gets him.

THE VISION. — On the 29th of June last an adventurous gentleman set sail from N. York in a small boat, hardly big enough for navigation of the North river in all weathers, proposing to cross the Atlantic. The New York papers generally made quite a sensation out of the event, as though the foolish undertaking was quite commendable. We condemned it, because such foolishness if successful at first, leads to still more reckless adventures, until some lamentable sacrifice of life warns men of their danger. Nearly five months have elapsed, and nothing has been heard of the "Vision," which has probably gone to the bottom of the Atlantic, with all on board — two men and a dog. If men have a relish for danger, there are plenty of ways that are legitimate, honorable, and useful, in which there is peril enough to satisfy the most reckless. Newspapers do wrong to encourage such foolish and unprofitable adventures.—*Syracuse Courier.*

PORTS OPENED.—The ports of Norfolk, Virginia, and Fernandina and Pensacola, Florida, having for some time past been in the military possession of the United States, it is deemed advisable that they should be opened to domestic and foreign commerce. Therefore the President of the United States has issued a proclamation that the blockade of those ports shall so far cease from the first day of December next, that commercial intercourse with them, except as to persons and things and information contraband of war, may from that time be carried on subject to the laws and agreeable to regulations.

☞ John Bright, the great English liberal, in a recent letter, upon the Presidential contest in this country, says:

I believe that the effect of Mr. Lincoln's re-election, in England and in Europe, and indeed throughout the world, will be this: it will convince all men that the integrity of your great country will be preserved, and it will show that republican institutions, with an instructed and patriotic people, can bear a nation safely and steadily through the most desperate perils.

WOULD LOSE FIFTY THOUSAND DOLLARS.—If a military officer puts in an application for a furlough on the simple ground of urgent private business, he is about as likely to get it as he is of being struck by lightning. A Maine officer applied for one, however, stating that if it was not granted he should lose $50,000. This attracted attention at headquarters, and the officer was desired to forward a statement of how he would lose it. He did so to the effect that he had been in the army without leave of absence for two years; that he was engaged to a young lady worth $50,000; that there was another fellow after her, and that she had written to him that if he did not come home and marry her right away, she would have the other man. He got his furlough. *Portland Argus.*

— As an illustration of the facility with which fraudulent voting is done in New York, it is stated that the small, compact Fourteenth Ward, which has hardly seen a new house in the last twenty years, polled a third more votes in the recent election than ever before. It polled more votes for McClellan alone than it had names on its registries on the morning of election. Yet the Democracy, not satisfied with their present opportunities, are clamoring for more voting places to facilitate the work of voting early and *often.*

SEARCHING FOR BURIED TREASURE.—We understand that during the past ten days quite a number of our young men (some say twenty-one in all,) have been engaged in making a vigorous search for gold, supposed to have been buried by pirates on the shore at Mispeck, near this city. The money is said to have been deposited there in boxes, and is of enormous value. Some of the diggers gave up, disgusted with their want of success, but others continued at work as actively as ever, believing that they are almost in sight of the coveted treasure.—*St. John Telegraph.*

— A letter from the Army of the Potomac, dated the 15th inst., says the increasing influx of deserters and refugees seems to be the main subject of interest now in the army. Women and children, as well as men, are coming over daily.

— It is reported that Gen. McClellan is about to visit Europe.

THE REBELLION.

A letter from the fleet off Charleston says: "Recently the steamer Pontiac, sighting a blockade runner, slipped her cable and gave chase without effect. Returning subsequently to get her anchor, the rebels opened on her, either from Fort Marshall or Beach Inlet, to which she paid no attention until a ten-inch shell struck her on the forecastle, killing and wounding a number of men, 7 of whom died on the instant."

The loss of Gen. Gillem's forces in the recent encounter with Breckinridge is estimated at 400 wounded and missing. Gillem is safe at Knoxville.

In East Tennessee, rebels attacked our forces at Strawberry Plains, 18 miles above Knoxville, in force, Friday morning at daylight. The fighting continued at intervals all day. The rebels were repulsed in every attack.

In the New York papers of Monday, a statement is printed to the effect that Sherman's army left Atlanta in two columns, one on the 9th and the other on the 12th, moving eastward, the former via Macon, and the other directly towards Augusta. The first column was heard from on the 14th, and had then advanced 70 miles on the road toward Macon, driving everything before it, and destroying everything as it went.

Gen. Sherman had his headquarters on Monday last week at Kingston, with the 14th corps. He had issued an order telling the troops that they were about to pass through a country heretofore unoccupied by either army, and they were expected to subsist on the country, taking all the mules and horses within their reach. The 14th corps was the rear guard of Sherman's army, and moved from Kingston on Sunday last week.

From Gen. Grant's army, the N. Y. Herald's correspondence says the rebels attacked our picket lines Thursday and Friday twice between the James and Appomattox rivers. In the first attack the rebels captured four officers and eighty privates, but they were soon driven back. The next attack was more feeble.

The World's dispatch from Sheridan's army contradicts the report that Early has abandoned the valley. He is still at Newmarket and Mount Jackson. It is reported that Capt. Brasher with sixty men had a fight with Mosby on the 18th inst., and got whipped. No particulars.

Our Gen. Canby died at New Orleans Nov. 12.

On Monday night Hood's entire army, including Forrest's cavalry, were in the immediate neighborhood of Tuscumbia and Florence, Ala., watched by the troops under Gen. Thomas.

— The National Intelligencer did not say the President was about to send peace commissioners to Richmond, as reported in a dispatch on Saturday. On the contrary, it expressed the opinion that no such proposition has yet been seriously contemplated by the President.

NEW HAMPSHIRE ITEMS.

—— The Union celebration at Nashua, Thursday evening, Nov. 17, though brilliant was attended by one of those sad accidents which so frequently accompany similar demonstrations and turn an occasion of rejoicing into one of sorrow and regret. While a salute of a hundred guns was being fired, a premature discharge occurred at the 41st round, severely and perhaps fatally injuring two of those in charge of the gun, and slightly wounding another, viz. Frederick J. Hughes and Andrew W. Sprague and Edward A. Smith. Hughes was mangled in both arms, one which has been amputated, and in his side and face, losing one eye! His wounds are thought to be fatal. Sprague received a wound in his left arm, had his hand fractured, and his face mutilated, destroying one eye. His recovery is doubtful. Mr. Sprague has a small family. The iron ramrod discharged from the gun struck a house fifty rods distant, but did no damage.

—— In regard to the disappearance of Rev. J. Hall from Manchester, the Concord Monitor has been credibly informed by a gentleman who has investigated the case, that the cause of his disappearance was *solely* on account of financial troubles. It gives us pleasure to believe and record this statement.

—— The robbers of the Walpole Bank broke into the house of Mr. B. F. Aldrich, the Treasurer, and stole the keys to the safe from the pockets of his pantaloons, after which they had easy access to the Bank. It is thought that they used chloroform. It is thought that the loss will be saved by stopping payment of the Bonds stolen, as the numbers have already been found of all but about $2700. The amount stolen was over $40,000.

A GOOD MONTH'S WORK FOR OCTOBER.—The Rochester Courier says E. C. Kinnear, of Farmington, manufactured 12,000 pairs of shoes valued at $17,000, upon which there was a tax of $871.20.

☞ The Rochester Courier gives as prominent candidates for Congress in this District, John D. Lyman of Farmington, Jacob H. Ela of Rochester, and S. M. Wheeler and John E. Bickford of Dover.

GOLD, in Boston, Monday, varied from 221 3-4 to 218 1-4.

Hail to the chief who kept the helm
When darkness filled the sky!
True to the nation's chart he stood,
With hopes still fixed on high!—
The ship is safe! the port is near!
And though the sails are rent,
Millions of hearts devoutly cry,
God bless the President!

FACTS FOR THE PEOPLE.—It is a well-established fact that no preparation has ever been placed before the public that, as a remedial agent for the safe and speedy cure of Coughs, Colds, Croup, Influenza, Hoarseness, Tickling in the Throat, Soreness of the Chest and Lungs, and the relief of Consumptive Cough, is equal to *Coe's Cough Balsam.* Although not known in the Western States until the fall of 1863, over 300,000 bottles of it were sold and used by the people—its immense popularity being the result of its undoubted merit. The proprietors, Messrs. C. G. Clark & Co., of New Haven, Ct., who are among the most reliable of the Eastern Drug Houses, have offered to any man who would produce an article that would cure any Lung and Throat Affections as quick as Coe's Cough Balsam, a reward of $100, and are without any taker, although the offer has been made public over two years. The bottle compares favorably in size with any of the 65 cent preparations, and its strength is second to none, making it not only the best, but the cheapest remedy in the world. We have the united testimony of such houses as Lord & Smith; Feller, Finch & Fuller; Burnham & Van Schaack; J. H. Read & Co., and H. Scovill, all heavy druggists in the city of Chicago, together with the assurance of wholesale and retail druggists in all points of the Northwest, that they are selling more of this preparation, and that it gives greater satisfaction than any other Cough Balsam now extant. No family should be without it: it is within the reach of all, the price being only 40 cents. In time of health provide for disease.—*Chicago Tribune.* n5dawlm

HALE'S

Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the means of all. At last, after a long course of chemical experiments, he found that by adding to these *five* other ingredients, each one valuable in itself, he not only obtained the desired results but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the general public as a safe, pleasant and infallible remedy.

PRICE, 50 CENTS PER BOTTLE.

For sale by B. Hutchings, Portsmouth, and all Druggists.

"A Wonderful Discovery."

DR. TEBBETTS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "DYE," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new HAIR in all cases on BALD HEADS, when the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With it every "GRAY HEAD" in New England can be restored in less than sixty days.

THACHER, opposite the Post Office and 12 Market Square, Agent for Portsmouth.—Geo. C. Goodwin, No. 38 Hanover street, Boston, Wholesale Agent for New England, and sold by Druggists everywhere. TEBBETTS BROTHERS, Druggists and Chemists, Proprietors, Manchester, N. H. Jel—tf

☞ Our readers will probably remember the City Election, this day;—and act accordingly.

NEWCASTLE UNION CELEBRATION.

Messrs Editors.— In the absence of the editorial corps of the Chronicle, I will inform you of the manner in which our New Castle friends celebrated the glorious triumph of the Union party at the recent election. I venture to say that never was a happier crowd assembled in the Town Hall than was present on Friday evening last. The Hall was beautifully and tastefully decorated with flags and appropriate mottoes. Tables were spread, upon which was placed everything that could be desired. The ladies, ever ready to respond, left nothing wanting. Such turkeys, such chickens, such *everything*, would have astonished any one not acquainted with, or not knowing the generous nature and strong *Union* sentiments of the good ladies of New Castle. To such a bountifully-spread table we all sat down, and partook of the viands with a relish that only victors can appreciate.

After the repast came the "feast of reason and the flow of the soul." — The President, Elias Holbrook, Esq., introduced Hon. W. H. Y. Hackett, who spoke briefly of the great battle which had been fought and won, treating the subject of our national troubles in that logical manner which his long practice at the bar has rendered almost a second nature.

Rev. Mr. Waterhouse followed, with an eloquent allusion to the prospects which lie before us as a nation, trusting that another presidential election would find us a new people, with the great cause of all our troubles eradicated and effectually destroyed.

Mr. Joseph P. Morse, was the next speaker. He congratulated his audience upon the auspicious result of the election, and was heartily applauded during his remarks.

He was followed by Rev. Mr. Patterson, who, in view of the manner in which the citizens of New Castle celebrated the event, was almost inclined to wish that a presidential election came as often as once a year. He alluded to the glorious achievements of our army and navy, paying a high tribute to the gallantry and valor of the soldiers and sailors in this great contest. He predicted for our country a new career of usefulness, glory, and power. His remarks were replete with humor, and were most enthusiastically received.

Lieutenant J. E. Johnson eloquently responded to the compliments of the preceeding speaker, in behalf of the army. In closing his remarks, he exhorted all to stand or fall with the Union; believing, however, that our country would *not* fall; that our young republic would be more than saved; redeemed from oppression; renewed in spirit, and bright with the shining lustre of our well-tried faith. Then would the golden horn of plenty be filled anew, the smiling arts of peace return, and Liberty and Education once again and evermore walk side by side and hand in hand. He trusted that our friends upon the tented field might return to us in safety, and that the Ship of State would outride this simoon of rebellion and continue her voyage upon an unruffled sea; with a loyal crew and the flag of our Union nailed to her mast.

Alfred M. Hoyt, Esq., being called for, responded with the following sentiment, — "Abraham Lincoln: By his reelection to the presidency, he adds another star of the first magnitude to an already brilliant constellation of names, embracing those of Washington, Jefferson, Madison, Monroe and Jackson."

Mr. C. L. Tidd of Portsmouth was vociferously called for, but as he facetiously remarked he "couldn't see it in that light."

A young man who was present, being repeatedly called for, was prevented by extreme modesty, from making any extended remarks."

Oliver Jones, Esq., of Raymond being present, in reply to repeated calls arose, and remarked, that he sympathised warmly with the object of the meeting, and would not have the people of New Castle suppose that he was unappreciative of the bountiful repast of which he had just partaken. "The opposition," he remarked, "might extenuate the matter to any time more suitable than now, *but* he could give them to understand, indefatigably, that the great principles contended for, multiplied subterraneously by the ulterior results to be deduced therefrom, could no more shake the American people in their integrity, than could the roar of Niagara confisticate about these walls, or the bowl of a mid night tempest conflagerate a marble statue into ice, through a never-ending eternity." [Tremendous applause.]

The speaking was followed by the performance of several patriotic and well selected airs, by the Fort Constitution band, who had kindly volunteered their services for the occasion. Those who "trip the light fantastic" remained till the approach of daylight, when they separated for their several homes, all highly pleased with the result of the election and its celebration in New Castle. **

NAMES OF STREETS.— *Messrs. Editors:* Would it not be well now that the political contest is over, to turn our attention to affairs more local, and see if there are not some improvements that can be made in our City, without going to any considerable expense. It seems we have a multiplicity of streets, or rather a multiplicity of names for one street; for instance we have Daniel, Congress and Islington Streets, Islington and Greenland roads, to Greenland; it being one continuous line, and known by five different names; so of others of our thoroughfares, it being almost impossible to know when one street ends and when another commences. The remedy for this is to alter their names, and I would propose to call them by their proper names, that is *Avenues*. Streets are mere crossings from one avenue to another. And as Market Street is the only avenue leading into the State of Maine, it might very properly be called Maine Avenue. Another commencing at Vaughan Street and extending to the line of Newington might be called North Avenue. One beginning at Navy Yard Landing and extending to the Plains might be First Avenue. State Street then of course would be Second Avenue. Commencing with Court Street and running to the line of Greenland would be the Third Avenue. Commencing at South Mill Bridge and extending to the Plains would be the Fourth Avenue; and that leading from Market Square to New Castle Bridge might be called the South Avenue. This list includes all the avenues leading from the city; and by adopting the above suggestions we should have but seven names, whereas now we have sixteen or eighteen. The expense attending the alterations would be merely repainting the signs and renumbering the buildings. That the change would be attended by any serious evils, or the cause of any inconvenience to the public I cannot think, for the thing has been practiced to some extent, and we have not heard of any complaint. The last instance that comes to my mind was the changing the name of Auburn Street to Richards Avenue, a merited tribute of respect to one who was so instrumental in beautifying that much frequented thoroughfare; and that the present name may remain as a monument to his memory, is no doubt the wish of all the good people of
PORTSMOUTH.

☞ Among the articles raffled at the Sailors' Fair, we are glad to notice that Mr. Henry C. Barnabee, formerly of this city, and who has rendered such good service to the cause, in the amateur theatricals, and is always ready to aid, with his valuable musical and dramatic ability, in any such good work, drew a splendid piano-forte, of Hallet & Cumston's make, worth $700,—for which there were 350 tickets, at $2 each.

Mr. W. S. Walker, of this city, is also reported as drawing two pictures, worth $30.

☞ Recruiting has begun again in this District, in anticipation of another call for troops. Several towns have already put in quite a number of volunteers, and the business is getting to be brisk again. This is all right—for whether another special call be made or not, while we have a war on our hands, it would be one of the most absurd things in the world to stop recruiting men for its success.

☞ Mr. George P. Edgerly, of Farmington, formerly a clerk in the Provost Marshal's office in this city, died at his home in Farmington on the 15th inst., aged 24 years. He was buried with Masonic honors. He was highly esteemed wherever known.

No vocabulary can furnish language sufficiently strong in commendation of that excellent and indispensable article known as the J. Monroe Taylor Gold Medal Soap. The lady having aught to do in any household department, from the wash tub to the finest needle work, should not fail to supply herself with a year's stock. It only requires a person to use it once to use it their whole life. Most of the grocers sell it. 29

He is the happiest who does most to make others happy. The inventor of Herrick Allen's Gold Medal Saleratus must be the happiest man in existence, for we hazard nothing in saying that the use of the Gold Medal Saleratus cannot fail to make a happy household. Our better half says she does not fear of our ever frowning, as long as she can get the genuine Herrick Allen's. We say success to the inventor, and if everybody knew how good it is, no other would be used. A good many of our Merchants have it. Their depot is 112 Liberty Street, New York.

☞ Special attention is asked to Hunnewell's preparations, advertised on our inside columns. They are based on true medical laws, used very largely by Physicians, and most undoubted testimonials are in the hands of the proprietor, always open to inspection. Let Portsmouth and its vicinity bear testimony by a confidence to test them, which will be sacred.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

— A parsimonious sea captain answering the complaints of his man that the bread was bad, exclaimed, "What! complain of your bread that is made from flour? What do you think of the Apostles? They eat 'shew bread' made from old boots and shoes."

— One of the curiosities of our mode of electing President is this—that a change of 25,000 votes in those States giving Lincoln the smallest majorities would have elected McClellan, though Lincoln would still have had a popular majority of a quarter of a million.

— A colored barber at Pictou is noted for his skill in tonsorial science and ready wit. When the rebel Gen. Preston presented his chivalric chin for Seth's manipulations, he remarked that he supposed he had not often the honor of shaving a Southern gentleman. "Yes sah," said the contraband, ebery morning." "How is that?" said the General. "I always gets de fus shave!" was the ready answer.

— A young lady advertises in the Cleveland Plaindealer for a young man to act as an amanuensis. He must be able to write in cipher, and when not engaged he will be expected to read poetry with feeling, converse with ease, and be able to play cribbage and backgammon. He must expect to be kissed when she is pleased, and cuffed when she is not; but, as her temper is as known to be good, there will be more kissing than cuffing.

GOLDEN SHEAF WHISKEY.

C. A. RICHARDS,
99 WASHINGTON STREET,
Boston,
Would most respectfully invite the attention and examination of all Grocers, Druggists, Apothecaries and Private Individuals, desiring to sell or USE STRICTLY PURE

Liquors, Wines, Cordials or Bitters,
to the list of choice goods enumerated below, which are constantly on hand in large quantities in his Large and Spacious
Wine Store and Bottling Establishment,
99 Washington street, Boston.

First on the list, as a reliable pure stimulant, stands the celebrated and widely-known

Golden Sheaf Bourbon Whiskey,
made from Wheat, Rye and Corn, warranted for five years old. Put up in unique dark style, bottle in a paper box, in cases of one dozen each, the large and increasing sales of which convince the proprietor that no extraordinary advertisement is needed to extol its real merits. It will recommend itself on trial.

Golden Sheaf Cordial.
A delightful and healthful beverage, aromatic, with a rich ginger cordial, made from the pure Golden Sheaf Bourbon.

Golden Sheaf Bitters.
The best Tonic Bitter ever offered to the public. Mingled with the rich flavor of the Bourbon are a number of other ingredients for restoring the appetite and imparting life and vigor to the whole system.

Golden Sheaf Punch.
Made from fresh, ripe lemons, and other articles, combined as a whole inimitable.

Bourbon Whiskey Punch.

All the above put up full strength of the whiskey, and in cases of one dozen each. These articles improve by age, and no exposure of climate can affect them.

JOHN AND ROBERT DUNSTER'S
CELEBRATED
LONDON DOCK
SPIRITS AND WINES,
Imported solely by C. A. R., in wood, from the London Docks, and bottled by him in America. The distinguished and world-wide reputation of these articles has induced the subscriber to seek and obtain the Sole Agency in this country.—They are sold only in Bottles, *entirely pure, and without adulteration*, and comprise the four kinds, as follows:
LONDON DOCK GIN,
LONDON DOCK BRANDY,
LONDON DOCK SHERRY,
LONDON DOCK PORT.
All in cases of one dozen each, in strong shipping order for immediate transportation, and are sold lower than any other liquors and wines in the market of equal quality.

Pure California Wines.
The large demand for the pure wines of California has made it a fixed fact that no well selected stock of Wines is complete without them. C. A. R. has made arrangements for the entire production of
The Largest Vineyard in California!
and is now receiving and offers for sale, the finest CALIFORNIA WINES, comprising over twenty KINDS, of four qualities, in splendid style of labels, bottles and cases—such as
ANGELICA—Sweet.
PORT—Rich.
HOCK—Dry.
STILL CHAMPAGNE—Delicious.

Parties attracted by this advertisement, or who have already become acquainted with the qualities of these wines, can have samples sent by mail, or samples by express, when desired, by addressing the subscriber.

C. A. RICHARDS,
99 Washington street, - - - Boston.

NOTE.—C. A. Richards would also beg leave to state that the above are only a part of the list of articles for sale and imported by him. He has, in addition, one of the largest stocks to be met with of Fine Bottled Wines and Spirits, of every variety and kind, together with a fine assortment of Liquors and Wines in original packages, for sale by the cask or gallon. Also, Pickles, Sauces, Sardines, Pickles, Sauces and every kind of fancy groceries usually found in a first class wine store in this country or in Europe.
Orders are most respectfully solicited.

Ayer's Ague Cure,
For the speedy and certain cure of Intermittent Fever, or Fever and Ague, Remittent Fever, Chill Fever, Dumb Ague, Periodical Headache, or Bilious Headache, and Bilious Fever; indeed, for the whole class of diseases originating in biliary derangement, caused by the malaria of miasmatic countries.

FEVER AND AGUE is not the only consequence of the miasmatic poison. It strews every district, among the children of men, Neuralgia, Rheumatism, Gout, Headache, Blindness, Toothache, Earache, Catarrh, Asthma, Palpitation, Painful Affection of the Spleen, Hysterics. Pain in the Bowels, Colic, Paralysis, and Derangement of the Stomach, all of which, when originating in this cause, put on the *intermittent type*, or become periodical. This "Cure" expels the poison from the blood, and thus cures them all alike. It is not only the most efficiual remedy ever discovered for this class of complaints, but it is the cheapest, and, moreover, is perfectly safe. No harm can arise from its use, and the patient when cured is left as healthy as if he had never had the disease. Can this be said of any other cure for Chills and Fever? It is true of this, and its importance to those afflicted with the complaint cannot be over-estimated. Be sure to try it to cure the Fever and Ague, that it may be truthfully said to be a certain remedy. One Dealer complains that it is not a good medicine to sell, because one bottle cures a whole neighborhood.
Prepared by J. C. AYER & Co., Lowell, Mass., and sold by Brackett Hutchings, J. H. Thacher, W. H. Preston, David Kimball, and all druggists

THE MAGEE
COOKING STOVE.

The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the
CELEBRATED AND UNEQUALLED
MAGEE COOK STOVE,
as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. The oven plates are covered with plaster, which renders it equal to the old-fashioned brick oven for perfection in baking.
There is a new style and very superior broiler and ad-iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the extension top there is a large copper Reservoir for hot water; also a large tin warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.
The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shoveling up of the ashes is entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.
For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.
We would refer to the following purchasers:

"MAGEE'S PATENT"
VENTILATING & AIR-WARMING
FURNACES.
The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would also invite those remodelling or erecting buildings to examine this truly valuable invention.
For economy, purity of air and ease of management it has no equal, producing a current of warm air, moist and agreeable;—and as none of the air which comes in contact with the fire-pots is used for respiration, the tendency to produce headache so much complained of in other furnaces, is entirely obviated.
The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.
To accomplish this many complicated and expensive heating arrangements have been constructed, yet possessing but little improvement over former methods, while many have proved a total failure. The reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the
MAGEE FURNACE.
The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of cold air through the fire-pot, which ignites them as they pass off from the coal, thus saving at least 30 per cent. of the properties of the heat in the fuel.
No heating apparatus with the smoke-pipe or flue leaving the top of the dome can be made to consume the gases of the coal, as they pass off with a large amount of the heat generated, making the chimney the hottest part of your dwelling.
This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.
These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.
For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.
They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of the best Furnace in the world.—and would refer them to the following named gentlemen, who have them now in use:
Samuel Cleaves, Esq., Albert E. Hatch, Esq.,
Aaron H. Hill, Charles H. Mendum,
Henry F. Wendell, John Sise, and others.

DR. W. R. MERWIN & CO.'S COLUMN
FOR THE
CHEROKEE MEDICINES.
Cherokee Cure, the great Indian Medicine,

An unfailing cure for Spermatorrhea, Seminal Weakness, Nocturnal Emissions, and all diseases caused by self-pollution; such as Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Trembling, Wakefulness, Eruptions on the Face, Pale Countenance, Insanity, Consumption, and all the dreadful complaints caused by departing from the path of nature.
☞ This medicine is a simple vegetable extract and one on which all can rely, as it has been used in our practice for many years, and with thousands treated it has not failed in a single instance. Its curative powers have been sufficient to gain victory over the most stubborn disease.
☞ To those who have trifled with their constitution, until they think themselves beyond the reach of medical aid, we would say, *Despair not!* the CHEROKEE CURE will restore you to health and vigor, and after all quack doctors have failed!
☞ For full particulars, get a circular from any drug store in the country, or write the proprietors, who will mail free to any one desiring the same, a full treatment in pamphlet form.
☞ Price, $2 per bottle or three bottles for $5, and forwarded by express to all parts of the world.
Sold by all respectable druggists everywhere.

Glad News for the Unfortunate!
The Long Sought For Discovered at Last.
Cures in from one

to three days.
CHEROKEE REMEDY
—AND—
CHEROKEE INJECTION,
Compounded from Roots, Barks & Leaves.
CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys, Stone in the Bladder, Stricture, Gravel, Gleet, Gonorrhœa, and is especially recommended in those cases of Ulcer Albus or Whites in females, where all the old nauseous medicines have failed.
It is prepared in a highly concentrated form, the dose only being from one to two tablespoonfuls two times per day.
It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all of its original purity, and vigor; thus removing from the system all pernicious causes which have induced disease.
CHEROKEE INJECTION is intended as an ally or assistant to the CHEROKEE REMEDY, and should be used in conjunction with it at medicine in all cases of Gonorrhœa, Gleet, Fluor Albus or Whites. Its effects are *healing, cooling and detinulcent;* removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the *cheap quack injections.*
☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to full vigor and strength.
For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.
Price—CHEROKEE REMEDY, $2 per bottle or three bottles for $5.

DR. WRIGHT'S
REJUVENATING ELIXIR,
OR ESSENCE OF LIFE.
Prepared from Pure Vegetable Extracts,
Containing nothing injurious to the most delicate.

"As the Phœnix rises from the ashes of its fire, animated with new life,"—so does this Elixir rejuvenate the system and OVERCOME DISEASE.
The Rejuvenating Elixir is the result of modern discoveries in the Vegetable kingdom; being an entirely new and abstract method of cure, irrespective of all the old and worn-out systems.
This medicine restores to manly vigor and robust health the poor debilitated, worn-down and despairing devotee of sensual pleasure.
The listless enervated youth, the over-tasked man of business, the victim of nervous depression, the individual suffering from general debility, or from weakness of a single organ, will all find immediate and permanent relief by the use of this Elixir or Essence of Life.
☞ Price, $2 per bottle, or three bottles for $5, and forwarded by express, on receipt of money, to any address.

The Chronicle.

— In Philadelphia, on Sunday, a fire destroyed the Venetian blind factory of B. J. Williams, on 8th street, and damaged several other buildings. Total loss about $250,000; partially insured.—And on the same day was consecrated St. Paul's and St. Peter's Cathedral, with imposing ceremonies and show. More than 200 priests participated.

— A boy in England, for throwing stones at a peacock, has been sentenced to fourteen days' imprisonment with hard labor.

— A Mr. Rhinehart of South Coventry township, Chester county, Pa., purchased a condemned government horse recently, and discovering a wound or sore on its thigh, which showed no signs of healing, made an examination of the wound, and finding some hard substance in it, extracted it, and found it to be a lady's pocket knife, with the blade shut.

A gentleman, walking with two ladies, stepped on a hogshead hoop, that flew up and struck him in the face. "Mercy!" said he, "which of you dropped that?"

— Capt. Howard, presumptive heir to the Irish Earldom of Wicklow, died of intemperance lately and his life having been insured for half a million of dollars, several of the London offices have been heavily taxed. All of the policies were in the hands of creditors of the deceased for bona fide debts.

A grocer in a neighboring city says that a lady applied to him for a pound of *oblong* tea.

— The lacteal gland has a wide range, and many curious resources not generally known. Whoever has access to Carpenter's Physiology, may find in it a reliable account of a colored *man* in Baltimore who gave milk, and nursed a child several months.

— A part of the stone ruins recently found on the plains of Troy are to be used in rebuilding that part of Constantinople not long since destroyed by fire.

Punch has a cartoon representing an Irishman who has got the worst of it in a street fight. His better-half approaches the vanquished hero, when the following dialogue ensues:

Wife of his Bussum (to Vanquished Hero)—"Terrance, ye great Umadawn, what do yer git into this Thrubble for?

Vanquished Hero (to Wife of his Bussum)—"D'ye call it Thrubble, now? why, it is Engyement!"

— M. D. Conway, in a letter from England to the Boston Commonwealth, states that one hears more good parlor-voices in England than even in Italy.

A prominent bachelor politician on the Kennebec remarked to a lady that soap stone was excellent to keep the feet warm in bed. "Yes," said the young lady, who had been an attentive listener, "but some gentleman have an improvement on that which you know nothing about." The bachelor turned pale and maintained a wistful silence.—*Lewiston Journal.*

— Government detectives have recently taken some valuable prizes in the shape of sea going vessels engaged in contraband trade on the Chesapeake Bay, and the captains and crews made prisoners. Valuable information has also been gained.

Man travels to expand his ideas; but woman—judging from the number of boxes she invariably takes with her—travels only with the object of expanding her dresses.

— One of the good signs in English society is, that young ladies who sing at the piano, are beginning to prefer English ballads to the masses of meretricious music which has so long monopolized their fine voices.

VERNATELLA.
Warranted to make the Soles of Boots and Shoes water and dampness proof, and wear one-third longer.
VERNATELLA
Is a preparation from Copper, having no grease, linseed oil, or anything of the kind, and when the soles are once saturated with it, water can no more get through them than through copper itself. **Price 25 Cents Per Bottle,** at retail everywhere.
But its cost to the purchaser is really NOTHING, as it makes the soles wear enough longer to more than pay for it, leaving as a net gain the making of them Water and Dampness Proof, and the preservation thereby of that priceless gem, the health.
☞ LADIES, READ THIS! ☜
SAVE YOUR HEALTH.
Use Vernatella on the Soles of your Shoes. It makes them water proof and thereby protects your feet from dampness, for the ground is always more or less moist, either from rain or the morning and evening dew.

SOLICITOR OF PATENTS,
Late Agent of U. S. Patent Office, Washington, (under the Act of 1837.)
76 State street, opposite Kilby street,
Boston.
After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.
The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The Testimonials below give proof that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SECURING THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional service so moderate.
The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.
These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.
All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.
TESTIMONIALS.
"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.
"I have no hesitation in assuring inventors that they cannot employ a person *more competent and trustworthy*, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents.
Mr. R. H. Eddy has made for me THIRTEEN applications, on all but one of which patents have been granted, and that is *now pending*. Such unmistakeable proof of great talent and ability on his part leads me to recommend *all* inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges." JOHN TAYLOR.
During eight months, the subscriber, in course of his large practice, made on *twice* rejected applications SIXTEEN APPEALS, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents. R. H. EDDY.

DR. J. TELLER continues to be confidentially and successfully consulted on all forms of private diseases, at his old Established Hospital, No. 5 Beaver Street, Albany, N. Y. Twenty years devoted to this one particular branch of practice, enables him to perform cures such as no other Physician can, and the facilities he enjoys in science in correspondence with the most eminent Physicians of the Old World, of obtaining the safest as well as the latest remedies for these diseases, offer inducements to the unfortunate of a quick and rapid cure, to be obtained at no other office in America.
In Syphilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and Spermatic Cords Bubo, Ulcerated Throat, Sore Nose, Tender Shin Bones, Cutaneous Eruptions, Pimples, Blotches, Abscesses, and all other impurities of the system, are perfectly under the control of the Doctor's Medicines, and have been cured in more than 20,000 cases annually, with immense Success.
YOUNG MEN.
Young Men addicted to secret habits, who have impaired their health and destroyed the vigor of their minds, thus depriving themselves of the pleasure of the Married Life, are notified that in consulting Dr. J. Teller, they will find a Friend, Counselor and a Physician who has cured thousands, in almost every part of the United States, who applied to him in a broken down health; now rejoice in all that makes life desirable and man happy. The reader is of course aware that the delicacy of this subject will prevent a more minute description of this terrible disease.
DR. TELLER'S GREAT WORK.
A book for everybody.—Startling disclosures. Dr. TELLER's great work for the Married or those contemplating marriage—200 pages, with 125 plates—price 25 cts Sent to all parts, under seal, by mail, post paid. 50,000 copies sold the past year. The single Married and the Married Happy. A lecture on Love, or how to choose a Partner—a complete work on Midwifery, it contains hundreds of secrets, never before published.—Warranted to be worth three times the amount asked for it. 25 cents, in specie or postage stamps, inclosed, will secure a copy by return mail. Dr TELLER has devoted a lifetime to the cure of those diseases upon which his books treat.
TO THE LADIES.
DR. TELLER still remains the only Agency in America, for the sale of Dr. Vicholi's Italian Female Monthly Pills. The sale of more than 20,000 boxes establishes their reputation as a female remedy, unapproached, and far in advance of every other medicine—for stoppages, irregularities, and other obstructions in females.
CAUTION.—Married ladies in certain delicate situations should avoid their use. For reasons, see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent, by mail or express, to any part of the world, secure from curiosity or damage.
Office hours from 8 A.M. to 8 P.M., and on Sundays from 2 to 5 P.M.
N. B.—Persons at a distance can be cured at home by addressing a letter to Dr. J. Teller, enclosing a remittance. Medicines securely packed from observation, sent to any part of the world. All cases warranted. No charge for advice.—N. B.—No students or boys employed. Notice this, address all letters to

WEDNESDAY, NOVEMBER 23, 1864.

STATE SOVEREIGNTY.—If the States were free to enter into a convention as sovereignties, in the face of their original allegiance, with the view of a "more perfect Union," why are they not free to fall back upon their rights of sovereignty now?—*N. Y. News.*

The easiest way to answer this compound question, is to ask another something like it. If a man owned a house and lived in it last year, as he had a sovereign right to do, if he was in the same sovereignty free to *sell it*—and did sell it—why is he not now free to fall back on his sovereign right, and live in the house rent free, as he used to do?

Almost any body can answer the latter question—and it would seem that any body but a dupe or dance might answer the former. U. T.

Dr. W. Scott, of Buffalo, on a recent visit to the home of his youth, in Hoosic, N. Y., near Bennington, Vt., was surprised to find that Mount Anthony, which in his boyhood was a conspicuous object from his father's house, was no longer visible at all, the view being intercepted by a hill, which he thinks has risen in altitude in the course of fifty years since he left the region, or else Mount Anthony must have lowered.—*Exchange.*

A similar phenomenon has occurred at Sir John Smiths Isles (miscalled the shoals.) The cupola on the Appledore House has gradually risen to view from the door stone of the church on the other island. A large hill on Appledore must have sunk about one foot each year for ten years or more—or the valley of the Appledore House must have risen without the hill—or the island holding the church must have risen.—We think the last named supposition to be the true one, viz. that church has been exalted. U. T.

☞ Certain surgeons in London have succeeded by simple and purely scientific operations in giving sight to those born blind. Dr. Kidd has published a very long and minute account of the result of an operation of this nature—in which a woman of twenty-two, who had suffered from congenital cataract and had in consequence never seen at all in her life, was restored to sight by a most simple operation. The description of the surprise and confusion of the poor girl is pathetically interesting—how she shut her eyes and used her fingers to discover what the things before her were, how she recognized flowers by their smell, and the common objects by her fingers instead of her eyes. All these things are most touching. No less so is an account that has come recently from Paris of sundry poor people whose hearing has been restored after many years of deafness.

KENTUCKY.—The New York Post's correspondent, writes from Washington that the arrest of Lieut. Governor Jacobs, of Kentucky, is likely to bring the disloyal authorities of that State to their senses. There are rumors of a wide spread conspiracy in that State—to inaugurate a second revolution, the object of which is to make Kentucky independent of the general government. The so-called "Union party" in Kentucky of two years ago is now in full alliance with the "democrats" or the "secession" organization. Bramlette and Wickliffe are hand and glove in their plans and purposes, and Garrett Davis, who two years ago moved to expel his colleague, Powell, from the United States Senate for treasonable conduct, is now one of his most intimate friends and companions. All of which is an other shining example of "Kentucky loyalty."

☞ Ex-Gov. Fairbanks of Vermont, died at his residence in St. Johnsbury, on Sunday, aged 72 years. He has been prominent for many years in the politics of Vermont, first as a whig and then as a Republican—in the religion of Vermont, being strongly attached to the orthodox faith and contributing largely to its benevolent and charitable funds—and in the business of St. Johnsbury, by the location of their Scales factory there, and the Scales made them rich. He was a good citizen and a worthy man.

☞ Gov. Seymour's Thanksgiving proclamation for New York, dwells upon the evils inseparable from the state of the country, which are greatly exaggerated; and seems intended to foster a spirit of discontent rather than of thanksgiving.—It makes no mention of public worship; does not invite the people to assemble anywhere; and does not say a word about its being a National Union Thanksgiving.—It seems as if the Governor's milk of human kindness had all been turned sour by some recent events, and he pours out the acid on the peoples' heads.—But the people *will* be thankful, and the church going people will go to church that day,—and let the Governor and his proclamation go quietly to their own place.

—A little boy in Munnsville, N. T., was killed by the explosion of an election-rejoicing cannon.

THE REBELLION.

A man answering the description of Capt. Bell, leader of the Lake Erie pirates, was arrested at Guelph on Saturday and brought to Toronto, C. W. for examination.

An arrival at New York, brings New Orleans advices to Nov. 12th. No army news. The New Orleans papers state that Gen. Canby's wound is not serious, that he is doing well, and will be confined to his quarters for only a short time.

Dispatches via Memphis give the 12th as the day of Gen. C's death.

Information from the Army of the Potomac, dated Sunday, says a good deal of firing was heard on Saturday in front of Petersburg on the Appomattox, but as far as heard from, without important results. Deserters report that the rebel troops on the James river have all been withdrawn with the exception of a skirmish line and enough to man the guns in the forts. Up to Sunday morning there had been almost continuous rain for thirty-six hours. Rumors had reached the army that the enemy were evacuating Petersburg, but they were not generally believed.

The reported death of Gen. Canby is feared by the War Department to be too true. His death will be a loss to us.

Gen. Rawlings, Gen. Grant's Chief of Staff, telegraphs that there is a great panic in Richmond concerning Sherman's movement.

Some excitement exists at Rouse's Point N. Y. Their pickets were fired upon by armed horsemen, who made their appearance at Rouse's Point Sunday evening, and were ordered to halt by the pickets, upon which they fired and retreated. One of their number was shot and fell from his horse, but his comrades took him away and escaped.—It is learned from Montreal, that a plan was on foot to burn Upper and Lower Champlain, N. Y., and that the same would be destroyed within nine days. The citizens of Champlain, and along the entire frontier would do well to be on their guard.

NEW HAMPSHIRE ITEMS

—— Among those captured during a skirmish near the Appomattox river on the 17th, were Captain Reed of the 12th N. H., Adjutant General of Col. Patten's brigade, and Lieut. Chas. Fowle 12th N. H. No men were killed, but a few were wounded, among them Lieut. John P. Lane, 12th N. H., who was shot through both thighs, but not seriously.

—— Capt. Varnum H. Hill, of Manchester, Quartermaster U. S. Army, was captured by the rebels Oct. 14th, near Atlanta, and is a prisoner at Columbia, S. C., and in good health. Col. Bedel of the 3d regt., who was taken a prisoner in June 1863, is a prisoner in the same building. Capt. Hill says he is in a room with 15 other officers, and they pass the time quite pleasantly. Some of them are engaged in the study of the languages.

——*N. J. Kidder, of the 1st N. H. Cavalry, lost a leg in a skirmish near Winchester, on the 13th instant. He is a son of Mr. S. B. Kidder of Manchester.*

—— Mr. George W. Rowell of Manchester, raised this season four cabbages upon one stalk. They are of good size and of excellent quality. They are what is called the Low Dutch variety.

—— About 90 invalid soldiers came to the U. S. Soldiers' Hospital in Manchester Tuesday, from Readville, Ma. Arrangements have been perfected at the hospital, so that the sick soldiers can be accommodated as fast as they arrive.

—— The *retail* prices for potatoes in Concord, N. H., are from 45 to 55 cents, according to quality.

—— The Manchester Daily papers are now sold at 3cts. each. The Union which was started at 1 cent, now says:

Business must be made self-supporting or be abandoned; and we find that we cannot afford to sell our paper through the instrumentality of news boys for two cents. Hence, on and after Tuesday, Nov. 22d, we shall charge three Prices to subscribers will not be changed for the present.

N. H. SOLDIERS' VOTE.—The following are the returns of the soldiers' votes, as received at the Secretary of State's office. It is reported that the Third Regiment did not vote at all. The Eighth Regiment is in the Gulf Department, and no returns have reached here yet. It will be seen that the soldiers vote nearly three to one, for the Union ticket.

☞ In a speech at a dinner given in Boston to the officers of the Kearsarge, Hon. Edward Everett responded to a sentiment in honor of President Lincoln. He said that in no one quality, either as a man or President, was President Monroe superior to Abraham Lincoln. In intellectual ability he was the equal of Judge Douglas.—And his conscientious discharge of his high trust, his kind heartedness, were the theme of the orator's most complimentary remarks. Alluding to the stories of the President's uncouth manners, he described a dinner given at the Gettysburg commemoration, at which many distinguished gentlemen, foreigners and Americans, were present, and, said Mr. Everett, "in gentlemanly appearance, manners, and conversation, he was the peer of any man at the table."

REFUGEES FROM GEORGIA.—A correspondent of the N. Y. Post with Sherman's army writes:

It is quite singular to see how the idea has spread about among the residents of this country that we intend abandoning Rome, Atlanta and the line of railroad.—These unfortunate refugees are coming in from all sides, begging to be sent North.—Entire families find their way to the stations, and pitiful sights are witnessed every day. These unfortunates are content to take any place they can get—on the tops of cars, in the open baggage crates, upon platform cars, perched amidst cannon and ammunition boxes, exposed to the wind and the rain, which for several days past has fallen with great violence. What these poor refugees are to do when they arrive North is a question which must be answered by the philanthropic people of the Northern cities.

☞ Col. Schouler, of Boston, wishes the wealthy people there would give the *families* of soldiers a thanksgiving dinner. He says:—

I can point out where, in one of the most wealthy and prosperous wards of this city, a poor but most worthy widow lady can be found who sent five sons into this war, all the children she had, every one of whom has fallen nobly in battle. Should not these people have a good Thanksgiving dinner?

— Mortifying as the fact may be to human pride, it is nevertheless certain that in their internal organs and general structure, the hog and bear more closely resemble man than any other animal. Most of their diseases, as might be expected, closely resemble those of the human species, and require similar treatment.

GOVERNMENT.—Men are more eager to govern than anything else, and they are less fit to govern than anything else. Political power corrupts men. If they are honest when they take it, they seldom are when they leave it. There are few men that can wield political power without being corrupted. And it will not do to look into government. The centre of government is, has been from the beginning of the world, and probably will be to the end of time, selfish and corrupt; and yet, it is not on that account right to say that political affairs have not gained. There has been an undergrowth.—*H. W. Beecher.*

— Look out for bogus lottery schemes. There is but about one chance in 67, of a person drawing as much as he invests in a real lottery, and there is no chance at all in the bogus affairs with agents all over the country soliciting investments by circulars through the Post Office.

USE OF HORSE-FLESH.—We learn from the foreign journals, that the attempts to popularize the use of horse-flesh, have been very successful in Vienna. Several butchers' shops have been opened in that city for the sale of this meat, under the authority of government, and with a regulated superintendence. The permission was first obtained a few years since, but of late the business has considerably increased.—*North British Agriculturist.*

☞ At New Orleans Nov. 12, the cotton market was quiet but more buoyant, owing to the restrictions being removed.

A Matamoros letter mentions a large increase of trade from New York and other ports which used to be confined to New Orleans. The amount of goods housed in Matamoros was immense.

☞ Harper's Weekly newspaper, and Monthly Magazine, both advertised in our columns to-day, are truly valuable works, each ranking among the best of its class. They are both fresh with novelties for the hour, which are yet of substantial worth for preservation and future perusal.

— While a Union meeting was being held in Colinsville, Conn., on Friday night, the house of Mr. W. W. Bidwell, a War Democrat, was set on fire, it is supposed out of political revenge. A subscription was immediately started to reimburse Mr. Bidwell for his loss.

— Sorghum sugar, costing nine dollars per hundred pounds, made at Chicago, is on exhibition at the Agricultural Department in Washington. It has the appearance of bright Havana sugar, and at the price stated, must find plenty of buyers, if it is anything like as good.

— The majority against Lincoln in Delaware is 610. In 1860 the majority against him was 8410, the aggregate vote being about the same in the two elections. This is evidence of progress.

— It is reported that Lieut. Gov. Jacobs of Kentucky has been sent into the rebel lines for alleged treason.

HARPER'S NEW MONTHLY MAGAZINE.
Critical Notices of the Press.

It is the foremost Magazine of the day. The fireside never had a more delightful companion, nor the million a more enterprising friend, than Harper's Magazine.—*Methodist Protestant* (Baltimore).

The most popular Monthly in the world.—*New York Observer.*

We must refer in terms of eulogy to the high tone and varied excellences of HARPER'S MAGAZINE—a journal with a monthly circulation of about 170,000 copies—in whose pages are to be found some of the choicest light and general reading of the day. We speak of this work as evidence of the American People; and the popularity it has acquired is merited. Each Number contains fully 144 pages of reading matter, appropriately illustrated with good wood-cuts; and it combines in itself the racy monthly and the more philosophical quarterly, blended with the best features of the daily journal. It has great power in the dissemination of a love of pure literature.—*Trubner's Guide to American Literature, London.*

The volumes bound constitute of themselves a library of miscellaneous reading such as cannot be found in the same compass in any other publication that has come under our notice.—*Boston Courier.*

SUBSCRIPTIONS. 1865.

The Publishers have perfected a system of mailing by which they can supply the MAGAZINE and WEEKLY *promptly* to those who prefer to receive their periodicals directly from the Office of Publication.

The postage on Harper's Magazine is 24 cents a year, which must be paid at the *subscriber's* post-office.

Terms:
HARPER'S MAGAZINE, one year.....$4 00.

An Extra Copy of either the Magazine or Weekly will be supplied gratis for every Club of Five Subscribers, at $4 00 each, in one remittance; or Six Copies for $20 00.

Back Numbers can be supplied at any time.

A Complete Set now comprising twenty-nine Volumes, in neat cloth binding, will be sent by express, freight at expense of purchaser, for $2 25 per volume. *Single Volumes*, by mail, *postpaid*, $3 00. Cloth cases, for binding, 88 cents, by mail, postpaid. Address

HALE'S

Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the means of all. At last after a long course of chemical experiments, he found that by adding to these *five* other ingredients, each one valuable in itself, he not only obtained the desired results but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the general public as a safe, pleasant and infallible remedy.

"A Wonderful Discovery."

DR. TEBBETTS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "Dye," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new Hair in all cases on BALD HEADS, when the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With it every "GRAY HEAD" in New England can be restored in less than sixty days.

CITY ELECTION.

The City and Ward Officers for Portsmouth were elected on Tuesday, Nov. 22d. The meetings were very quiet; and the day almost as still as the Sabbath. The weather was very fine, the sunshine after the storm.

The candidates for Mayor were both new. The Democratic party had Hon. Charles H. Peaslee, and gave him 335 votes. John H. Bailey, Esq., headed the Union ticket, and received 999 votes; and there were 2 scattering votes for Mayor in Ward 3, and 1 in Ward 2. It will be seen that the Union ticket prevailed in all these Wards,—for the first time.

Mr. Bailey is elected Mayor by a majority of 661, in a vote of 1337. Last year Mayor Dearborn had 419 majority in a vote of 1289.

☞ The present City Government, Overseers of the Poor, and the City Government elect, are respectfully invited to visit the Alms House on Thanksgiving Day, from 11 to 12 o'clock. The House will be open on that day from 2 to 5 o'clock for all who choose to visit it. B. NORTON, Supt.

☞ Mr. Daniel J. Vaughan of this city, a member of the 157th N. Y. Regiment, arrived at his home on Tuesday evening, having served his country faithfully in the arduous duties of a soldier for the past three years.

☞ The Ball of No. Two Engine Company comes off to-night, and we don't see anything to prevent them and their guests from having a gr and time, as usual.

☞ No political event for many years has created more general rejoicing in this city than the success of the Union party in Ward 3 at the election yesterday. In the evening, when the result was generally known, an impromptu procession was formed under the marshalship of Samuel Rowell, Esq., which, with the Cornet Band, first called upon the Mayor elect, and then marched through the late Democratic Sebastopol, calling upon and congratulating most of the successful Union candidates on the result, in a very hilarious manner.—At about half-past 10 the crowd returned to the headquarters of the Union Club on Congress street, and dispersed in high good humor.

NAVAL—*Orders.*—Captain William A. Walker, to duty under the direction of Rear-Admiral Gregory, on the duty as a member of a court of inquiry at Portsmouth.

Commander Charles H. Baldwin, to ordnance duty at Mare Island, California.

First Assistant Engineer R. H. Fitch, to Portsmouth, N. H., as an assistant to Chief Engineer R. M. Bartleman.

Acting Master's Mate William H. Yeaton, to the Vandalia.

Appointment.—John E. Fitzpatrick, Acting Second Assistant Engineer, and ordered to remain on board the Agamenticus.

☞ The inquiry is often made, Why are coppers so scarce? The answer is plain—there are a few persons in our city who sell them, and many persons green enough to purchase them. Just so long as this policy is pursued, they will be scarce, and no longer. It is not generally known that millions are monthly distributed from the mint in Philadelphia. All that is required to get them is to send your greenbacks, any amount not over 50 dollars, and you will in 30 days or less receive the full amount in coppers, without any express to pay. This is much better than to pay 5 per cent. to the copper dealers.

— Gold, Tuesday, 225 1-2.

— A Washington letter says Mr. Lincoln takes his triumph as composedly as if he had been elected parish deacon, instead of President.

— The Dayton Empire contains the card of Mr. Vallandigham, announcing that he "has resumed the practice of law."

THE AGE FOR MARRYING.—The statistics culled from the British Registrar General's report give some curious details as to the ages at which men are most likely to marry and women to be married. After a woman passes twenty, her prospect of getting a husband begins to fade. Taking the years 1859, 1860, 1861, we find that 78 girls were married at 15 years of age, but no males. At 16, seventeen youths entered the state of matrimony and 937 girls. For both sexes, 20 seems the most favored age for marriage. In 1861 the numbers of each sex then married were 48,495 men, and 50,640 women. At 25 this proportion was reversed, the numbers being 26,473 men to 20,673 women; and at 30 the difference was still more marked, for while 10,621 men married at that age, only 7,840 women found husbands. The males having once obtained the preponderance maintain it to the last. At 80, we find 119 men marrying, and only 21 women; 30 men and 3 women at 73; and 8 men at 80 to 2 women.

MARRIAGES.

In this city, Nov. 17th, by Rev Henry F. Lane, Mr. CHARLES L. WEST to Miss PAMELIA SIMMONS, both of Mowhegan, Me.—By the same, Nov. 21st, Mr. LEVI WILLEY, Jr., to Miss ROXANNA I. SPINNEY, both of Boothbay, Me.

A Word to Everybody.

The Boys' Benefit,

Or the History of the Substitute Business, written by JAMES EASTMAN, Gen'l Recruiting Officer,

Will appear in a few days, in pamphlet form, at one dime per copy. This pamphlet will contain the First and Second Letters. Over 300 copies of the first have been circulated throughout the State of New Hampshire. This shows the class of men engaged in the Sub business, with letters to Capt. Silvey, at Concord, N. H., and other matters too numerous to mention.

The Second Letter will be the explosion of the Kittery, Me., Rendezvous. It will show them back into the mountains, where Guy Fawkes tried to blow the British Parliament with his gunpowder plot. It will also contain a history of the Rendezvous in Portsmouth, under the supervision of one Keene. I shall show the difference between Blackie's many other things that can't be seen. This pamphlet will contain a poem on one J T Moor, and an old Strain, who stole my men and put my soul in pain; with the history of one Wm. Wise, whose life is fainted with guilt and sin, which will plow him down to the tomb, and far beyond, as we presume, and haunt his soul in the great pandemonium far below—the place where all good darkies go. This letter will contain seven battles I have had with brokers since the first Letter appeared, with numerous assaults with intent to kill; how I have managed them with three military arrests, by Capt. Silvey, Provost Marshal General of New Hampshire. Also the trouble I have have had with the Pettikises, trying to get their brother incarcerated for revengeful purposes, caused, as they say, by Eastman's monomaniacism; also a poem on one Copperhead lawyer not a mile from Portsmouth, who, imposed upon the Recruiting Officer by writing him a petition, and reading it to him different from what it represented in ink; those intended lines will make the devil wink.

I've a word to say to all mankind, of city and of town, of old and young, and all combined of low and high renown. And those truthful words which I shall write will expose a wicked class and put their souls to flight. 'Tis nearly 600 years since this wicked world was made—been in habited by every class and every grade; giants have arisen, profits have fell, some gone to heaven, but more gone to hell: Yankees have invented every thing that God, man or devil could mention; but all be but a mere cypher, when compared with this substitute invention.

These pamphlets will appear from time to time, be sold every where for a dime; the sub business complete this book will mention in good style, and truthful arts is the author's wild intention. Everybody should buy it, read it, keep it and compile it. Very Resp'ly Yours,
J. EASTMAN.

THE MODEL COOK.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

TWO COMRADES IN ARMS.

[From the Californian.]

"Comrade! I hear the beating of a drum,
Have reinforcements come?"
"There is no sound save a lost whipporwill
Crying from yonder hill."
"Comrade! I see a spacious mansion stand,
Built by my grandsire's hand."
"No honored ancestry have left a stone
That I may call my own."
"Beside its hearth my gently lady warms
The sweet child in her arms."
"No tender wife upon her loving breast
Lulls babe of mine to rest."
"See! how her bright hair falls in golden showers,
Twined with autumnal flowers."
"No waving hair, by fragrant flowerets pressed,
Has my rough head caressed."
"Oh what enchanted wings the swift time *flies*,
Charmed by those lovely eyes."
"How dreary and how long the *sad hours* seem!
Alas! I cannot dream."
"Again I hear the beating of a *drum*;
Comrade, has the foe come!"
"Yes, that great foe—or *friend*—we all must meet,
Who never knows defeat."
* * * * * * *
On the battle-ground, at the break of day,
Two lifeless soldiers lay;
One face looked *pitiful* with yearning pain,
As one who prays in vain.
The other wore a look divinely blest,
And, from his paleness breast.
The picture of a lady and a child
Looked up to him and smiled.

EPE. N.H., Feb. 20, 1846. "I hereby certify that my daughter had the skin taken off her hands for 3 years—some of the time so badly as to prevent her labor, or even rest—as it affected her hands very much. A large sum had been expended by the most celebrated physicians, for Sarsaparilla Syrup, &c., &c., but she obtained no relief until I procured some ten or twelve bottles of Dr. SWETT'S PANACEA, and several bottles of his Humor Wash, which have effected a cure. There can be no mistake, as this cure was effected more than three years ago. I have other medicine can equal Dr. Swett's in removing the various kinds of humors. I have sold it to a number of my neighbors, who were severely afflicted, and witnessed many full cures effected by it. Since I have acted as agent for the sale of it. JOSIAH JENNESS.

PORTSMOUTH, April 21st, 1862.
I have for several years been troubled with distress at my stomach, loss of appetite, and often vomited up all of my food immediately after eating it, and all medicine failed to afford any relief until about a year ago, when I took one bottle of DR. S. SWETT'S PANACEA, which fully cured me, so that I have not had the least trouble from any of those complaints since, and I enjoy good health. M. LOWD.

From ELDER I CHESLEY, *Lee, May 31, 1841*
DR. SWETT: Permit me to testify, as I feel in duty bound to do, the benefit I have received, from my afflicted with scrofulous humor, and that previous to your visiting our house in the spring of 1840, she had been confined for a number of months, without her natural rest by day or night. She had applied to a number of physicians, but continued to grow weaker till she commenced using your PANACEA and HUMOR WASH. Since then, she has recovered her health so far as to rest quietly by night, and labor by day. I esteem your medicine one of the best that can be found for the disease above named." ISRAEL CHESLEY

☞ Any one returning the remainder of a bottle or box of Dr. Swett's medicines shall have pay for it, if it do not agree with his case, or if not worth the price. All orders directed to DR. S. SWETT, No. 7 High street, Portsmouth, N. H., promptly attended to. may26

Houses and Lands.

Desirable Estate on Middle Street
FOR SALE.
The new and convenient DWELLING HOUSE, No. 45 Middle street, recently erected by Mr. JOHN CASWELL, is offered for sale. The house has just been built of the best materials, in a most careful and perfect manner. The situation is high and dry; the cellar built of Biddeford granite, being one of the very best in the city. The house possesses many advantages. Situate on one of the most pleasant avenues in the city, with a fine prospect from either side of the dwelling, amid pure and healthy surroundings, the location is one seldom found in the market.
The ROOMS are conveniently arranged, the stories being of good height, windows of fine proportions, and all the finish of the kind found in a first-class house.
For further particulars apply to

THE MAGEE
COOKING STOVE.

The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the
CELEBRATED AND UNEQUALLED
MAGEE COOK STOVE,
as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. The oven plates are covered with plester, which renders it equal to the old-fashioned brick oven for perfection in baking.
There is a new style and very superior broiler and sad iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the exception top there is a large copper Reservoir for hot water; also a large tin warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.
The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shoveling up of the ashes is entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.
For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.
We would refer to the following purchasers:

"MAGEE'S PATENT"
VENTILATING & AIR-WARMING
FURNACES.
The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.
For economy, purity of air and ease of management it has no equal, producing a current of warm air, moist and agreeable;—and as none of the air which comes in contact with the fire-pots used for respiration, the tendency to produce headache so much complained of in other furnaces, is entirely obviated.
The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.
To accomplish this many complicated and expensive heating arrangements have been constructed, some possessing but little improvement over former methods, while many have proved a total failure. The objection to the obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the
MAGEE FURNACE.
The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of cold air through the fire-pot, which ignites them as they pass off from the coal, thus saving at least 20 per cent. of the properties of the heat in the fuel.
No heating apparatus with the smoke-pipe or flue on the top of the cone can be made to consume the gases and smoke, as they pass off with a large amount of the heat generated, making the chimney the hottest part of your dwelling.
This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order; thus simplifying, while it increases the surface of radiation.
These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.
For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.
They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of the best Furnace in the world,—and would refer them to the following named gentlemen, who have them now in use:
Samuel Cleaves, Esq., Albert R. Hatch, Esq.,
Aaron H. Hill, Charles H. Mendum,
Henry F. Wendell, John Sise, and others.

DR. W. R. MERWIN & CO.'S COLUMN
FOR THE
CHEROKEE MEDICINES.
Cherokee Cure, the great Indian Medicine,

ROOTS, BARKS AND LEAVES.
An unfailing cure for Spermatorrhea, Seminal Weakness, Nocturnal Emissions, and all diseases caused by self-pollution; such as Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Trembling, Wakefulness, Eruptions on the Face, Pale Countenance, Insanity, Consumption, and all the direful complaints caused by departing from the path of rectitude.
☞ This medicine is a simple vegetable extract and one on which all can rely, as it has been used in our practice for many years, and with thousands treated it has not failed in a single instance. Its curative powers have been sufficient to gain victory over the most stubborn cases.
☞ To those who have trifled with their constitution, until they think themselves beyond the reach of medical aid, we would say, *Despair not!* the CHEROKEE CURE will restore you to health and vigor, and after all quack doctors have failed!
☞ For full particulars, get a circular from any drug store in the country, or write the proprietors, who will mail free to any one inquiring the same, a full treatment in pamphlet form.
☞ Prices, $2 per bottle or three bottles for $5, and forwarded by express to all parts of the world.
Sold by all respectable druggists everywhere.

Glad News for the Unfortunate!
The Long Sought For Discovered at Last.
Cures in from one

to three days.
CHEROKEE REMEDY
—AND—
CHEROKEE INJECTION,
Compounded from Roots, Barks & Leaves.
CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys, Stone in the Bladder, Stricture, Gravel, Gleet, Gonorrhea, and is especially recommended in those cases of Fluor Albus (or Whites in females) where all the old nauseous medicines have failed.
It is prepared in a highly concentrated form, the dose only being from one to two tablespoonfuls three times per day.
It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all of its original purity and vigor; thus removing from the system all pernicious causes which have induced disease.
CHEROKEE INJECTION is intended as an ally or assistant to the CHEROKEE REMEDY, and should be used in conjunction with that medicine in all cases of Gonorrhœa, Gleet, Fluor Albus or Whites. Its effects are *healing, soothing and, sometimes* removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the *cheap quack injections.*
☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to full vigor and strength.
For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.
Price—CHEROKEE REMEDY, $2 per bottle or three bottles for $5.

CHEROKEE PILLS!

Health Preserver!!
CERTAIN AND SAFE.
They cure or obviate those numerous diseases that spring from irregularity, by removing the irregularity itself.
They cure Suppressed, Excessive and Painful Menstruation.
They cure Green Sickness (Chlorosis).
They cure Nervous and Spinal Affections, pains in the back and lower parts of the body, Hysterics, Fatigue on slight exertion, Palpitation of the Heart, Lowness of Spirits, Hysteria, Sick Headache, Giddiness, &c., &c. In a word, by removing the irregularity, they remove the cause and with it ALL the effects that spring from it.
Composed of simple vegetable extracts, they contain nothing deleterious to any constitution, however delicate, their function being to substitute strength for weakness, which, when properly used, they never fail to do.
They may be safely used at any age and at any period, *except during the first three months*, during which the unfailing nature of their action would infallibly prove abortive.
All letters seeking information or advice will be promptly, freely and discreetly answered.
Full directions accompany each box.
☞ Price $1 per box, or six boxes for $5.
Sent by mail, postage free, on receipt of price.

DR. WRIGHT'S
REJUVENATING ELIXIR,
OR ESSENCE OF LIFE.
Prepared from Pure Vegetable Extracts,
Containing nothing injurious to the most delicate.

"As the Phenix rises from the ashes of its fire, animated with new life,"—so does this Elixir rejuvenate the system and OVERCOME DISEASE.
The Rejuvenating Elixir is the result of modern discoveries in the Vegetable kingdom; being an entirely new and abstract method of cure, irrespective of all the old and worn-out systems.
This medicine restores to manly vigor and robust health the poor debilitated, worn-down and despairing devotee of sensual pleasure.
The listless enervated youth, the over-tasked man of business, the victim of nervous depression, the individual suffering from general debility, or from weakness of a single organ, will all find immediate and permanent relief by the use of this Elixir or Essence of Life.
☞ Price, $2 per bottle, or three bottles for $5, and forwarded by express, on receipt of money, to any address.

ROMANCE OF A FACTORY GIRL.—A few years since the factory girls of Lowell projected and commenced publishing a literary paper, edited by themselves, called "The Offering." Its contents exhibited talent, genius and literary culture of no mean order. In St. Louis there was a merchant engaged in the selling of dry goods — a man of taste and cultivation. A stray copy of the Offering fell into his hands. It attracted him to the extent of causing him to become a subscriber. With the writings of one of the correspondents, or outside editors, he was particularly struck. There was a peculiarly lovable and womanly character about them, that made an impression, deep and lasting, it would seem, upon his mind and his heart. He ventured on writing to the author. In due season a response came. A long correspondence ensued. At length the gentleman proposed engagement. The lady declined until they had met. He was going to New York, and made arrangements to proceed to Lowell. An interview was had, and both parties were pleased. An engagement and marriage followed. The gentleman is now a partner in one of the heaviest dry goods houses in that city, with a branch in St. Louis, and counts his annual profits by tens of thousands. The match has proved an eminently happy one in every way. The wife has shown herself equal to any position, and graces society as if to the manor born.

RYE, N.H., Feb. 28, 1866. "I hereby certify that my daughter has had the salt rheum for a number of years—some of the time so badly as to prevent her labor, or even rest—as it affected her hands very much. A large sum had been expended to the most celebrated physicians, for Sarsaparilla Syrup, &c., &c., but she obtained no relief until I procured some ten or twelve bottles of Dr. SWEET'S PANACEA, and several bottles of his Humor Wash, which have effected a cure. There can be no mistake, as this cure was effected more than three years ago. No other medicines can equal Dr. Sweet's in removing the various kinds of humors. I have sold it to a number of my acquaintances, who were afflicted, and witnessed many full cures effected by it since I have acted as agent for the sale of it. JOSIAH JENNESS.

PORTSMOUTH, April 21st, 1862.
I have for several years been afflicted with dizziness at my stomach, loss of appetite, and often vomited up all of my food immediately after eating it, and all medicine failed to give any relief until about a year ago, when I took one bottle of DR. S. SWEET'S PANACEA, which fully cured me, so that I have not had the least trouble from any of these complaints since, and I enjoy good health. M. LOWD.

From ELDER I. CHESLEY, *Lee, May 31, 1841.*
Dr. SWEET: Permit me to testify, as I feel in duty bound to do, that my daughter was afflicted with scrofulous humor, and that previous to your visiting our house in the spring of 1840, she had been confined to her room for six months, without her natural rest by day or night. She had applied to a number of physicians, but continued to grow weaker till she commenced using your PANACEA and HUMOR WASH. Since then, she has recovered her health so far as to rest quietly by night, and labor by day. I esteem your medicine one of the best that can be found for the disease above named." ISRAEL CHESLEY

☞ Any one returning the remainder of a bottle or box of Dr. Sweet's medicines shall have pay for it, if it do not agree with his case, or if not worth the price. All orders directed to DR. S. SWEET, No. 1 High street, Portsmouth, N. H., promptly attended to. may26

VERNATELLA.
Warranted to make the Soles of Boots and Shoes water and dampness proof, and water proofing for leather.
VERNATELLA
is a preparation from Copper, having no grease, linseed oil, or anything of the kind, and when the soles are once saturated with it, water can no more get through them than through copper itself. **Price 25 Cents Per Bottle,**
at retail everywhere.

But its cost to the purchaser is really NOTHING, as it makes the soles wear enough longer to more than pay for it, leaving a net gain the making of them Water and Dampness Proof, and the preservation thereby of that priceless gem, the health.

☞ LADIES, READ THIS! ☜
SAVE YOUR HEALTH.
Use Verontella on the Soles of your Shoes. It makes them water proof and thereby protects your feet from dampness, for the ground is always more or less moist, either from rain or the morning and evening dew.

At wholesale in Boston by Geo. C. Goodwin & Co., 38 Hanover street; S. M. Colcord & Co., 56 Hanover st.; M. S. Burr & Co., 26 Tremont st.; Carter, Hall & Co., 48 Hanover st.; and Wholesale Druggists generally. Also, by all the principal dealers in Boots and Shoes.

American and Foreign Patents.
R. H. EDDY,
SOLICITOR OF PATENTS;
Late Agent of U. S. Patent Office, Washington, (under the Act of 1837.)
76 State street, opposite Kilby street,
Boston.

After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Also, Reissues, Extensions, Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by transmitting One Dollar. Assignments recorded at Washington.

The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any by which can be offered them elsewhere. The Testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional service so moderate.

The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.

These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.

All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.

TESTIMONIALS.

"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse." CHARLES MASON, Commissioner of Patents.

"I have no hesitation in assuring inventors that they cannot employ a person *more competent* and *trustworthy*, and more capable of putting their applications in form to secure for them an early and favorable consideration at the Patent Office." EDMUND BURKE, Late Commissioner of Patents.

Mr. R. H. Eddy has made for me THIRTEEN applications, on all but ONE of which patents have been granted, and that is *now pending*. Such unmistakable proof of great talent and ability on his part leads me to recommend *all* inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges." JOHN TAGGART.

During eight months, the subscriber, in course of his large practice, made on *twice* rejected applications SIXTEEN ALLOWANCES, SEVEN ONE when was decided in *his favor*, by the Commissioner of Patents. R. H. EDDY.

The Old Established Hospital,
No. 5 Beaver Street, Albany, N. Y.
QUICK CURES AND LOW PRICES.
Over Twenty Thousand Patients Cured Annually!

DR. J. TELLER continues to be confidentially and successfully consulted on all forms of private diseases, at his old Established Hospital, No. 5 Beaver Street, Albany, N. Y. Twenty years devoted to this one particular branch of practice, enables him to perform cures such as no other Physician can, and his facilities are such (being in correspondence with the most eminent Physicians of the Old World,) of obtaining the *latest* as well as the latest remedies for these diseases, offer inducements to the unfortunate of a quick and rapid cure, to be obtained at no other office in America.

In Syphilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and Spermatic Cords Bubo, Ulcerated Sore Throat, Nose, Head and Shin Bones, Cutaneous Eruptions, Blles, Ulcers, Abscesses, and all other impurities of the system, are perfectly under the control of the Doctor's Medicines, and have been tested in more than 20,000 cases annually, with immense Success.

YOUNG MEN.

Young Men addicted to secret habits, who have impaired their healths and destroyed the vigor of their minds, thus depriving themselves of the pleasure of the Married Life, are notified that in consulting Dr. J. Teller, they will find a Friend, Counselor and a Physician who has cured thousands, in almost every part of the United States, who applied to Dr. J. Teller, and are now in health, and rejoice in all that makes life desirable and made happy. The reader is of course aware that the delicacy of this subject will prevent a more minute description of this terrible disease.

DR. TELLER'S GREAT WORK.

A book for everybody.—Startling disclosures. Dr. Ingalls' great work for the Married or those contemplating marriage—200 pages—full of plates—price 25 cts. Sent to all parts, under seal, by mail, post paid. 50,000 copies sold the past year. The single Married and the Married Happy. A lecture on Love, or how to choose a Partner—a complete work on Midwifery, it contains hundreds of secrets, never before published.—Warranted to be worth three times the amount asked for it. 25 cents, in specie or postage stamps, inclosed, will secure a copy by return mail. Dr TELLER has devoted a lifetime to the cure of those diseases upon which his books treat.

TO THE LADIES.

DR. TELLER still remains the only Agency in America, for the sale of Dr. Vichol's Italian Female Monthly Pills. The sale of more than 20,000 boxes establishes their reputation as a female remedy, unapproached, and far in advance of every other medicine—for stoppages, irregularities, and other obstructions to females.

CAUTION.—Married ladies in certain delicate situations should avoid their use. For reasons see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent, by mail or express, to any part of the world, secure from curiosity or damage.

Office hours from 8 A.M. to 8 P.M., and on Sundays from 9 to 5 P.M.

N. B.—Persons at a distance can be cured at home by addressing a letter to Dr. J. Teller, enclosing a remittance. Medicines securely packed from observation, sent to any part of the world. All cases warranted. No charge for advice.—N. B.—No students or boys employed. Notice this, address all letters to

THANKSGIVING.—"Give thanks to God, all ye people," who have anything to be thankful for. And all ye who don't feel that you have, will do well to observe a fast, in hopes of being possessed of a more appreciative and thankful spirit.

HIGH PRICES.—It is high time rational persons inquire into the cause of present high prices of merchandize and the necessaries of life, which, while they are oppressive upon the poorer classes, tend to make the rich richer, and build up unprincipled speculators taking advantage of the calamities of war. Are not our agricultural products, the fruits of the earth, generally as abundant as they were a year or two years ago? Are not men of all classes well paid for their labor and services? Is there not over two hundred and fifty millions of specie and bullion in the Free States—even more than at any former period?

In 1830, it was estimated that the total amount of the metallic currency in the Union was about thirty-one millions, and yet the nation was in a prosperous condition as to finances—no complaint of exorbitant prices. In searching for the cause of the present high prices, we look for the *primary* cause to the rich speculators of the city of New York—to the wealthy Jews and Gentiles; a city with about eight hundred thousand population, where by far the largest part of the import duties are paid, and by the law required to be paid in the metallic currency. The city contains a majority of thirty-six thousand Copperheads, and among the whole number of that party there are wealthy men enough to influence the market value of gold and silver.

They seem to be regardless of the welfare of their country, and hoard up the specie under the delusive hope that the rebels will be victorious, and therefore that the national paper currency will never be redeemed. Some of those speculators hoard up even the copper coin—it is said that one of them had so many tons in his chamber that the flooring gave way.

The New York speculators and importers combine to fix the value of gold in the market, and their example is followed readily by similar classes in the other sections of the country. Importers are obliged to pay the duties, as well as their foreign debts, in specie; it is therefore conceded that gold is of a little more value to *them* than the paper currency of the State Banks or of the Government.

With these exceptions, excepting also the intrinsic value of specie and bullion for manufacturing purposes, it is very clear that the Government notes and specie are of equal value. Why? Because the government notes are made by law a legal tender for all debts, and because the public revenue, estimated to amount in the future to about a hundred millions of specie annually, is pledged for the redemption of the Treasury notes or bills—and because all the real and personal property of the people of the several States in honor and good faith is pledged for their ultimate redemption. Is there any bank in the Union having a safer basis for the redemption of their bills? Indeed it may be affirmed that the Treasury notes have a more solid basis than all the other banks in the Union. A. B.

CALIFORNIA NEWS.—The Supreme Court of California has decided that taxes may be paid in greenbacks. This decision will materially aid the party in that State who are striving to introduce Government paper there as currency. It has been exclusively specie.—The citizens of Stockton have organized patrols to protect themselves from the incendiaries who infest that city in great numbers.—One Henry Grady, foreman of Crescent City Engine Co. in San Francisco, has been fined $500 for running the machine maliciously through a Union procession. A previous foreman of that company was the notorious Jim Casey, who killed King, editor of the Bulletin, and was hung by the Vigilance Committee.—The Bulletin mentions a report that the steamer A. J. Davis was captured on her way from Mexico to New York, by a party of fifty secessionists who recently left San Francisco for Mazatlan. Warning was given by the papers at the time of their leaving.

Men long for a leader wise and strong enough to justify their confidence. Seldom can men be found who are fit to be leaders. Four years and more we have needed a leader; and we have not found one; and we shall not find. It is not the nature of Northern civilization to breed men so much more than the average of men as that they are fitted to be put up as kings over the people. They will find them more easily in the South, because it is the nature of barbaric civilization to keep the masses down, and advance a few men over them. The South will find leaders, and we shall not; and the reason is that we are more civilized than they.—*H. W. Beecher.*

☞ The destination of the Army of the Potomac to-day is, for Turkey.

CLOSE OF THE FAIR.—The National Sailors' Fair, at the Boston Theatre, which has engaged the hearts and hands of the live loyal people for the last two weeks, closed gloriously Tuesday evening. The crowd in attendance was as large, if not larger, than on any previous occasion, and all who had shares or goods to dispose of were anxious to *sell*, and pressed their wares upon the visitors in tones that could not be resisted. The raffling room was crowded throughout the evening, and the active young men who assisted the blind goddess Fortune in awarding the prizes were never more active; at midnight the drawings had not been concluded.

Probably the amount received from sales, admissions, and donations, will not fall far short of $200,000—a sum that will go far towards the establishment of a Home for those disabled in the U. S. marine service. The fountain of beneficence and charity that was opened at the call of the Sanitary Commission has not yet run dry, and now that our people have learned how pleasant it is to contribute thus for the benefit of our brave defenders, it is difficult to say how or, when it will stop flowing.

An auction of paintings, engravings, and other objects of art contributed to the Fair, took place at noon in the art gallery in the large saloon of the theatre. Articles sold low—Bierstadt's painting of the "Silver Lake," a spot named by Starr King, in California, was knocked off for only $375, (bought by Royal E. Robbins,) while its mate at the New York fair brought $1600; and this could easily have been raffled for $2000, if the donor would allow it. "Envying another's Lot," a horse looking over into the adjoining enclosure, was sold to Mr. Everett for $140; "Mountain Gorge," $200, &c.

The fate of the General's sword was decided last evening by a well-known citizen of East Boston, who cast sixty votes at one dollar each for Gen. Butler, thus giving that individual a majority of all the votes cast.

The Naval sword was also secured by Capt. Joseph Alden of the sloop-of-war Brooklyn, his crew having sent $350 for that purpose.

The managers have decided to make the following disposition of the goods which remained unsold. The greater part will be given to the Fair to be held in the Charlestown Navy Yard, soon. The ladies in charge of the Beverly, Salem and Newton tables will take their articles home and open small fairs there. The rest will be given to Mrs. A. H. Rice, who will start a fair at her residence in Union Park.

☞ The magnificent white ox, Gen. Grant, at the Boston Fair, was drawn by Mr. Theodore Thatcher, iron founder, of 39 Broad street, Boston; and will not be slaughtered. He netted about $3000 for the Fair, in exhibition and sale. Mr. Carlos Pierce, (formerly of Pierce Brothers & Flanders, of Franklin street, Boston,) who drew his royal bovine highness at the New York Fair, and gave him to President Lincoln, superintended the sale of tickets at the Boston Fair, and bought twenty-eight himself, but didn't get "struck" again with him—although he did draw a $500 Affghan and other valuable articles.

INDIAN SPRING OIL COMPANY.—We refer our readers to the advertisement today in our, columns of the "Indian Spring Oil Company," which bids fair to be a most favorite property for capitalists, from the rare quality of its oil, its large territory for boring purposes, and its very low price to subscribers.

GREAT INCENDIARY FIRES IN RUSSIA.—The Moscow Gazette publishes a long list of fires which have taken place in different parts of Russia since April last, and it adds that the account of the principal disasters is not complete. The work of incendiaries commenced at the end of April in the destruction of fifty-houses; next at Okhanik two hundred and four houses were burned. The fires continued in succession at Serapoul; at Serdobik, where four-fifths of the town was destroyed; at Mozir, one-half of the houses; at Mologa, more than two hundred; and at the fair of Nijni-Novgorod, fifteen hundred booths and one hundred and forty-eight houses. At Patrofsk there were as many as six fires in the month of June alone, and entire quarters of the town were consumed. The powder magazines of Kazan and that of Okhta, near St. Petersburg, were blown up; at Riga the fires occurred one after the other; the same at Tunien, where the finest quarters of the town were entirely destroyed. At Orenburg six hundred houses were burned, and Baki is now only a heap of ruins. During the same space of time four conflagrations took place at St. Petersburg; six at Simbirsk, a town which as well as Taroslavi, is now in ruins; and one at Serpoukhoff, where seventeen houses were consumed. Previously to April two imperial foundries were laid waste in the same manner. The Moscow Gazette apprehends fresh disasters of the same kind, and calls on the Russian government to adopt prompt and rigorous measures.

LETTER FROM NEW YORK.

From our Regular Correspondent.

NEW YORK, Nov. 17.

Dear Chronicle:—

Emerged from the storm of election and the high waves of party strife which have lashed so fearfully the limits of kindness and prosperity, we can look back with clearer vision and greater consideration to the lines of difference which a few weeks ago seemed so marked and bitter. The culmination of the canvass passed more quietly and peacably than many foretold and anticipated, but the floating population of our city was so well occupied that they had no disposition to ferment a brawl or tumult. Gen. Butler is still here for some purpose, said, by usually reliable individuals and those "sound on other people's business" to be perfectly understood by himself and the government.—It certainly isn't by any one else, and it seems to be the general desire that he should finish his little business here as soon as convenient and move out to some place where his talents will be more fully appreciated, or to a better place—below.

The City vote was much larger than was ever polled before. There was one vote for every *minute and a third*, during the day. There were six hundred and thirty minutes between sunrise and sunset, which multiplied by two-hundred and forty polls gives 157,000 minutes, and the vote was 110,000.

Other facts connected with the vote are curious, and not very complimentary to the democracy. In the First Ward, the hotel of rum-holes, and prostitution, the majority against the government was ten to one, or 2163 to 213; some poll districts in the ward gave 20 to 1. In the Fourth Ward, peopled by a class equally debased, the majority against the government was six to one, or 2379 to 435; one district giving 25 to 1. And the notorious Sixth Ward (Five Points) gave McClellan eleven to one, or 3457 to 329. These facts tell their own story.

The general result of the election is not however of much loss or credit to either party, but merely the alternate revulsion, characteristic of New York politics. The election two years from now, will throw the State into the care of the democracy.

The artistic skill of my friend Mr. Meinerth again contributed to the completeness of my "views of Portsmouth," by beautiful photographs of the Unitarian Church, Rockingham and First National Banks, Chronicle and Gazette office, "Richards Avenue," and "Among the Pines," a view of a picnic party in the Sagamore woods, the first four especially noticable for the excellence of proportion and finish, and greatly enhancing the interest which attaches to the Strawberry Bank Album which ornaments my centre table.

I was pleased to learn during my recent flying visit, of the large subscription then already obtained for the "Poets of Portsmouth." Mr. A. M. Payson allowed me the inspection of the "Index" and I was specially impressed with the appropriateness of its arrangement and selection. And the "proof" in the clearest of type, on delicately tinted paper, promises that it will be a beautiful work.

During an hour at the High School, the young ladies sang twice at the kind request of their lady teacher. The whole scene recalled other school days, whose pleasures were never fully realized till they had drifted far away out of reach; the very seats and desks, and crayon sketches on the boards seemed to carry me back a dozen years, and there was no necessity to ask any one at that moment to "make me a child again just for to-night."

Maggie Michell "crams" Niblo's four hours nightly by the excellence of her performance of "Fanchon."

What will you please to give me for Thanksgiving? Forty thousand turkeys are being boxed and shipped to the fleets and to the armies of the Shenandoah, James and Potomac. They are purchased by the subscription of New York merchants at an average of 28 a 29 cts.

McClellan, the hero of three wars—The Potomac, the James, and the Salt. N.

ATTEMPT TO DESTROY A RAILROAD TRAIN.—An attempt was made on Saturday to throw the Chicago Express train on the Vermont Central Railroad off the track, about a mile east of Williston Depot. Villains had placed a railroad tie across the track, on which were a couple of heavy planks and six or eight sticks of hard wood. The section men had passed an hour before, when the track was all clear. The engineer, coming around a curve, discovered the same in time to stop the train. It was a narrow escape, as the cars would have been thrown down an embankment fifteen to twenty feet high.

— At Havana a committee of influential persons have waited on General Dulce with a petition to be presented through him to Isabella II., that all negroes be declared free after the expiration of twenty-four years from January 1st, 1864, each receiving a salary during the four last years, of eight dollars per month, the greater part of which may be retained until the freedom of the slave is accomplished.

It is beauty's privilege to kill time, and time kills beauty.

THE REBELLION.

The War Department has advices from New Orleans to Nov. 15, when Gen. Canby was doing well!

The Navy department is advised that the rebel schooner Badger, from St. Marks, bound to Havana, was taken possession of by the steamer Adela, on the 6th inst., off the middle entrance of St. George's Sound, Florida. Twenty-five packages of cotton were captured with the vessel, the captain of which threw his papers overboard.

The reports of the evacuation of Petersburg originated with refugees and deserters who coming into our lines, have merely impressed on others their belief that such was the fact.

Nearly two weeks have elapsed since direct information has been received from Gen. Sherman, himself. The Government has no intelligence of his recent movements later than that contained in the Richmond papers of Friday. Gen. Sherman, at least a month ago, informed the proper authority at Washington of his plans, which, judging by rebel accounts, have thus far been carried into effect with bright promise of success throughout his campaign.

Advices from Gen. Sherman state that he was 30 miles from Macon on the 19th.

It is averred that the Captain of the Roanoke was three times distinctly told by our Consul at Havana, of the plot to capture his vessel. This has a bad look for the Captain.

The Wild Rover, with Braine and the rest of the Roanoke pirates, has arrived at Nassau from Bermuda. She attempted to get into Wilmington, but failed.

The Stormy Petrel exploded her boilers at Bermuda.

The latest from Hood left him near Florence with 35,000 men. Dick Taylor, with 10,000, was reported near Beauregard. Stewart's corps was at Corinth.

Gen. Thomas is rapidly concentrating his forces, as though disposed to make an attack on the rebels in some direction.

There was but one building destroyed by Forrest's attack on Johnsonville, Tenn. The place is still held by our troops.

Nothing later from the Shenandoah valley.

Late rebel papers say Gov. Watts of Alabama has had an official conflict with the rebel conscripting officers. The policemen of Selma are being taken for service in the army. The Governor has issued an order that being State officers they are exempt from draft. Richmond papers are very severe on the defection of Gov. Brown of Georgia, and the Legislatures of that State and Alabama. They scout the idea of a convention of all the States, north and south.

Indian Spring Oil Co.

Capital Stock - - - - - - - - - $300,000.
SHARES AT PAR, $5 EACH.

Subscription price $2 50 per share to original Subscribers, and no further Assessments.

Working Capital, $25,000, Cash.

This is the cheapest and most favorable Oil property yet offered for public and safe investment in the great Alleghany valley. It consists of about **900 acres** in the noted Oil Creek Counties of Cattaraugus and Allegany, N. Y., and in close proximity to the Erie Railroad. It has been carefully selected from an area of **35 miles**, including **14 farms**, which give the richest show of oil discovered in the entire region, and including no mountain lands, useless for oil wells. There are already three wells in progress, one of which is down 520 feet on the "Moore Farm," with an abundant show of oil. A remarkable natural oil spring also exists on this farm, near the well, constantly yielding gas and oil of extraordinary quality, being of a greenish hue and like the celebrated "Mecca Oil," very valuable as a *lubricator*, commanding more than double the price of the ordinary petroleum. On the "Talcott Farm" a well is down 575 feet, with a fine show of oil and gas. Near this well is the famous INDIAN SPRING, which flows oil in large quantities. Remarkable outflows of oil exist on the "Metcalf Farm," on which a well is now being bored, with rich show of oil. The first oil is reached at *fifty feet* on these lands wherever boring has been done. Two engines are now constantly at work on the wells.

The rare character of this oil gives immense value to this property, being so superior as a lubricator. Its near proximity to the Erie Railroad enables the oil to be delivered in market $1 50 per bbl. less than from Oil Creek, Pa.

The very *low cost* of this property to subscribers for the large sum *at of boring territory*, together with the valuable improvements already upon it, and the **Rare Quality** of its oil, must command the attention of all to its unrivalled advantages for investment and profit.

The principal part of the stock is already taken; when closed it is proposed to organize under the laws of the State of New York.

Subscription books are open for the sale of the balance of this stock, and samples of the crude petroleum can be seen, and full particulars obtained, at the offices of

HALE'S

Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the means of all. At last after a long course of chemical experiments, he found that by adding to these *five* other ingredients, each one valuable in itself, he not only obtained the desired results but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the general public as a safe, pleasant and infallible remedy.

"A Wonderful Discovery."

DR. TEBBETTS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "Dye," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new Hair in all cases on BALD HEADS, when the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With it every "GRAY HEAD" in New England can be restored in less than sixty days.

THACHER, opposite the Post Office and 12 Market Square, Agent for Portsmouth.—Geo. C. Goodwin, No. 38 Hanover street, Boston, Wholesale Agent for New England, and sold by Druggists everywhere. TEBBETTS BROTHERS, Druggists and Chemists, Proprietors, Manchester, N. H. Jel—tf

A Card to Invalids.

A Clergyman, while residing in South America as a missionary, discovered a safe and simple remedy for the Cure of Nervous Weakness, Early Decay, Diseases of the Urinary and Seminal Organs, and the whole train of disorders brought on by baneful and vicious habits. Great numbers have been already cured by this noble remedy. Prompted by a desire to benefit the afflicted and unfortunate, I will send the recipe for preparing and using this medicine, in a sealed envelope, to any one who needs it, *Free of Charge*.

Please inclose a stamped envelope, addressed to yourself.

ASSIGNMENT BLANKS,

For NEW HAMPSHIRE and MAINE, for sale at the Chronicle office.

Local.

☞ No Daily Chronicle on Friday.

☞ The usual Thanksgiving Services will be held at all our Churches to-day as usual, we presume.

Rev. Mr. Patterson will occupy his own pulpit, at the Universalist Church.

Services at the Court Street Christian Chapel, at the usual morning hour. Sermon by the pastor. A contribution will be taken up for the U. S. Christian Commission; and we hope a good attendance for the sake of our brave soldiers who are to be benefitted by it.

The Baptist and Methodist societies will unite in services—at the Methodist Church.

There will be services at the North Church. Sermon by Rev. Mr. Adams, pastor.

☞ Mr. Jacob H. Thompson, of this city, who for the last three and a half years has filled the position of associate editor and book-keeper of this Chronicle, (which, as in all smaller cities, also includes that of joint reporter and general business assistant,) to the entire satisfaction of ourselves and patrons—we regret to state, has discontinued our very pleasant connection, to engage in other business in New York. In which new sphere we wish him, as will all the host of friends he leaves behind, the most ample success.

Mr. Thompson had also, for a long time previous to the period stated, during which he has employed his whole time in our interest and that of our patrons and this community—exerted himself for the success of our enterprise and the local press generally, in various ways. Never was there a more devoted, faithful and efficient co-worker than he, and never more agreeable association than ours has been—so far, at least, as we are concerned. May his lines always fall in pleasant places.

Mr. John H. Miller, who has been for several years employed in this office and that of the New Orleans Picayune, will assume the position vacated, and is fully authorized to transact any business on behalf of the publisher of this paper.

FIRE.—An alarm of fire was given in our streets on Wednesday, about one o'clock; and as the fire was reported to be in the large Steam Factory, a crowd was assembled. The fire was in the picker, the interior of which was greatly damaged; but by the efforts of the fire department, added to those of the factory force, the flames were confined to that part of the building where it began. It was a narrow escape from a great conflagration, which must have occurred if the fire had broken out in force, in a brisk westerly wind then blowing, which would have swept the fire over a wooden district.

NAVAL.—Acting Master Henry D. Edwards is detached from the receiving ship Ohio at Boston, and ordered to Portsmouth, for duty on the Albatross.

NEW HAMPSHIRE ITEMS.

—At the Dover municipal election, Tuesday, Hon. Wm. Estes (Union Republican) was re-elected Mayor by 300 majority.

—The Concord correspondent of the Manchester Union says: "We hear that the directors of the Concord Mechanics' Bank, and also the Pittsfield Bank, propose to wind up business. They are considered two of the soundest institutions in the State."

—Dr. Zaccheus Colburn, of Manchester, died on the 20th inst., aged 64. His disease was cancer in the mouth, from which he had been a great sufferer for two or three years.

—Among those captured during a recent skirmish before Petersburg, were Capt. Reed of the 12th Regt., Adjutant of Col. Patten's brigade; also, Lt. Chas. Fowle, of the same regiment. Among the wounded was Lt. John P. Lane, shot through both thighs.

—H. H. Adams, of the 10th regiment, died at Hampton Hospital on the 12th. The mortality is very large, especially among the negro troops.

—Dr. E. Morrill, Assistant Surgeon of the 13th regiment, has been appointed Surgeon of the Heavy Artillery. He is a son of Dr. Alpheus Morrill of Concord, and like his father, a well-read and skillful homœopathist, says the Patriot.

—The Patriot says "it is stated that John P. Hale is on the track for Governor. It was probably promised him as an inducement for him to support Lincoln, for it was understood that he was for some time 'open to conviction' as to whom he should support;" of which, our readers will believe as much as they have a mind to.

IN CANADA, owing to reliable information that Southerners and rebel sympathizers in certain Western towns are manufacturing, clandestinely, and collecting at convenient points shot, shell and cannon, the Government has issued a proclamation prohibiting the exportation or carrying coastwise, or by inland navigation, of arms or ammunition.

BANISHED.—Gen. Burbridge has sent Lieut. Gov. Jacobs of Kentucky, and Paul R. Shipman, editor of the Louisville Journal across the lines to Dixie. The banishment of the latter was countermanded by the War Department when too late.

GRAND MUSICAL FESTIVAL.—The second annual session of the New Hampshire State Musical Convention, will be held in Eagle Hall, Concord, commencing on Monday, January 2, 1865, and continuing through the week. In accordance with the wish of the Convention, as unanimously expressed last year, will be the Prof. L. O. Emerson, of Boston, as conductor. A new work, the "Chorus Wreath," and Mr. Emerson's "Harp of Judah," will be adopted for use.

The object of this annual gathering is three fold, namely: First, to elevate the standard of musical taste; second, the introduction and study of a higher class of music; thirdly, a general good time. All to whom this notice may come, will please extend it and use their influence in bringing together the entire musical force of the State.

An orchestra will be formed, under the direction of C. C. Gibson, Esq., and a general invitation is extended to players through out the State and elsewhere, to participate. Each player should provide himself with a music-stand.—One session will be held with the organ of the Universalist Church. One hour each afternoon will be set apart for social singing and playing. The use of a magnificent grand piano, has been generously tendered the Convention, from the celebrated house of Chickering & Sons. Pianists will bear this pleasing fact in mind, and come prepared with some brilliant contributions.

Two grand concerts will be given on Wednesday and Thursday evenings, January 4th and 5th. A plan is in progress, and will be presented on Wednesday morning, when by the Convention may make *an Excursion to Boston* on Friday morning—giving a grand concert, in connection with the great organ, in Music Hall.

By arrangement, return tickets, will be furnished members, free of expense, on the

Member's tickets to the course, including concerts, gentlemen $1, ladies 50 cents. Visitors' tickets, to course, including all exercises of the Convention and concerts, $1.50.

Members having friends in the city with whom they propose topping, should make the earliest possible arrangements with them. Letters of inquiry to the Committee wishing board, must be addressed to them at once. All letters requiring an answer should enclose a stamp. Those having a matter in charge have spared neither trouble nor expense to make this, our second annual gathering, an occasion of rare interest, and worthy the musical reputation of the Granite State. Per order, Benj. B. Davis, John Jackman, J. H. Morey, Committee. Any further information may be had by addressing J. H. Morey, Concord, N. H.

☞ The present City Government, Overseers of the Poor, and the City Government elect, are respectfully invited to visit the Alms House on Thanksgiving Day, from 11 to 12 o'clock. The House will be open on that day from 2 to 5 o'clock for all who choose to visit it. B. NORTON, Supt.

Why Mrs. C., how nice and clean your clothes always look! What kind of soap do you use? Well, Mrs. D., it gives me great pleasure to say that I use the Gold Medal Soap, manufactured by J. Monroe Taylor, 112 Liberty street, New York, and as long as he keeps the quality as good as now, I shall never use any other. Every one who will try it, will say just what I am telling you. Try it and be convinced. 30

☞ Special attention is asked to Hunnewell's preparations, advertised on our inside columns. They are based on true medical laws, used very largely by Physicians, and most undoubted testimonials are in the hands of the proprietor, always open to inspection. Let Portsmouth and its vicinity bear testimony by a confidence to test them, which will be sacred.

He is the happiest who does most to make others happy. The inventor of Herrick Allen's Gold Medal Saleratus must be the happiest man in existence, for we hazard nothing in saying that the use of the Gold Medal Saleratus cannot fail to make a happy household. Our better half says she does not fear of our ever frowning, as long as she can get the genuine Herrick Allen's. We say success to the inventor, and if everybody knew how good it is, no other would be used. A good many of our Merchants have it. Their depot is 112 Liberty Street, New York.

THE MODEL COOK.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

The subscriber has reduced the prices of the Model Cook Stoves FIVE DOLLARS each, to conform to the decline in gold.

Important to the Afflicted.

DR. DOW continues to be consulted at his office, Nos. 7 and 9 ENDICOTT STREET, Boston, on all diseases of a

PRIVATE OR DELICATE NATURE.

By a long course of study and practical experience of unlimited extent, Dr. D. has so fully gratification of presenting the unfortunate with remedies that have never, since he first introduced them, failed to cure the most alarming cases of

GONORRHŒA AND SYPHILIS.

Beneath his treatment, all the horrors of venereal and impure blood, Impotency, Scrofula, Gonorrhœa, Gleet, Strictures, Pain and distension in the region of procreation, Inflammation of the Bladder and Kidneys, Hydrocele, Abscesses, Humors, frightful Swellings, and the long train of horrible symptoms attending this class of disease, are made to become as harmless as the simplest ailings of a child.

SEMINAL WEAKNESS.

Dr D.. devotes a great part of his time to the treatment of those cases caused by a secret and solitary habit, which ruins the body and mind, unfitting the unfortunate individual for business or society. Some of the sad and melancholy effects produced by early habits of youth, are Weakness of the Back and limbs, Dizziness of the head, Dimness of sight, Palpitation of the heart, Dyspepsia, Nervousness, Derangement of the digestive functions, Pimples on the face, Consumption, &c. The fearful effects on the mind are much to be dreaded; loss of memory, confusion of ideas, depression of spirits, nervous irritability, aversion of society, self-distrust, timidity, &c., are among the evils produced. Such persons should, before contemplating matrimony, consult a physician of experience, and be at once restored to health and happiness.

Patients who wish to remain under Dr. Dow's treatment a few days can be accommodated with pleasant rooms, and charges for board moderate.

Medicines sent to all parts of the country, with full directions for use, on receiving description of your cases. Dr. Dow has also for sale the French Capotte, warranted the best preventive. Order by mail. Three for $5 and a red stamp.

Highly Important to Females

IN DELICATE HEALTH.

DR. DOW, Physician and Surgeon, No 7 & 9 ENDICOTT STREET, Boston, is consulted daily for all diseases incident to the female system. Prolapsus Uteri, or falling of the Womb, Fluor Albus, Suppression, and other menstrual derangements, are all treated upon new enlightened principles, and speedy relief guaranteed in a few days. So invariably certain is the new mode of treatment, that most obstinate complaints yield under it, and the afflicted person soon rejoices in perfect health.

Dr. Dow has no doubt had greater experience in the cure of diseases of women and children, than any other physician in Boston.

Boarding accommodations for patients who may wish to stay in Boston a few days under his treatment.

Dr. Dow, since 1845, having confined his whole attention to an office practice, for the cure of Private Diseases and Female Complaints, acknowledges no superior in the United States.

N. B.—All letters must contain four red stamps, or they will not be answered.

Office Hours from 8 A. M. to 9 P. M.

CERTAIN CURE

in all cases, or No Charges Made.

Dr. Dow is consulted daily, from 8 A. M. to 9 P. M. as above, upon all difficult and chronic diseases of every name and nature, having by his unwearied attention and extraordinary success gained a reputation which calls patients from all parts of the country to obtain advice.

Among the physicians in Boston, none stands higher in the profession than the celebrated DR. DOW, No. 7 Endicott st., Boston. Those who need the services of an experienced physician and surgeon should give him a call.

P. S.—Dr. Dow imports and has for sale a new article, called the FRENCH SECRET. Order by mail. Two for $1 and a red stamp.

Boston, April 7, 1864.—eodly.

Houses and Lands.

Desirable Estate on Middle Street

FOR SALE.

The new and convenient DWELLING HOUSE, No. 45 Middle street, recently erected by Mr. JOHN CASWELL, is offered for sale. The house has just been built of the best materials, in a most careful and perfect manner. The situation is high and dry; the cellar built of stone, and extending along one of the ways laid in the city. The house possesses many advantages. Situate on one of the most pleasant avenues in the city, with a fine prospect from either side of the dwelling, amid pure and healthy surroundings, the location is one seldom found in the market.

The ROOMS are conveniently arranged, the stories being of good height, windows of fine proportions, and all the finish of the kind found in a first-class house.

For further particulars apply to

THE MAGEE

COOKING STOVE.

The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the

CELEBRATED AND UNEQUALLED

MAGEE COOK STOVE,

as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. The oven plates are covered with plaster which renders it equal to the old-fashioned brick oven for perfection in baking.

There is a new style and very superior broiler and sad iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the exception top there is a large copper Reservoir for hot water; also a large tin warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.

The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shovelling up of the ashes is entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.

For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.

We would refer to the following purchasers:

"MAGEE'S PATENT"

VENTILATING & AIR-WARMING

FURNACES.

The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.

For economy, purity of air and ease of management it has no equal, producing a current of warm air, moist and agreeable—being a fact of the air which comes in contact with the fire-pot is used for respiration; the tendency to produce headache so much complained of in other Furnaces, is entirely obviated.

The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.

To accomplish this many complicated and expensive heating arrangements have been constructed, some possessing but little improvement over former methods, while many have proved a total failure, the reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. The objection, so common in other Furnaces, is obviated in the

MAGEE FURNACE.

The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of cold air through the fire-pot, which ignites them as they pass off from the coal, thus saving at least 20 per cent. of the properties of the heat in the fuel.

No heating apparatus with the smoke-pipe or flue on the top of the dome can be made to consume the gases as they pass off with a large amount of the heat generated, making the chimney the hottest part of your dwelling.

This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.

These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.

For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.

They give entire satisfaction wherever used. We have in store the different sizes, Brigs and Portables, to which we invite the attention of those in want of the best Furnace in the world,—and would refer them to the following named gentlemen, who have them now in use:

Samuel Cleaves, Esq.,	Albert R. Hatch, Esq.,
Aaron H. Hill,	Charles H. Mendum,
Henry F. Wendell,	John Sise, and others.

DR. W. R. MERWIN & CO.'S COLUMN

FOR THE

CHEROKEE MEDICINES.

Cherokee Cure, the great Indian Medicine,

ROOTS, BARKS AND LEAVES.

An unfailing cure for Spermatorrhœa, Seminal Weakness, Nocturnal Emissions, and all diseases caused by self-pollution; such as Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Trembling, Wakefulness, Eruptions on the Face, Pale Countenance, Insanity, Consumption, and all the direful complaints caused by departing from the path of nature.

☞ This medicine is a simple vegetable extract and one on which all can rely, as it has been used in our practice for many years, and with thousands treated it has not failed in a single instance. Its curative powers have been sufficient to gain victory over the most stubborn cases.

☞ To those who have trifled with their constitution, until they think themselves beyond the reach of medical aid, we would say, *Despair not!* the CHEROKEE CURE will restore you to health and vigor, and after all quack doctors have failed!

☞ For full particulars, get a circular from any drug store in the country, or write the proprietors, who will mail free to any person making the same, a full treatment in pamphlet form.

☞ Price, $2 per bottle or three bottles for $5, and forwarded by express to all parts of the world.

Sold by all respectable druggists everywhere.

CHEROKEE REMEDY

—AND—

CHEROKEE INJECTION,

Compounded from Roots, Barks & Leaves.

CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys Stone in the Bladder, Stricture, Gravel, Gleet, Gonorrhœa, and is especially recommended in those cases of Fluor Albus (or Whites in females) where all the old nauseous medicines have failed.

It is prepared in a highly concentrated form, the dose only being from one to two tablespoonfuls three times per day.

It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all of its original purity and vigor; thus removing from the system all pernicious causes which have induced disease.

CHEROKEE INJECTION is intended as an alloy or substitute to the CHEROKEE REMEDY, and should be used in conjunction with that medicine in all cases of Gonorrhœa, Gleet, Fluor Albus or Whites. Its effects are *kindly, soothing and demulcent*, removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the *cheap quack injections.*

☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to full vigor and strength.

☞ For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.

Price—CHEROKEE REMEDY, $2 per bottle or three bottles for $5.

DR. WRIGHT'S

REJUVENATING ELIXIR,

OR ESSENCE OF LIFE.

Prepared from Pure Vegetable Extracts,

Containing nothing injurious to the most delicate.

"As the Phœnix rises from the ashes of its fire, animated with new life," so does this Elixir rejuvenate the system and OVERCOME DISEASE.

The Rejuvenating Elixir is the result of modern discoveries in the Vegetable kingdom; being an entirely new and abstract method of cure, irrespective of all the old and worn-out systems.

This medicine restores to manly vigor and robust health the poor debilitated, worn-down and despairing devotee of sensual pleasure.

The listless enervated youth, the over-tasked man of business, the victim of nervous depression, the individual suffering from general debility, or from weakness of a single organ, will all find immediate and permanent relief by the use of this Elixir or Essence of Life.

☞ Price, $2 per bottle, or three bottles for $5, and forwarded by express, on receipt of money, to any address.

☞ A new and accomodating sort of industry has just been established in Paris. An enterprising genius has made arrangements with most of the tobacconists in the city to act as his agents for the renting of umbrellas. If you are caught in the rain, which people very frequently are in that capricious climate, all you have to do is to step into the first tobacconists, take an umbrella, depositing as security the value of it, and returning it next day to the first tobacco shop you see, receive back your money minus six sous, which is the charge for a day's hire.

☞ Lydia Maria Child writes that when Maryland had become a free State it took ten years off her age at once. She adds: "If I had acted out my impulses I would have swung my bonnet, and given three hurrahs; but it is not proper for women to obey their impulses, you know. I hope, some time or other, to get to a world where spontaneity is not always improper. That must be the reason why they never grow old in the other world."

THE OWL is one of the gardeners and foresters best friends, annually ridding them of dozens of their foes; but notwithstanding this valuable service, we too frequently see him heedlessly destroyed. In some parts of Europe, however, this most sensible bird is kept in families, like a cat, whom he equals in patience, and, if possible, surpasses in alertness. It is well known fact that wherever the barn-owl has been killed off, or very few left, field-mice have increased enormously, and they, in their hunger do peel, and of course destroy the young bolts and other trees in new plantations.

— Elmira A. Grant was lately sentenced to one year's imprisonment in the house of correction at Detroit, for being a common drunkard. Her husband, who is a hard-working mechanic, at present resides in Rochester, N. Y., but becoming tired of his company, she left a good home for a life of abandonment and shame. She boarded at a saloon, and the very man who sold her the liquor was the principal witness against her.

— The San Jose Mercury says the wife of Jose Castro, of Monterey, has given birth to thirty-six children, all of whom are living together in that country. The first twenty are twins, each pair representatives of either sex. Of the remaining children, eleven only were singly born.

"Rotation!" is the cry among the hungry office seekers. "No Rotation" is the stern response of the "ins," who are determined to serve their country and draw their salaries, or die in the attempt. The telegraph says the President will regard Young America, and rule out the "old fogies."—*Post.*

— An officer and two privates were killed in Fort Sumter by the Federal bombardment on the night of the 12th inst.

— The rebels say they captured a drove of five hundred mules from Sherman near the Chattahoochie river, recently.

— Contempt of Court is said to be a common sentiment where Judge McCann holds out in New York.

VERNATELLA.
Warranted to make the Soles of Boots and Shoes water and dampness proof, and wear one-third longer.
VERNATELLA!
Is a preparation from Copper, having no grease, linseed oil, or anything of the kind, and when the soles are once saturated with it, water can no more get through them than through copper itself.
Price 25 Cents Per Bottle,
Sold by all Druggists everywhere.
But its cost (to the purchaser) is really NOTHING, as it makes the soles wear enough longer to more than pay for it, leaving as a net gain the making of Water and Dampness Proof, and the preservation thereby of that priceless gem, the health.

☞ LADIES, READ THIS! ☜
SAVE YOUR HEALTH.
Use Vernatella on the Soles of your Shoes. It makes them water proof and thereby protects your feet from dampness, for the ground is always more or less moist, either from rain or the morning and evening dew.
At wholesale in Boston by Geo. C. Goodwin & Co., 38 Hanover street; S. M. Colby & Co., 36 Hanover st.; M. S. Burr & Co., 26 Tremont st.; Carter, Rust & Co., 49 Hanover st.; and Wholesale Druggists generally. Also, by all the principal dealers in Boots and Shoes.
Manufactured in the Chemical Department of
The Cahoon Manufacturing Company.

American and Foreign Patents.
E. H. EDDY,
SOLICITOR OF PATENTS;
Late Agent of U. S. Patent Office, Washington, (under the Act of 1837.)
76 State street, opposite Kilby street,
Boston.
After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity of rights of patents or Inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.
The Agency is not only the largest in New England, but though at Inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The Testimonials below given prove that none is MORE SUCCESSFUL AT THIS PATENT OFFICE, and the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional service so moderate.
The immense practice of the subscriber during twenty years past has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.
Have, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.
All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved to inventors.
TESTIMONIALS.
"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.
"I have no hesitation in assuring inventors that they cannot employ a person *more competent and trustworthy*, and more capable of putting their applications in form to secure for them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents.
Mr. E. H. Eddy has made for me THIRTEEN applications, on all but one of which patents have been granted, and that is *now pending*. Such unmistakable proof of great talent and ability on his part leads me to recommend *all inventors* to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."
JOHN TAGGART.
During eight months, the subscriber, in course of his large practice, made on *twelve* rejected applications SIXTEEN APPEALS, SEVENTEEN of which was decided in *his favor*, by the Commissioner of Patents.

The Old Established Hospital.
No. 5 Beaver Street, Albany, N. Y.
QUICK CURES AND LOW PRICES.
Over Twenty Thousand Patients Cured Annually!
DR. J. TELLER continues to be confidentially and successfully consulted on all forms of private diseases, at his old Established Hospital, No. 5 Beaver street, Albany, N. Y. Twenty years devoted to this one particular branch of practice, enables him to perform cures such as no other Physician can, and his numerous testimonials being in correspondence with the most eminent Physicians of the Old World, of obtaining the safest as well as the latest remedies for these diseases, offer inducements to the unfortunate of a speedy and rapid cure, to be obtained at no other office in America.
In Syphilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and Spermatic Cords, Bubo, Ulcerated Throat, sore Nose, Tender Shin Bones, Cutaneous Eruptions, Hives, Tetter, All Accesses, and all other impurities of the system, are perfectly under the control of the Doctor's Medicines, and have been tested in more than 20,000 cases annually, with immense Success.
YOUNG MEN.
Young Men addicted to secret habits, who have impaired their health, and destroyed the vigor of their minds, thus depriving themselves of the pleasure of the Married Life, are notified that in consulting Dr. Teller, they will find a friend to console and a Physician who has cured thousands in almost every part of the United States, who applied to Dr. Teller broken down in health, now rejoice in all that makes life desirable and happy. The reader is of course aware that the delicacy of this subject will prevent a more minute description of this terrible disease.
DR. TELLER'S GREAT WORK.
A book for every body.—Startling disclosures. Dr. TELLER's great work for the Married or those contemplating marriage—200 pages—cloth, 25 plates—price 25 cts. Sent to all parts, under seal, by mail, post paid. 50,000 copies sold the past year. The Single Married and the Married Single. A lecture on Love, or how to choose a Partner—a complete work on Midwifery, it contains hundreds of secrets, never before published.—Warranted to be worth three times the amount asked for it, 25 cents, in specie or postage stamps, inclosed, will secure a copy by return mail. Dr TELLER has devoted a lifetime to the cure of those diseases upon which his books treat.
TO THE LADIES.
DR. TELLER still retains the only Agency in America, for the sale of Dr. Ashoff's Italian Female Monthly Pills. The sale of more than 20,000 boxes establishes their reputation as a female remedy, unapproached, and far in advance of every other medicine—for stoppages, irregularities, and other obstructions in females.
A CARD.—Married ladies in certain delicate situations should avoid their use. For reasons see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent by mail or express, to any part of the world, secure from curiosity or damage.
Office hours from 9 A. M. to 8 P. M., and on Sundays from 2 to 5 P. M.
N. B.—Persons at a distance can be cured at home by addressing Dr. J. Teller, M. D., and inclosing a remittance. Medicines securely packed from observation, sent to any part of the world. All cases warranted. No charge for advice.—N. B.—No students or boys employed. Notice this, address all letters to

[Communication.]

HIGH PRICES, NO. 2.—The opponents of the Administration, with a view to change it and reinstate the Democracy in power, resort to false and sophistical arguments to show that such is the vast amount of Treasury notes issued under the authority of Congress to pay the war expenses, and the improbability that our armies will be victorious, that many foolishly believe that the notes, like the old Continental paper money, will depreciate or else never be redeemed. Such might be the result, should our Government be overthrown, but not otherwise. That the paper *currency* of the Confederate Government or of the revolted States, so soon as they are subdued, will not be withdrawn, there can be no doubt; and the foreign capitalists, who have made heavy loans, may seek in vain for their reimbursement. We shall not deplore their loss. But such are the inexhaustible resources of our Free States, such their superior military force and physical energies, that the man who believes that our Government can be subverted by the united rebel forces, must have a disordered imagination.

While, then, our national paper currency, with the above exceptions, is precisely as good as the metallic for all practical purposes, no good reason can be assigned for the present exorbitant high prices of agricultural products and merchandize. With the prospect of a speedy close of the war, and the restoration of peace, there will be a large reduction of the present prices; and it is the duty of every patriotic and good citizen to use his influence in favor of such reduction for the benefit of all, especially the poorer classes. Let all who from sordid motives have hoarded up the gold and silver, and thus withdrawn the same from circulation, suffer the consequences of their folly. The high premium they have given for coin will be their loss, and we ought to have no sympathy for such speculators. They may yet have cause in sorrow to exclaim with the poet—

"O Gold! thou charming, fascinating evil!
Say with what heart thou hast not played the Devil!"

It is conceded that the inflation of the currency, paper or metallic, tends to enhance the price of things generally, but that cannot justify the present unreasonable prices. The wages of labor ought to be reduced, if for no other reason, from patriotic motives. Our products are somewhat diminished by the large number of laborers and others who have joined the army, but the home consumption is thereby lessened, and our soldiers are fed, in part, by supplies from the rebel territory and capture of provisions. Although there is some loss in transporting provisions to the army, yet these circumstances do not justify the high price of labor or provisions at home. We admit that the duties assessed upon foreign and domestic articles are properly added to their prior marketable value, and that the scarcity of any useful article tends to enhance the price. Submitting these brief comments for the public consideration, with a view to reduce high prices generally, we raise to the logical and lucid argument, recently published, of Hon. William Pitt Fessenden, Secretary of the Treasury, showing that the national paper currency is perfectly safe, and will ultimately be redeemed in specie. He is an able financier, and the facts he states may be relied upon as correct. A. R.

GOLD BONDS AND THE NATIONAL BANKS.— The N. Y. Times argues that there will be but few more gold bonds issued. Its reasons are, that as the principal of the gold-bearing public debt now stands $963,389,192, and this gold interest per annum is $56,779,608, this principal will not be carried at present above one thousand millions (or the interest above $60,000,000,) and that the intermediate balance of $36-610,808 will probably be supplied in 10-40's at par as wanted, for currency basis, by the new National Banks in the course of formation, or the old State Banks now being rapidly converted into Nationals.

☞ It appears that men employed in the revenue service are considered to be in the employ of the Treasury Department, and therefore are not credited on the quotas of towns. On this account Portland loses fifty-five men one of its assumed full quota. The Argus says the State authorities of Maine will contest this decision of Provost Marshal General Fry.

☞ The majority for Lincoln in New York is 6,000. His majority in the whole State (says a copper organ,) "is less than it is in the single county of St. Lawrence." Exactly so: and the majority *against* him in New York City, is chiefly from the worse dens of vice and ignorance in that city or the whole land: while the comparatively moral and intelligent County of St. Lawrence goes the other way. Gov. Seymour's *friends*, were in the city;—the Union's friends in the country.

THE REBELLION.

The Richmond Dispatch of the 21st says Gen. Sherman is moving in two columns, one upon Augusta, and the other on Macon. The column marching on the Georgia State road for Augusta will probably go as far as Madison, and then march on Milledgeville, the capital of Georgia. The column marching on Macon will probably go to Crawford, within fifteen miles of the town, and then turn off to Milledgeville and form a junction with the other column. By this movement Macon falls, and the enemy [U. S. Army] are at liberty to move on Augusta, via Georgia Central Railroad to Brownsville, and then march north or on Savannah. Gen. Sherman is moving rapidly, and is not much troubled with transportation. He has burned several stations at the depots he has passed, and is devastating the country generally in foraging.

The rebel Hood, and his army, are said to be at Waynesboro', Tenn., threatening Nashville and Paducah. He is said to have 37 pieces of cannon and 35,000 men, who are greatly in need of clothing, supplies of which they hope to obtain by plundering towns through which they pass. Large numbers of deserters come into our lines daily, many bringing horses and equipments. Gen. A. J. Smith commands our forces opposed to him.

The traitor Breckinridge threatens to invade Kentucky.

Advices from Fayetteville, Ark., say Col. Brooks, with 2,000 rebels, attacked that place Oct. 28, but were repulsed with loss. From that time to the 3d inst. the town was invested, when Fagan, with about 6000 of Price's retreating army, came up and bombarded the place for five hours with two pieces of artillery, but were held at bay until next day, when Gens. Curtis and Blunt arrived, and the rebels skedaddled. The rebels lost nearly 1000 killed and wounded. Our loss was one man killed.

A missionary who traveled about forty miles with Price in Arkansas, reports that Price told him that he lost over 10,000 men in killed, wounded and deserters, and that his expedition into Missouri had been most disastrous.

We have news direct from Richmond of the pirate Tallahassee, which was run on a sand bar as she was going up the Cape Fear river to Wilmington, and wrecked. She had been dismantled, and her guns, &c., saved, but the piratical cruiser will probably prove a total loss.

Early has not gone to Georgia, as reported, but is now confronting Gen. Butler, on the right of the Union lines before Richmond. Perhaps some of Lee's forces have been sent southward.

The report that the steamer Laurel transferred Semmes and his pirates to the steamer Sea King, off Madeira, is confirmed.

The La France says Brazil has broken off relations with the United States, on account of the seizure of the pirate Florida.

The Paris Patrie asserts that England has called upon the great Powers to protest collectively against the seizure of the Florida.

The rebel House of Representatives have just passed a resolution that it is the unalterable determination on the part of the Confederate States, who have suffered all the cruelties of a protracted war, that they will never, on any terms, politically affiliate with a people who have been guilty of an invasion of their soil and the butchery of their citizens.

ARREST OF A HORSE THIEF. Some weeks ago a fellow giving his name as G. W. Sandford, hired a team in Waltham for the purpose of going to Newton. Not returning in time, pursuit was made, and he was followed by the officers to Stoddard, N. H. The house in which he was known to have taken refuge was surrounded, but the thief escaped to the woods. Since then he has not been seen in Boston until Tuesday, when he was arrested.

☞ In our New York letter of Thursday, "McClellan the hero of three wars", should of course have been, "three *rivers*,—the Potomac, the James, and the Sal:" For however good and great a man Little Mac may be, he is not to "N's" thinking nor ours, a heroic warrior; but evidently much prefers to use the pen, rather than the sword. He may be all the wiser and better for that, but still this don't alter the facts.

SENATE. — The terms of thirteen members of the present Senate will expire on the 4th day of March next. Several of them have been re-elected, and successors have been chosen in two or three instances. The Union men lose a Senator in New Jersey, and gain one in Illinois. Two Union Senators will be elected from Nevada, so that the next Senate will stand as follows: Union 40, opposition 14.

— It is estimated that there is a population of 20,000 in New York City that pay neither rent for the dwellings they occupy, nor municipal taxes as holders of real estate. They comprise that portion of the population known as "squatters," and mostly to be found in the region of Central Park. They are principally engaged in the retail rag business.

TO THE PEOPLE OF NEW HAMPSHIRE. The Constitution of New Hampshire wisely affirms that "A well-regulated militia is the proper, natural and sure defence of a State." The experience of the past few years demonstrates this fact. Different sections of our State have been threatened with invasion, others have been disturbed by internal dissension and open violence. In every instance we have been compelled to appeal to the General Government for protection. Destitute of "a well regulated militia", we have been powerless to defend our own houses. The armies of the nation, battling for our liberties in the far South, must be weakened to perform a duty which justly devolves on us, and which we might easily perform.

Our citizens have realized this defect in our military system. There is hardly a hamlet in the State in which her loyal sons have not felt the necessity of some body of trained men who might serve as a basis of organization in the hour of sudden and unforeseen danger. But the defect is as yet unremedied. The only organized bodies of militia within our borders are:

The Amoskeag Veterans, of Manchester; the Lafayette Artillery, of Lyndeborough; the Strafford Guards, of Dover; the Granite State Cadets, of Nashua; the Bedford Light Infantry, of Bedford; the Governor's Horse Guards, of Concord; the National Guards, of Manchester; the Martin Guards of Manchester.

Of these organizations, two (the Veterans and Horse Guards) hold charters direct from the Legislature, and can hardly be classed with propriety as State militia. The other six organizations comprise perhaps 300 effective men. This is the entire strength which the Governor, as "Commander-in-chief of the Army and Navy" of New Hampshire, has under his control with which to repel such invasion as even now threatens us from across the border, or put down a sudden insurrection within our own limits.

In these circumstances, I would call the attention of the people of the State to the militia law which was enacted at the June Session, 1862, and urge upon them the importance of organizing themselves into companies of volunteer militia for the purpose of State defence, under the provisions of that act. This act provides that fifty citizens of any city or town may, upon petition, have leave to organize as a company of volunteer militia, (either infantry or cavalry,) and recommend suitable persons to be commissioned as officers. The State Government will furnish each company, thus organized, with arms and equipments, as prescribed by the Army Regulations of the United States, and also pay the sum of $50 per annum towards procuring a suitable armory in which to store the same.

These companies are required by the law to parade on the afternoon of the fourth Tuesday of May, and also on one afternoon immediately preceding the Fall Encampment; for each of which day's service they receive $1.00 per number. They are also required to attend a three day's encampment in the Fall of each year, for attendance on which they receive $2.50 per man for each day's pay and subsistence, and five cents per mile for travelling fees to and from the place of encampment. In the case of a company of Cavalry, or Light Artillery, the same allowance will be made for each horse required to be furnished.

These companies, thus organized, are subject to the orders of His Excellency the Governor, within the boundaries of the State; *but he has no authority to order them beyond its limits.* In that respect they stand on a perfect equality with the enrolled militia of New Hampshire, and can only be called into the service of the General Government by draft, or by voluntary enlistment.

Believing that our people feel the necessity of a larger and more perfectly organized body of volunteer militia within our borders, I have embodied the general features of the existing law in this circular, and shall be happy to give additional information in person or by letter to any who may think of availing themselves of the provisions of this act. Copies of the entire law will be promptly forwarded on application at this office.

Let me, in conclusion, once more impress upon the people of New Hampshire the necessity of prompt and efficient action in this matter. Let me remind them of the advantages which may accrue to themselves from a judicious liberality in fostering the military spirit among our young men. Not only protection from possible danger, but increased facility in meeting the requisitions of the General Government will result from the organization of companies of volunteer militia in such important centres as Concord, Claremont, Keene, Lancaster, Portsmouth and Laconia.

The city of Manchester has always been distinguished for its military spirit. It boasts at the present time one chartered company, two companies of uniformed militia, and one volunteer association (the Matt Head Zouaves), which is inferior in discipline and patriotic spirit to neither of the others. These companies have again and again served as a nucleus around which to gather companies for actual service; and Manchester has promptly filled her quota at an expense which has never exceeded, and seldom reached, $150 per man, while other towns, destitute of military organizations, have been compelled to offer a bounty of $1000. Clearly, the money which was spent in organizing and equipping the volunteer militia of that city, was a most profitable investment. A similar investment has saved to some of our sister States millions of dollars.

Will not wealthy and patriotic citizens in other places consider the propriety of lending a helping hand to the young men who would gladly organize and drill. There are such in every town. There are, in our returned soldiers, men who are competent drill-masters and efficient officers. We want no showy uniforms, no fuss and feathers. The State law restricts the costume of new companies who may purchase a uniform, to simple blue—inexpensive and serviceable. But no uniform at all is needed. What we do need is men trained to bear arms, as their fathers did before them in good old Jackson times.

A VICTIM OF THE FLORIDA.—Capt. James S. Dillingham, Jr., late master of ship Snow Squall, condemned at Rio Janeiro, and who was a passenger on board barque Mondamin, at the time that vessel was captured by the Florida, Aug. 20, arrived at his home in Chelsea, a few days since. Capt. Dillingham lost all his nautical instruments and charts at the time of his capture, but was permitted to take his other personal effects, and was landed at Porto Rico, whence he took passage on board schooner Carter, for Baltimore.—While in command of the ship Snow Squall Capt. Dillingham narrowly escaped capture by the privateer Tuscaloosa, but got clear by his pluck and good sailorship, which have in several special instances before preserved him from other great perils on the deep. Capt. D. is somewhat known in this city, having married a daughter of B. P. Shillaber, Esq.; and it added not a little to the discomforts and vexations of a young husband detained in a foreign land, that he could receive no letters from home, where the most "interesting" events were transpiring. However, all hands are as well as could be expected; and we congratulate the family on their happy reunion. How are you, Granpa Partington?

Subscription price $2 50 per share to original Subscribers, and no further Assessments.
Working Capital, $25,000, Cash.
This is the cheapest and most favorable Oil property yet offered for profitable and safe investment in the great Allegheny valley. It consists of about **900 acres** in the noted Oil Creek Counties of Cattaraugus and Allegany, N. Y., and in close proximity to the Erie Railroad. It has been carefully selected from an area of **35 miles**, including **14 farms**, which give the richest show of oil developments in the entire region, and including no mountain lands, useless for oil wells. There are already three wells in progress, one of which is down 480 feet on the "Moore Farm," with an abundant show of oil. A remarkable natural oil spring also exists on this farm, near the well, constantly yielding gas and oil of extraordinary quality, being of a greenish hue and like the celebrated "Mecca Oil." very valuable as a *lubricator*, commanding more than double the price of the ordinary petroleum. On the "Talcott Farm" a well is down 575 feet, with a fine show of oil and gas. Near this well is the famous **INDIAN SPRING**, which flows oil in large quantities. Remarkable outflows of oil exist on the "Metcalf Farm," on which a well is now boring, with rich show of oil. The first oil is reached at *fifty feet* on these lands wherever boring has been done. Two engines are now constantly at work on the wells.
The rare character of this oil gives immense value to this property, being so superior as a lubricator. Its near proximity to the Erie Railroad enables the oil to be delivered in market $1 50 per bbl. less than from Oil Creek, Pa.
The very *low cost* of this property to subscribers for the *large amount of boring territory*, together with the valuable improvements already upon it, and the **Rare Quality** of its oil, must command the attention of all to its unrivalled advantages for investment and profit.
The principal part of the stock is already taken; when closed it is proposed to organize under the laws of the State of New York.
Subscription books are open for the sale of the balance of this stock, and samples of the crude petroleum can be seen, and full particulars obtained, at the offices of

HALE'S
Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the means of all. At last after a long course of chemical experiments, he found that by adding to these *five* other ingredients, each one valuable in itself, he not only obtained the desired results but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the general public as a safe, pleasant and infallible remedy.

PRICE, 50 CENTS PER BOTTLE.

A PHYSIOLOGICAL VIEW OF MARRIAGE—Containing nearly 300 pages, and 130 fine plates and Engravings of the Anatomy of the Human Organs in a state of Health and Disease, with a Treatise on Early Errors, its deplorable Consequences upon the Mind and Body, with the Author's Plan of Treatment—the only rational and successful mode of cure, as shown by the report of cases treated. A truthful adviser to the married, and to those contemplating marriage, who entertain doubts of their physical condition. Sent free of postage to any address, on receipt of 25 cents, in stamps or postal currency, by addressing DR. LACROIX, No. 31 Maiden Lane, Albany, N. Y.

"A Wonderful Discovery."

DR. TEBBETTS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "Dye," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new HAIR in all cases on BALD HEADS, when the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With it every "GRAY HEAD" in New England can be restored in less than sixty days.

EPILEPTIC FITS CAN BE CURED!

DR. LOCKROW having become eminently successful in curing this terrible malady, invites all similarly afflicted to call or send for references and testimonials of numerous cases cured of from one to twenty-four years standing. He devotes his attention especially to diseases of the Cerebro-Spinal Axis, or Nervous System, and solicits an investigation of his claim to public confidence.

He may be consulted at his private residence, No. 141 West 23d st., daily from 9 A. M. until 4 P. M., except Saturday and Sunday. Address all letters to DR. V. B. LOCKROW.

A Card to Invalids.

A Clergyman, while residing in South America as a missionary, discovered a safe and simple remedy for the Cure of Nervous Weakness, Early Decay, Diseases of the Urinary and Seminal Organs, and the whole train of disorders brought on by baneful and vicious habits. Great numbers have been already cured by this noble remedy. Prompted by a desire to benefit the afflicted and unfortunate, I will send the receipe for preparing and using this medicine, in a sealed envelope, to any one who needs it, *Free of Charge*.

Please inclose a stamped envelope, addressed to yourself.

☞ An Address or an appeal from Adj. Gen Head, of interest to every man in the State, will be found in another column. We hope our citizens will adopt its suggestions, for we never ought to have less than two good Militia Companies here; and with the great number of men employed at the Navy Yard, and the immense interests at stake there, four companies might well be organized and sustained here so long as present circumstances exist.

We cannot omit to remention, in this connection, the fact that ex-Gov. Goodwin, of our own city, was for years almost the only public man in New Hampshire, who persistently, uniformly urged an efficient militia system. Better had it been for us and the country, that his councils were heeded. Let us not delay it too long, till too late we may lament our negligence and apathy.

NAVAL.—The U. S. steamer Shawmut, which arrived here on the 20th, from a cruise on the coast of Nova Scotia and in the Bay of Fundy, had a very stormy cruise, with cold weather—ice, cold, sleet and snow. She is commanded by Lieut. Com. Geo. U. Morris, who fought the Cumberland in Hampton Roads until she sunk with her colors flying; and has for sailing master Acting Ensign G. A. Churchell, formerly of Dorchester, Mass., who in March last saved the U. S. steamer Memphis from destruction by a torpedo ram attack in North Edisto river, S. C. The Shawmut came in for repairs.

The DeSoto is in the Dry Dock receiving repairs upon her hull. She is to be sent to Baltimore to receive new boilers, which have been for some time past manufactured for her.

A Naval Court of Enquiry is in session at the Navy Yard, consisting of Com. S. C. Rowan, President, Capts. John R. Goldsborough and Wm. M. Walker, members, and Lieut. Henry J. Berbap, Judge Advocate, and is engaged in examining the facts relative to reception of recruits at the naval rendezvous at Kittery and the Receiving Ship. Wm. H. Hackett is Counsel for Acting Master Hills, against whom certain statements have been made.

The draft for the payment of the workmen at the Yard was received this week, and the men paid for October.

LOOK OUT FOR BURGLARS.—Some time on Wednesday night the flour store of Messrs. Eldredge was broken open, and the safe lock charged with powder, which exploded; but the safe was not blown open, and the thief decamped without booty. He entered by prying up a window sash, and evidently tried to burn the building as well as to get the money, but failed of the fire—and would have got no money if he had opened the safe.

Two houses near the west end of the city were also entered, in one case by two persons.

☞ City Marshal Dresser arrested several young men last evening for loafing and obstructing the public passage in the lobby of the Post Office. We learn that much complaint is made in regard to the practice of many young men standing longer than is necessary to do their business,—and our Postmaster will be heartily sustained in putting a stop to it.

THE FAIR—it don't matter whether we mean the great Sailors' Fair, or "the fair" sex, greater yet—for to either, a man must surrender. Hear what our friend "L," the spicy and gallant Boston correspondent of the Ballot, says about it:

"You must know that at every turn you are assailed by a bevy of handsome young ladies, especially gotten up for the occasion, who try to touch a tender spot in you, with:—"Won't you take a share in this, that or other article?—tickets all prices, from 20 cts. to five dollars; now do, will you, that's a good fellow?" You of course disgorge. How could you help it? Frank Miller and yours respectfully "did" the Fair on Saturday. Not being quite used to the way they have of doing things up here, my friend and colaborer "bled" profusely; and I am not aware at the present moment that he has received any return for what he laid out, excepting perhaps the bounteous smiles and compliments of aforesaid young ladies. He led me into ambuscade, though, in introducing me to a dozen young ladies from Portsmouth, each with some fancy article in her hands, and each in turn imploring Mr. 'L.' to take a share in said article."

Since Br. L. has let on *so* much, we shall add that the irresistible syrens charmed a round $36 out of *his* pocket; and the only reason that he didn't shell out and try his luck to two or three times that amount, like somebody else we know, was because L. changed his base and beat a retreat in good season. He'd better talk about "other return"—why, "virtue is its *own* reward!" though we shouldn't have objected a bit to that ox also!

☞ On Thanksgiving Day, at Rochester, the District Convention of the Democratic Party nominated Hon. DANIEL MARCY for re-election to Congress.

—— Gen. Gilman Marston did not leave Exeter last week, as he received by telegraph an extension of his furlough.

☞ Capt. Geo. W. Towle, of Company G, 10th N. H. Regt., has been spending a short furlough at his home in this city. He has been suffering considerably from camp sickness, but his health is now much improved.

☞ The friends of the Pearl St. Free Baptist Parish called on their Pastor on the eve of the 23d., with a very nice turkey, pies, cakes and 86 dollars in money, which they left for his benefit. Many thanks.

☞ Our market was well supplied with poultry and other "fixins" for Thanksgiving dinners. Poultry brought about 25 cents a pound, which is cheap enough for these times.

The Greenland "Old Guard" wishes us to correct the statement of votes at the presidential election in that town. The vote stood 90 Dem. to 98 Abo., instead of 86 to 98 as before published. A gain of 2 for the "Old Guard." — *States & Union.*

Why Mrs. C., how nice and clean your clothes always look! What kind of soap do you use? Well, Mrs. D., it gives me great pleasure to say that I use the Gold Medal Soap, manufactured by J. Monroe Taylor, 112 Liberty street, New York, and as long as he keeps the quality as good as now, I shall never use any other. Every one who will try it, will say just what I am telling you. Try it and be convinced. 30

☞ Special attention is asked to Hunnewell's preparations, advertised on our inside columns. They are based on true medical laws, used very largely by Physicians, and most undoubted testimonials are in the hands of the proprietor, always open to inspection. Let Portsmouth and its vicinity bear testimony by a confidence to test them, which will be sacred

He is the happiest who does most to make others happy. The inventor of Herrick Allen's Gold Medal Saleratus must be the happiest man in existence, for we hazard nothing in saying that the use of the Gold Medal Saleratus cannot fail to make a happy household. Our better half says she does not fear of our ever frowning, as long as she can get the genuine Herrick Allen's. We say success to the inventor, and if everybody knew how good it is, no other would be used. A good many of our Merchants have it. Their depot is 112 Liberty Street, New York

SAVE YOUR FUEL!

THE MODEL COOK.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

The subscriber has reduced the prices of the Model Cook Stoves FIVE DOLLARS each, to conform to the decline in gold.

RYE, N.H., Feb. 26, 1848. "I hereby certify that my daughter has had the salt rheum for a number of years—some of the time so badly as to prevent her labor, or even rest—as it affected her hands very much. A large sum had been expended to the most celebrated physicians, for Sarsaparilla Syrup, &c., &c., but she obtained no relief until I procured some ten or twelve bottles of Dr. Swett's PANACEA, and several bottles of his Humor Wash, which have effected a cure. There can be no mistake, as this cure was effected more than three years ago. No other medicines can equal Dr. Swett's in removing the various kinds of humors. I have sold it to a number of my acquaintances, who were afflicted, and witnessed many full cures effected by it since. I have acted as agent for the sale of it. JOSIAH JENNESS.

PORTSMOUTH, April 21st, 1862.

"I have for several years been afflicted with dizziness in my stomach, loss of appetite, and often vomited up all of my food immediately after eating it, and all medicine failed to give any relief until about a year ago, when I took one bottle of DR. S. SWETT'S PANACEA, which fully cured me, so that I have not had the least trouble from any of these complaints since, and I enjoy good health. M. LOW D.

From ELDER I. CHESLEY, *Lee, May 31, 1841.*

DR. SWETT: Permit me to testify, as I feel in duty bound to do, that my daughter was afflicted with scrofulous humors, and that previous to your visiting our house in the spring of 1840, she had been confined for a number of months, without her nature, but day or night. She had applied to a number of physicians, but continued to grow weaker till she commenced using your PANACEA and HUMOR WASH. Since then, she has recovered her health so far as to rest quietly by night, and labor by day. I esteem your medicine one of the best that can be found for the diseases above named. I. CHESLEY.

☞ Any one returning the remainder of a bottle or box of Dr. Swett's medicines shall have pay for it, if it do not agree with his case, or if not worth the price. All medicines directed to DR. S. SWETT, No 2 High street, Portsmouth, N. H., promptly attended to. may26

Houses and Lands.

Desirable Estate on Middle Street

FOR SALE.

The new and convenient DWELLING HOUSE, No. 45 Middle street, recently erected by Mr. JOHN CASWELL, is offered for sale. The house has just been built of the best materials, in a most careful and perfect manner. The situation is high and dry; the cellar built of Biddeford granite, being one of the very best in the city. The house possesses many advantages. Situate on one of the most pleasant avenues in the city, with a fine prospect from either side of the dwelling, amid pure and healthy surroundings, the location is one seldom found in the market.

The ROOMS are conveniently arranged, the stories being of good height, windows of fine proportions, and all the finish of the kind found in a first-class house.

For further particulars apply to

THE MAGEE

COOKING STOVE.

The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the

CELEBRATED AND UNEQUALLED

MAGEE COOK STOVE,

as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. The oven plates are covered with plaster, which renders it equal to the old-fashioned brick oven for perfection in baking.

There is a new style and very superior broiler and cad-iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the extension top there is a large copper Reservoir for hot water; also a large tin warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.

The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shoveling up of the ashes is entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of kindling every day.

For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.

We would refer to the following purchasers:

"MAGEE'S PATENT"

VENTILATING & AIR-WARMING

FURNACES.

The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.

For economy, purity of air and ease of management it has no equal, producing a current of warm air, moist and agreeable;—and as none of the air which comes in contact with the fire-pot is used for respiration, the tendency to produce headaches so much complained of in other furnaces, is entirely obviated.

The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.

To accomplish this many complicated and expensive heating arrangements have been constructed, some pretending to have improvement over former methods, while many have proved a total failure. The reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the

MAGEE FURNACE.

The fire or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of cold air through the fire-pot, which ignites them as soon as they come off from the coal, thus saving at least 20 per cent. of the properties of the heat in the fuel.

No heating apparatus with the smoke-pipe or flue on the top of the cone can be made to consume the gases of the coal, as they pass off with a large amount of the heat generated, making the chimney the hottest part of your dwelling.

This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.

These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.

For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.

They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of the Furnace in the world,—and would refer them to the following named gentlemen, who have them now in use:

Samuel Cleaves, Esq.,	Albert R. Hatch, Esq.,
Aaron H. Hill,	Charles H. Mendum,
Henry F. Wendell,	John Sise, and others.

FOR THE

CHEROKEE MEDICINES.

Cherokee Cure, the great Indian Medicine,

ROOTS, BARKS AND LEAVES.

An unfailing cure for Spermatorrhœa, Seminal Weakness, Nocturnal Emissions, and all diseases caused by self-pollution; such as Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Trembling, Wakefulness, Eruptions on the Face, Pale Countenance, Insanity, Consumption, and all those fearful complaints caused by departing from the path of nature.

☞ This medicine is a simple vegetable extract and one on which all can rely, as it has been used in our practice for many years, and with thousands treated it has not failed in a single instance. Its curative powers have been sufficient to gain victory over the most desperate cases.

☞ To those who have trifled with their constitution, until they think themselves beyond the reach of medical aid, we would say, *Despair not*; the CHEROKEE CURE will restore you to health and vigor, and after all quack doctors have failed!

☞ For full particulars, get a circular from any drug store in the country, or write the proprietors, who will mail free to any one desiring the same, a full treatment in pamphlet form.

☞ Price, $2 per bottle, or three bottles for $5, and forwarded by express to all parts of the world.

CHEROKEE REMEDY

—AND—

CHEROKEE INJECTION,

Compounded from Roots, Barks & Leaves.

CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys, Stone in the Bladder, Stricture, Gravel, Gleet, Gonorrhœa, and is especially recommended in those cases of Fluor Albus (or Whites—from this) where all the old nauseous medicines have failed.

It is prepared in a highly concentrated form, the dose only being from one to two tablespoonfuls three times per day.

It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all of its original purity, and vigor; thus removing from the system all pernicious causes which have induced disease.

CHEROKEE INJECTION is intended as an ally or assistant to the CHEROKEE REMEDY, and should be used in conjunction with that medicine in all cases of Gonorrhœa, Gleet, Fluor Albus or Whites. Its effect are healing, soothing and diuretic; removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the *cheap quack injections.*

☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to full vigor and strength.

☞ For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.

Price—CHEROKEE REMEDY, $2 per bottle or three bottles for $5.

DR. WRIGHT'S

REJUVENATING ELIXIR,

OR ESSENCE OF LIFE.

Prepared from Pure Vegetable Extracts,

Containing nothing injurious to the most delicate.

"As the Phœnix rises from the ashes of its fire, animated with new life,"—so does this Elixir rejuvenate the system and OVERCOME DISEASE.

The Rejuvenating Elixir is the result of modern discoveries in the Vegetable kingdom; being an entirely new and abstract method of cure, irrespective of all the old and worn-out systems.

This medicine restores to manly vigor and robust health the poor debilitated, worn-down and despairing devotee of sensual pleasure.

The listless enervated youth, the over-tasked man of business, the victim of nervous depression, the individual suffering from general debility, or from weakness of a single organ, will all find immediate and permanent relief by the use of this Elixir or Essence of Life.

☞ Price, $2 per bottle, or three bottles for $6, and forwarded by express, on receipt of money, to any address.

The Chronicle.

☞ "Time was, that when the brains were out, the man would die."—But times have changed. A philosopher in New Hampshire lately "suggested that the election of Mr. Lincoln was fatal to the country, but would be advantageous to the Democratic party," — whereupon Uncle Toby thought that if the country were killed or destroyed, the success of this or that party was of no consequence; But now the Philosopher explains, saying, "that a suffering and repentant people should employ another party to restore it."

The Philosopher then goes on to say:

Uncle Toby artlessly inquires why the Democratic party voted against Mr. Lincoln if his election is their salvation?—It don't occur to him at all that we should prefer the welfare of the country to that of any party on the face of the globe.

If the above extract really means what it says, it exhibits the drollest piece of political *strategy* ever heard of.

Let the reader bear in mind, that the Philosopher, and his paper the Union, and the *whole party* to which they belong, did all they could to *defeat* Pres. Lincoln's re-election:—and that they did this *only* for the salvation of the country; though they knew all the time that his election, would be the *best* thing that could happen for the democratic party.

If there were one grain of truth in all this,—Five Pointers in New York City, who gave their votes 11 to 1 against Mr. Lincoln, were the most self-denying and patriotic men in all the country! And the similar three Wards in Boston, which chose *the-six* representatives, were the wisest as well as the best men in Massachusetts.

But there is no truth in it. Only the writer must say something to soothe his defeated readers, and so he said that. U. T.

'TIS TRUE, THO PITY 'TWERE, 'TIS TRUE.—The Boston Post well says that "it can hardly be denied that the raffle is the most popular as well as the most efficient means of obtaining contributions, whatever strict moralists may say about it. The picture sale at the Fair, where real gems of art were sold for little more than half what artists are accustomed to receive, will illustrate this. Bierstadt's delightful picture sold for less than had previously been offered for it at private sale, and the works of some of the best Boston artists brought scarcely more to the treasury of the Fair, than some gaudy Affghan or elaborate pin cushion." And the reason is, that everybody (almost) likes, think or talk as they may, to make a "venture"—from the five-year old boy with his marbles, up or down to the money-king in his marble palace, or the gamblers in cotton or gold. And while almost anybody can and will give or risk five or fifty dollars in a good cause, but few care to increase it a hundred fold, even if they have so much.

We speak of what we do know, in this matter, and testify to what we have seen; and if we didn't get the big ox, we suppose we *did* have a "chance" to get him,—which was all any of us paid for. And whoever put their $50 or $100 into the thousand or more different raffles, and got nothing *else* out, can and should feel sufficiently recompensed in aiding so good a cause in the way they preferred for themselves. F.

SHARP PRACTICE.— The Salem Gazette has this item:

The other day a man in this city sent a boy to collect a bill of a person considered among the "doubtful" kind, and who sold liquor for a living. Bluffing off the boy with a plump refusal to pay, the fact was reported to the person having the demand, who gave the bill to the messenger, telling him he might keep the bill and all he could collect from it. In a day or two the young man got the money in full, greatly to the surprise of the party to whom the debt was due. On being asked how he collected the claim, he replied, "I first bought a pint of liquor, and then presenting the bill, told the dealer if he did not pay it, I would complain of him for selling and be a witness against him." The dealer paid up in full, and the lad went out and poured away his liquor.

A celebrated New York doctor prescribed for an old lady patient "syrup of hirthorn," and wrote his prescription in the usual cabalistic characters, "Syr. Rham. Cath." On inquiring if she'd taken the medicine, a thunder cloud darkened her eyes and she exclaimed—No! I ain't going to take your syrup of ram cats for anybody under heaven."

Every man who is not a monster, a mathematician or a mad philosopher, is the slave of some woman.

— The dandy who makes the greatest flourish isn't always in a flourishing condition.

— We prefer oil-mills to rhyme-factories —lubrications to lucubrations.

VERNATELLA.
Warranted to make the Soles of Boots and Shoes water and dampness proof, and wear one-third longer.
VERNATELLA
Is a preparation from Copper, having no grease, linseed oil, or anything of the kind, and when the soles are once saturated with it, water can no more get through them than through copper itself. **Price 25 Cents Per Bottle,**
at retail everywhere.
But its cost to the purchaser is really NOTHING, as it makes the soles wear enough longer to more than pay for it, leaving as a net gain the making of them Water and Dampness Proof, and the preservation thereby of that priceless gem, the health.
☞ LADIES, READ THIS! ☜
SAVE YOUR HEALTH.
Use Vernatella on the Soles of your Shoes. It makes them water proof and thereby protects your feet from dampness, for the ground is always more or less moist, either from rain or the morning and evening dew.
At wholesale in Boston by Geo. C. Goodwin & Co., 38 Hanover street; S. M. Colcord & Co., 86 Hanover st.; M. S. Burr & Co., 26 Tremont st.; Carter, Rust & Co., 43 Hanover st.; and Wholesale Druggists generally; by all the principal dealers in Boots and Shoes.
Manufactured in the Chemical Department of **The Cabeen Manufacturing Company.**

American and Foreign Patents.
R. H. EDDY,
SOLICITOR OF PATENTS,
Late Agent of U. S. Patent Office, Washington, (under the Act of 1837,)
76 State street, opposite Kilby street,
Boston.
After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds, Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.
The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The Testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional service so moderate.
The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.
These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.
All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.
TESTIMONIALS.
"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.
"I have no hesitation in assuring inventors that they cannot employ a person *more competent* and *trustworthy*, and more capable of putting their applications in form to secure for them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents
Mr. R. H. Eddy has made for me THIRTEEN applications, on all but ONE of which patents have been granted, and that is *now pending*. Such unmistakable proof of great talent and ability on his part leads me to recommend *all* inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges." JOHN TAGGART.
During eight months, the subscriber, in course of his large practice, made on *twice* rejected applications SIXTEEN APPEALS, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents. R. H. EDDY.

The Old Established Hospital.
No. 5 Beaver Street, Albany, N. Y.
QUICK CURES AND LOW PRICES.
Over Twenty Thousand Patients Cured Annually!
DR. J. TELLER continues to be confidentially and successfully consulted on all forms of private disease, at his old Established Hospital, No. 5 Beaver Street, Albany, N. Y. Twenty years devoted to this one particular branch of practice, enables him to perform cures such as no other Physician can, and his facilities are such (being in correspondence with the most eminent Physicians of the Old World,) of obtaining the safest as well as the latest remedies for these diseases, offer inducements to the unfortunate of a quick and rapid cure, to be obtained at no other office in America.
In Syphilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and Spermatic Cords Bubo, Ulcerated Throat, Sore Nose, Pimples, Blotches Bones, Cutaneous Eruptions, Biles, Ulcers, Abscesses, and all other impurities of the system, are perfectly under the control of the Doctor's Medicines, and have been tested in more than 20,000 cases annually, with immense Success.
YOUNG MEN.
Young Men addicted to secret habits, who have impaired their healths and destroyed the vigor of their minds, thus depriving themselves of the pleasure of the Married Life, are notified that in consulting Dr. J. Teller, they will find an experienced counselor and a Physician who has cured thousands, in almost every part of the United States, who applied to Dr. J. Teller, and who can now rejoice in all that makes life desirable and man happy. The reader is of course aware that the delicacy of this subject will prevent a more minute description of this terrible disease.
DR. TELLER'S GREAT WORK.
A book for everybody.—Startling disclosures. Dr. Teller's great work for the Married or those contemplating marriage—200 pages—full cut plates—price 25 cts. Sent to all parts, under seal, by mail, post paid, on receipt of 25 cts. Over 50,000 copies sold the past year. The single Married and the Married happy. A lecture on Love, or how to choose a Partner—a complete work on Midwifery, it contains hundreds of secrets, never before published.—Warranted to be worth three times the amount asked for it. 25 cents, in specie or postage stamps, inclosed, will secure a copy by return mail. Dr Teller has devoted a lifetime to the cure of those diseases upon which his books treat.
TO THE LADIES.
Dr. Teller still remains the only Agency in America, for the sale of Dr. Vichol's Italian Female Monthly Pills. The sale of more than 20,000 boxes establishes their reputation as a female remedy, unapproached, and far in advance of every other medicine—for stoppages, irregularities, and other obstructions in females.
CAUTION.—Married ladies in certain delicate situations should avoid their use. For reasons see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent, by mail or express, to any part of the world, secure from curiosity or damage.
Office hours from 8 A.M. to 8 P.M., and on Sundays from 9 to 5 P.M.
N. B.—Persons at a distance can be cured at home by addressing a letter to Dr. J. Teller, enclosing a remittance. Medicines securely packed from observation, sent to any part of the world. All cases warranted. No charge for advice.—N. B.—No students or boys employed. Notice this, address all letters to

MONDAY, NOVEMBER 28, 1864.

THE REBELLION.

Government dispatches at Washington from City Point, Nov. 24, report nothing new or important, except the arrival of rebel deserters, who report the occupation of Macon by Sherman.

The intelligence received by the Government by telegraph from Fortress Monroe Friday morning from the Savannah Republican is regarded as highly favorable to the programme which Gen. Sherman is consummating.

The Fortress Monroe telegraph here referred to, says, the steamers Atlantic and Blackstone arrived at Fortress Monroe on Thanksgiving morning with about 1245 exchanged prisoners, 10 being lost on the passage. They left the Savannah river at noon on the 22nd inst. The Baltic was loading when they left. The exchange of prisoners was going on well. Capt. Gray says that just before he left there it was reported that Macon and Milledgeville were burned. The Legislature was in session at Milledgeville, but was dissolved in haste and the members had scattered in every direction.

The total number of exchanged prisoners to be brought up from Savannah river by our whole fleet is estimated at 10,000, and judging from the appearance of those already received, they must be in a deplorable condition.

A private rebel dispatch received in Savannah, Nov. 11, from Macon, says the enemy crossed the Ocmulgee in force, on Sunday the 20th, at Plaster's factory, eight miles east of Indian Spring. They are reported to be from 30,000 to 40,000 strong. This would seem to strengthen the belief that Augusta is their object. The Central Railroad, near Greswaldville, was cut at 3 P. M. on the 20th. The telegraph is also destroyed. Communication between Savannah and Macon is destroyed. The wires between Gordon and Milledgeville are also cut.

A letter from Beauregard urges the Georgia people to "obstruct and destroy all the roads in Sherman's front, flank and rear, and his army will soon starve in your midst. Be confident, be resolute, trust in an overruling Providence, and success will soon crown your efforts. I hasten to join you".

Some eminent Georgia rebels in Richmond, write home, as follows:

We have had a conference with President Davis and the Secretary of War, and assure you they have done and are still doing all that can be done to meet the emergency that presses upon you. Let every man fly to arms. Remove your negroes, horses, cattle and provisions from Sherman's army, and burn what you cannot carry. Burn all the bridges and block up the roads in his route. Assail the invaders in front, flank and rear by night and by day. Let him have no rest.

The mail boat at Washington from City Point Friday brings nothing of special importance from the front, except a report that Early's force had arrived in Butler's front. It seems probable from concurrent rumors that Lee has dispatched some of his troops to Georgia.

The special correspondent of the Confederate Chronicle and Sentinel, writing from the right wing of the army of Tennessee, near Jonesboro, Ga., on the 15th, says; A portion of the army having been reinforced, such a disposition has been made of it as to make foraging by the enemy extremely dangerous. Our army is well fed, but many soldiers are destitute of shoes, blankets, &c.

By Telegraph—Sunday noon.

WASHINGTON, Nov. 26.—We have received full files of Richmond papers up to Friday morning. The Whig of Thursday, while admitting the fall of Milledgeville, says there is no news at the War Department. The Enquirer says: "A repetition of the rumors concerning the occupation of Milledgeville by Gen. Sherman occurred yesterday, and as a rumor, whether immediately correct or not, was accepted as a matter of course. We may suppose for the sake of hypothesis as to the situation in Georgia that the city has fallen. Of course there could have been no determined resistance. This supposition gives color to the rumor that a strong force of the enemy has made a demonstration upon Augusta, within 20 miles of which place it is reported they were encountered by our troops and that their left wing was driven back in confusion, and an assault by their right wing repulsed with severe loss. Savannah being their objective point, this movement can only be called a feint with the view of raiding upon Augusta and destroying it. It is believed that the large fleet which has been in preparation in the James River for some time past is intended to co-operate with Sherman. There seems to be nothing definite from Georgia. The prevailing impression, based upon all information thus far received, is that Sherman has passed by Macon, and that he will move towards the coast without regarding an attack on the defences of Augusta. He will of course desolate the country through which he passes. Now if Sherman has really attempted so wild and mammoth a raid, unless we are greatly deficient in forces in that quarter, his expedition will come to early grief. We look hopefully to Georgia, and confidently expect great results."

NEW YORK, Nov. 26.—The excitement consequent upon the rebel plot to burn the city last night and to-day have not lessened, as developments continue to show that it was a deep laid affair. Altogether about thirty places were fired, including 15 hotels and many places of amusement. An attempt was also made by the same gang to fire several piers covered with hay, and three or four hay barges were set on fire, but prompt discovery prevented extensive conflagrations. All the fires were produced by bottles of turpentine and phosphorous being emptied among combustibles. The woman arrested last night has proved her innocence and been released.—Several other arrests have been made to-day in various parts of the city of rebels known to be desperate characters, and some of those arrested prove to be rebel soldiers and rebel officers. The War Department Detective, Barker, arrived here to-day, and will probably be able to identify some of the prisoners. All passengers out of the city to-day have been closely scrutinized. Superintendent Kennedy to-day made an important arrest. It appears that the police have had information that a large sum of money in gold was in possession of a man in this city, to be used in destroying property or creating a riot. This morning Mr. Kennedy resolved to arrest this man, considering the evidence sufficient to hold him. This afternoon the detective arrested him and found in his possession the baggage of the chief conspirators and $1200 in gold. He was a confidant of the conspirators. The person who superintended the conspiracy is said to have left the city last night at 11 o'clock He is a young and a fine looking man, and is believed to a lieutenant in the rebel army.

Gold closed at the evening exchange at 224 3-4.

LETTER FROM CALIFORNIA.

SAN FRANCISCO, Oct. 22, 1864.

Dear Chronicle:—Time with its noiseless step has jogged my memory that another "occasional" is due, and I will haste to jot down a few items. A change of season is about to usher in upon us, and the "Trades" have quieted down to zephyrs, and in consequence we are having the full benefit of the solar rays at 90 in the shade. This is rather more than San Franciscans care to have, unless compounded largely with her favorite old Boreas; but those unfortunate Californians who have located high up in foot hills have frequently 115 in the shade, while we have from 20 to 30 degrees less, with an ample bay and fresh sea breezes to temper the heat to our liking. This will not last long, for winter is approaching with genial heat, and we shall enjoy a little fog and southeasterly winds, an agreeable variation, bringing the dew drops to moisten the parched earth, that it may resume its verdure and the famishing herds may once more graze on a thousand hills.

This year has been an unusually dry one, and farmers (rancheros) have suffered much from the drouth; many have abandoned their ranches to graze their stock in more favored portions of the State. Those down at Santa Barbara have been the greatest sufferers, and material aid has been raised and sent to their relief. On this account our vegetable market is now and has been very poorly supplied, and prices have been far better than the esculents. Fruit is plentiful, cheaper and better than in former years, and I hope ere long to see apples as numerous as I have in old Portsmouth; and then we'll do as the old folks used to do, lay in a few barrels of the choicest and best.

Placer, quartz and other mineral mines are not so buoyant in the yield or in the stock market as they were, but it is hoped they will soon revive again and become as active and lucrative as formerly. Personally I would advise no one to buy stock in any but those known to be bona fide gold, silver and copper mines; not but that there are a great many good claims, but because they are at present in the wrong hands and will not pay dividends until the modus operandi is subjected to legitimate business management. There are many very valuable mines, which do not pay now, but will if properly managed prove to be of immense value and not to their owners a constant revenue.

The state of the country generally is progressing steadily onward in all the arts trades and sciences, not omitting education and agriculture. San Francisco is doing much to improve her school system, and to keep pace with the rest of the world and accommodate the growing wants of this great city. Under the auspices of the Board of Education, two new Grammar School Houses have just been built at a cost of $140,000, and will compare favorably with any in the Eastern cities, either as to architecture, size or modern improvements.

The Mechanics have just closed a grand Industrial Fair, and it has proved a great success. The temporary building erected for the purpose, cost some $20,000.

The Sanitary and Christian Commissions have fully tested the liberality of our people, both in city and State, who are ever and anon bestowing of their abundance through these channels upon the poor suffering soldiers who are fighting for our country, and who deserve this bounty for their struggles for Union and Liberty.

* * * We have had one of the most brilliant torchlight processions—there were some 8000 strong participated in it; the streets were ablaze with the torch, rockets, Roman candles, blue lights, &c., which gleamed forth in all their glittering array amid hundreds of transparencies, such as "We are coming, Father Abraham, with 500,000 more." Hundreds of houses, hotels, and stores were gordeously lighted while glowing lights and streaming rockets went up from windows, balconies and house tops. The ladies of San Francisco never looked more beautiful than when waving the Stars and Stripes over their heads. The *éclat* of that occassion will have its effect on the coming election, when we expect to elect honest old Abraham to occupy the White House and direct the affairs of this glorious Union.

Put me down for the Portsmouth Book of Poems and your valuable paper.

Yours truly, J. E. W. C.

☞ In New York City on Friday night, the Metropolitan, St. Nicholas, Lafarge, St. James, Belmont, and Lovejoy's Hotels, and Barnum's Museum were all set on fire. No one of them was consumed. The fires were made with phosphorus, and it is thought for the purpose of robbery. In Barnum's Museum the audience was robbed most thoroughly in the great smoke and confusion that ensued. In the hotels the robbers did not succeed so well. A woman from Baltimore was arrested at the Metropolitan Hotel under suspicious circumstances. She protests innocence. Several other arrests were also made. The woman arrived in the city a few days since. She refused to disclose the nature of her business in New York. Papers in her room pointed to a man recently discharged from Fort Lafayette on the ground that he was a British subject, as an accomplice: he was arrested. He was excited when arrested and disclaimed connection with the affair.

The entire fire department was aroused, and together with the police department measures were adopted for the safety of life and property for the remainder of the night. The attempt, which was well planned, has failed. It has shown what might be done there and elsewhere, and will inspire increased vigilance throughout the North.

THE ENROLLMENT LISTS. — The Provost Marshal's Bureau of the United States are calling attention to all concerned of a thorough revision of the enrollment lists in this and other States. The incessant changes by death and removals, as well as by young men coming of martial age, and aliens taking out naturalization papers, render an occasional revision of the lists necessary. Such revision can of course be made to better advantage now than when a call for men is pending. In this State there has been very little complaint in regard to the lists. Still they are in many cases notoriously incorrect. Capt. Silvey intends to do all in his power to correct them, and appeals to the selectmen of the different subdistricts to aid him in the matter. It is for their interest and that of every citizen to lend a helping hand.

Let every man who can justly claim exemption establish his claim at once, and have his name stricken from the lists. This will materially diminish the quotas of many sub-districts in the event of a call. Then let every man whose name is justly on the list see that every man's name which belongs there is inserted. That will diminish his own chances of election in case of another draft. The time and money required for selectmen to revise their rolls and make them accurate, had better be spent in this way than in buying substitutes to fill a quota which their own neglect has made excessive. The money required to put in one man more than can justly be claimed of a town is now $300, and was a few weeks since $1000 in some localities. Either of these sums would go a long way towards paying for a revision of the rolls.

Let it be understood that the revision of which we speak can be made at this time, or indeed at any time, under the auspices of the Board of Enrollment in our own State. The grounds on which a man's name may be stricken from the enrollment lists are: death, alienage, permanent physical disability, over-age, under-age, non-residence, being personally or by substitute in the service of the country, or *having been honorably discharged from the army or navy after two years' service.* The lists should contain only the names of those who are liable for military service, and every such name.

BLOCKADE RUNNING.—The steamer Corsica, from Havana 19th and Nassau 21st inst., has arrived at New York. Three steamers from Charleston and two from Wilmington had arrived at Nassau. Five had returned, having been unable to get into Southern ports, and four had sailed to run the blockade.

— Gold, in New York, on Saturday, varied from 219 1-2 to 223 1-4. $1,870,000 were shipped off that day to Europe. Gold in Boston, 220.

☞ The mammoth ox, "Gen. Grant," which was drawn at the National Sailors' Fair by Theodore Thatcher of Roxbury, was taken home by that gentleman. The animal netted $3580,10 to the Fair. Mr. Thatcher has refused $1000 for him, intending to keep him on his own place. Mr. Carlos Pierce held twenty-eight shares in the raffle for the beast. Among other shareholders were Hon. Edward Everett, Hon. Charles Sumner, Hon. Henry Wilson, Senators Hale and Clark of New Hampshire, Morrill of Maine, Sprague of Rhode Island and Mrs. Sprague. Verily, "Some [animals] are born great, and some have greatness thrust upon them."

Indian Spring Oil Co.

Capital Stock - - - - - - - - - $300,000.

SHARES AT PAR, $5 EACH.

Subscription price $2 50 per share to original Subscribers, and no further Assessments.

Working Capital, $25,000, Cash.

This is the cheapest and most favorable Oil property yet offered for a profitable and safe investment in the great Allegheny valley. It consists of about **900 acres** in the noted Oil Creek Counties of Cattaraugus and Allegany, N. Y., and in close proximity to the Erie Railroad. It has been carefully selected from an area of **35 miles,** including **14 farms,** which give the richest show of oil developments in the entire region, and including no mountain lands, useless for oil wells. There are already three wells in paying order, one of which is down 430 feet on the "Moore Farm," with an abundant show of oil. A remarkable natural oil spring also exists on the farm near the well, continually yielding gas and oil of extraordinary quality, being of a greenish hue and like the celebrated "Mecca Oil," very valuable as a *lubricator*, commanding more than double the price of the ordinary petroleum. On the "Talcott Farm" a well is down 575 feet, with a fine show of oil and gas. Near this well is the famous INDIAN SPRING, which flows oil in large quantities. Remarkable outflows of oil exist on the "Metcalf Farm," on which a well is now being bored, with rich show of oil. The first oil is reached at *fifty feet* on these lands wherever boring has been done. Two engines are now constantly at work on the wells.

The rare character of this oil gives immense value to this property, being so superior as a lubricator. Its near proximity to the Erie Railroad enables the oil to be delivered in market $1 50 per bbl. less than from Oil Creek, Pa.

The very *low cost* of this property to subscribers for the *large amount of boring territory,* together with the valuable improvements already upon it, and the **Rare Quality** of its oil, must command the attention of all to its unrivalled advantages for investment and profit.

The principal part of the stock is already taken; when closed it is proposed to organize under the laws of the State of New York.

Subscription books are open for the sale of the balance of this stock, and samples of the crude petroleum can be seen, and full particulars obtained, at the offices of

HALE'S

Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the means of all. At last after a long course of chemical experiments, he found that by adding to these *five* other ingredients, each one valuable in itself, he not only obtained the desired results but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the general public as a safe, pleasant and infallible remedy.

PRICE, 50 CENTS PER BOTTLE.

"A Wonderful Discovery."

DR. TEBBETTS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "DYE," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new HAIR in all cases on BALD HEADS, when the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With it every "GRAY HEAD" in New England can be restored in less than sixty days.

THACHER, opposite the Post Office and 12 Market Square, Agent for Portsmouth.—Geo. C. Goodwin, No. 38 Hanover street, Boston, Wholesale Agent for New England, and sold by Druggists everywhere. TEBBETTS BROTHERS, Druggists and Chemists, Proprietors, Manchester, N. H. Jel—tf

A Card to Invalids.

A Clergyman, while residing in South America as a missionary, discovered a safe and simple remedy for the Cure of Nervous Weakness, Early Decay, Diseases of the Urinary and Seminal Organs, and the whole train of disorders brought on by baneful and vicious habits. Great numbers have been already cured by this noble remedy. Prompted by a desire to benefit the afflicted and unfortunate, I will send the recipe for preparing and using this medicine, in a sealed envelope, to any one who needs it, *Free of Charge*.

LYCEUM.—The third entertainment is announced for to-morrow evening—with triple performance, this time; Concert by the Cornet Band, Readings by Mrs. Whipple of this city, and Lecture on "Corals and Coral Islands," by Prof. Clark. Our Band, we all know, will do their part well; and Mr. Phillips endorsed Prof. Clark, in advance, as an able and interesting lecturer. The lady who is to give readings from the poets, has already appeared before a select audience of our citizens, several months since, in this capacity; which occasion we were unable to attend—but a writer who did, thus speaks of the fair *debutante* in the Portsmouth Journal:

"It gives us great pleasure to hear that our gifted towns-woman, Mrs. Julia Van Ness Whipple, sister to Brig. Gen. Dana, is announced soon to appear before our Lyceum, in an entertainment of readings and recitations. She has on a previous occasions made a most favorable impression upon our Portsmouth people, and engaged their interest, by the exquisite taste in her selections and her delicate appreciation of the authors. With her fine person, ladylike bearing, brilliant talents, excellent culture, and rare dramatic power, she cannot fail to make her way in the difficult path she has chosen, and become a great favorite with the public."

The Portland Argus also says:

"The lecture Committee of the Mercantile Library Association of Portland we hear, have it in contemplation to engage Mrs. Whipple (if indeed, they have not already done so) to give one of her attractive entertainments here during the approaching lecture season. It would be sure to be popular and successful."

We have no doubt Mrs. Whipple will be gladly heard by her fellow-citizens; and that they will wish her, as we cordially do, the most complete and satisfying success in her new undertaking.

☞ Mr. Frank C. Sweetser, of this city, had the misfortune to break his thighbone by falling into the hold of the ship Franklin at the Navy Yard on Saturday. He was employed in the coppersmith's gang, machinists' department, and while in the performance of his duties stepped on the end of a plank lying across a hatchway, and thinking the other end secure, was thus precipitated some fifteen feet down between decks. He was conveyed to his home on a litter.

☞ In Saturday's Chronicle the item referring to the Naval Court of Inquiry just held at the Portsmouth Navy Yard, with Lieut. Henry J. *Berhap* as Judge Advocate, should have been Bishop, it being Lieut. Bishop now stationed at the Marine Barracks.

PROMOTIONS.—In the 2d N. H. Regt., 1st Sergt. Chas. E. Plaisted, Co. K, to be Adjutant, vice Legro promoted.

In the 10th Regiment, 1st Lieut. James A. Sanborn, Co. E, to be Captain, vice Trumbull dismissed.

☞ We give this morning a letter from an old Weekly subscriber in California who is punctual in sending his annual remittance, and always accompanies it with a pleasant, familiar epistle, worth as much more. We have omitted a little of our friend's political lucubrations, seeing that election is over, and so well over. May he live a thousand years, and always remain on our Pacific list, if he don't get nearer home.

☞ The Ladies Humane Society will meet at No. 1 Austin St., on Monday afternoon, Nov. 28.

DIED in Beaufort, N. C. Oct. 21, Mary E. Tuttle, aged 27, formerly of this city. Left an orphan in early childhood, Miss Tuttle was received into a family circle at Portsmouth, where she made herself so welcome and so beloved that she was honored in life and mourned in death. Last winter she went to Beaufort, N. C., to be a teacher of colored children. Last spring between six and seven hundred refugees from Washington and Plymouth arrived at Beaufort in a state of almost utter destitution. Miss Tuttle was at one of the churches the afternoon that the refugees arrived, and from that time every minute of her leisure, and all the strength which remained after the performance of her school duties, were given to their need. When the yellow fever reached Beaufort, Miss Tuttle was ready to start for Massachusetts; but staying to nurse a sick friend, she became a victim to the pestilence.

☞ An item is going the rounds, that "of a detachment of bounty-jumping desperadoes sent out at a high price as recruits for a New Hampshire regiment, over seventy-five deserted to the enemy the first night after their arrival at camp. A few days afterwards a rebel officer sent to one of our officers the following note: "Capt. C.—Please send over your colors. I am having splendid success in organizing the First New Hampshire *Rebel* Regiment." Something like this is said to have occurred to the Fifth N. H.; but whether it did or not, it is an outrage on that gallant regiment, and all our brave New Hampshire boys, that we should send to them, to fill the place of heroes, recruits of whom such stories could be told or for a moment credited.

—— Monday night a fire broke out in Water street, Nashua, and four wooden buildings were destroyed. The buildings belonged to Josephus Baldwin. Fire supposed incendiary.

—— The Keene Republican states that a tragedy occurred at a bowling alley in that village on Tuesday evening. A young man named Alfred Tolman, of Richmond, had a difficulty with Sarah Webber, who keeps the house in connection with the alley, when she took a pistol from behind the bar and shot him in the forehead—the ball entering the brain and remaining there. The young man lingered, unconscious, until morning, when he died. The girl, with two others that belong there, were arrested. A male companion of Tolman is said to have witnessed the shooting.

—— The News says Mr. Geo. H. Wiggin of Tuftonborough, was returning to his home from that village, in a wagon, when his clothing took fire from a pipe he had put in his pocket and he was so severely burned that his recovery is considered doubtful.

DEATHS.

In Charlestown, Nov. 23, suddenly, BENJ. RUSH TINSLAR, Surgeon U. S. Navy, aged 64 years. His body was brought to this city, and the funeral took place on Saturday, from St. John's Church. Dr. Tinslar was the examining surgeon at the rendezvous in Daniel Street; he was at his office on Wednesday, returning to Charlestown in the 5 P. M. train. He expired that evening. He had been in the service above 40 years, and at this station about four months.

☞ The Funeral of Mrs. MARY T. HUSSEY will take place this (Monday) afternoon, at 2 o'clock.

It is but simple justice to the Manufacturer of the J. Monroe Taylor Gold Medal Soap, to award him the credit of being far ahead of all competitors in catering to the luxury of the ladies, who prize nice, clean, white clothes (and what lady does not?). Our wife says she could not keep house without it. It is decidedly the Soap of the world. It is a peculiar institution of itself, and such a luxury to use it, that after one trial it is always found to be one of the most useful articles in the household. Depot, 112 Liberty street, New York. 31

He is the happiest who does most to make others happy. The inventor of Herrick Allen's Gold Medal Saleratus must be the happiest man in existence, for we hazard nothing in saying that the use of the Gold Medal Saleratus cannot fail to make a happy household. Our better half says she does not fear of our ever frowning, as long as she can get the genuine Herrick Allen's. We say success to the inventor, and if everybody knew how good it is, no other would be used. A good many of our Merchants have it. Their depot is 112 Liberty Street, New York.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

From the Portsmouth Journal.

"HONOR TO WHOM HONOR."—Upon the Board of Mayor and Aldermen of the present year has devolved a series of arduous duties, the performance of which has been creditable to a number of its members whom we do not mention, equally with those whom we volunteer to speak of. These especial duties have arisen from the prevalence of yellow fever; the filling and accrediting to the quota of our city; the re-building of Sagamore bridge; and the construction of a suite of new City rooms. And first to Mayor Dearborn, who for two years, notwithstanding his ill health, has so well performed the ordinary and extraordinary duties of his office. He has acted with promptness and decision, and has kept an eye on the interest of the city in the execution of its extended financial concerns. May his successor be as successful.

We wish also to make friendly mention of the services of two of the outgoing members of this Board, Aldermen Rider and Hadley. The interest which the former has for the past four years taken in the business of the city, and the unremunerative labors which he has performed, deserve thanks rather than prejudiced criticism. It is evident, from the number of committees upon which he has been placed, that his services have been appreciated by the Mayors under whom he has served; this we say, though with his political sentiments we have no sympathy.

It is a matter of regret that Alderman Hadley, who has served but a single year should have been refused a re-election. There are few men, old or young, who could have made themselves more useful upon the first year of their sitting at that Board. He has performed with ready thought and prompt action the duties of the important committees upon which he has been placed; and been, as we understand, a right hand man to the Mayor in many respects. There are but few thanks accorded to the members of this Board for their arduous labors; and it was rather too bad in this instance to give the cold shoulder to one who has faithfully and well performed his duties.

THE TOPPAN DINNER.—Once more the well spread boards at the almshouse has brought a sunbeam in upon the hearts of the poor unfortunates, and they have again blessed the name and memory of Hon. Christopher S. Toppan. The high prices of provisions do not appear to diminish the quantity or quality of the feast; and we are at a loss to say which does most credit to the matron of the house, the appearance of the cooking or the general tidiness and perfect cleanliness of every portion of the establishment; and, on the other hand, it is quite as hard to choose between the excellent management, by the good humored Superintendant, of the inmates, and that of the stock, products, ground and materials of the farm. Members of the past and incoming City Government, and others, inspected the establishment with much satisfaction on Thursday noon.

THANKSGIVING.—The Thanksgiving sermon of Rev. Mr. Adams at the North Church, on Thursday, was from the text 1 Chr. 29: 11—18. After allusion to our especial cause for thanks in this city, for the staying of the pestilence which threatened so during the past summer, and the prosperity with which we have been favored, his sermon embraced National topics, indicating the hand of God in our nation's destiny; the virtual overthrow of slavery; the assurance amounting almost to a certainty that ours is not to be a divided country, the failure of the rebellion being now morally sure; the causes for national thanksgiving, that victory is everywhere crowning the efforts of the Government against traitors; that the exciting period of a Presidential campaign has passed, without riot or bloodshed, thus demonstrating to European monarchies the entire success of republican institutions, and the ability of a free people to govern themselves even in the midst of a monstrous civil war; and that the North in the election has come up in so great a unity to the support of our government.

The discourse was truly patriotic, and highly creditable to the mind and heart of the preacher.

FIRE.—On Wednesday, just before 1 P. M. an alarm proceeded from fire in the Picker room, on the lower floor of the west wing of the Portsmouth Steam Factory. In this room is a Whipper, through which all the cotton passes from the bale to cleanse it from seed and dirt, and make it loose. The person who had this matter in charge had just set the Whipper in operation on his return from dinner, when the cotton operating upon blazed up, and in a moment the flames spread around him, without being able to ascertain the cause. It probably was occasioned by friction matches concealed in the cotton bale, which ignited by the action of the points of the Whipper. Aid was readily at hand, the room deluged, and the fire extinguished. The damage to the gearing, bands, and to cotton from being wet, will not probably much exceed $500.

CONCORD BRILLIANCY.—The Statesman gives a detailed account of the display in that city in commemoration of the re-election of President Lincoln. About seventy houses and public buildings were brilliantly illuminated, all lighted up nearly at the same moment. The dwelling of Gov. Gilmore was brilliantly lighted, the yard decorated with national flags, and a dazzling display of fire-works made when the band and procession reached that portion of Main Street. The State House was lighted by candles at the windows, from the lower floor to the eagle, and a light, like the evening star in a clear October night, glimmered many feet above the emblem bird, all making a figure of great beauty. Some instances of peculiar good taste were seen along the way. The spectacle, as a whole, or considered in detail, was the best of its kind ever witnessed there.

Joshua Hobart, a McClellan man, will next week redeem a bet lost at the late Presidential election, by wheeling a barrel of oysters in a wheelbarrow from Providence to Boston.

Don't forget Mons. Dubois lecture next Wednesday evening. His countenance is enough to do you good.

Lieut. Thornton, of the Kearsarge, has received an elegant sword from his Charlestown friends.

The population of San Francisco is 120,000. In Sept. 1848 the number of inhabitants was 450.

Houses and Lands.

Desirable Estate on Middle Street
FOR SALE.

The new and convenient DWELLING HOUSE, No. 45 Middle street, recently erected by Mr. JOHN CASWELL, is offered for sale. The house has just been built of the best materials, in a most careful and perfect manner. The situation is high and dry; the cellar built of Biddeford granite, being one of the very best in the city. The house possesses many advantages. Situate on one of the most pleasant avenues in the city, with a fine prospect from either side of the dwelling, amid pure and healthy surroundings, the location is one seldom found in the market.

The ROOMS are conveniently arranged, the stories being of good height, windows of fine proportions, and all the finish of the kind found in a first-class house.

For further particulars apply to

THE MAGEE
COOKING STOVE.

The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the

CELEBRATED AND UNEQUALLED
MAGEE COOK STOVE,

as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. Its oven plates are covered with plates, which renders it equal to the old-fashioned brick oven for perfection in baking.

There is a new style and very superior broiler and sad-iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the extension top there is a large copper Reservoir for hot water; also a large tin warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.

The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shovelling up of the ashes is entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.

For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.

We would refer to the following purchasers:

"MAGEE'S PATENT"
VENTILATING & AIR-WARMING
FURNACES.

The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.

For economy, purity of air and ease of management it has no equal, producing a current of warm air, moist and agreeable;—and as none of the air which comes in contact with the fire-pots is used for respiration, the tendency to produce headache so much complained of in other Furnaces, is entirely obviated.

The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.

To accomplish this many complicated and expensive heating arrangements have been constructed, some possessing but little improvement over former methods, while many have proved a total failure. The common fire-place remains. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the

MAGEE FURNACE.

The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of cold air through the fire-pot, which ignites them as they pass off from the coal, thus saving at least 30 per cent. of the properties of the heat in the fuel.

No heating apparatus with the smoke-pipe or flue on the top of the cone can be made to consume the gases, as they pass off with a large amount of the heat generated, making the chimney the hottest part of your dwelling.

This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.

These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.

For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.

They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of the best Furnace in the world.—and would refer them to the following named gentlemen, who have them now in use:

Samuel Cleaves, Esq.,	Albert R. Hatch, Esq.,
Aaron H. Hill,	Charles H. Mendum,
Henry F. Wendell,	John Sise, and others.

DR. W. R. MERWIN & CO.'S COLUMN
FOR THE
CHEROKEE MEDICINES.

Cherokee Cure, the great Indian Medicine,

An unfailing cure for Spermatorrhea, Seminal Weakness, Nocturnal Emissions, and all diseases caused by self-pollution; such as Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Trembling, Wakefulness, Eruptions on the Face, Pale Countenance, Insanity, Consumption, and all the direful complaints caused by departing from the path of nature.

☞ This medicine is a simple vegetable extract and one on which all can rely, as it has been used in our practice for many years, and with thousands treated it has not failed in a single instance. Its curative powers have been sufficient to gain victory over the most stubborn cases.

☞ To those who have trifled with their constitution, until they think themselves beyond the reach of medical aid, we would say, *Despair not!* the CHEROKEE CURE will restore you to health and vigor, and after all quack doctors have failed!

☞ For full particulars, get a circular from any drug store in the country, or write the proprietors, who will mail free to any one desiring the same, a full treatment in pamphlet form.

☞ Prices, $2 per bottle or three bottles for $5, and forwarded by express to all parts of the world.

Sold by all respectable druggists everywhere.

CHEROKEE REMEDY
—AND—
CHEROKEE INJECTION,
Compounded from Roots, Barks & Leaves.

CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys Stone in the Bladder, Stricture, Gravel, Gleet, Gonorrhœa, and is specially recommended in those cases of the Fluor Albus (or Whites in females) where all the old nauseous medicines have failed.

It is prepared in a highly concentrated form, the dose only being from one to two tablespoonfuls three times per day.

It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all of its original purity and vigor; thus removing from the system all pernicious causes which have induced disease.

CHEROKEE INJECTION is intended as an ally or assistant to the CHEROKEE REMEDY, and should be used in conjunction with it; medicine in all cases of Gonorrhœa, Gleet, Fluor Albus or Whites. Its effects are *healing, soothing and demulcent*; removing all scalding, heat, chordee and pain, instead of the burning and smarting so intolerable pain that is experienced with nearly all the *cheap quack Injections.*

☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to full vigor and strength.

For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.

Price—CHEROKEE REMEDY, $2 per bottle or three bottles for $5.

DR. WRIGHT'S
REJUVENATING ELIXIR,
OR ESSENCE OF LIFE.

Prepared from Pure Vegetable Extracts,
Containing nothing injurious to the most delicate.

"As the Phœnix rises from the ashes of its fire, animated with new life,"—so does this Elixir rejuvenate the system and OVERCOME DISEASE.

The Rejuvenating Elixir is the result of modern discoveries in the Vegetable kingdom; being an entirely new and abstract method of cure, irrespective of all the old and worn-out systems.

This medicine restores to manly vigor and robust health the poor debilitated, worn-down and despairing devotee of sensual pleasure.

The listless enervated youth, the over-tasked man of business, the victim of nervous depression, the individual suffering from general debility, or from weakness of a single organ, will all find immediate and permanent relief by the use of this Elixir or Essence of Life.

☞ Price, $1 per bottle, or three bottles for $5, and forwarded by express, on receipt of money, to any address.

☞ A Canadian who bought a ticket on the Grand Trunk Railroad to go to Montreal and return, the ticket specifying "good for this day and to-morrow," being one day late in returning, was put out of the car because he refused to pay his fare a second time, whereupon he sued the company and recovered $100 damages. It would really seem that Railroads have no rights in such cases which passengers are bound to respect —according to the decisions of Courts, from time to time. But though this may be law, we don't see why a railroad may not in justice be allowed to make their own ticket regulations, like other folks. What would be thought, for instance, of a man claiming admission to a public exhibition on an old ticket for another night? We don't believe he would get in, or get damages either—unless the doorkeeper damaged him if he persisted in passing his effete paper.

FAILURE OF AN ENGLISH IRON CLAD. Our English friends seem be in an unenviable state of uncertainty concerning the best system for iron-clad ships of war. No sooner do they build than they tear down, and the work of alteration is continually going forward. The Royal Sovereign, Capt. Cole's turrett ship, is laid up in ordinary, and the last English mails bring intelligence that the Warrior, the sometime "model" iron-clad, has been put in dock and dismantled, for the purpose, says the London Post, Palmerston's organ, "of making extensive alterations."

☞ The Cushing Guard reached Newburyport on Wednesday glad to get home to Thanksgiving, as the people were glad to greet them once more. Their service has not been light—the guarding of rebel prisoners. This completes the third term of their enlistments; first, for three months; next for nine months; and now for a hundred days. In all this time, though often in important positions and dangerous, it has not been their fortune to be in a pitched battle: and though they have been located in different States and in unhealthy sections, they have lost but one man by death.

—— The Wolfborough News says a few days since several men were engaged in blasting stone. The charge had been put in, the safety fuse lighted, and the laborers had betaken themselves to a safe place, when a little girl, attracted by the smoking fuse, stepped upon the stone and pulled it from the charge. A moment later and she would have been blown to atoms.

— A gentleman in Twenty-third street, N. Y., for his faith in McClellan's popularity, will have to make an equestrian tour of the Central Park some Sunday, at noon, arrayed in crinoline and all the other feminine "fixings." To comply with the terms of another bet, a gentleman in Forty-first street will have to drive three of his horses, tandem, attached to an oyster cart, from the Battery to Macomb's Dam.

— The First National Bank of Newburyport has voted to increase its capital stock $100,000, making the total $300,000. This will offer a good opportunity for investments. The first dividend of the bank, after paying all the expense of organizing, was 10 per cent for eight months, and then a handsome surplus was left.

— The Boston correspondent of the Old Colony Sentinel, says the Boston Courier has become the property of Mr. Wyzeman Marshall, formerly manager of the Boston Theatre, who will make it an evening paper — which can be printed for about half the expense of a morning issue.

— It is said that the rose of Florida, the most beautiful of flowers, emits no fragrance; the bird of Paradise the most beautiful of birds, gives no songs; the cypress of Greece, the finest of trees, yields no fruit; dandies, the shiniest of men, have no sense; and ball-room belles the loveliest creatures in the world, are very often ditto—only more so!

— Monticello, Jefferson's homestead, was sold on the 17th, under the sequestration law, to Benjamin F. Ficklin for $80,500. At the same sale, a negro woman and seven children, all of the latter under seven years of age, were sold for $23,000.

— The picture of Admiral Farragut at the Sailors' Fair, was drawn by one of the crew of the Receiving Ship Ohio, who invested one hundred dollars in as many shares in the representation of the gallant old sea-dog.

—It is stated that the cigar factories of Boston and vicinity have nearly ceased work, throwing out of employ over two thousand cigar-makers.

"The Best, Cheapest, and most successful family paper in the Union!"

HARPER'S WEEKLY,
SPLENDIDLY ILLUSTRATED.
Critical Notices of the Press.
"The best Family Paper published in the United States."—*New London Advertiser.*
"THE MODEL NEWSPAPER of our country—complete in all the departments of an American Family Paper—HARPER'S WEEKLY has earned for itself a right to its title, 'A JOURNAL OF CIVILIZATION.'"—*N. Y. Evening Post.*
"This Paper furnishes *the best illustrations.* Our future historians will enrich themselves out of Harper's Weekly long after writers and painters, and publishers are turned to dust."—*New York Evangelist.*
"A necessity in every household."—*Boston Transcript.*
"It is at once a leading political and historical annalist of the nation."—*Phila Press.*
"The best of its class in America."—*Boston Traveller.*

"Unquestionably the best sustained Work of the kind in the World."

HARPER'S
NEW MONTHLY MAGAZINE.
Critical Notices of the Press.
It is the foremost Magazine of the day. The fireside never had a more delightful companion, nor the million a more enterprising friend, than Harper's Magazine.—*Methodist Protestant* (Baltimore).
The most popular Monthly in the world.—*New York Observer.*
We must refer in terms of eulogy to the high tone and varied excellence of HARPER'S MAGAZINE—a journal with a monthly circulation of about 170,000 copies—in whose pages are to be found some of the choicest light and general reading of the day. We speak of this work as an evidence of the American People; and the popularity it has attained is merited. Each Number contains fully 144 pages of reading matter, appropriately illustrated with good wood cuts; and it combines in itself the very monthly and the more philosophical quarterly, blended with the best features of the daily journal. It has great power in the dissemination of a love of pure literature. —*Trubner's Guide to American Literature, London.*
The volumes bound constitute of themselves a library of miscellaneous reading such as cannot be found in the same compass in any other publication that has come under our notice.—*Boston Courier.*

JESDAY, NOVEMBER 29, 1864.

THE REBELLION.

New York advices of the 28th contain a rebel report of an engagement on the west side of the Ocomee river, in which of course our cavalry were repulsed and driven back. The Richmond papers say the burning of Milledgeville lacks confirmation, although a portion of Sherman's army had been there.

The steamer Herman Livingston arrived in Washington on the 26th with 755 exchanged prisoners. The Savannah News of the 23d has the following telegraphic news:

"AUGUSTA, Ga., Nov. 22.—The Central train from Davisboro' reports that Milledgeville and Gordon were captured yesterday. The State House, Governor's mansion and the Penitentiary were burned. Gen. Wayne holds the Ocomee bridge. Nothing from Macon. Passengers on the Georgia road report that the train went to Greensboro' to-day. The enemy appear to have all gone in the direction of Milledgeville and Macon, but nothing certain is known."

The Augusta Constitutionalist of Monday evening says the passengers by the Georgia road train, last evening, reported that the Ocomee bridge, five miles above Gordon, was burned at noon yesterday, by a small party of the enemy's cavalry, who retired after burning the bridge, to their camp on the north side of the river. The force of the enemy on the line of this road is estimated at 15,000, advancing slowly and cautiously. The Governor of South Carolina has ordered the reserve militia of that State to assemble at Hamburg.

Gov. Brown of Georgia has issued a proclamation making a levy en masse of all citizens between the ages of 16 and 55 to serve for forty days.

Hood's army, numbering 40,000, is confronted by the Union forces under Gen. Thomas near Columbia, Tenn. Severe skirmishing took place on the 24th, and there are rumors of a heavy fight on the 25th.

Brig. Gen. Morgan L. Smith has succeeded Maj. Gen. Dana in command of troops at and around Vicksburg. Rebels and guerillas have been cleared out around Baton Rouge and our lines extended.

It is said that Scott's cavalry, for some time so active in Louisiana, having been ordered to join Hood, mutinied and went home.

The Herald's Nashville dispatch reports smart skirmishing for the last two days between Pulaski and Columbia, Tenn., and that the main Union army has fallen back north of Duck river. Forrest has also crossed the river and is trying to strike the flank and rear of our army. Hood's main army is thought to be moving northeast towards Shelbyville and Wartrace.

Hastings' guerillas were routed near Yellow Creek, Ky., on Sunday, by a Federal force of 200 men, and it is probable the whole gang will be captured.

Gen. Thomas is reported to have fallen back to Franklin, Tenn. The military authorities here say that if the report is correct, Gen. Thomas must be preparing to receive the large reinforcements now on the way to him before giving battle to Hood, and that he has fallen back for no other purpose.

☞ Perley telegraphs to the Boston Journal that on Sunday as Gen. Butler and staff were on their way from Bermuda Hundred to Fort Monroe in his dispatch boat, the Greyhound, the head of the boiler blew out and the boat was enveloped in flames. Rafts were hastily constructed of settees and doors, on one of which Gen. Butler escaped, and all the passengers and crew escaped, being picked up by a passing tug. The boat sank thirty minutes after the fire broke out. Gen. Butler lost his horses and nearly all his personal effects.

☞ There was a report that Gov. Brown of Georgia, and Gen. Sherman were making a peace. But Perley writes from Washington that accounts come of the burning of the Governor's house and furniture near Canton, Cherokee county, by a party sent there for the purpose by Gen. Sherman. It is believed at Washington that these rumors are manufactured by gold speculators.

— Commissioner Ould's cotton selling proposition related merely to the obtaining of supplies for rebels whom we hold as prisoners. Gen. Grant acceded to the proposition. A thousand bales of cotton are to be sent to New York, and the proceeds from the sales are to be expended in getting such articles for the prisoners as shall most promote their comfort.

— The Irish hackman who carried General Grant from the railroad station in New York to the Astor House, gloried over his experience in an original manner, exulting that he had "driven the Lieutenant-General of the United States, which was more than Bobby Lee ever did."

— The first alarm of fire in twenty-six days occurred in Boston on Saturday evening; the longest period for which that city has been free from the ravages of fire since its fire department was organized.

Communication.

HIGH PRICES.—In looking over the public journals of different parts of our Free States, we see that there is an abundance of agricultural products, and a surplus for export to foreign countries, and it is gratifying to learn that the price of provisions is falling,—and the market price of gold is also falling. With the addition of taxes, can any good reason be assigned why the price of the necessaries of life should not be reduced to the rates they were two years ago.

There seems to be a reciprocal influence between the price of gold and that of products generally. The reduction of the one produces that of the other, and when the metallic currency falls to nearly an equal value to that of the National paper currency, (which will be the result of a speedy peace,) we may expect a return of the old prices as they were *ante bellum*.

Fault-finding is unpleasant—often unpopular; but we think the public attention should be called to this important subject. Public opinion is a lever which can move the world—surely then, it can influence, if not regulate prices. All persons, so far as practicable, should decline to purchase when exorbitant and unreasonable prices are demanded. This would soon reduce the prices.

We invite the attention of our fellow-citizens, in particular, to this matter. So far as we can judge from the price current in other sections of the Free States, the price demanded for many things is higher in this city than in the other sections.—There may be some plausible cause for it, and there may be a remedy.

Our merchants should make careful inquiries where merchandize and provisions are sold at the lowest rates, and avoid paying transit duties so far as possible on sales and re-sales, and offer inducements to draw the trade of the interior to this city, and exchange country produce for merchandize here. All trade is, in substance, barter, whether domestic or foreign. Merchandize may be vended in this city cheaper at retail than at Boston, because rents and some other things are much lower.

We suggest to our traders the advantage of purchasing country produce at Concord. For instance, two very necessary articles, butter and cheese. The price current of butter is there from 33 to 38 cts. per pound, and cheese 16 to 18 cts per pound: potatoes 50 cts. per bushel. Here the price of butter is from 50 to 55 cts. per pound, cheese 23. Flour is selling in New York city at from $8.25 to $9.50; in Boston at $9.50 to $10.00, but the price is falling.

When country produce is sold in Boston, and traders here purchase it there, they have to pay not only for the transportation from the interior, but the profits of the Boston trader, and butter and cheese of the best quality is generally consumed in Boston or else exported.

As trade is by barter, should our traders purchase some articles of country produce at Concord, a central place for railroads, the Concord traders would be induced to open a considerable trade with this city, especially as they could purchase some things here at cheaper rates than at Boston or New York.

Moderate profits and quick returns, would afford the largest aggregate profits in the long run. We have seen this exemplified by shrewd traders. We need more importers, instead of purchasing at other ports of entry.

The people of the interior are very inquisitive in respect to prices. They have an idea that they can buy foreign merchandize at the place of import. Portland, for instance, has become a very populous and wealthy city within the last thirty years, because importations are direct to that city. About thirty years ago, this city was ahead of Portland in wealth, population, shipping and commerce. X.

☞ General Dix has issued the following important order:

A nefarious attempt was made last night to set fire to the principal hotels and other places of public resort in this city. If this attempt had succeeded it would have resulted in a frightful sacrifice of property and life. The evidences of an extensive combination and other facts disclosed to-day show it to have been the work of rebel emissaries and agents. All such persons engaged in secret acts of hostility here can only be regarded as spies, subject to martial law and to the penalty of death. If they are arrested they will be immediately brought before a court martial, or military commission, and if convicted they will be executed without the delay of a single day.

☞ The guard house on the west side of the Maine State Prison was attacked by the convicts at closing time on Saturday evening. They succeeded in tearing away a flight of steps and ascended the wall over which four of them escaped. One of them was found secreted in a lime kiln, three swam the river, one of them was drowned. The other two escaped to the woods, and one was subsequently captured. The other, Capt. Collins, the Calais Bank raider, managed to get off.

— Why isn't a joint stock-company like a watch? Because it does not go on after it's wound up.

NEW HAMPSHIRE ITEMS

—— The Merrimac river is flowing with full banks for the first time in many months, amounting almost to a freshet.

—— The Baptist church in Fisherville have extended a call to Rev. Mr. Kenny, of Niles, Michigan, to become their pastor.

—— The Supreme Court at Keene has found a verdict of manslaughter against John Grey of Harrisville, charged with the murder of his wife.

—— Theodore W. Sheppard was recently ordained as pastor of the Baptist church in Plaistow, and Frank W. Fowle as pastor of the Baptist church in Claremont.

—— Second Lieut. R. I. Merrill, of Concord, 75th U. S. colored troops, has been promoted to the grade of 1st lieutenant and is acting A. D. C. on the staff of the 1st brigade at Morganzia, La.

—— The New Hampshire Committee, ladies and gentlemen, who carried Thanksgiving dinners to the soldiers, were delayed at the mouth of the Rappahannock by the breaking of the engine. They were also obliged to tow the steamer up the James River. Consequently the New Hampshire soldiers got no turkey till Friday.

—— The Statesman tell us that "those voters whose lot is cast in New Hampshire must soon put themselves in readiness for another campaign. The expectation has been entertained by some Republicans that the Democratic party would consider "discretion the better part of valor," and, for the present, suspend opposition. But it is not to be so. The temple of Janus is not to be closed. Democratic chiefs have decided upon an earnest canvass. "Lincoln, his satraps and coborts," are to be met in March, and a pitched battle waged for possession of the State Government. On their part the campaign commences with the renomination of Mr. Marcy at Rochester. That they are to be met and overcome, as in every other trial since March, 1855, there can be no doubt, if the Republicans exercise their usual vigilance. That it will be brought into requisition, and the same result reached as in every election of the last nine years, we entertain no doubt."

— India has 3000 miles of railway.

— Chicago dailies have gone up to $14.

— Salt is said to be a "dead shot" for bed-bugs.

— The ten cent government notes are printed on paper made from corn husks.

— Nashville is filled with thieves and murderers. About twenty deaths by violence have occurred lately.

— Experiments with Greek fire are said to have proved more satisfactory at Washington than at Charleston.

— They are to have a new hotel at the South End in Boston, on Washington St., between Worcester and Springfield streets.

— Newburyport has a surplus that will cover her quota in advance for another call of a half a million of men.

— Paul Morphy, the great chess player, offers his services to the New Orleans public as an attorney at law.

— They celebrate the introduction of pure water into Charlestown, Mass., to-day, by a procession, speeches, &c., and an illumination in the evening.

— Gen. Hancock, on account of illness from old wounds has arrived in Washington on leave of absence.

—There are now only seven copperhead papers in Maine, and three of these are apparently on their last legs.

— A rebel steamer, supposed to be the Chickamauga, was seen by the Dutch bark Judah Cappe on the 13th inst, in lat. 32.08, long. 73.

— Monticello, Jefferson's homestead, was sold by the rebel authorities on the 17th, under the sequestration law, to Benjamin F. Ficklin, for $80,500.

— Already we have accounts of the drowning of skaters by the breaking of thin ice. Don't be in a hurry, boys, the degree of cold necessary for the safe practice of this sport will come soon enough.

— There have been only fifteen deaths in the hospitals at Augusta the last six months, though there have been during that time more than twenty-two hundred sick and wounded soldiers in hospital.

— Portland follows steadily in the wake of our larger cities—for horrors, at any rate. On Friday forenoon the body of a full-grown infant was dragged from a little pond at the foot of Elm street by a dog.

— Bill Anderson, the noted guerilla, carried a human scalp tied to the bridle of his horse. It was from the head of a young man whose name is unknown. The scalp is now on exhibition in St. Louis.

— A large break in the main canal at Lawrence, Mass., on Friday rendered all the factories idle. A coffer dam was to be completed so as to resume the work on Monday, but many days would be required to repair the break.

— The exchanged prisoners from Georgia show by their appearance the deplorable condition they have been kept in. It is said that 2500 were at Macon, on their way to Savannah, but that Sherman's destruction of the railroad would prevent their arrival at the point of exchange. Possibly he may have effected their release long ere this.

It is but simple justice to the Manufacturer of the J. Monroe Taylor Gold Medal Soap, to award him the credit of being far ahead of all competitors in catering to the luxury of the ladies, who prize nice, clean, white clothes (and what lady does not?). Our wife says she could not keep house without it. It is decidedly the Soap of the world. It is a peculiar institution of itself, and such a luxury to use it, that after one trial it is always found to be one of the most useful articles in the household. Depot, 112 Liberty street, New York. 3t

He is the happiest who does most to make others happy. The inventor of Herrick Allen's Gold Medal Saleratus must be the happiest man in existence, for we hazard nothing in saying that the use of the Gold Medal Saleratus cannot fail to make a happy household. Our better half says she does not tear of our ever frowning, as long as she can get the genuine Herrick Allen's. We say success to the inventor, and if everybody knew how good it is, no other would be used. A good many of our Merchants have it. Their depot is 112 Liberty Street, New York.

☞ Special attention is asked to Hunnewell's preparations, advertised on our inside columns. They are based on true medical laws, used very largely by Physicians, and most undoubted testimonials are in the hands of the proprietor, always open to inspection. Let Portsmouth and its vicinity bear testimony by a confidence to test them, which will be seared.

THE VERNATELLA

LIQUID BLACKING

Gives to the Leather not only a

Splendid Jet Black Polish,

But an elegant and Fashionable Perfume.

The neatness and convenience of using Liquid Blacking and the superior polish which it gives over other kinds, has heretofore been in a great measure counterbalanced by its disagreeable vinegar odor and the trouble of fitting something into the stopper of each bottle in order to apply it to the brush, but the Vernatella Blacking has only the most DELIGHTFUL PERFUME, which remains with the leather as long as the blacking lasts, and each bottle has a stick ready fitted in the stopper. The Vernatella Blacking also softens and benefits the leather.

Be sure and inquire for the VERNATELLA Blacking.

Price, 12 Cents per Bottle.

This is the cheapest and most favorable Oil property yet offered for profitable and safe investment in the great Alleghany valley. It consists of about 900 acres in the noted Oil Creek Counties of Cattaraugus and Allegany, N. Y., and in close proximity to the Erie Railroad. It has been carefully selected from an area of 35 miles, including 14 farms, which give the richest show of oil developments in the entire region, and including no mountain lands, useless for oil wells. There are already three wells in progress, one of which is down 480 feet on the "Moore Farm," with an abundant show of oil. A remarkable natural oil spring also exists on this farm, near the well, constantly yielding gas and oil of extraordinary quality, being of a green color, but unlike the celebrated "Moore Oil," very valuable as a *lubricator*, commanding more than double the price of the ordinary petroleum. On the "Tidball Farm" a well is down 575 feet, with a fine show of oil and gas. Near this well is the famous INDIAN SPRING, which flows oil in large quantities. Remarkable outflows of oil exist on the "Metcalf Farm," on which a well is now being bored, with rich show of oil. The first oil is reached at *fifty feet* on these lands wherever boring has been done. Two engines are now constantly at work on the wells.

The rare character of this oil gives immense value to this property, being so superior as a lubricator. Its near proximity to the Erie Railroad enables the oil to be delivered in market $1 50 per bbl. less than from Oil Creek, Pa.

The very *low cost* of this property to subscribers for the *large amount of boring territory*, together with the valuable improvements already upon it, and the **Rare Quality** of its oil, must commend the attention of all to its unrivalled advantages for investment and profit.

The principal part of the stock is already taken; when closed it is proposed to organize under the laws of the State of New York.

Subscription books are open for the sale of the balance of this stock, and samples of the crude petroleum can be seen, and full particulars obtained, at the offices of

HALE'S
Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the means of all. At last after a long course of chemical experiments, he found that by adding to these five other ingredients, each one valuable in itself, he not only obtained the desired results but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the general public as a safe, pleasant and infallible remedy.

"A Wonderful Discovery."

DR. TEBBETS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "DYE," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new HAIR in all cases on BALD HEADS, when the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With it every "GRAY HEAD" in New England can be restored in less than sixty days.

Local.

PORTSMOUTH AT THE FAIR.—As a matter of local interest, we at our earliest convenience put on record below some details of what our city did, directly, for the Fair. And Mrs. Haley requests us, in the name of the Committee of which she was at the head, to return their sincere thanks to each and all who in any way lent any aid to the good cause—to the young ladies who did so much, both here and in Boston; to the citizens, for subscriptions and donations of various descriptions; to the loyal local press for gratuitous advertising, printing, &c.; to the Eastern Railroad for various favors in the way of free passes, &c; and to all interested in any way.

The cash subscriptions were:—

Total—$770.42.

The total amount paid over to the Treasurer, by the Portsmouth Committee, is $1340; and the balance of stock left unsold, which was sent to the Charlestown Fair, embraced a large number of valuable articles, the receipts from which will increase this sum considerably.

Besides this, the beautiful miniature Kearsarge, which netted more than $600, must be credited as in part at least a contribution from our city (Navy Yard mechanics, &c.,)—not to mention the noble Kearsarge herself, also built here.

Mr F. W. Ham also sent a Revolutionary canteen, (little wooden keg,) which brought $30 in raffle; A. L. Jones, Esq., sent an autograph letter from George Washton to Tobias Lear—which being delayed in conveyance, was not received in season for favorable disposition; Mr. Theo S. Harris, of Boston, donated to the Portsmouth table a white Esquimaux dog, which was raffled for $100, drawn by Mr. Copley Amory, by him again presented to the table and resold.

There were many other valuable contributions, of which we have no list, as we expected. Among the rest, Col. Webber, of the Portsmouth Steam Factory, contributed a large amount of the famous Portsmouth Spool Cotton; and Mr. Charles Rook, of the Rockingham Mills, a generous donation of the braids and fancy wares which that mill turns out in such varieties and quantities.

The ladies, bless 'em! of course did their share, and more too—and among their fancy work, we noticed five water-color paintings by Miss Sarah Foster, oil paintings by Miss Bartow; feather pictures; wax flowers; a bead tea-set by a blind daughter of Mr. D. L. Randall; a novel Masonic tidy, and other articles altogether too numerous to mention.

NAVAL.—Carpenter Wm. M. Laighton has been ordered to the Naval Academy.

Carpenter Joseph Cox has been detached from the Portsmouth Navy Yard, and awaits orders.

Carpenter Joseph G. Myers has been detached from the Naval Academy and ordered to this naval station.

The Naval Rendezvous at Providence, R. I., is ordered to be discontinued.

☞ Col. Mark F. Wentworth has been "restored to his place" as Naval Storekeeper at Portsmouth Navy Yard; and John Wentworth, the late incumbent, we learn takes the clerkship in the Ordnance office recently vacated by Mr. Butler.

We regret to chronicle the sudden death, from inflammation of the bowels, of Mr. Ezekiel Fitzgerald, of this city, who has for some time occupied the position of Assistant Clerk to the Commandant of the Yard, and was a most worthy and highly esteemed citizen.

☞ The Portsmouth Division, Sons of Temperance, invite their friends to a social Levee at their Hall, Wednesday and Thursday evenings. They are worthy of patronage—and will get up a good time; and mercy knows there is need enough of their labors.

☞ The 3d Lyceum entertainment takes place this evening. For particulars see advertisement. A few season tickets are to be had at the usual price.

☞ The world is progressing. Any person who keeps open store (unless of neccessity) in this city on Christmas or New Year will be liable to arrest.

☞ In view of the daring attempts at arson made in New York, and the fact that many of the person engaged in the dastardly business had left New York for the East, precautions were taken to preserve railroad property between Boston and this city, and hence to Portland, the bridges, &c., being under guard a number of nights past.

ANOTHER MARTYR.—Among the Sons of Portsmouth who have laid down their lives in behalf of their country, especial mention should be made of the young and heroic Sylvester Y. White, of Co. G. 10th Reg. N. H. V., who fell in the recent reconnoissance of that gallant regiment in the vicinity of Fair Oaks Va. When but sixteen years of age he enlisted in the service of his country, feeling that he could not remain at home while her liberties were in danger. Young as he was, he endured with cheerful fortitude all the hardships and privations of army life. He had shared with his regiment, in all its perils and glories. He was brave almost to a fault, never shrinking, but rather seeking the port of danger. He fell in the van of the charging column, and died instantly, pierced through the breast by a shell. He would not have chosen a different death. His sorrowing kindred may never reclaim his beloved dust, but his memory—in connection with our vast army of martyrs will be preserved by a grateful country so long as liberty is revered or patriotism is honored among men. P.

☞ Daniel B. Sawyer, aged 33, son of Mr. Moses Sawyer of this city, died at a New Haven Hospital a week or two since, and was buried at Needham, Mass. He was a member of the 1st Mass. Cavalry, and wounded in one of Sheridan's Valley battles; but was doing well until he received fatal injuries in the New Haven Railroad accident. He had previously served out a three-months' term in the 1st Mass. Battery—and was a good and true soldier. Detachments of two Boston Independent Companies attended the funeral.

☞ The funeral services of the late Surgeon B. R. Tinslar took place at the St. John (Episcopal) Church in Charlestown on Saturday. The pall bearers were Adm. Stringham, Commodore Armstrong, Capt. French, and Paymasters Buchanan, Bates and Cutter. The services were conducted by Rev. Mr. Chase, Chaplain of the Navy, and Rev. Dr. Lambert, Pastor of the Church. The remains were conveyed to Mount Auburn for interment.

☞ Mr James A. Leary, aged about 50 years, a well-known hostler and hotel-waiter of this city, died in Newmarket last week, from the effects of a kick in the body, inflicted by a vicious old mare a fortnight before, in the stable of Mr. H. H. Smith. The worthless old hack brute had before kicked another man in the jaw, knocking him down and breaking the other jaw in the fall.

☞ Remember Prof. Dubois' Lecture at the Temple to morrow evening.

MARRIAGES.

In Boston, Nov. 24, by Rev. O. T. Walker, JOSIAH S. HOWELL to MISS LOIS J. HADLEY, daughter of J. G Hadley, Esq. all of this city.

DEATHS.

In this city, on Sunday afternoon, Nov. 27, after an illness of two days, Mr. EZEKIEL FITZGERALD, aged 53 years—a writer in the Commandant's office at the Navy Yard; well known in this city and elsewhere, and highly respected for his many good qualities as a merchant and a citizen.

☞ Funeral services at the Universalist Church on Wednesday, 30th, at 2½ o'clock, P. M.

Masonic brethren will assemble at Masonic Hall at 1½ o'clock, P. M.

In this city, Saturday, Nov. 26, MISS SARAH P. TUCKER, aged 23 yrs., 6 mos., daughter of Mr. John Tucker.

☞ The funeral of Corp. HORACE H. ADAMS, Co. G, 10th N. H. V., will take place at the residence of his father, No. 2 Gates Street, this, Tuesday, afternoon, at 2 o'clock. Friends and relatives are invited to attend, without further notice.

THE FRENCH

FRANGIPANNI TOILET POWDER!

This widely and justly celebrated article, which is used throughout Europe, and considered

A necessity in the toilet of every Lady,

is now for the first time introduced

TO THE LADIES OF AMERICA.

Frangipanni Powder

Is unrivalled for removing Chaps, Blotches, Pimples, Chafes and other impurities of the skin, rendering it Soft, Clear, Smooth and Beautiful.

Frangipanni Powder

Is used to remove Tan and Freckles, giving FRESHNESS to the Complexion and a healthy hue to the Skin, with youthful softness.

Frangipanni Powder

Is used by the ladies of Europe to sprinkle on the inside of kid gloves, enabling a tight glove to be drawn on and off with ease, and preventing their being soiled by perspiration. After the glove is withdrawn it leaves the hand smooth, soft and white, with a delicate freshness and perfume.

Frangipanni Powder

Is used to remove all roughness and redness from the hands, arms and face. It softens Corns, and all other cutaneous excrescences.

SAVE YOUR FUEL!

THE MODEL COOK.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

The subscriber has reduced the prices of the Model Cook Stoves FIVE DOLLARS each, to conform to the decline in gold.

Morning Chronicle.

—In New Orleans they have cars for colored persons distinguished by a star. White persons can also ride in the cars, if they will, but they are not permitted to object to the presence of the other race.

Louis XIV. was told that Lord Stair was one of the best-bred men in Europe. "I shall soon put him to the test," said the king; and asking Lord Stair to take an airing with him, as soon as the door of the coach was opened he bade him pass and go in. The other bowed and obeyed. The king said: "The world is right in the character it gives. Another person would have troubled me with ceremony."

——Lieut. John Edwin Mason, 5th N. H. Vols, has been promoted to be Captain, for gallant service. He is now at his home in North Dana, Mass., on furlough, having been wounded.

—Probably no other city in the Union can show a greater or more marked ratio of improvement in railway structures than has within the past three years been effected in Boston.

Stubbs said to one of his debtors: "Isn't it about time that you paid me that little bill?" "My dear sir," was the consoling reply, "it's not a question of time—it's a question of money."

—The payments at the postal money-order office in New York, to persons who present orders drawn in other cities, have reached nearly a thousand dollars a day.

Fanatics think themselves virtuous, not in consequence of their actions, but of their belief. The credulity of men is, therefore, in their opinion, the only measure of virtue.

—Frederick the Great once sent a sword to Washington, with the inscription: "From the oldest General in the world to the greatest!"

It is only the useless, aimless, repining life which is an ignoble one; a life of occupation and labor is generally one of enjoyment also.

—A Tennessee woman died the other day at the age of 103. Her descendants to the fifth generation were gathered around her.

On and after March 4, 1865, no Democrat will be allowed to go at large without a stamp. — *Int. Rev. Decision by Jingo.*

—Prof. Benj. Silliman, Sen., expired at his residence in New Haven, Conn. Thanksgiving morning, aged 84 years.

Thousands who never were in battle have been destroyed by grape.

—John Slidell, insolvent soap-boiler of 1824, was the father of John Slidell, the "Southern aristocrat" of 1864.

Houses and Lands.

Desirable Estate on Middle Street
FOR SALE.
The new and convenient DWELLING HOUSE, No. 45 Middle street, recently erected by Mr. JOHN CASWELL, is offered for sale. The house has just been built of the best materials, in a most careful and perfect manner. The situation is high and dry; the cellar built of Biddeford granite, being one of the very best in the city. The house possesses many advantages. Situate on one of the most pleasant avenues in the city, with a fine prospect from either side of the dwelling, amid pure and healthy surroundings, the location is one seldom found in the market.
The ROOMS are conveniently arranged, the stories being of good height, windows of fine proportions, and all the finish of the kind found in a first-class house.

THE MAGEE
COOKING STOVE.

The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the
CELEBRATED AND UNEQUALLED
MAGEE COOK STOVE,
as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. Its oven plates are covered with plaster, which renders it equal to the old-fashioned brick oven for perfection in baking.
There is a new style and very superior broiler and sad-iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the extension top there is a large copper Reservoir for hot water; also a large tin warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.
The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shoveling up of the ashes is entirely dispensed with. The fire is planed in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.
For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.
We would refer to the following purchasers:

"MAGEE'S PATENT"
VENTILATING & AIR-WARMING
FURNACES.
The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.
For economy, purity of air and ease of management it has no equal, producing a current of warm air, moist and agreeable—and as none of the air which comes in contact with the fire-pot is used for respiration, the tendency to produce headaches and the complained of in other Furnaces, is entirely obviated.
The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.
To accomplish this many complicated and expensive heating arrangements have been constructed, some possessing but little improvement over former methods, while many have proved a total failure. The reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the
MAGEE FURNACE.
The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of cold air through the fire-pot, which ignites them as they pass off from the coal. This saving at least 20 per cent. of the properties of the heat in the fuel.
No heating apparatus with the smoke-pipe or flue on the top of the same can be made to consume the gases of the coal, as they pass off with a large amount of the heat generated, making the chimney the hottest part of your dwelling.
This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.
These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.
For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.
They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of the best Furnace in the world,—and would refer them to the following named gentlemen, who have them now in use:

Samuel Cleaves, Esq.,	Albert R. Hatch, Esq.,
Aaron H. Hill,	Charles H. Mendum,
Henry F. Wendell,	John Sise, and others.

DR. W. R. MERWIN & CO.'S COLUMN
FOR THE
CHEROKEE MEDICINES.

Cherokee Cure, the great Indian Medicine,
COMPOUNDED FROM

ROOTS, BARKS AND LEAVES.
An unfailing cure for Spermatorrhœa, Seminal Weakness, Nocturnal Emissions, and all diseases caused by self-pollution; such as Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Trembling, Wakefulness, Eruptions on the Face, Pale Countenance, Insanity, Consumption, and all the direful complaints caused by departing from the path of nature.
☞ This medicine is a simple vegetable extract and one on which all can rely, as it has been used in our practice for many years, and with thousands treated it has not failed in a single instance. Its curative powers have been sufficient to gain victory over the most stubborn cases.
☞ To those who have trifled with their constitution, until they think themselves beyond the reach of medical aid, we would say, *Despair not*; the CHEROKEE CURE will restore you to health and vigor, and after all quack doctors have failed!
☞ For full particulars, get a circular from any drug store in the country, or write the proprietors, who will mail free to any one desiring the same, a full treatment in pamphlet form.
☞ Prices, $2 per bottle or three bottles for $5, and forwarded by express to all parts of the world.
Sold by all respectable druggists everywhere.

Glad News for the Unfortunate!
The Long Sought For Discovered at Last.
Cures in from one

to three days.
CHEROKEE REMEDY
—AND—
CHEROKEE INJECTION,
Compounded from Roots, Barks & Leaves.
CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys, Stone in the Bladder, Stricture, Gravel, Gleet, Gonorrhœa, and is especially recommended in those cases of Fluor Albus (or Whites in females) where all the old nauseous medicines have failed.
It is prepared in a highly concentrated form, the dose only being from one to two tablespoonfuls three times per day.
It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all of its original purity and vigor; thus removing from the system all pernicious causes which have induced disease.
CHEROKEE INJECTION is intended as an ally or assistant to the CHEROKEE REMEDY, and should be used in conjunction with it at meal time in all cases of Gonorrhœa, Gleet, Fluor Albus or Whites. Its effects are *healing, soothing and demulcent*; removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the *cheap quack injections.*
☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to full vigor and strength.
For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.
Price—CHEROKEE REMEDY, $2 per bottle or three bottles for $5.

The Cherokee Remedy, Cherokee Injection, and Cherokee Cure,
Are sold by all enterprising Druggists in the civilized world. Some unprincipled dealers, however, try to sell worthless compounds in place of these: those which they can purchase at a cheap price, and make more money by selling, than they can on these medicines. As you value your health, aye, the health of your future offspring, do not be deceived by such unprincipled Druggists, *ask for these medicines and take no others.* If the Druggists will not buy them for you, enclose the money in a letter, and we will send them to you by Express, securely sealed and packed free from observation.
Ladies or Gentlemen can address us in perfect confidence, stating fully and plainly their diseases and symptoms, as we treat all diseases of a chronic nature in male or female. Patients need not hesitate because of their inability to visit us, as we have treated patients successfully in all parts of the civilized globe, by correspondence.
Patients addressing us will please state plainly all the symptoms of their complaints, and write Postoffice, County, State and name of writer, plain and inclose postage stamp for reply.
We send our 32 page pamphlet free to any address. Address all letters for Pamphlets or advice to the proprietors,

REBELS AND POLTROONS IN CANADA. The War Department is in possession of information that there are now in Canada several thousand deserters and men who have fled to avoid the draft. So many have sought that region, there is no longer work to be had, and they are on the point of starvation. Many of them are in wretched condition, destitute of suitable clothing for this inclement season, and unable to obtain remunerative employment. Recently there was a large meeting of them near the Canada end of the suspension bridge, resulting in the forwarding of a petition to the U. S. Government, asking that they be received back into their respective regiments without being subject to the military punishment usually accorded in cases like theirs. Most of them would return if they were not afraid of being shot. Cold wintry weather is now upon them, and as the Canadians deny them shelter and food such as we find to our paupers, most of them must return or die before spring. A short time since over six hundred offered themselves in a body to the Grand Trunk Railroad, and were put to work on the promise of food only. The Philadelphia Inquirer says that no pardon will be extended to them at present.

☞ In the debate in the rebel House of Representatives on the 19th, the fact is developed that the war against Vice President Stephens is extending to all reconstructionists, and Boyce, Brown, Leach, Vance, Stephens, Cobb and Foote are denounced as heedless agitators of dangerous questions.

The House of Representatives, like the Confederacy in general, is divided against itself, and cannot stand long in the excitement produced by Sherman. The debate shows that Governors Brown and Vance have taken positive action against the execution of the conscript laws. The House passed with undue haste the Senate bill to amend the law so as to force the militia of one State to go to the defense of other States. This action is taken so as to concentrate a force against Sherman.

COMPLIMENTS—OVER THE LEFT.—The Missouri Republican, a copperhead paper, says:

The State has gone for the Radicals, and the stay-aways—the Democrats who had not the nerve to vote—are the cause of it. That's it; and there is no use of printing excuses about it.

The Boston Courier endorses this, and says:

The election was lost through the faint-heartedness of the cowards who might well have been doubly ashamed of such pusillanimity under so gallant a leader. [?] The cowards who slunk away from the polls deserve neither rights nor liberties.

☞ The Bridgeport Standard relates the following:

"The house of John Chipman, Sen., of Cornwall, Conn., was consumed by fire on the night of the 7th instant, and Mrs. Chipman, his wife, burned to death. Mr. and Mrs. Chipman were old people, and at the time of the accident, a man by the name of Pope, was living with them. Mr. Chipman and Pope retired for the night, leaving Mrs. Chipman sitting by the fire. They were awakened by her groans, and found the house on fire. Greatly frightened, they left the house in their night clothes, Mr. Chipman in the excitement of the moment, forgot a number of valuable papers which he had in his house — including deeds, notes of hand to the amount of several hundred dollars — and one hundred dollars in silver coin, but rushed into the cellar and saved a fine pumpkin, which was afterward frozen and spoilt. There was no insurance on the property."

☞ A publishing house in New York runs forty-three steam presses of the largest size, and uses an average of 34,375 reams of printing paper per annum—equivalent to 3,300,000 duodecimo volumes of 240 pages each, or 1,650,000 volumes of 480 pages each. Another house, in Philadelphia, sells books annually to the amount of $1,500,000, and the number of packages which they send out of the city yearly is between 14,000, and 15,000. The house last referred to sold books in 1863 to the amount of over $200,000 more than in any former year, although before the war it had a large Southern trade.

☞ The Boston Transcript facetiously says, "It is unfortunate that a majority of some hundreds of thousands of the people have endorsed the Administration and blocked the wheels of the partisan schemes for pacification which were designed to save Jeff. Davis and his fellow leaders for future partisan use. But the decision of a misguided patriotic people must be respected."

It is the foremost Magazine of the day. The fireside never had a more delightful companion, nor the million a more enterprising friend, than Harper's Magazine.—*Methodist Protestant* (Baltimore).

The most popular Monthly in the world.—*New York Observer.*

We must refer in terms of eulogy to the high tone and varied excellences of HARPER'S MAGAZINE—a journal with a monthly circulation of about 150,000 copies—the merits of which are to be found some of the choicest light and general reading of the day. We speak of this work as an evidence of the American People, and the popularity it has acquired is merited. Each Number contains fully 144 pages of reading matter, appropriately illustrated with good wood cuts; and it combines in itself the very monthly and the more philosophical quarterly, blended with the best features of the daily journal. It has great power in the direction of a love of pure literature.—*Trubner's Guide to American Literature, London.*

The volumes bound constitute of themselves a library of miscellaneous reading such as cannot be found in the same compass in any other publication that has come under our notice.—*Boston Courier.*

WEDNESDAY, NOVEMBER 30, 1864.

A MACEDONIAN CRY.—A late number of the Savannah Republican calls upon all Georgians to crush Gen. Sherman and his Yankees,—and then addresses its neighbor States in this fashion:

What are our Carolina friends doing in this great emergency? Certainly they will not be lookers-on when their *liberty* as well as ours is at stake. Will they not pour forth across the Savannah by tens of thousanks, and, uniting with their brethren of Georgia, give the finishing blow to this ruthless attempt to reduce us to slavery.

Aha, aha!—says Uncle Toby—"Is that you, old Truepenny?" *Is* liberty worth preserving, and *is it* as evil to be reduced to slavery? *If so*, then "Son, remember" that you and *your* fathers have held your half-brothers and sisters, yea, and your own children and grandchildren, in slavery, for ah hundred years,—and bought and sold them like merchandize. If the tables were turned, and they became free and you *really* slaves,—who could say that God's providence herein is unjust? But you know that no such thing is intended by the United States. No doubt your *bogus* aristocratic dignity may be lowered a peg or two—but if so, the world can survive it, and the country too. If you cannot, so much the worse for you: the democracy, which you hate and affect to despise, is to rule—with your consent, if you please—without it, if you don't.

ADVENT.—Sunday, Nov. 27th, the season of Advent begins, and the Ecclesiastical year throughout the world commences. There are four Advent Sundays this year, and Christmas occurs on the fifth Sunday, Dec. 25. The character of the Scripture lessons now entirely changes. The sublime chapters in Isaiah predicting the coming of Christ are read in Morning and Evening Prayer, and the magnificent Advent Collect used at the same time.

☞ The December number completes the 40th volume of the American Phrenological Journal. It is the only unbroken record of the discovery, progress and present condition of Phrenology in any language, and the only serial in the world devoted to the discussion of "the science of the mind." Its long life and promising future are sources of real encouragement to its friends and supporters. Published by Fowler & Wells, New York, at $2 per annum.

☞ A circular from the Boston Printers Union, complains that "the proprietors of the Boston Daily Newspapers are now endeavoring to reduce the wages of Journeymen Printers in the city, and are resorting to every possible subterfuge to divide and defeat the Boston Printers Union; in short, there is a secret combination to break up the influence, ay, existence, of the Union, a society which has existed since 1848, and which has really tended to increase the self-respect and dignity of the printers of the city."

RIGHTS OF PEDESTRIANS.—The U. S. Circuit Court, New York, has given a verdict of a $4000 to a person for damages sustained while crossing the street, from a stage. The law is that pedestrians have the first right to the crossing of the street on foot. Drivers of vehicles should make a note of this fact, and not run persons down in the streets by fast driving around the corners.

— Rev. Henry Ward Beecher, in his Thanksgiving discourse at Brooklyn, N. Y., affirmed that New England was the Conscience Keeper of this Nation, for wherever her sons went there liberty, intelligence and education flourished. She had been true to the old historic doctrine of the whole glorious Revolutionary period of American history.

— The Salem Gazette tells the following goose story: "A young spring goose was exhibited in Salem market by John Bradstreet of Topsfield, on Tuesday, weighing seventeen pounds! This was one of four, hatched by an old goose *seventy-eight years of age*. The average weight of the four was fifteen pounds."

☞ The Atlantic Monthly for December, with a varied table of contents, completes the 14th volume of that valuable periodical, the publishers of which, in their prospectus for the coming year seem determined to maintain its rank and popularity among the first.

— The first vessel to fire a shotted gun at the breaking out of this rebellion was the revenue cutter Harriet Lane. It was fired while off Charleston bar, and directed against the mail steamer Nashville, which was lying off the bar waiting to run in during the bombardment of Fort Sumpter, in April, 1861.

— A suspicious vessel, which had cleared from Montreal for New York, was seized on Friday, in John's Bay, near Pemmaquid, by the steam cutter Mahoning, and will be detained until advices as to the can be obtained from Washington.

THE REBELLION.

Full files of Richmond papers of Saturday contain nothing additional in regard to Sherman's movements.

All is quiet about Richmond, and it is claimed that the rebel army has been newly supplied with clothing, blankets, shoes, salt and soap.

In the rebel Congress, on Friday, pacific resolutions offered by Mr. Leach of North Carolina were rejected.

It is reported the rebels are fortifying Roanoke and Chowan river, N. C., with a view of evacuating Virginia.

There were rumors in Baltimore on Monday of rebel demonstrations at New Creek and Piedmont.

From New York, 29th, we have the following additional information in regard to Sherman's movements, from late rebel papers:—

Both the columns under Howard and Slocum are admitted to be well across the Oconee river. The reported occupation of Milledgeville is confirmed, and the destruction of the charcoal works and foundries at Grisworldville. It is stated that the panic in Georgia and South Carolina has had no parallel during the war. A levy en masse in these States is ordered and desperate efforts are being made to concentrate an army large enough to check Sherman's steady advance.

The Augusta Chronicle of the 22d says a raiding party tapped the railroad 10 miles east of Macon, and destroyed a lumber train.

Milledgeville had been evacuated, and everything of value taken away before the arrival of the enemy.

The Augusta Despatch of the 21st says Sherman's movement on Milledgeville was a feint, to concentrate our forces there, and the raid upon the Central Railroad for the purpose of keeping them there, while the whole force moved upon and captured Augusta or Savannah.

The Augusta Constitutionalist give the progress of the column under Slocum.—About 1000 cavalry visited Madison, on the Georgia State Road, and burned it on the 19th. On the 20th, an engine, sent up the road, found the enemy 11 miles nearer Augusta. On the 15th the Federals, a raiding party, were 75 miles from Augusta.

The Augusta Chronicle of the 20th, says a large cavalry force left Greenville, S. C. and is moving across the country in the direction of Atlanta with a view to cut off the Yankee column moving down the Georgia road in this direction.

The Constitutionalist of the 20th, says: As we write the glad and familiar shout of veteran troops just arriving from the South Carolina depot comes up from the streets. If Sherman's men retreat this way they will hear the whistle of bullets from the trusty guns which have often been pointed at the fanatics on the banks of the Potomac and James Rivers.

The Macon Confederate of the 20th says "Lt. Gen. Hardee arrived here this morning; Gen. Beauregard will probably be here to-morrow." Since the date of the above, communication with the east has been cut off by Sherman, and both Hardee and Beauregard are left far in the rear of Sherman. Gov. Brown, Dick Taylor and Beauregard were reported at Macon on the 22d inst.

Richmond papers of the 25th and 26th say they have encouraging news from Georgia, but as the Yankees depend upon them for news from Sherman they will not print it. Still they assure their readers that the official advices from Georgia are as favorable as they could expect.

The Tribune's Washington dispatch says the secesh there are in possession of news to the effect that Sherman's cavalry surrounded Milian and held the place until the infantry came up and released two-thirds of our prisoners there. The others had been removed further south before Sherman's arrival.

The Tribune's army correspondent states that guns are en route to the front that will throw shells into Richmond, distant seven miles. The shell is of a particularly inflammable and destructive power, capable of reducing the rebel city to ashes. The plan for its use has been sanctioned by Gen. Grant.

Advices from Nashville, Nov 29th, states that nothing has been heard from Hood's army or our front since yesterday evening. Hood made an assault on our works at Columbia, south of Duck river, on Saturday, and was badly repulsed. A small portion of the rebel cavalry have succeeded in crossing Duck river. The military situation is satisfactory to the authorities. The impression gains ground that Hood will move east across Chattanooga, possibly with the hope of accomplishing something by co-operating with Breckinridge.

The Richmond Sentinel of Nov. 25, says Breckinridge and Vaughan again have the Yankees surrounded at Strawberry Plain.

Mosby's adjutant, who had heretofore taken the oath of allegiance, was captured at his father's residence, near Georgetown, on Sunday.

There was a slight engagement at Moorefield, West Va., on Sunday, the rebels losing 20 men.

An expedition, commanded by Lt. Col. Sterling of the 2d Me. cavalry, captured a company of rebels guarding Barren Bridge, Western Florida, on the 26th. A number of small arms were also captured.

— Seb. Rose, of East Machias, Me., arrived at New York on Tuesday morning from Montego Bay, and reports that she was overhauled and her papers examined by a British gunboat.

☞ The steamer Continental, from New Orleans 21st inst., arrived at Cairo on the 28th. Twenty-seven rebels were captured while crossing from the east to the west side of the Mississippi river at Choctaw Bend, and have arrived at New Orleans. Among them was Capt. Montgomery, who was moving to Texas. He had a large amount of stock and $250,000 in foreign exchange, all of which was captured with him.

Gen. Canby is rapidly recovering and will soon be out again. He is able to attend to business at his house. The demand for cotton has been somewhat checked.

☞ Different papers express different views of the incendiaries in New York City, some considering them emisaries of the rebels, others calling them mere domestic criminals, who commit arson to get plunder. Gen. Dix deems them rebel spies and allies; and if so, it is a remarkable case of swift retribution,—that the 37,000 majority of Gov. Seymore's friends in New York City, should so soon find their nest set on fire by the hands of their own confederates.

— Gold in Boston on Tuesday at 12.40 stood at 236, having opened at 238.

— Roger A. Pryor, wearing a handsome uniform of gray and looking as defiant as of old, was marched down Pennsylvania Avenue to the old capitol prison on Tuesday.

— The rebel Adm. Buchanan and aids will be sent to Fort Warren.

— Admiral Porter telegraphs the Navy Department that the prize steamer Florida has been ran into by an army boat and sunk in nine fathoms of water.

— George B. McClellan has received the appointment of Engineer in Chief of the Morris and Essex Railroad. The salary will be $25,000 a year.

— Rebel guerrillas use a frog to throw railway trains from the track, very similar to that used in replacing cars on the rails. It is hardly distinguishable from the rail, and cannot be passed over, even at the lowest speed, without accomplishing its diabolical purpose.

— A little girl five years old, as she came out of church in Boston last Sunday morning, during the concluding organ voluntary, put her face up towards her mother's and whispered, "Mother, the music sounds just like Buckley's!"

— The Canadian Government has refused the application of the St. Albans raiders for permission to send a special messenger to Richmond to obtain evidence to be used in their defense.

— The acquisitiveness of some people is beyond comprehension. Two men named Trott stole the target on Cushing's Island, Portland harbor, used for artillery practice by the troops at Fort Preble, and on Saturday were trotted into custody for so doing.

— The Corcoran Legion, which left New York 3600 strong last spring, is now reduced to 630 actually with their colors. In the battle of Cold Harbor and the second assault on Petersburg they suffered terribly.

— The Victory, the flag-ship of Lord Nelson at the battle of Trafalgar, is now the flag-ship of the port-admiral of Portsmouth, and on the 14th of October, the anniversary of the engagement, was decorated as usual, with evergreen wreaths at each masthead.

— A sensible clergyman cured himself of an anti-Christian hankering for tobacco by rinsing his mouth with pure cold water every time the fit came on. In other words, he *washed* his mouth to get rid of a filthy habit.

— Maj. Gen. Couch has been relieved from the command of the Department of the Susquehannah and ordered to report to Maj. Gen. Thomas. He left Taunton on Monday for active service in Tennessee.

☞ Brewer & Tileston, of Boston, publishers of the Old (Thomas') Farmer's Almanac, have furnished us with their useful periodical for 1865.

☞ The Continental Monthly, with a varied table of contents, for December, is received from the publisher, John F. Trow, New York.

— Cruelty to animals is not permitted in England. A cart man in London was recently fined £5 and costs for compelling a horse for which he paid £2 to draw a load of 2500 lbs.

— Gen. Webb is said to have managed the Florida case admirably, and to have insured its amicable settlement without any sacrifice of our national honor.

— Eight or ten thousand people were thrown out of employment by the breakage of the canal at Lawrence last Friday.

— The Prairie Chicken is the name of a bright little paper published once a month, at Tilton, Ill., for the benefit of the Sanitary Commission, by a family who seek thus to amuse themselves in their pioneer residence, and contribute, at the same time to the great national charity.

Colt's arms are useful when you want to fight, but if you want to run away, colt's legs are better.

THE PLOT TO BURN NEW YORK.—The Times' Washington dispatch says Col. Baker on the 4th inst. informed Gen. Dix of a plot to burn New York, and a man named Ward, cognizant of the plot, was arrested and sent to Fort Lafayette. The day after election he was released and has not been seen since.

It is stated that on the morning of the election a state room in the steamer Elm City, which plies between New York and New Haven, was found on fire, the same material of combustion, phosphorus, turpentine, &c., being used as was used Friday night. Three more arrests of suspected rebels have been made. The Hotel Keepers' Society offer a reward of $20,000 for the arrest of the incendiaries.

An attempt was made Monday night to burn the International Hotel. The fire was luckily discovered and extinguished.

☞ The New York Tribune says, "the plot to burn New York which failed on Friday night was a rebel plot. The evidence in possession of the police and military authorities, the facts recited in our columns, and the conviction of every intelligent person, establish the fact of the plot and the fact of its birth in Richmond. Six weeks ago the Richmond press threatened and foretold just such an attempt, defended it as justifiable warfare, and chuckled in advance over its anticipated success.—Their sole chagrin will be to hear that it has been tried and has failed; and they will discover with rage, but without one emotion of shame, that it is not so easy as they thought to burn a city that holds a million of people, and that it is protected by the safeguard of a civilization unknown to their barbarous society."

THE UNPRECEDENTED POPULARITY

Which has attended the introduction of our brands of

CALIFORNIA WINES

Is a flattering tribute to their purity and fine qualities.

THE STATE FAIR

At Indianapolis, where our Wines came into competition with all the best WESTERN WINES, have just awarded us a *SILVER MEDAL*.

At the OHIO STATE FAIR we took *Five Premiums* out of six.

Surgeon General Dale, after a careful and searching chemical analysis of our wines, pronounces them PURE.

The leading portion of the American Press have extolled their merits; and the unanimous verdict of those who use them is, that

THE VERNATELLA

LIQUID BLACKING

Gives to the Leather not only a

Splendid Jet Black Polish,

But an elegant and Fashionable Perfume.

The neatness and convenience of using Liquid Blacking and the superior polish which it gives over other kinds, has heretofore been in a great measure counterbalanced by its disagreeable vinegar odor and the trouble of fitting something into the stopper of each bottle in order to apply it to the brush, but the Vernatella Blacking has only the most DELIGHTFUL PERFUME, which remains with the leather as long as the blacking lasts, and each bottle has a stick ready fitted in the stopper. The Vernatella Blacking also softens and benefits the leather.

Be sure and inquire for the VERNATELLA Blacking.

This is the cheapest and most favorable Oil property yet offered for profitable and safe investment in the great Alleghany valley. It consists of about 900 acres in the noted Oil Creek Counties of Cattaraugus and Allegany, N. Y., and in close proximity to the Erie Railroad. It has been carefully selected from an area of 35 miles, including 14 farms, which prove the richest show of oil developments in the entire region, and including no mountain lands, useless for oil wells. There are already three wells in progress, one of which is down 430 feet on the "Moore Farm," with an abundant show of oil. A remarkable natural oil spring also exists on this farm, near the well, constantly yielding gas and oil of extraordinary quality, being of a greenish hue and like the celebrated "Mecca Oil," very valuable as a *lubricator*, commanding more than double the price of the ordinary petroleum. On the "Talcott Farm" a well is down 575 feet, with a fine show of oil and gas. Near this well is the famous INDIAN SPRING, which flows oil in large quantities. Remarkable outflows of oil exist on the "Metcalf Farm," on which a well is now being bored, with rich show of oil. The first oil is reached at *fifty feet* on these lands wherever boring has been done. Two engines are now constantly at work on the wells.

The rare character of this oil gives immense value to this property, being so superior as a lubricator. Its nearness to the Erie Railroad enables the oil to be delivered in market $1 50 per bbl. less than from Oil Creek, Pa.

The very *low cost* of this property to subscribers for the *large amount of boring territory*, together with the valuable improvements already upon it, and the **Rare Quality** of the oil, must command the attention of all to its unrivalled advantages for investment and profit.

The principal part of the stock is already taken; when closed it is proposed to organize under the laws of the State of New York.

Subscription books are open for the sale of the balance of this stock, and samples of the crude petroleum can be seen, and full particulars obtained, at the offices of

HALE'S

Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the means of all. At last after a long course of chemical experiments, he found that by adding to these *five* other ingredients, each one valuable in itself, he not only obtained the desired results but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the general public as a safe, pleasant and infallible remedy.

"A Wonderful Discovery."

DR. TEBBETTS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "DYE," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new HAIR in all cases on BALD HEADS, where the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. Will it every "GRAY HEAD" in New England can be restored in less than sixty days.

☞ All persons to whom bills are sent "about this time," (or at any other time, as to that matter,) by any mechanic or tradesman, will see the propriety of settling the same immediately—seeing this is not a question of time but of money. As to a few *we* send, for our Weekly, &c., those whose subscriptions have run out, will be considered as wishing their papers discontinued, unless they remit forthwith.

☞ The levee of the Portsmouth Division of Sons of Temperance will be open this evening, where the various attractions of such gatherings, music, tableaux, &c., will be held out to our citizens.

THE LEVEE of the Temperance Division at the Court House this evening promises to be one of the most agreeable entertainments of the season. Our people are not social enough:—we have too few social gatherings where the people can throw off the cares of business and the hum-drum of every day life; and as a consequence we grow stoic and indifferent to each others welfare. The music to be furnished this evening is more than worth the admittance fee—to say nothing of the other attractions. The Temperance folks are wide awake, and "know how to keep a hotel." TOT. AB.

☞ Don't forget that Mons. Dubois delivers his humorous lecture on "English and French Blunders" this evening. Aside from the object to which the proceeds are to be devoted, which of itself ought to ensure him a full house, he is said by the press of those cities in which he has appeared, to be one of the most entertaining lecturers of the day.

☞ Mr. E. A. Joy commences a new Term of Juvenile Singing School, at Mercantile Hall, next Saturday afternoon at 2 o'clock. That nice little hall ought to be full—for the children's sake, and that of the public, not to mention the good-natured teacher.

Mr. Joy also proposes to open an Evening School on Wednesday evening, Dec. 7, at the same place, provided a sufficient number are present on that occasion. The "Harp of Judah" will be used.

☞ The two companies of Heavy Artillery formerly stationed at Fort Constitution, and which have been absent nearly seven months, in the performance of garrison duty in the forts about Washington, returned to this city on Tuesday morning.—They have lost but three men, wounded by a shell while on picket, one of whom has since died, and as a body were looking well. They have still a year or more to serve, which they anticipate doing within the State.

NEW HAMPSHIRE ITEMS

—— Lieut. Colonel Barker, Adjutant Heath, Quartermaster Winch, Assistant Surgeon Carbee, five captains and eight lieutenants of the 12th New Hampshire Regiment, being all the officers who were cognizant of the circumstances, have signed a paper saying that A. H. Milliken, late First Lieutenant of Company H. in that regiment, and recently expelled from the service, was a true soldier and brave officer, ever ready to perform all his duties; and they believed that in tendering his resignation he was actuated by motives just and honorable, and that great injustice has been done Milliken by his summary dismissal from the service. They therefore urge that the order of dismissal be revoked, and an honorable discharge be granted to him.

—— The Concord Monitor is "down" on an association of brokers who advertise in its columns that in consequence of the recent order of A. A. P. M. General Silvey regarding middle men they shall transfer their services to the "forty acre principality of Roger *Sherman*," and thinks that "men who are unwilling to submit to regulations against fraud are like burglers who object to bank locks and steel vaults, and can well be spared from our community."

—— George Parker and Albert Rogan, of the 7th regiment, died at Fort Columbus, New York, last week. At Lovell General Hospital, Portsmouth Grove, R. I., Augustus Dobein, Co. B, 7th regiment, died Oct. 30, and Corp. Joseph E. Prescott, Co. B, 3d regiment, Oct. 29.

—— The company manufacturing Buckley's Patent newspaper folding machines, in Manchester, have more orders than they can fill. They finish about fifty machines a year, worth $900 each.

—— Dr. Ira W. Bragg, formerly assistant surgeon in the marine hospital, Chelsea, Mass., died in New Orleans Oct. 21, of yellow fever. He was 28 years old and a native of Croydon.

—— Rev. H. C. Fay has asked a dismission from the pastorate of the Cong. Church in Northwood.

Rev. E. N. Hidden, was dismissed by a Council from the pastorate of the Cong. Church in Candia, Nov. 16. He is to take charge at Great Falls.

—— A splendid buck and a fawn were killed in Jefferson on Saturday. The Portlanders will luxuriate on the venison.

—— Two freight trains collided at Goff's Falls on Monday forenoon, with some damage to one of the engines and several cars, but fortunately no lives were lost.

The Emperor of Brazil has appointed a "Board of Health" to investigate and decide what proprietary remedies should be admitted into the country and what excluded. After some months session they have reported condemning them all except Dr. J. C. Ayer & Co.'s preparations. Three of those they recommended the Emperor to admit for the benefit of the public health, while they hold the fourth, Cherry Pectoral under advisement for further information respecting one of its ingredients—morphine—which, while so extensively employed and highly esteemed as a remedy in this country, is scarcely known in that. Of all the other medicines before them, the Imperial commission say, "no one of them merits any favor whatever, or protection from this Government, as they contain nothing new nor any specific virtues not fully known and used by our own physicians." The Imperial Government has accordingly prohibited them all from admission through the Custom House, except the remedies of our distinguished countryman above mentioned—a discrimination by their learned men very like to that which experience has led the American people.—[Boston Herald. 108

It is but simple justice to the Manufacturer of the J. Monroe Taylor Gold Medal Soap, to award him the credit of being far ahead of all competitors in catering to the luxury of the ladies, who prize nice, clean, white clothes (and what lady does not?). Our wife says she could not keep house without it. It is decidedly the Soap of the world. It is a peculiar institution of itself, and such a luxury to use it, that after one trial it is always found to be one of the most useful articles in the household. Depot, 112 Liberty street, New York. 31

He is the happiest who does most to make others happy. The inventor of Herrick Allen's Gold Medal Saleratus must be the happiest man in existence, for we hazard nothing in saying that the use of the Gold Medal Saleratus cannot fail to make a happy household. Our better half says she does not fear of our ever frowning, as long as she can get the genuine Herrick Allen's. We say success to the inventor, and if every body knew how good it is, no other would be used. A good many of our Merchants have it. Their depot is 112 Liberty Street, New York.

☞ Special attention is asked to Hunnewell's preparations, advertised on our inside columns. They are based on true medical laws, used very largely by Physicians, and most undoubted testimonials are in the hands of the proprietor, always open to inspection. Let Portsmouth and its vicinity bear testimony by a confidence to test them, which will be sacred.

SAVE YOUR FUEL!

THE MODEL COOK.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

The subscriber has reduced the prices of the Model Cook Stoves FIVE DOLLARS each, to conform to the decline in gold.

Morning Chronicle.

SOUTHERN DRAFT EXEMPTIONS.—The Richmond Enquirer bestows half a column of indignation upon the Governors of North Carolina and Georgia for the numerous exemptions from military service which they have secured for the citizens of those States. It appears by a report to the rebel Congress that Georgia had 15,000 and North Carolina 14,000 exempts as State officers. The Enquirer remarks:

"Of what profit is it if a man gain the whole world and lose his own soul,' and what good is it if the States of Georgia and North Carolina preserve their organization but lose their existence?

Thirty thousand constables, sheriffs, assessors, militia officers, &c., &c., in two States! These men are necessary to the protection and defense of State rights! The army that is fighting against Lincoln is depleted that another may be organized against Davis.

This whole cry about State rights is a subterfuge to cover up personal animosity to the President, and in reckless disregard of the dangers which surround us."

The absurd dogma, that every State is *sovereign*, while the Union is *no* sovereign at all but a sandy confederacy,—was a Virginian abstraction carried up to Kentucky. Adopted by no State but Kentucky, it has been a *subterfuge*, "to cover up" the designs of a most corrupt party,—and finally to promote the rebellion. It now returns to plague the inventors: and this is right. U. T.

—It is said that the rose of Florida, the most beautiful of flowers, emits no fragrance; the bird of Paradise, the most beautiful of birds, sings no songs; the cypress of Greece, the finest of trees, yields no fruit; dandies, the shiniest of men, have no sense; and ball-room belles, the loveliest of creatures in the world, are very often ditto—only more so.

When a poor countryman of mine—how invariably it is an Irishman has to be brought in when one would illustrate the law's oppression—was once bound over to keep the peace toward all her Majesty's subjects, he left the office exclaiming, "Well then, God help the first furrener I meet with."—*Blackwood's Magazine.*

The number of convicts in the State Prison is now only 75. This circumstance is not attributable to improvement in the public morals, but to the fact that men arrested for crime would entitle them to tickets "over the bridge," are permitted to make a choice between army and State prison bread, and invariably choose the former. *Statesman.*

William R. Blake, the comedian, walking up Broadway one morning, met a friend, who accosted him with "Ah! Rufus, good morning; how fat you are getting, William." "I know it, sir," replied Blake, "and every d—— fool I meet tells me of it."

THE MAGEE
COOKING STOVE.

The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the
CELEBRATED AND UNEQUALLED
MAGEE COOK STOVE,
as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. The oven plates are covered with plaster, which renders it equal to the old-fashioned brick oven for perfection in baking.
There is a new style and very superior broiler and sad-iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the extension top there is a large copper Reservoir for hot water, and an improved ventilating-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.
The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shoveling up of the ashes is entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.
For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.
We would refer to the following purchasers:

"MAGEE'S PATENT"
VENTILATING & AIR-WARMING
FURNACES.
The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.
For economy, purity of air and ease of management it has no equal, producing a current of warm air, moist and agreeable;—and as none of the air which comes in contact with the fire-pots is used for respiration, the tendency to produce headache so much complained of in other Furnaces, is entirely obviated.
The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.
To accomplish this many complicated and expensive heating arrangements have been constructed, some promising but little improvement over former methods, while many have proved a total failure. The reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the
MAGEE FURNACE.
The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of cold air through the fire-pot, which ignites them as they pass off from the fuel, thus saving at least 20 per cent. of the properties of the heat in the fuel.
No heating apparatus with the smoke-pipe or flue of any kind, can be called an economical one, if it allows the gases of the coal, as they pass off with a large amount of the heat generated, making the chimney the hottest part of your dwelling.
This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.
These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.
For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.
They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of the best Furnace in the world,—and would refer them to the following named gentlemen, who have them now in use:
Samuel Cleaves, Esq., Albert R. Hatch, Esq.,
Aaron H. Hill, Charles H. Mendum,
Henry F. Wendell, John Sise, and others.

DR. W. R. MERWIN & CO.'S COLUMN
FOR THE
CHEROKEE MEDICINES.

Cherokee Cure, the great Indian Medicine,

ROOTS, BARKS AND LEAVES.

An unfailing cure for Spermatorrhea, Seminal Weakness, Nocturnal Emissions, and all diseases caused by self-pollution; such as Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Trembling, Wakefulness, Eruptions on the Face, Pale Countenance, Insanity, Consumption, and all the direful complaints caused by departing from the path of nature.

☞ This medicine is a simple vegetable extract and one on which all can rely, as it has been used in our practice for many years, and with thousands treated it has not failed in a single instance. Its curative powers have been sufficient to gain victory over the most stubborn cases.

☞ To those who have trifled with their constitution, until they think themselves beyond the reach of medical aid, we would say, *Despair not!* the CHEROKEE CURE will restore you to health and vigor, and after all quack doctors have failed!

☞ For full particulars, get a circular from any drug store in the country, or write the proprietors, who will mail free to any one desiring the same, a full treatment in pamphlet form.

☞ Prices, $2 per bottle or three bottles for $5, and forwarded by express to all parts of the world.

Sold by all respectable druggists everywhere.

DR. W. R. MERWIN & CO., Sole Proprietors,
No. 63 Liberty street, New York.

Glad News for the Unfortunate!
The Long Sought For Discovered at Last.
Cures in from one

to three days.

CHEROKEE REMEDY
—AND—
CHEROKEE INJECTION,
Compounded from Roots, Barks & Leaves.

CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys, Stone in the Bladder, Stricture, Gravel, Gleet, Gonorrhœa, and is especially recommended in those cases of Fluor Albus (or Whites in females) where all the old nauseous medicines have failed.

It is prepared in a highly-concentrated form, the dose only being from one to two tablespoonfuls three times per day.

It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all of its original purity and vigor; thus removing from the system all pernicious causes which have induced disease.

CHEROKEE INJECTION is intended as an ally or assistant to the CHEROKEE REMEDY, and should be used in conjunction with it at medicine in all cases of Gonorrhœa, Gleet, Fluor Albus or Whites, its effects are *healing, soothing and disinfecting*; removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the *cheap quack Injections.*

☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to health and vigor and strength.

For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.

Price—CHEROKEE REMEDY, $2 per bottle or three bottles for $5.

Price—CHEROKEE INJECTION, $2 per bottle, or three bottles for $5.

The Cherokee Remedy, Cherokee Injection, and Cherokee Cure,
Are sold by all enterprising Druggists in the civilized world. Some unprincipled dealers, however, try to sell worthless compounds in place of these: those which they can purchase at a cheap price, and make more money by selling, than they can on these medicines. As you value your health, age, the health of your future offspring, do not be deceived by such unprincipled Druggists, *ask for these medicines and take no others.*
If the Druggists will not buy them for you, enclose the money in a letter, and we will send them to you by Express, securely sealed and packed free from observation.
Ladies or Gentlemen can address us in perfect confidence, stating fully and plainly their diseases and symptoms, as we treat all diseases of a chronic nature in male or female. Patients need not hesitate because of their inability to visit us, as we have treated patients successfully in all portions of the civilized globe, by correspondence.
Patients addressing us will please state plainly all the symptoms of their complaints, and write Postoffice, County, State and name of writer, plain, and inclose postage stamp for reply.
We send our 32 page pamphlet free to any address. Address all letters for Pamphlets or advice to the proprietors,

☞ The Boston Transcript says the gold operators in New York and Boston are now mercilessly preying upon one another, after having for a long time subsisted at the expense of the body politic. It is one of the pleasantest of phlebotomizing operations for a spectator to witness a gold buyer at 218, when ten minutes after the purchase the price is quoted at 210. But it is unsatisfactory to reflect that the seller is not obliged to produce any gold, but only pockets the difference, — especially as speculators in other articles do not reduce their rates to correspond with even the reported decline of the precious metal, — which, at its real value, should now stand between 170 and 180.

NINE FOLLIES.— To think that the more man eats the fatter and stronger he will become.

To believe that the more hours children study at school, the faster they learn.

To imagine every hour taken from sleep an hour gained.

To act on the presumption that the smallest room in the house is large enough to keep in.

To argue whatever remedy causes one to feel better is "good for" the system, without regard to more ulterior effects.

To commit an act which is felt in itself to be prejudicial, hoping that somehow or other it may be done in your case with impunity.

To advise another to take a remedy which you have not tried, or, without making special inquiry whether all the conditions are alike.

To eat without an appetite, or continue to eat after it has been satisfied, merely to satisfy the taste.

To eat a hearty supper for the pleasure experienced during the brief time it is passing down the throat, at the expense of a hole night of disturbed sleep, and a weary waking in the morning.

WHAT IS ART?— I have heard many definitions of "art," but I know, on the whole, no better one than this,—to do faithfully what we do. Anything, finished thoroughly in all its details, affects the mind as art; and any high or beautiful work, thoroughly done, becomes fine art. It is the perfect finish of poetry, the exact proportion of architecture, the regular modulation of music, the delicate precision of painting and sculpture, which make them all works of art. Anything which can be done in a lovely way, where a little more or less makes no difference, is not art. Shovelling gravel, or digging potatoes, cannot be carried to that precision, and so cannot become works of art.—*James Freeman Clarke.*

A bashful youth was paying his addresses to a gay lass of the country, who had long despaired of bringing things to a crisis. He called one day when she was at home alone. After settling the merits of the weather, he said, looking slyly into his face: "I dreamed of you last night." "Did you? Why now!" "Yes, I dreamed that you kissed me." "Why, now! What did you dream your mother said?" Oh! I dreamed she wasn't at home." A light dawned on the youth's intellect, and directly something was heard to crack—perhaps his whip and perhaps not, but in about a month they were married.

☞ General Grant was in business in St. Louis before the war broke out, and here is his advertisement, which appeared in a paper of that city, March 12th, 1859. He has enjoyed rapid advancement since that time:

"H. HOGGS. U. S. GRANT.
Hoggs & Grant, general agents for buying, selling, bartering real or personal property, notes, bonds, and other securities; borrowing or loaning of money on real estate or other good security; collection of rents, renting of houses, collecting of notes, bills, accounts, or other demands. Office No. 55 Pine street, St. Louis, Mo."

— All the officers and crew of the Florida brought by that vessel, the Kearsarge and the Wachusett, are in Fort Warren where they await the determination of the Government as to their disposal.

— Government has taken no action in the case of the Florida, and no discussion of it has been held, consequently all reports of her being ordered back to Babia are erroneous.

— A Sabbath School girl in Bangor only ten years old recently received the prize of a Bible for committing 1360 verses to memory in six months. Her teachers ought to be ashamed to make such a fact public.

— The Portland papers are rather severe on Gough—one of them remarking that he will make more of a splurge than any other man in the country on so small capital as he possesses.

— A wealthy Jewess has just been recovered from a nunnery in Warsaw. She says there are a dozen more there, who like her, were kidnapped and confined.

It is the foremost Magazine of the day. The fireside never had a more delightful companion, nor the million a more enterprising friend, than Harper's Magazine.—*Methodist Protestant* (Baltimore.)

The most popular Monthly in the world.—*New York Observer.*

We must refer in terms of eulogy to the high tone and variety of the contents of HARPER'S MAGAZINE—a journal with a monthly circulation of about 170,000 copies—in whose pages are to be found some of the choicest light and general reading of the day. We speak of this work as an evidence of the American People; and the popularity it has acquired is merited. Each Number contains fully 144 pages of reading matter, appropriately illustrated with good wood cuts; and it combines in itself the racy monthly and the more philosophical quarterly, blended with the best features of the daily journal. It has great power in the dissemination of a love of pure literature.—*Tribune's Gadsby's American Literature, London.*

The volumes bound constitute of themselves a library of miscellaneous reading such as cannot be found in the same compass in any other publication that has come under our notice.—*Boston Courier.*

WORKS MEET FOR REPENTANCE.—Recent issues of the Boston Courier and the N. H. Patriot quote an account given by Gen. Guitar, Democratic Candidate for Congress in Missouri of a certain Capt. Pollion, Co. E, 68th, Regiment of Colored Volunteers. Guitar says, "by his own admissions, Capt. Pollion was for several years engaged in the African slave trade.—he kidnapped and transported negroes from Africa to Cuba. On one occasion, having on board his vessel about 700 negroes, all manacled and confined below decks, he was chased by a British man-of-war-ship and to effect his own escape, was compelled to run his vessel ashore and abandon her. Before abandoning his ship he scuttled and sunk her with all the negroes on board."

"Now, adds Gen. Guitar, we find Captain Pollion at the head of a negro company leading them on to freedom and glory."

If Gen. Guitar's account is true, it must be confessed that Capt. Pollion had behaved very basely and had been an exceedingly wicked man.

The labor of the editors of the Courier and Patriot, in support of the institution of slavery, has for many years tended to encourage the perpetration of exactly such acts as are attributed to Capt. Pollion. He has, however, according to Gen. Guitar's account, abandoned the slave trade and, as he is "now at the head of a negro company leading them on to freedom and glory," it is fair to infer that he has repented of his former base and wicked deeds and is trying, at the risk of his life, to make amends for them. This is encouraging and makes it almost reasonable, in view of such facts, to hope that the editors of the Courier and Patriot may even yet go and do likewise.

X. T.

— An extraordinary system of thieving by the master workmen and some of the minor officials has been discovered at the Philadelphia Navy Yard. Their robberies it is estimated will amount to one or two hundred thousand dollars. Resin, tin, lead, copper and other materials purchased for the yard were conveyed from the vessels on carts to other parts of the city and disposed of.

— George D. Prentice, of the Louisville Journal, has procured a pass for Richmond from President Lincoln. The object of his visit is to intercede with Jeff Davis for the pardon of his son, who is in Hood's army and under sentence of death for murder. Young Prentice alleges that he acted in self defence, and was shot at twice before he defended himself by killing his assailant.

— In consequence of the enormous tax on friction matches, (just double the price we were accustomed to pay for them,) imported matches can be sold cheaper than those of home manufactures, and several manufacturers have removed from Maine to New Brunswick to carry on the business there.

— An extensive break occurred in the Erie canal, at Perinton, twelve miles east of of Rochester, on Friday last. Fifty thousand square yards of earth were washed out of the canal bank, and the damage is estimated at $50,000. The disaster was probably caused by a muskrat boring through the bank.

— A correspondent of the N. Y. Herald writes from Liverpool that a firm in that city has contracted to deliver to the rebel government, in some port of the confederacy, 250,000 Enfield rifles, to be used in arming the negroes; a bale of cotton to be received for each rifle so delivered.

— The Charlestown water celebration was a complete success, the procession being large and imposing, but we fear some of the company may have mixed something with their water, as the present is the first year that the Cochituate Water Board have dispensed with wines at their annual dinner.

— The Court Martial at Charlestown Navy Yard, before whom the trial of the Smith Brothers of Boston was commenced two or three months since, is still in session and bids fair to be for several weeks longer, although it has been constantly engaged in the examination of the case.

— A Pennsylvania editor, in an appeal to his patrons, says: "The editor wants grain, pork, tallow, candles, whiskey, linen beeswax, wool and anything else he can eat." He must have a stomach like an ostrich if he can digest the articles he enumerates.

— Great guns cost something. A 10-inch Parrott gun costs $4,500, a 15-inch Rodman gun costs $6,500, a 15-inch Krupp's gun costs $29,400, a 12-inch Blakely gun costs $35,000. The two latter are made of steel.

— The iron clad Dictator is lying at anchor, burning up her coal, so that she may be docked. It is said to be cheaper to burn up coal at $12 per ton than to take it out of her by hand.

CALIFORNIA WINES.—Had the Spanish adventurers, who set sail from Palos three hundred years ago, in quest of El Dorado, been asked what country would realize their ideal, they would doubtless have replied a land abounding in grapes and gold. They were not disciples of Dr. Sangrado nor Taylor, though in their quest they were forced to practice the one and the self-denial of the other. Francis Otellano and his companions sought in vain. It was not between the Orinoco and the Amazon, nor yet between the Essequibo and Branco that this precious country was to be found. The missionary monks, two centuries later, raised the cross upon it unawares, when they built monasteries and founded convents under the shadows of the Coast Range and along the banks of San Joaquin and San Gabriel. Taking with them to California the seeds and cuttings of the famous Oporto, they gave to the congenial soil a blessing that flourished more thrifty than their religion, and was green when the walls of their monastries had crumbled to dust. A century or more later, in 1851, two unpretending Germans, named Kohler and Frohling, turning their backs upon the mineral treasures which then set the world drifting toward the setting sun, settled themselves in the district of Los Angelos, five hundred miles southward from San Fransisco, and while the rest of mankind delved for gold, they, with more certain assurance of wealth, cultivated the grapes. Year after year their vineyards extended and their cellars overflowed with the abundant vintage; and returning travelers brought back from El Dorado, among their pleasantest memories, the delicate flavor and exquisite bouquet of Muscatel, and among their most precious treasures, a few bottles of native Port. Somewhat later Mr. Carl Stern returned from California and established an agency for these wines in New York with the Messrs. Perkins; and thenceforward the name and the fame of the California wines extended, till now there are few cities in the civilized world where they are not known. Perhaps some stimulus was given to their general introduction by the Hon. Wilson Flint, President of the California State Wine growers' Association, who found them "improved in flavor and general excellence by the sea-voyage, over those of the same vintage remaining in California," and the favorable words of Professor Kirkland, of Cleveland, who recommended the samples he tested of California wines and brandies as "possessing qualities which would well adapt them for substitutes for the old fashion pure Madeira wine and French brandy, now obsolete, whenever diffusable stimulants are required for the sick." The severe critical test to which they were subjected by Acting Surgeon General Barnes, Washington City, also recommended them to popular favor. It was as follows:—

"Brandy, 43 per ct. alcohol, pure, with exception of coloring matter. Port Wine, 16.5 per ct. alcohol, 14 per ct. Grape Sugar. Muscatel, 15.5 per ct. alcohol, 22 per ct. Grape Sugar. Angelica, 15 per ct. alcohol, 16.5 per ct. Grape Sugar. Hock, 13.4 per ct. alcohol. All are pure wines.

And to our own readers the fact that at a recent meeting of the Cincinnati Wine growers' Association, they were marked the highest of wines submitted for their inspection, will be sufficient commendation. Certainly we have tested no foreign wines surpassing them in flavor or bouquet. And the best of it all is, that, so far, at least, they are unadulterated, and unquestionably the pure juice of the grape. It is, therefore, a pleasure to know that they are to be introduced here, and available at all our first-class drug and wine houses. — *Cincinnati Commercial.*

THE PRESIDENT PETROLEUM COMPANY, *of President, Venango Co., Penn.*—The advertisement of complete organization is published on another page, and fully explains the plan of the corporation. It will be seen that the officers and directors are of excellent commercial standing and influence. Very liberal advantages are offered to subscribers, and the territory of the company is so ample that there is a very fair prospect of immense returns to the stockholders. It appears that this company has secured, on the Allegheny River and favorite tributaries, an oil-bearing territory of over ten and a half miles in extent. Immediately adjoining the lands of the President Company several successful wells have been sunk, and there is strong testimony in favor of a great success for this enterprise. It is intended to form two more companies out of the territory secured by the "President," which will, of course, enure to the benefit of the original stockholders. The subscription agents in New York, Messrs. L. H. SIMPSON & Co., Cedar street, supply all information as to details that may be desired by subscribers. $100 now paid in secures $500 of the original stock.

— The New York Tribune says it has made no money this year, paper is so high. The Waterville Mail says it is glad to hear it, for the Tribune, by running at a low price, has done much towards starving out the country papers.

— An order has been issued forbidding officers in the field from wearing sashes, shoulder straps or conspicuous hat ornaments, and thereby making themselves marks for rebel sharpshooters.

— The Brooklyn city railroads have petitioned to be allowed to increase their fare, on the ground that they are now barely paying their expenses.

— H. D. Washburn has served a notice upon Hon. D. W. Voorhees that he will contest the seat he claims in Congress from the 7th Indiana district.

— Portland is to have a skating park at an expense of $1000.

— Wood is scarce in Richmond at $100 per cord.

THE REBELLION.

On Monday afternoon 1500 or 2000 rebels appeared in front of New Creek Station on the Baltimore and Ohio Railroad, which was defended by a small body of troops behind earthworks. The latter were soon overcome and either surrendered or fled. In a short time the enemy were in full possession of the post. They blew up the earthworks and destroyed all temporary and other buildings, excepting the residence of Colonel Armstrong, who is either now or has been in the rebel army.

Soon after the enemy reached Piedmont, and destroyed the road house of the company, a large workshop and much valuable machinery, but the cutting of the telegraph wire had alarmed the railroad men, so that all rolling stock and moveable property had been sent off. The enemy are reported to have left in a southerly direction.

At the capture of New Creek Station by the rebels immense quantities of public stores were lost.

It is said that A. P. Hill's rebel corps has been detached from Lee's army and sent south, probably to meet Sherman. Its place has been taken by two divisions of Early's army.

Rebel deserters report that Ewell's rebel corps has gone South.

Gen. Burnside has sailed from Fortress Monroe with 20,000 men, to meet Sherman.

Exchanged prisoners report but 1500 troops at Savannah, who could make but feeble resistance.

The Herald's Army of the Potomac correspondence of the 28th inst., says more firing than usual was indulged in the 27th inst. In the evening the rebels fired from the advanced point of their new line just beyond the famous Bermuda Hundred town. Our gunboats replied and the affair terminated. On the morning of the 28th the firing was quite brisk, musketry participating, but no battle ensued.

Throughout all of the 27th, the rebel firing on Dutch Gap canal was uncommonly heavy And persistent. No damage was done. For an hour in the afternoon they delivered a severe fire on Fort Brady. No damage was done here.

The Richmond Whig urges the slight importance of Richmond to the Confederacy, evidently to lessen the shock of its capture or evacuation.

Gen. Butler has issued an order that Maj. David B. White, of the 81st N. Y. Vols., cannot have the place of sutler in his army. He says, field officers leaving the service voluntarily, cannot take the place of "boot blacks" here. If they have no more respect for the service they have left, they will find that the officers here have. White was sent out of the Department.

Hood's movements in Tennessee seem to indicate an attempt to turn Nashville on the east and make his way to join Breckinridge. It is believed that he will then essay to capture Knoxville, which will give him railway communication with Lynchburg and Richmond. The successful issue of Sherman's move will have severed communication between the main rebel armies, and Hood's present campaign seems to be directed toward securing such communication by the line mentioned.

Five of our gunboats are within three miles of Mobile. The rebels have important earthworks a little below the city.

A letter from Morganzia, La., says the report that the garrison at that place had been captured by the rebel Gen Buckner is a malicious falsehood. Gen. Ullman has proved himself too wide awake for the rebels.

A man named Smith is leading a gang of fillibusters on the Mexican side of the Rio Grande, threatening to take the lives of Federal officers.

☞ The following is the substance of an order just issued from the War Debartment for the organization of a new Veteran Corps, to be commanded by Maj. Gen. Hancock with headquarters at Washington:

An Army Corps to consist of not less than 20,000 infantry, and enlisted for not less than one year, to be designated the "First Corps," shall be organized in the District of Columbia, commencing organization on the first day of December, 1864, and continuing until the first day of January next. Privates to consist of able-bodied men, who have served honorably not less than two years, and therefore not subject to the draft. Officers to be commissioned from such as have honorably served not less than two years.

Recruits will be furnished transportation to Washington and will be credited to the district in which their families reside, and will be paid a special bounty of $300 from the substitute fund upon being mustered into the service. Each recruit who preserves his arms to the end of his term, may retain them as his own upon being honorably discharged.

A freshman at Bowdoin college who was hazed has sued the guilty parties. The Telegraph "hopes that the matter may be adjusted without the publicity of a trial." We hope it will not be; if the college faculties cannot manage rowdy students, let the law take effect on them, as it does on other loafers. We would like to be one of the jury to whom the case will be submitted. *Newburyport Herald.*

— Gold in New York on Wednesday stood at 229 at 1:55.

— The barefooted Carmelites have opened an establishment in Paris. It is customary for the young swells of the Jockey Club and elsewhere to invite them in to take a snack.

— England knows not where to turn for recruits and sailors, and finds extreme difficulty in maintaining an army of only 140,000 rank and file.

— On Tuesday Gen. Hancock was presented with a beautiful field carriage from friends in New York.

— Persons selling "Plantation" or other bitters must take out a liquor dealer's license.

— Nine men over 80 years of age voted for Lincoln in Brattleboro, Vt.

— 1500 men were discharged from the Brooklyn Navy Yard on Tuesday evening.

THE VERNATELLA

LIQUID BLACKING

Gives to the Leather not only a

Splendid Jet Black Polish,

But an elegant and Fashionable Perfume.

The neatness and convenience of using Liquid Blacking and the superior polish which it gives over other kinds, has heretofore been in a great measure counteracted by its disagreeable vinegar odor and the trouble of fitting something into the stopper of each bottle in order to apply it to the brush, but the Vernatella Blacking has only the most Delicate of Perfumes, which remains with the leather as long as the blacking lasts, and each bottle has a stick ready fitted in the stopper. The Vernatella Blacking also softens and benefits the leather.

Be sure and inquire for the VERNATELLA Blacking.

Price, 12 Cents per Bottle.

Manufactured in the Chemical Department of the Cahoon Manufacturing Co., and for sale by Boot and Shoe Dealers everywhere.

This is the cheapest and most favorable Oil property yet offered for profitable and safe investment in the great Alleghany valley. It consists of about 900 acres in the noted Oil Creek Counties of Cattaraugus and Allegany, N. Y., and in close proximity to the Erie Railroad. It has been carefully selected from an area of 35 miles, including 14 farms, which give the richest show of oil developments in the entire region, and including no mountain lands, useless for oil wells. There are already 175 feet, with a fine show of oil and gas. Near this well is the famous INDIAN SPRING, which flows oil in large quantities. Remarkable outflows of oil exist on the "Metcalf Farm," on which a well is now boring hard, with rich show of oil. The first oil is reached at *fifty feet* on these lands wherever boring has been done. Two engines are now constantly at work on the wells.

The rare character of this oil gives immense value to this property. It is equally as a lubricator. Its near proximity to the Erie Railroad enables the oil to be delivered in market $1 50 per bbl. less than from Oil Creek, Pa.

The *very large* portion of this property to subscribers for the *large amount of boring territory*, together with the valuable improvements already upon it, and the *superior quality* of its oil, must command the attention of all to its unrivalled advantages for investment and profit.

The principal part of the stock is already taken; when closed it is proposed to organize under the laws of the State of New York.

Subscription books are open for the sale of the balance of this stock, and samples of the crude petroleum can be seen, and full particulars obtained, at the offices of

HALE'S

Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the means of all. At last after a long course of chemical experiments, he found that by adding to these *five* other ingredients, each one valuable in itself, he not only obtained the desired results but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the cneral public as a safe, pleasant and infallible remedy.

PRICE. 50 CENTS PER BOTTLE.

"A Wonderful Discovery."

DR. TEBBETTS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not an "Dye," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new HAIR in all cases on BALD HEADS, when the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With it every "GRAY HEAD" in New England can be restored in less than sixty days.

☞ The funeral services of Mr. Ezekiel Fitzgerald were attended on Wednesday afternoon at the Universalist Church, where the deceased was a worthy member and parishoner; and where a large congregation assembled on this occasion, to pay their tribute of respect to his memory; among them were a numerous body of freemasons, who with the Portsmouth Cornet Band performed escort duty. The consoling and beautiful burial service of that church never seemed more appropriate than on this occasion, embracing, as it did, many valuable references to the life and character of the deceased.

☞ Those of our citizens who failed to attend the levee of the Sons of Temperance at the Court House last evening will do well to avail themselves of the opportunity offered them to spend an evening pleasantly to-night. The Sons seem determined not to be outdone by the order in sister cities and are desirous that the public should act as umpires in the matter.

KILLED, in a skirmish near Charlestown, Va., Aug. 27th, Mr. John L. Marden, of the 2d Mass. Cavalry, son of the late James Marden, of this city. His age was 38 years.

—— In the space of ten days Mr. Miles Rendal, of Wolfboro', lost his wife and four children, by diptheria.

—— Lake Winnepisogee is as free from ice as in mid-summer, and the steamers make occasional trips with freight.

☞ The Boston Printers are on a strike—not so much for increase of wages, we believe, but rather to maintain the authority and existence of their Union. We are sorry it has come to this. The Post advertises for hands, in our column this morning. The workmen are certainly not to be blamed; but the proprietors are, for they might, by combination and co-operation with their employees, put up their prices so as to pay such wages as first-class typos merit.

— Strict orders have been sent to enrolling officers to correct and revise their enrollment lists at once.

— A cotton flannel mill in North Blackstone, Mass., owned by A. J. Kimball, was burned on Wednesday morning. Loss heavy.

— A resolution in the rebel Congress affirming a willingness to make peace and return to the Union, when they could be guaranteed all their constitutional rights, was voted down almost unanimously.

— Roger A. Pryor's assertion that the Richmond papers would furnish no more information of Sherman's progress, seems to be sustained by the recent course of those journals.

— The President has issued a proclamation announcing the ratification of treaties with Belgium for the extinguishment of the Scheldt dues, and of the treaty of commerce and navigation of 1858.

— The indications are that the Secretary of the Treasury will recommend a continuation of direct loans and increased taxation, especially on manufactures. The Post's special dispatch says Senator Sherman of Ohio will be the new chairman of the Finance Committee. He vows his opposition to the issue of any more currency.

— The city of Roxbury offers $500 for the apprehension of the person who murdered Edward Leahey on the night of the 5th inst., by pounding him on the head with a hammer.

— As a precaution against any incendiary attempt, no visitor will hereafter be admitted to the Brooklyn Navy Yard without a pass from the commandant or executive officer.

— The police of Portland made a descent upon several of the houses of ill fame in that city on Monday evening. All the women captured were sent to the House of Correction.

— The Southerners in New York are a little scared by Gen. Dix's registration order, and are coming up to the Provost Marshal's office pretty freely,

— Newark, N. J., is the principal seat of the trunk manufacture in the United States. One manufacturer employs 400 hands.

☞ Mr. E. A. Joy commences a new Term of Juvenile Singing School, at Mercantile Hall, next Saturday afternoon at 2 o'clock. That nice little hall ought to be full—for the children's sake, and that of the public, not to mention the good-natured teacher.

Mr. Joy also proposes to open an Evening School on Wednesday evening, Dec 7, at the same place, provided a sufficient number are present on that occasion. The "Harp of Judah" will be used.

It is but simple justice to the Manufacturer of the J. Monroe Taylor Gold Medal Soap, to award him the credit of being far ahead of all competitors in catering to the luxury of the ladies, who prize nice, clean, white clothes (and what lady does not?). Our wife says she could not keep house without it. It is decidedly the Soap of the world. It is a peculiar institution of itself, and such a luxury to use it, that after one trial it is always found to be one of the most useful articles in the household. Depot, 112 Liberty street, New York. 31

He is the happiest who does most to make others happy. The inventor of Herrick Allen's Gold Medal Saleratus must be the happiest man in existence, for we hazard nothing in saying that the use of the Gold Medal Saleratus cannot fail to make a happy household. Our better half says she does not fear of our ever frowning, as long as she can get the genuine Herrick Allen's. We say success to the inventor, and if everybody knew how good it is, no other would be used. A good many of our Merchants have it. Their depot is 112 Liberty Street, New York.

☞ Special attention is asked to Hunnewell's preparations, advertised on our inside columns. They are based on true medical laws, used very largely by Physicians, and most undoubted testimonials are in the hands of the proprietor, always open to inspection. Let Portsmouth and its vicinity bear testimony by a confidence to test them, which will be sacred.

Special Notice.

To the Readers of the Morning Chronicle, Portsmouth, N. H.

The undersigned would respectfully ask attention to the preparations known as

Hunnewell's Universal Cough Remedy

The Great Remedy for all Throat and Lung Complaints.

HUNNEWELL'S TOLU ANODYNE,

A perfect relief for Neuralgia, all Nervous Complaints, and Loss of Sleep.

HUNNEWELL'S ECLECTIC PILLS,

Declared to be the most perfect Cathartic and Family Pill; seldom requiring more than *One* for a dose, without *Griping*, and one that should be known to every family.

These preparations will be noticed each month, and originating from most potent questions in Medicine, enjoyed for ten years unbounded reputation, readers are invited to accept such notices as a true index of character, and give me their confidence to test them.

PAINT! PAINT!

Winter's Metallic Brown Paint

RECOMMENDS ITSELF.

It is a pure oxide of Iron and Manganese. It mixes readily with Linseed Oil, taking two gallons less per 100 lbs. than any mineral, and possesses more body than any other paint. It forms a glossy, unfading, durable *metallic coat*, protecting wood from decay, and iron or other metals from rust or corrosion.

☞ It does not require grinding, and is warranted to give satisfaction for painting Railway Cars, Iron Bridges, Houses, Barns, Hulls and Decks of Ships, Tin and Shingle Roofs, &c.

SAVE YOUR FUEL!

THE MODEL COOK.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

The subscriber has reduced the prices of the Model Cook Stoves FIVE DOLLARS each, to conform to the decline in gold.

ACTION.

It is not they who idly dwell
In cloister-gray, or hermit cell,
In prayer or vigil, night and day,
Wearing all their prime away,
Lord of Heaven! that serve thee well.

Action still must wait on thought;
Life's a voyage rough though short;
We must dare the surges where
Many a sin-storm we must brave
Ere we reach our destined port.

Sitting listening on the shore
To the ocean's restless roar:
Never launching on the main
Can the merchant hope to gain
Wealth to swell his treasure store!

Vain it were to watch beside
The pits where we our talents hide;
We must face the noise and strife
Of the market-place of life,
That our trustiness be tried.

Where our Captain bids us go,
'Tis not ours to murmur "No"
He that gives the sword and shield
Chooses too the battle-field
On which we are to fight the foe.

Though, wherever we look around,
All we see is hostile ground;
Where our apparent defeat, above
Recognise His banner—Love—
There it is we should be found.

— London Cathedral, Old St. Paul's destroyed in the great fire, was the longest church in the world. According to an inscription in the building itself, it was above 700 feet long, while St. Alban's church and Winchester cathedral only measure up to 532 and 530.

An old man, advising his daughter one day on the subject of marriage, said, in reply to one of her objections, "Very well my dear, never marry a poor man; but at the same time remember that the poorest man in the world is he who has got plenty of money and nothing else."

— The Emperor of China, after the restoration of Nankin to the Imperialists by capture, ordered that the Chung-Wang and Kan-Wang—each a Jeff. Davis—should be "cut into a thousand pieces," near the ruins of their palaces, and the sentence has been carried into execution.

— A Western paper makes the following apology: "The editor is absent, the foreman has the toothache, the devil is drunk and trying to drink lager beer out of a boot jack, the press is out of order, and we aint well ourselves, so please excuse a poor paper this week."

— A Democratic paper consoles itself as follows: "It is no shame to belong to the minority. Noah and his family were in the minority, while the vast majority went to destruction, pretty much as they are going now."

Charles Augustus to a bevy of young ladies: "Well, plenty of rats round, as usual. I can tell in an instant a lady that wears rats." Indignant young lady: "I can tell in an instant a puppy: you are a regular rat terrier."

The child who cried for an hour, one day at week, didn't get it.

THE MAGEE
COOKING STOVE.
The subscriber, having received his Fall Stock of Stoves, would especially call the attention of the public to the
CELEBRATED AND UNEQUALLED
MAGEE COOK STOVE,
as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. The oven plates are covered with plaster, which renders it equal to the old-fashioned brick oven for perfection in baking.
There is a new style and very superior broiler and sad-iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the extension top there is a large copper Reservoir for hot water; also a large tin warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.
The arrangements for sifting the coal and cleaning the grate are far superior to those of any other stove now in use, as no dust can possibly escape into the room, and the shovelling up of the ashes entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.
For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other stoves; as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.
We would refer to the following purchasers:

with and without ovens, which are too well known to need any recommendation.

"MAGEE'S PATENT"
VENTILATING & AIR-WARMING
FURNACES.
The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.
For economy, purity of air and ease of management it has no equal, producing a current of warm air, moist and agreeable;—and as none of the air which comes in contact with the fire-pot is used for respiration, the tendency to produce headache so much complained of in other Furnaces, is entirely obviated.
The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.
To accomplish this many complicated and expensive heating arrangements have been constructed, some possessing but little improvement over former methods, while many have proved a total failure. The reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the
MAGEE FURNACE.
The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of cold air through the fire-pot, which ignites them as they pass off from the coal, thus saving at least 20 per cent. of the properties of the heat in the fuel.
No heating apparatus with the smoke-pipe or flue on the top of the cone can be made to consume the gases of the coal; as they pass off with a large amount of the heat generated, making the chimney the hottest part of your dwelling.
This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.
These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 40 to 50 per cent. of fuel over common Furnaces.
For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.
They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of the best Furnace in the world.—and would refer them to the following named gentlemen, who have them now in use:

Samuel Cleaves, Esq.,	Albert R. Hatch, Esq.,
Aaron H. Hill,	Charles H. Meadum,
Henry F. Wendell,	John Sise, and others.

DR. W. R. MERWIN & CO.'S COLUMN
FOR THE
CHEROKEE MEDICINES.
Cherokee Cure, the great Indian Medicine,
COMPOUNDED FROM
ROOTS, BARKS AND LEAVES.
An unfailing cure for Spermatorrhea, Seminal Weakness, Nocturnal Emissions, and all diseases caused by self-pollution; such as Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Trembling, Wakefulness, Eruptions on the Face, Pale Countenance, Insanity, Consumption, and all the direful complaints caused by departing from the path of nature.
☞ This medicine is a simple vegetable extract and one on which all can rely, as it has been used in our practice for many years, and with thousands treated it has not failed in a single instance. Its curative powers have been sufficient to gain victory over the most stubborn cases.
☞ To those who have trifled with their constitution, until they think themselves beyond the reach of medical aid, we would say, *Despair not*; the CHEROKEE CURE will restore you to health and vigor, and after all quack doctors have failed!
☞ For full particulars, get a circular from any drug store in the country, or write the proprietors, who will mail free to any one desiring the same, a full treatment in pamphlet form.
☞ Prices, $2 per bottle or three bottles for $5, and forwarded by express to all parts of the world.
Sold by all respectable druggists everywhere.

Glad News for the Unfortunate!
The Long Sought For Discovered at Last.
Cures in from one
to three days.
CHEROKEE REMEDY
—AND—
CHEROKEE INJECTION,
Compounded from Roots, Barks & Leaves.
CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys, Stone in the Bladder, Stricture, Gravel, Gleet, Gonorrhœa, and is especially recommended in those cases of Fluor Albus (or Whites in females) where all the old nauseous medicines have failed.
It is prepared in a highly concentrated form, the dose only being from one to two tablespoonfuls three times per day.
It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all its original purity and vigor; thus removing from the system all pernicious causes which have induced disease.
CHEROKEE INJECTION is intended as an ally or assistant to the CHEROKEE REMEDY, and should be used in conjunction with it at medicine in all cases of Gonorrhœa, Gleet, Fluor Albus or Whites. Its effects are *healing, soothing and demulcent;* removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the *cheap quack Injections.*
☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to full vigor and strength.
For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.
Price—CHEROKEE REMEDY, $2 per bottle or three bottles for $5.
Price—CHEROKEE INJECTION, $2 per bottle, or three bottles for $5.

The Cherokee Remedy, Cherokee Injection, and Cherokee Cure,
Are sold by all enterprising Druggists in the civilized world. Some unprincipled dealers, however, try to sell worthless compounds in place of these: those which they can purchase at a cheap price, and make more money by selling, than they can on these medicines. As you value your health, age, the health of your future offspring, do not be deceived by such unprincipled Druggists, *ask for these medicines and take no others.* If the Druggists will not buy them for you, enclose the money in a letter, and we will send them to you by Express, securely sealed and packed free from observation.
Ladies or Gentlemen can address us in perfect confidence, stating fully and plainly their diseases and symptoms, as we treat all diseases of a chronic nature in male or female. Patients need not hesitate because of their inability to visit us, as we have treated patients successfully in all portions of the civilized globe, by correspondence.
Patients addressing us will please state plainly all the symptoms of their complaints, and write Postoffice, County, State and name of writer, plain, and inclose postage stamp for reply.
We send our 32 page pamphlet free to any address. Address all letters for Pamphlets or advice to the proprietors,

SEWERS. — Twenty-four years ago New York had not a sewer; only a few water-drains; and a heavy penalty was inflicted on the evil-doer who connected his house-drain with one of them. Twenty-four centuries ago Rome had a complete system of sewers for the removal of impurities, the main channel of which now exists and is capable of the functions it was designed for, and might last thousands of years longer.

The iron of wheels and horse-shoes beats and grinds to powder the rough pavements deemed necessary to enable slippery-shod horses to keep on their feet; and thence comes two-thirds of all the street dirt, all of it that will not easily float through sewers without clogging them. Ancient pavements, made of basaltic lava, and smoothed and polished so as not to wear the unshod feet of horses, and wheels without iron tires, lasted for centuries without perceptible wear; and there was relatively little dirt. Had we such pavements, with our skill in carriage-making, we could work without horses at less cost than we can now work with them, even if man-power were the only substitute; the hand-cars on railways show this. — *Am. Artisan.*

— The trial of a new sub-calibre projectile, in connection with a new packing or sabot, both the invention of Wilson H. Smith of Derby, Conn, was made in that town a few days since, by order of the Navy Department. The New Haven Journal says the extreme range of these projectiles was *seven-and-a-quarter miles*, and their penetrative force without a parallel, two of the bolts passing through a target composed of 8 inches of laminated iron plates, 12 inches of oak backing and 4 feet of hemlock timber.

American and Foreign Patents.
R. H. EDDY.
SOLICITOR OF PATENTS,
Late Agent of U. S. Patent Office, Washington, (under the Act of 1837.)
76 State street, opposite Kilby street,
Boston.
After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Reports, Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with despatch. Research made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.
The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional service so moderate.
The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.
These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.
All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.
TESTIMONIALS.
"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.
"I have no hesitation in assuring inventors that they cannot employ a person *more competent and trustworthy*, and more capable of putting their applications in form to secure for them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents.
Mr. R. H. Eddy has made for me THIRTEEN applications, on all but ONE of which patents have been granted, and that is *now pending*. Such unmistakeable proof of great talent and ability on his part leads me to recommend *all* inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."
JOHN TAGGART.
During eight months, the subscriber, in course of his large practice, made on *twice rejected* applications SIXTEEN APPEALS, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents.

In Syhilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and Spermatic Cords Bubo, Ulcerated Throat, Sore Nose, Tender Shin Bones, Cutaneous Eruptions, Biles, Ulcers, Abscesses, and all other impurities of the system, are perfectly under the control of the Doctor's Medicines, and have been tested in more than 20,000 cases annually, with immense Success.
YOUNG MEN.
Young Men addicted to secret habits, who have impaired their healths and destroyed the vigor of their minds, thus depriving themselves of the pleasure of the fairer sex, are notified that in consulting Dr. J. Teller, they will find a friend to console and a Physician who has cured thousands, in almost every part of the United States, who applied to Dr. T. broken down in health, now rejoice in all that makes life desirable and man happy. The reader is of course aware that the delicacy of the subject will prevent a more minute description of this terrible disease.
DR. TELLER'S GREAT WORK.
A book for everybody.—Startling disclosures. Dr. TELLER'S great work for the Married classes contemplating marriage—200 pages—full of plates—price 25 cts. Sent to all parts, under seal, by mail, post paid, to the copies sold the past year. The single Married and the Married Happy. A lecture on Love, or how to choose a Partner—a complete work on Midwifery. It contains hundreds of secrets, never before published or Warranted to be worth three times the amount asked for it. 25 cents, in specie or postage stamps, inclosed, will secure a copy by return mail. Dr TELLER has devoted a lifetime to the cure of those diseases upon which his books treat.
TO THE LADIES.
Dr. TELLER still remains the only Agency in America, for the sale of Dr. Vichoi's Italian Female Monthly Pills. The sale of more than 20,000 boxes establishes their reputation as a female remedy, unapproached, and far in advance of every other medicine—for stoppages, irregularities, and other obstructions in females.
CAUTION.—Married ladies in certain delicate situations should avoid their use. For reasons see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent, by mail or express, to any part of the world, secure from curiosity or damage.
Office hours from 8 A.M. to 8 P.M., and on Sundays from 9 to 57 P.M.

Morning Chronicle.

Portsmouth, N. H.

FRIDAY, DECEMBER 2, 1864.

HOW THE REBEL RULERS NOW TREAT THE DEMOCRATIC PARTY.—It appears that the ruling rebels are greatly disappointed and chagrined at the defeat of McClellan, and the overwhelming majority for President Lincoln. From most of the copperhead newspapers, and Northern conspirators and traitors, especially those who had joined the secret order, or Jacobine clubs, to aid the rebels to subvert the Government, they had great confidence that their friend, Little Mac, would be elected, and afterwards enter into a treaty acknowledging their separate independence. It may be inferred that they expected the Vallandighams, Woods, Seymours, and other commanders of the secret clubs in most of the States, would give orders for an insurrection and civil war at the North, and that our principal cities would, on a day to be appointed, be involved in flames! Had not the treasonable plots been timely discovered, and some of the traitors arrested, such might have been the case. All our States, but three, having been loyal at the Presidential election, the oligarchs now express their utter contempt of the Democrat-party, copperheads included, and a higher respect for the "black republicans," who stand for their own institutions. Among other papers, the Richmond Enquirer of the 12th ult. asks: "Have the Democrats shown us sympathy, or done us simple justice at any time during the war? Did they ever boldly stand up against the heated passions and heroic bravery of the black Republicans, to protect the Confederate States? Or, when they did arise, was it not merely to protect their own rights and further their own plans? They are no longer the pure and noble Democrats of days gone by. They have adopted, for party purposes, all the radicalism, the discontent, the poverty and crimes of Europe; all the thousands, living in misery and vice at home, alike incapable of comprehending, much more of loving, the enlightened structure of republican freedom. The cowardice and baseness of the Northern Democracy are unexampled in history. They have, without a blow, surrendered every right of their own." Without further extracts, we present this vulgar abuse from the leading organ of the Southern sentiment, as a mirror that the copperheads may plainly see in what light they are viewed. It is too bad, after they had manfully struggled at the polls in support of Southern Slavery and Independence. Now, let oligarchs understand that the cruel war they waged to sustain and widely expand their "peculiar institution," has opened the eyes of a vast majority of the Northern people, and we hope towards a million of loyal democrats have, or will soon, repudiate their political connection with the copperhead party. Certainly a large part of them voted for Lincoln's re-election. Unlike the copperheads, they are not "incapable of comprehending, much more of loving, the enlightened structure of republican freedom." They cannot justly be accused of "cowardice," of the "poverty and crimes of Europe," and of "misery and vice at home." True Democracy is entirely consistent with Republicanism. Ours is truly a Democratic Republican Government,—and will be maintained forever, or so long as the great body of the people remain virtuous and intelligent. The Southern Confederacy will soon die; slavery is dead—and copperheadism is dead beyond the power of resurrection. Let the aristocrats and crowned heads of Europe no longer sneer at our "Self-Government." They will now understand that it has sufficient vigor, energy and power, supported by freemen, for its own preservation and perpetuity.

ESTO PERPETUA.

HONORS FOR FARRAGUT.—It is stated that the President in his forthcoming message will recommend an advance of one grade in the Navy, similar to that given in the army by the appointment of Grant as Lieut. General. The new grade it is said, will be that of Vice-Admiral, and immediately on its creation the Navy Department will nominate to the Vice Admiralty the Salamander of the Navy, Rear Admiral Farragut.

☞ "Beau Hackett" having been imprisoned for conspiracy, thus concludes a letter to the Chicago Times:

In conclusion, let me say to you that it is about as cheap to support the government as it is to support a family, in these times, and it is about the best thing a man can do, when he can't do anything better. The little thing of being jerked off to prison at the option of an ambitious lieutenant or detective, is not what it is cracked up to be. It's like pulling girls up hill on a sled, it looks well in pictures, but it don't feel good to experience the reality. Henceforth, I've done with conspiracies.

— A man fishing from a wharf in Jersey City hooked up a cigar box, curiously packed and tied up with a twine, which was found to contain the dead body of an infant. Rather an unpleasant catch.

THE REBELLION.

Richmond papers of Monday, the 28th ult., contain very little intelligence from Georgia. The Examiner says all that has been received is unreliable and untrustworthy. The Dispatch says editorially that it don't pretend to know where Sherman is.

The Enquirer contains the details of an attempt made by the Union prisoners at Salisbury, N. C., to escape. They rushed upon the guard, killing two and driving others away. An alarm was given and a battery of artillery, loaded with grape and cannister, was fired on the prisoners, killing and wounding many. A large number effected their escape. Fifteen thousand Union prisoners are confined at that place.

Breckinridge is said to have left East Tennessee, but for what point is not stated.

The garrison at Shelbyville, Tenn., was attacked by a body of rebel cavalry, Monday, but after some severe skirmishing the rebels fled. Skirmishing at the front is of daily occurrence. There is no change in Hood's position. In every skirmish so far the Federals appears have had the advantage. Our forces have evacuated Shelbyville, and it is now in the hands of the rebels.

North Carolina rebel papers report the abandonment of the Wilmington expedition by the Union forces, which appears to give them great relief.

It is reported that all the available rebel forces at Wilmington and other points in North Carolina are moving to the assistance of Georgia. Gen. Bragg has been assigned to the command of the Department of North Carolina, which constitutes his command.

The Herald's New Orleans correspondent says:—

Gen. A. L. Lee, commanding the Union cavalry forces at Baton Rouge, returned to that point on the 22d ult., from an expedition to Liberty and Brookville, bringing with him three pieces of rebel artillery, about 800 horses and mules, and 200 prisoners, including the entire staff of Gen. Hodge, all of which were captured after a spirited engagement with the enemy. It is reported that a large portion of Magruder's army is endeavoring to cross the Mississippi to reinforce Hood's army, but they are watched by Union gunboats.

The Richmond Dispatch of the 28th says:

Georgia papers print much concerning Sherman's movements, and about our own, which it would be imprudent to copy. It was pretty well ascertained that the left wing of Sherman's army, when it reached Madison, numbered 16,000 men. They burned the town when they left.

The excitement in Augusta a week ago Monday was very great, and it was proposed to impress the negroes. The Richmond Whig derives comfort from the belief that Sherman marches but seven miles per day.

Grant is said to be massing troops on his left, and if the weather continues favorable he may make another move in that direction.

Instead of sailing from Fortress Monroe with 20,000 men, Gen. Burnside is in Providence.

The rebels made a furious attack on Gen. Thomas at Franklin, Tenn., on Wednesday afternoon with two corps and after very severe fighting were repulsed at all points with frightful loss. Their killed and wounded will number 6000. We captured 1000 prisoners. The Federal forces have not retreated except to improve their position. They occupy Franklin to-day, but will probably select for the battle field a place much nearer Nashville. A. J. Smith's corps was to reach Nashville on the night of the 30th.

Small detachments of rebel cavalry are operating not far from Nashville, doing, however, no great damage to railroad communications, which still remain intact. The Chattanooga trains are running regularly.

The latest intelligence from Georgia by rebel sources, represents the Macon and Augusta Railroad trains running on time on the 26th ult., neither city having been attacked.

The Herald's Martinsburg correspondent says of the affairs at New Creek, Col. Latham, M. C., elect from Pennsylvania was in command, and being warned by the engagement at Moorfield had his men prepared for an attack. Watching all night, but the enemy not appearing, vigilance was relaxed the next day, when Rosseur pounced upon his pickets and got inside his lines before his men could be gathered. We lost 7 or 7 guns and some 300 men. Col. Latham, who was missing until the battle, turned up at a safe distance from the scene of strife.

The rebels still claim that they occupy Macon, and the Richmond Enquirer argues that Sherman cannot reach that city.

Memphis papers of the 30th ult., give detailed accounts of a plot by rebel agents to burn the Memphis & Charleston railroad depot and Government stores worth $2,000,000. The plot was discovered by U. S. detectives, and the incendiaries were caught in the act of firing the buildings.

— Gold closed in New York on Thursday at 2 P. M at 2.26 bid, 2.26 1-4 asked.

— Semmes, the pirate, is reported by a Cairo dispatch to have arrived at Bagdad, Mexico, Oct. 15, on his way to Richmond.

— Pennsylvania, as near as can be ascertained at the present time, has given Lincoln 18,000 majority.

NEW YORK, Nov. 26.

Dear Chronicle:—

There is everything in a residence in a city where there is a continuous supply of excitement. No sooner do we get through with Gen. Butler than another species of incendiary appears. Probably there is no other place in the world where a dozen hotels could be fired in different localities, all within three hours, each one to conflagrate just half an hour. The Herald says it was the work of Southern sympathisers, and the Herald is never wrong; other people who are always right, maintain 'twas only the work of a gang of plunderers. As the two terms are merely synonymous if you add "cut throat" to the latter, I can't see that it makes much difference whether we use one or the other. The fiendish act certainly deserves the condemnation of every order-loving, loyal, and other respectable person, and the severest and speediest punishment of the law. But every one here excepting the newspapers has already nearly forgotten the affair. We have become so used to riots, murders, torpedoes under the horse cars, and little incidents of this kind, that they are items for only one day's consideration now.

The plot for the sacking of our beautiful city was admirably well planned and prepared, but very miserably executed. In the first place ten minutes before nine was too early in the evening for the opening; then the attempts were not simultaneous enough, and then the operators were in too great trepidation, and did not get their little bon-fires sufficiently well started.

A few minutes before nine last evening the bells rung out, "one, two,"—and the St. James' Hotel, corner of 26th street and Broadway, just above the Fifth Avenue, was discovered to be on fire. Hardly five minutes had elapsed before the bells gave the alarm from one to seven, and Barnum's Museum, away down Broadway, three miles, was also on fire. Then came an interval of a half hour. Here the plot miscarried. It was evidently intended that these two fires should get well under way, monopolize the attention of the fire department in the two extremes of the city, and then that the others should follow in quick succession;—but these two were quickly subdued, and instead of being a grand overture to the performance, only served as an alarm.

It crept on toward ten o'clock when the alarm rung for the St. Nicholas, (where the greatest loss was sustained, four rooms being fired,) and this was followed by one from the Metropolitan, and Lafarge, then away down to the United States, by the East River, then back to the Howard on Broadway, and followed before one o'clock by fire at the Astor, French's, Lovejoy's, Fifth Avenue, and several other hotels, with a climax of three hay barges along the North River. About half past ten it got to be pretty exciting.

It will be remembered that Winter Garden is in the Lafarge House, and Niblo's in the very heart of the Metropolitan. Both were crowded and the furore was tremendous. The audience rushed, screamed and fainted for a few moments, perfectly regardless of the feelings of the actors.

In all of these incendiary attempts the preparations were identical. In all phosphorus was used, contained in vials of a uniform size. Matches were thrust into the ticks, resin laid on the floors, the furniture piled on the beds, or the bedding in the centre of the room. All of the rooms were locked, and each of the occupants missing. Calmly reflecting on the diabolical magnitude of the scheme, the mind shudders from the contemplation of the fearful massacre which would have attended the success of these devilish machinations.

The hotels were all crowded from hall to dome, with men, women and children, the places of amusement within their limits were all well attended; the Museum is always "packed"; and especially in the latter case, the egress is so difficult that not one in a hundred of the audience would have escaped. The hotels are all situated in the compact portions of the city, and the fires would have consumed not only their individual magnificent structures, but block upon block in the vicinity of each, while the burning hay barges would have proved fearfully destructive to the shipping which fringes the city.

It was a miraculous escape; as Pres. Lincoln telegraphed to the Brooklyn politicians on hearing the election result, let us "Sing Old Hundred" and hope that a sufficient number of the villains will be caught to make it worth while to put into active operation Gen. Dix's orders for "execution upon conviction, *without a day's delay!*" Let them swing!

The third line of my last letter should have read, "the high waves of party strife which so fearfully lashed the limits of kindness and propriety," not *prosperity;* and the last paragraph, "McClellan, the hero of three rivers, (not *towns,*) the Potomac, James and Salt." Never be so unkind as to extinguish the very little brilliancy of a very poor joke, unless you positively can't help it!

What will be next devised for our amusement in this bustling little town, can't be easily foretold—I can only remain

Yours x-px-tantly, N.

— All the fires in New York for the next six months to come will be set by rebel emissaries with phosphorus. Such is the cause assigned for the burning of Ogden's lumber yard, on Hurbert street, on the 30th ult., resulting in a loss of $100,000.

— Francis O'Harran, arrested for placing obstructions on the railroad track near Farrisburg, Vt., on Saturday evening last, committed suicide in Middlebury jail on Tuesday afternoon. He is supposed to have been an insane person.

— An oil well has been struck near Zanesville, Ohio, whose daily products sell for $3840. A big strike, and one that goes down better with the proprietors than the printers' strike in Boston.

— The Portland Argus, having contracted for its composition and presswork for a year to come, can laugh at "strikes" for that period.

— Auction sales of Woolen goods in New York on Tuesday returned fair prices if gold had been but 200, but at 232 and upward, the prices obtained were below the mark.

— The Tribune's special Washington dispatch says Judge Holt has been selected to succeed Judge Bates as Attorney General.

THE VERNATELLA
LIQUID BLACKING
Gives to the Leather not only a
Splendid Jet Black Polish,
But an elegant and Fashionable Perfume.

The neatness and convenience of using Liquid Blacking and the superior polish which it gives over other kinds, has heretofore been in a great measure counterbalanced by its disagreeable vinegar odor and the trouble of fitting something into the stopper of each bottle in order to apply it to the brush, but the Vernatella Blacking has only the most DELIGHTFUL PERFUME, which remains with the leather as long as the blacking lasts, and each bottle has a stick ready fitted in the stopper. The Vernatella Blacking also softens and beautifies the leather.

Be sure and inquire for the VERNATELLA Blacking.

Price, 12 Cents per Bottle.

Manufactured in the Chemical Department of the Cabcon Manufacturing Co., and for sale by Boot and Shoe Dealers everywhere.

Parties Subscribing in this Company will receive an Equal Amount of Stock in two other Companies adjoining, without further charge.

The Lands of these Companies are located on the Allegany River, and on Hemlock, Porcupine and McCrea Creeks, making an OIL-BORING Territory of over *Ten and-a-half miles* in *Extent.*

The wells on the adjoining property, known as the celebrated "Heidrick" wells, and "Pithole Creek" wells, are famous for their immense supply of oil.

The wells on this property are being sunk with great vigor, and promise large supplies of oil.

To the capitalist, and to parties of limited means, unsurpassed inducements are offered.

Persons investing in this Company get $5 stock and the above BONUS for each $1 invested, without further call or assessment.

This is the cheapest and most favorable Oil property yet offered for profitable and safe investment in the great Allegany valley. It consists of about **900 acres** in the noted Oil Creek Counties of Cattaraugus and Allegany, N. Y., and in close proximity to the Erie Railroad. It has been carefully selected from an area of **35 miles**, including **14 farms**, which give the richest show of oil developments in the entire region, and including no mountain lands, useless for oil wells. There are already three wells in progress, one of which is down 430 feet on the "Moore Farm," with an abundant show of oil. A remarkable natural oil spring also exists on this farm, near the well, constantly yielding gas and oil of extraordinary quality, being of a greenish hue and like the celebrated "Mecca Oil," very valuable as a *lubricator*, commanding more than double the price of the ordinary petroleum. On the "Talcott Farm" a well is down 525 feet, with a fine show of oil and gas. Near this well is the famous INDIAN SPRING, which flows oil in large quantities. Remarkable indications of oil exist on the "Metcalf Farm," on which a well is now being bored, with rich show of oil. The first oil is reached at *fifty feet* on these lands wherever boring has been done. Two engines are now constantly at work on the wells.

The rare character of this oil gives immense value to this property, being so superior as a lubricator. Its near proximity to the Erie Railroad enables the oil to be delivered in market $1 50 per bbl. less than from Oil Creek, Pa.

The very *low cost* of this property to subscribers for the *large amount of boring territory*, together with the valuable property already upon it, and the **Rare Quality** of its oil, must command the attention of all to its unrivalled advantages for investment and profit.

The principal part of the stock is already taken; when closed it is proposed to organize under the laws of the state of New York.

Subscription books are open for the sale of the balance of this stock, and samples of the crude petroleum can be seen, and full particulars obtained, at the offices of

THE UNPRECEDENTED POPULARITY

Which has attended the introduction of our brands of

CALIFORNIA WINES

Is a flattering tribute to their purity and fine qualities.

THE STATE FAIR

At Indianapolis, where our Wines came into competition with all the best Western Wines, have just awarded us a *SILVER MEDAL.*

At the OHIO STATE FAIR we took *Five Premiums* out of six.

Surgeon General Dale, after a careful and searching chemical analysis of our wines, pronounces them PURE.

The leading portion of the American Press have extolled their merits; and the unanimous verdict of those who use them is, that

HALE'S

Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading To Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempt to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the means of all. At last after a long course of chemical experiments, he found that by adding to these *free* other ingredients, each one valuable in itself, he not only obtained the desired results but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the general public as a safe, pleasant and infallible remedy.

PRICE, 50 CENTS PER BOTTLE.

For sale by B. Hutchings, Portsmouth, and all Druggists.

"A Wonderful Discovery."

DR. TEBBETTS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "DYE," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new HAIR in all cases of BALD HEADS, when the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With it every "GRAY HEAD" in New England can be restored in less than sixty days.

NAVAL.— Capt. C. W. Pickering, U. S N. of this city, has command of the steamer Vanderbilt, recently off Wilmington, and now on a cruise.

The Marine Retiring Board, for sometime past in session at Brooklyn, have completed their sitting, and Maj. Jones, who has been a member, has returned to this station.

Acting Masters Mate Wm. H. Yeaton of Stratham, formerly of the Kearsarge, has reported for duty on board the Vandalia.

Acting Ensign Wm. Shackford has been promoted to Acting Master.

Acting Master's Mate Ezra Bartlett, (of Stratham,) of the U. S. gunboat Kearsarge, has been promoted to be an Acting Ensign, is detached from his vessel, and waiting orders.

☞ The great steamer Contoocook, built at our Navy Yard, will be launched on Saturday at half past 2 o'clock.

☞ We obtain the following information from the Concord Monitor:

G. N. Thomas of Canada, and Charles C. Knapp of Littleton, were brought before Commissioner Fowler, in Concord, on Monday, on a charge of enticing a soldier to desert, and attempting to re-enlist him in this city. Perrin A. Benton, of Canada, enlisted in the Mass. 16th Regiment, and when the time of service of that regiment expired, was transferred to the 11th Mass. He had served two years and re-enlisted. He was furloughed from one hospital and ordered to report to another; but not finding his name on the hospital lists, he furloughed himself to Canada, on a visit, where he remained five weeks. On his return he came to Littleton, where Thomas, who knew him, persuaded him to accompany himself and Knapp to Concord and re-enlist. Thomas to pay him $200. On his arrival there he was examined, and by advice of Capt. Silvey, rejected. He was brought to this city, examined and accepted, and was to receive from Thomas $100 only, the other $100 to be paid them for expense in obtaining a furlough of twelve days for him. He re-enlisted in this city under the name of Augustus Perrin.

On examination of his baggage, Capt. Kent discovered his discharge papers from the Massachusetts regiment, and immediately drew from him the circumstances of the case, and accompanied him to the depot where he arrested Thomas and Knapp.—Thomas was ordered to recognise in $1000 and Knapp in $600 for trial in May. Knapp obtained bail in Concord. Thomas, on the way to jail, informed City Marshal Pickering that he had $600 which he would put into the hands of any parties that would bail him, provided his bonds could be reduced to that sum. By consent of A. D. A. Mugridge the sum was reduced. He declined to pay the money at the jail and desired to do so at the Eagle Hotel. While down cellar to get a drink of cider, he suddenly decamped. This was at 4 o'clock P. M. No trace of him was discovered until about 8 o'clock in the evening, when he was found ensconced in the privy vault of the Eagle Hotel. He was duly cared for by Marshal Pickering.

— The large round stone barn of the Shakers, at Hancock, Mass., one of the largest and most famous agricultural structures in the country, took fire early Thursday morning, and was destroyed together with a considerable part of its contents. The fire was accidental.

— Gen. Gillmore left New York for New Orleans on the 1st, to inspect the defences in the West Mississippi military division.

— The resignation of the following named officers has been accepted by the President to take effect Nov. 20: Maj. Gen. John A. McClernand, Brig. Gen. E. Payne, Brig. Gen. Neal Dow.

The first Quaker that has been drafted was accepted Tuesday. He submitted with no outward demonstrations of reluctance to being arrayed in blue and was sent to camp without a murmur of disapproval. Whether he will fight or not, remains to be seen. There have been a number of the Friends drafted, but this was the first one that had proved physically suitable for military duty.—*Portland Argus.*

— This week the Stark Mills in Manchester, commence spinning flax, to be used in the manufacture of seamless grain bags. Before the war these mills were making 190,000 seamless cotton bags per month. They expect soon to turn out 16,000 of linen per day.

— Three good chances are open for speculators in New York. Joe Coburn is ready to fight any man for not less than $10,000 Wm. Davis, the "champion of California," any man in America, for $2500; and Dooney Harris, any man in the world, for $2500.

— 49,814 pounds of poultry were sent from New York to Sheridan's army.

It is but simple justice to the Manufacturer of the J. Monroe Taylor Gold Medal Soap, to award him the credit of being far ahead of all competitors in catering to the luxury of the ladies, who prize nice, clean, white clothes (and what lady does not?). Our wife says she could not keep house without it. It is decidedly the Soap of the world. It is a peculiar institution of itself, and such a luxury to use it, that after one trial it is always found to be one of the most useful articles in the household. Depot, 112 Liberty street, New York. 31

He is the happiest who does most to make others happy. The inventor of Herrick Allen's Gold Medal Saleratus must be the happiest man in existence, for we hazard nothing in saying that the use of the Gold Medal Saleratus cannot fail to make a happy household. Our better half says she does not fear of our ever frowning, as long as she can get the genuine Herrick Allen's. We say success to the inventor, and if everybody knew how good it is, no other would be used. A good many of our Merchants have it. Their depot is 112 Liberty Street, New York.

☞ Special attention is asked to Hunnewell's preparations, advertised on our inside columns. They are based on true medical laws, used very largely by Physicians, and most undoubted testimonials are in the hands of the proprietor, always open to inspection. Let Portsmouth and its vicinity bear testimony by a confidence to test them, which will be sacred.

U. S. INTERNAL REVENUE,

COLLECTOR'S OFFICE.

THE UNDERSIGNED, COLLECTOR FOR the First Collection District in the State of New Hampshire, hereby gives notice to all persons concerned in the County of Rockingham,

That he has received for Collection the Special Income Collection List within said District, and committed to him for collection by the Assessor thereof, in accordance with the Joint Resolution of Congress imposing a Special Income duty, approved July 4th, 1864, that the several duties and taxes assessed, enumerated and contained in said Special List have become due and payable, and that the undersigned, Collector for said district, personally or by deputy, will attend for the purpose of collecting and receiving the aforesaid duties and taxes, assessed and payable within said County of Rockingham, at the places within said county, and at the times designated as follows:

At NEWMARKET, at the Newmarket Bank, November 22d, 1864, from 10 o'clock A. M. to 12 M., and from 2 to 4 P. M., for the purpose of receiving the amounts assessed and payable within the said town of Newmarket, and the towns of South Newmarket, Deerfield, Nottingham, Northwood and Raymond.

At SALEM, at the Depot, November 25th, 1864, from 9 to 12 A. M., and at DERRY, at the Depot, from 2 to 4 P. M., for the purpose of receiving the amounts assessed and payable within the said towns of Salem and Derry, and the towns of Londonderry, Chester, Auburn, Sandown, Hampstead and Windham.

At EXETER, at the office of said Collector, December 1st, 2d, 3d, 5th, 6th, 7th, 8th, 9th and 10 h, 1864, from 9 o'clock A. M. to 12 M., and from 2 to 4 P. M., for the purpose of receiving the amounts assessed and payable within the said town of Exeter, and the towns of Stratham, Hampton, Kensington, North Hampton, Hampton Falls, Seabrook, East Kingston, Kingston, Epping, Brentwood, Fremont, Danville, Plaistow, Atkinson, Newton, South Hampton, Sandown, Hampstead, South Newmarket, Raymond, Candia, Nottingham, Northwood, Deerfield, Salem, Derry, Londonderry, Chester, Auburn, Windham and Newmarket.

At PORTSMOUTH, at the Naval and Surveyor's Office in the Custom House, December 9th and 10th, 1864, from 10½ o'clock A. M. to 4 P. M., for the purpose of receiving the amounts assessed and payable within the said city of Portsmouth, and the towns of Rye, Newcastle, Greenland, Newington and Gosport.

Notice is also hereby further given that all persons who shall neglect to pay the duties and taxes assessed upon them as aforesaid, to said Collector, or his deputy within the times above specified, will be liable, under the provisions of Section 28 and 29 of the Act of Congress approved June 30, 1864, to pay ten per centum additional upon the amount thereof.

It is very desirable that persons having taxes to pay should remember the day and hour, as the Collector is instructed to enforce the law in all cases of delinquency.

Tax payers will provide themselves with Government Currency, as only such will be received.

SAVE YOUR FUEL!

THE MODEL COOK.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

The subscriber has reduced the prices of the Model Cook Stoves FIVE DOLLARS each, to conform to the decline in gold.

THE MAGEE
COOKING STOVE.

The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the
CELEBRATED AND UNEQUALLED
MAGEE COOK STOVE,
as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. The oven plates are covered with plaster, which renders it equal to the old-fashioned brick oven for perfection in baking.

There is a new style and very superior broiler and sad-iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the extension top there is a large copper Reservoir for hot water; also a large tin warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.

The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shovelling up of the ashes is entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.

For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.

We would refer to the following purchasers:

"MAGEE'S PATENT"
VENTILATING & AIR-WARMING FURNACES.
The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would ask attention to remodelling or erecting buildings to examine this truly valuable invention.

For economy, purity of air and ease of management it has no equal, producing a current of warm air, moist and agreeable;—and as none of the air which comes in contact with the fire-pot is used for respiration, the tendency to produce headache so much complained of in other Furnaces, is entirely obviated.

The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.

To accomplish this many complicated and expensive heating arrangements have been constructed, some possessing but little improvement over former methods, while many have proved a total failure. The reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the
MAGEE FURNACE.
The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of fresh air through the fire-pot, which ignites them as they pass off into the coal, thus saving at least 20 per cent. of the properties of the heat in the fuel.

No heating apparatus with the smoke-pipe or flue on the top of the cone can be made to consume the gases of the coal, as they pass off with a large amount of the heat generated, making the chimney the hottest part of your dwelling.

This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.

These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.

For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.

They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of this best Furnace in the world,—and would refer them to the following named gentlemen, who have them now in use:

Samuel Cleaves, Esq., Albert R. Hatch, Esq.,
Aaron M. Hill, Charles H. Mendum,
Henry F. Wendell, John Sise, and others.

DR. W. R. MERWIN & CO.'S COLUMN
FOR THE
CHEROKEE MEDICINES.

Cherokee Cure, the great Indian Medicine,

An unfailing cure for Spermatorrhea, Seminal Weakness, Nocturnal Emissions, and all diseases caused by self-pollution; such as Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Trembling, Wakefulness, Eruptions on the Face, Pale Countenance, Insanity, Consumption, and all the direful complaints caused by departing from the path of nature.

☞ This medicine is a simple vegetable extract and one on which all can rely, as it has been used in our practice for many years, and with thousands treated it has not failed in a single instance. Its curative powers have been sufficient to gain victory over the most stubborn cases.

☞ To those who have trifled with their constitution, until they think themselves beyond the reach of medical aid, we would say, *Despair not!* the CHEROKEE CURE will restore you to health and vigor, and after all quack doctors have failed!

☞ For full particulars, get a circular from any drug store in the country, or write the proprietors, who will mail free to any one desiring the same, a full treatment in pamphlet form.

☞ Prices, $2 per bottle or three bottles for $5, and forwarded by express to all parts of the world.

Sold by all respectable druggists everywhere.

DR. W. R. MERWIN & CO., Sole Proprietors,
No. 63 Liberty street, New York.

Glad News for the Unfortunate!
The Long Sought For Discovered at Last
Cures in from one

to three days.
CHEROKEE REMEDY
—AND—
CHEROKEE INJECTION,
Compounded from Roots, Barks & Leaves.

CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys, Stone in the Bladder, Stricture, Gravel, Gleet, Gonorrhœa, and is especially recommended in those cases of Fluor Albus (or Whites in females) where all the old nauseous medicines have failed.

It is prepared in a highly concentrated form, the dose only being from one to two tablespoonfuls three times per day.

It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all of its original purity and vigor; thus removing from the system all pernicious causes which have induced disease.

CHEROKEE INJECTION is intended as an allyr assistant to the CHEROKEE REMEDY, and should be used in conjunction with it at bedtime in all cases of Gonorrhœa, Gleet, Fluor Albus or Whites. Its effects are *healing, soothing and demulcent;* removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the *cheap quack injections.*

☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to full vigor and strength.

For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.

Price—CHEROKEE REMEDY, $2 per bottle or three bottles for $5.

Price—CHEROKEE INJECTION, $2 per bottle, or three bottles for $5.

The Cherokee Remedy, Cherokee Injection, and Cherokee Cure,
Are sold by all enterprising Druggists in the civilized world. Some unprincipled dealers, however, try to sell worthless compounds in place of these: those which they can purchase at a cheap price, and make more money by selling, than they can on these medicines. As you value your health, aye, the health of your future offspring, do not be deceived by such unprincipled Druggists, *ask for these medicines and take no others.* If the Druggists will not buy them for you, enclose the money in a letter, and we will send them to you by Express, securely sealed and packed free from observation.

Ladies or Gentlemen can address us in perfect confidence, stating fully and plainly their diseases and symptoms, as we treat all diseases of a chronic nature in male or female. Patients need not hesitate because of their inability to visit us, as we have treated patients successfully in all portions of the civilized globe, by correspondence.

Patients addressing us will please state plainly all the symptoms of their complaints, and write Postoffice, County, State and name of writer, plain, and inclose postage stamp for reply.

We send our 32 page pamphlet free to any address. Address all letters for Pamphlets or advice to the proprietors,

THE MOOSE AND THE ELK. — Some of the writers in the New York Observer and Rural New Yorker, speak of the Moose *or* elk, as if the creatures were one and the same, — whereupon the New Hampshire Journal of Agriculture corrects heir error, and shows that even the men who make dictionaries may sometimes make errors. He says:

The *moose* and the *elk* are different animals — though of the same genus, — Cervus. The moose is the largest animal of the deer kind, being found sometimes 16 and 17 hands high, and weighing 1,000 and 1200 pounds. They have long coarse hair, and a remarkable and distinguishing mark, a long upper lip that hangs over and below the under lip — which is for the more readily severing and holding twigs and limb of trees upon which they browse. The lip of the moose is a morsel for the epicure. The moose inhabits the Northern forests of New England and of Canada East.

The elk is not as large, or as tall an animal as the moose, and has no the peculiar lip of the latter. Its hair is not so long as that of the moose, and is of a light brown dun almost like that of the lion. The elk has a characteristic mark. On its rump, and extending down the hams, the hair is of a lighter color, and the spaces thus lighter, being somewhat circular, the animal seen from the rear, presents a very unique appearance. The elk abounds in the West, but is not found wild in New England. We are aware that Dr. Webster says "the elk is called *moose* in North America," but as Dr. Johnson defined a *moose* to be a *young* rat, — and this definition did not turn a mouse, into a rat,— so neither has Dr. Webster turned an elk into a *moose*.

A GOOD FARM.— Capt. John Lombard of Wales, has recently sold his fine farm in Wales for about $6300, and is to remove to Farmingdale. Capt. Lombard has lived on this farm 34 years, and during that time has purchased only two barrels of flour and not a bushel of corn, all the wheat and corn necessary for his family of ten having been raised by himself. We doubt whether another farmer in the county, if indeed in the State, can say as much. *Lewiston Journal.*

Who talks of sterile New England?

— The officers of the Morris and Essex Railroad pronounce the statement of The New York Herald, to the effect that Gen. McClellan had been appointed Engineer-in-Chief of that road, at a salary of twenty-five thousand dollars a year, to be entirely without foundation.

☞ Franklin county, Maine, must be a great locality. Two bears were killed there last Monday, and the ladies, determined to make the most of leap year, have had several parties, inviting the gentlemen and paying the bills. Hugging must be an inexpensive luxury down that way.

— Two enterprising geniuses of the 2d Brigade 9th Corps, being desirous of furnishing their Winter quarters with a chimney, lately chose a schenkle shell for one of the corner stones of the edifice. The chimney drew beautifully till a few nights since, when, unfortunately, during the absence of the architects, it exploded, destroying chimney and tent, but injuring no one.

— From recently printed census returns for 1860 it seems that Illinois produced the largest quantity of wheat and corn of any State in the Union; Pennsylvania of rye and buckwheat; New York of oats, potatoes, hay, butter and cheese; Ohio of wool and wine; Virginia of tobacco; Mississippi of cotton; South Carolina of rice and Louisiana of sugar and molasses.

— A gentleman from Little Rock gives a gloomy account of the condition of affairs in Arkansas. The Union Legislature is without a quorum, and is likely to remain so. Gen. Steele needs more men to force Price and Magruder from the State, and then the Union feeling will manifest itself again.

— A horse, valued at five thousand dollars, belonging to Mr. Sanford, a retired merchant of Boston, was killed in New York, on Monday, by a wagon which was crossing an avenue. Mr. Sanford was thrown from his wagon, but not seriously injured.

— A dancer in one of the Cincinnati theatres died lately from drinking ice water. She had been dancing, and in passing from the green room to the stage, in response to a second encore, she drank a glass of water and dropped dead before the audience.

— The water in the Western lakes is about four feet lower than it was three years ago, and at some of the ports on Lake Huron, where there was formerly an abundance of water, it is difficult now to make any landing at all.

American and Foreign Patents.
R. H. EDDY,
SOLICITOR OF PATENTS,
Late Agent of U. S. Patent Office, Washington, (under the Act of 1837.)
76 State street, opposite Kilby street,
Boston.
After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity or utility of patents or Inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.
The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The Testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber, and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional service so moderate.
The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.
These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.
All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.
TESTIMONIALS.
"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.
"I have no hesitation in assuring inventors that they cannot employ a person *more competent and trustworthy*, and more capable of putting their applications in form to secure for them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents.
Mr. R. H Eddy has made for me THIRTEEN applications, in all but one of which patents have been granted, and that is *now pending*. Such unmistakable proof of great talent and ability on his part leads me to recommend *all* inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."
JOHN TAGGART.
During eight months, the subscriber, in course of his large practice, made on *twice* rejected applications SIXTEEN APPEALS, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents.

Morning Chronicle.

Portsmouth, N. H.

SATURDAY, DECEMBER 3, 1864.

THE SOUTHERN JOURNALS, as well as the Northern copperheads, accuse President Lincoln of having converted the Government into a Despotism, and allege that he is a Despot, and that, in substance, the people are his minions and slaves. Were it true, we ever that a Despotism is a far better government than an Oligarchy, a many-headed monster, which tramples in the dust the rights and liberties of the white as well as the colored population, and renders them poor, miserable, and ignorant, without the means of a common school education.

President Lincoln, on the other hand, has proclaimed his sentiments to the wide world, that he is the strong advocate of universal freedom for all within the wide domain of our Republic. He is the commander-in-chief of our Army and Navy, and is still using every effort in his power in the defence of the rights, privileges, and freedom of the people whose servant he has freely acknowledged himself to be. This nails to the counter the Southern and Northern falsehoods in respect to his Administration.

☞ The investigation of the plot to burn New York is going on with the greates vigor and success. Great confidence is expressed that some of the malefactors will be detected and punished under Gen. Dix's order. The city is under the strictest surveillance, and the precautions taken are such that it is probable that the city was never so safe as at this present moment.

In connection with this affair, a letter just received at the office of the Baltimore American, from a paroled prisoner from Georgia, contains a statement which appears to be important.

He says when he passed through Savannah on the 19th, he was informed by a professed Union citizen that he would bear of the greatest city burning on record, if the rebels succeeded in the North, and it was to come in a very few days. The party went on to state that one Capt Montgomery, formerly of Baltimore, who before the war was in the livery business, was the agent charged with the duty of firing the northern cities. Montgomery, he said, intended to burn New York, Washington, Baltimore and Philadelphia. He further states that the rebels in Savannah were in expectation of soon hearing of Montgomery's success, and that he was to receive a large sum of money if successful.

NEW HAMPSHIRE ITEMS

—— On Thanksgiving Day, Governor Gilmore commissioned a gentleman of this city to visit West Concord and solicit subscriptions from a few individuals whose names were given him, for the soldier's dinner. Encouraged by a generous response to his appeal, he determined to do some collecting on his return, at the thrifty farm houses along the road. Driving up to a building with spacious barns and out houses he dilated to the lady who answered his call on the worthiness of the cause and the apparent prosperity of the inmates of the dwelling. "Lord bless you," was the reply, "this is the town poor farm."—*Monitor.*

—— The Manchester Mirror tells of a young couple from Suncook who visited that city to purchase housekeeping goods, with the understanding that they were shortly to be married. The hero persuaded the heroine to entrust him with $150, on the plea that it would be safer in his hands, and since then neither money or lover have made their appearance.

—— The following N. H. soldiers are among those brought from Savannah on the transport Atlantic and landed at Annapolis:

4th regt—P. F. Smith, Co. C.
5th regt—James Murray, Co. K.
6th regt—James Williamson, Co. I.
7th regt—Frank Ellson, Co. D. John Phillip, Chas. Watson and S. Cheney, Co. E.

—— A horse belonging to D. J. Daniels, Esq., of Manchester, valued at $200, was shot on Elm street on Wednesday, by a young man incautiously handling a pistol.

——Merrimac County is considering the project of buying a farm for its poor, the matter is to be decided on the 13th inst.

—— Roger A. Pryor was captured by the 11th N. H. regiment.

—— At the New Hampshire table of the Sailors' Fair, were some beautiful Swiss *chalets*, and Alpine amethysts, crystals and camelians, which were the gift of Hon. Geo. G. Fogg, U. S. Minister to Switzerland.

The entire receipts of this table, were about $3000.00. Of this $513.00 were received in cash.

—The Bark Tommy Hussey, Capt. Patten, of Richmond, Me. from Troon for Portland, Me., was run into on the 19th of Sept. by an unknown ship, and sunk in a short time thereafter. All on board, except one seaman, perished by the unfortunate catastrophe. The seaman who was saved states that all on board could have been rescued by the crew of the unknown vessel, if they had made any exertions.

THE REBELLION.

Parties who witnessed the battle at Franklin, Tenn., on Wednesday, describe the attack of the rebel forces as desperate. Four charges were made upon the Federal lines of masked batteries in a body, four lines deep. Each time the rebels were repulsed with fearful loss. The fort is on the north bank of the river, opposite the town. Extending up the river and encircling the town, was the line of masked batteries. The engagement, in desperation and furious fighting, was hardly equalled by the battle of Stone River. Forrest in person was on the field rallying his men. There is a rumor in circulation that he was killed, but it lacks confirmation. About 7 o'clock heavy reinforcements reached Gen. Schofield, which caused a complete rout of the rebels.

A Nashville dispatch of the 1st says:

The Federal forces under Gen. Thomas retired from Franklin, last night, and have taken a position and formed in line of battle about three miles south of Franklin. Skirmishing has been going on all day about five miles south of here. Heavy cannonading can be distinctly heard in this city. No want of confidence is felt by the citizens in the ultimate success of our troops. The employees in the Quartermaster's department are under arms and in the trenches. 107 rebel officers, including one brigadier general, with 1000 prisoners, captured in the fight near Franklin, arrived this morning. The city to-day is full of fleeing residents from Williamson and other counties south. They state that Hood is gathering up all the horses, hogs and mules he can find and sending them South.

Up to Sunday evening nothing definite had been heard from Sherman in Savannah, but it was the general belief that he was advancing upon that city in two columns.

In Georgia, Sherman's movement having cut Gov. Brown off from all intercourse with the eastern part of the state, the Lieut. Governor Wright, being at Augusta, has assumed ex-officio gubernatorial control over Eastern Georgia and has issued a flaming proclamation, revoking the Governor's orders regarding the militia, and directs them to report to him and not to Gen. Smith, as Brown ordered. Gen. Wade Hampton from Virginia, and Bragg from North Carolina are reinforcing the Georgia rebels.

The following is from a Nashville dispatch of the 1st:

Hood's Infantry force crossed the Harpeth river this morning, but he has not advanced that portion of his force since. His cavalry crossed the Harpeth river at the fords above Franklin this morning at daybreak, closely following Gen. Wilson, who retired in this direction. Skirmishing with the advance has occurred all day. Gen. Wilson occupies a strong position a few miles south of Nashville and is able to resist any force the rebels may bring against him.

The following are the rebel casualties in the fight of the 30th ult.: Brig. Gen. Adams killed, Brig. Gen. Scott, wounded. The total number of rebels killed, wounded and prisoners is estimated at 4000, 3000 being either killed or wounded. The Federal loss in killed and wounded was 700. Loss in prisoners trifling.

The rebel Gen. Buckner has his headquarters at Alexandria, La., where additional formidable defensive works have been erected, rendering it impossible for the Union gunboats to ascend the Red River. Buckner is enforcing a merciless conscription in all the country as far around Alexandria as his military authority reaches.

Allen, the rebel governor of Louisiana, has organized ten regiments of negroes at Shreveport.

The Union Gen. Lee, in his report, says he had a strong fight at Liberty, and won a substantial victory.

The World's Washington dispatch repeats the report that the President has in his possession certain peace propositions from parties in three of the Gulf States, and that he will refer to the matter in his message.

Magruder's army is still attempting to cross the Mississippi to Hood's aid, but he is watched and foiled by Union troops and gunboats.

High military authority states that Sherman is marching for Assabaw Sound, below Savannah, having probably passed between Macon and Augusta, which may be the solution of the Richmond statements. It is reported that a new ram of rebel manufacture has been built and finished on the Neuse River in North Carolina. She is known to be larger and heavier than the Albemarle. She may be expected to pay our gunboats a visit at any day, but Adm. Porter has everything in readiness to give her a fitting reception.

A dispatch from Headquarters Army of the Potomac, Nov. 30, state that quiet had prevailed along our lines until the afternoon previous, when our batteries at Fort Hill opened fire for the entertainment of some English visitors. At first the enemy did not reply, but after a short time they opened from several points, and for a time a perfect shower of shot and shell fell in and around Fort Hill. Unfortunately just at this time some of the troops on duty in the vicinity were being relieved, and several casualties occurred. Lieut. Col. Stafford of the 56th N. Y. Regiment, was wounded, and it is said he cannot recover.

Letters from Port Royal, Nov. 25, say that news by the flag of truce that day is to the effect that Sherman was then 40 miles from Savannah.

NOTES OF FORMER DAYS.

Canada, Nova Scotia and New Hampshire, 1746-48.—Nova Scotia was not out of danger. The French and Indians, who, during the stay of the fleet at Chebucto, had appeared before Annapolis, but on their departure retired, were still in the peninsula Nov. 10, 1746; and it was thought necessary to dislodge them. For this purpose, Shirley sent a body of the Massachusetts forces, and pressed the governors of Rhode Island and New Hampshire to send part of theirs. Those from Rhode Island and one transport from Boston, were wrecked on the passage. The armed vessels of New Hampshire, with two hundred men, went to Annapolis; but the commander of one of them, instead of landing his men, sailed across the bay of Fundy, into St. John's river; where, meeting with a French snow, mistaking her for one of the Rhode Island transports, he imprudently sent his boat with eight men on board, who were made prisoners, and the snow escaped. The sloop, instead of returning to Annapolis, came back to Portsmouth. These misfortunes and disappointments had very serious ill consequences. The Massachusetts forces, who were at Nova Scotia, being inferior in number to the French, and deceived by false intelligence, were surprised in the midst of a snow storm at Minas, Jan. 31, 1747; and after an obstinate resistance, were obliged to capitulate. Their commander, Col. Arthur Noble, and about sixty men were killed, and fifty were wounded. The enemy, being provided with snow-shoes, made forced marches; and ours being destitute of them were unable to escape.

When the alarm occasioned by the French fleet had subsided, Atkinson's regiment marched into the country to cover the lower part of the frontiers, and encamped near the shore of Winnipiscogee Lake; where they passed the winter and built a slight fort. They were plentifully supplied with provisions, and had but little exercise and discipline. Courts martial were not instituted, nor offences punished. The officers and men were tired of the service, but were not permitted to enter on any other business, lest orders should arrive from England. Some were employed in scouting, some in hunting or fishing, and some deserted.

Shirley was so intent on attacking Crown Point, that he even proposed to march thither in winter, and had the address to draw the assembly of Massachusetts into an approbation of this project. He enlarged his plan, by proposing that the New Hampshire troops should at the same time go, by the way of Connecticut river, to the Indian village of St. Francois, at the distance of two hundred miles and destroy it; while the troops from Massachusetts, Connecticut and New York, should go by the way of the lakes to Crown Point. The Governor of New York would have consented to this wild projection, on account of the Indian allies, who were impatient for war; but it was happily frustrated, by the prudence of the Connecticut assembly; who deemed the winter an improper season for so great an undertaking, and deferred their assistance till the ensuing spring. At the same time the small pox prevailed in the settlements above Albany, through which the forces must have marched; and that distemper was then an object of much greater dread than the storms of winter, or the face of an enemy.

To finish what relates to the Canada forces, it can only be said, that excepting some who were employed on the frontiers, they were kept in a state of military indolence, till October, 1747; when by order from the Duke of Newcastle they were disbanded, and paid at the same rate as the king's troops. The governors drew bills on the British treasury, which were negotiated among the merchants at seven and eight hundred per cent., and the parliament granted money to reimburse the charges of the equipment and subsistence of the forces.

The Rev. Samuel Langdon was ordained on the 4th of February, 1747, to the pastoral care of the north church and parish in Portsmouth.

The Rev. William Shurtliff died on the 9th of May, 1747, and his remains were deposited under the communion-table of his church; and were removed in 1863, when the old house was taken down. They were buried in the Proprietors' Burying Ground. His name will long be mentioned with respect for his uncommon meekness and patience under great trials, and for distinguished piety, as well as pastoral fidelity. He was born at Plymouth in Massachusetts, and was graduated at Harvard College, in 1707. He published five sermons, and an account of the revival of religion in Portsmouth, about the year 1742, which was printed in the 22d and 48th numbers of the Christian history for 1743.

Doctor Joseph Peirce, the son of Joshua Peirce, was a native of Portsmouth. He studied the theory of physic and surgery with Doctor Packer, and established himself in this town. After a successful course of practice for a number of years, he was seized with the small-pox, of which disorder he died in the month of January, 1748.

The people at and near the plains united cordially in the settlement of Mr. Langdon, and the meeting-house which had been erected there was taken down in 1748.

Peace was established between the belligerent powers, by the treaty made at Aix la Chapelle, in which it was stipulated that all things should be restored to the state they were in before the war. In consequence of this article, the island of Cape Breton was again put into the hands of the French. This was a mortifying circumstance to the New England provinces, who had, made so great exertions only three years before to wrest it from the enemy. The troops left to guard Louisburg were permitted to return home; among them were several respectable officers belonging to Portsmouth.

☞ The Annual three-days' session of the New Hampshire State Teachers Association was held at Concord last week. Considerable interest was manifested, and the attendance was good. The following are the officers of the Association for the ensuing year:

President, C. S. Richards Secretaries, W. W. Colburn, Thomas Tash; Treasurer, J. E. Ayers; Vice Presidents, D. Crosby, E. T. Rowe, C. A. Aiken, G. G. Harriman, W. L. Gaylord, A. M. Payson, C. Tabor, S. Hayward, S. W. Buffum, and J. E. Vose; Counsellors, H. E. Sawyer, J. Tenney, A. Wood, E. T. Quimby, H. C. Bullard, F. G. Clark and R. C. Stanley.

— John Blew, a rigger in Portland, on Thursday last fell a distance of 55 feet, while in pursuit of his occupation, striking on a dory on the deck of the vessel he was at work upon. So heavy was his fall, that the dory was smashed. He was able with a little assistance to walk to a store, and was then conveyed to his residence on Commercial street. Hopes are entertained of his recovery, though the wonder is that he was not instantly killed in falling such a distance.

☞ The United States Service Magazine for December closes the 2d volume and first year of one of the best and most complete exponents of the art of war, and a truthful record of the military history of the great war for the Union in which we are now engaged. Published at $5 per year, by C. B. Richardson, New York.

THE VERNATELLA

LIQUID BLACKING

Gives to the Leather not only a

Splendid Jet Black Polish,

But an elegant and Fashionable Perfume.

The neatness and convenience of using Liquid Blacking and the superior polish which it gives over other kinds, has heretofore been in a great measure counterbalanced by its disagreeable vinegar odor and the trouble of fitting something into the stopper of each bottle in order to apply it to the brush, but the Vernatella Blacking has only the most DELIGHTFUL PERFUME, which remains with the leather as long as the blacking lasts, and each bottle has a stick ready fitted in the stopper. The Vernatella Blacking also softens and benefits the leather.

Be sure and inquire for the VERNATELLA Blacking.

Price, 12 Cents per Bottle.

Manufactured in the Chemical Department of the Cahoon Manufacturing Co., and for sale by Boot and Shoe Dealers everywhere.

HALE'S

Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the means of all. At last after a long course of chemical experiments, he found that by adding to these five other ingredients, each one valuable in itself, he not only obtained the desired end, but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the general public as a safe, pleasant and infallible remedy.

PRICE, 50 CENTS PER BOTTLE.

For sale by B. Hutchings, Portsmouth, and all Druggists.

"A Wonderful Discovery."

DR. TEBBETS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "DYE," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new HAIR in all cases on BALD HEADS, when the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With if every "GRAY HEAD" in New England can be restored in less than sixty days.

Local.

☞ On Tuesday, a draft of 219 seamen was taken from this Navy Yard, to be transferred to the receiving ship Ohio. They came in charge of about fifteen marines. Quite a large number of the men were substitutes, and as they were being marched through Chelsea street, Charlestown, on their way to the Navy Yard, a wholesale attempt at desertion was made. Many of the men broke and run, and notwithstanding the attempts of the guard to stop them, thirty-six succeeded in effecting their escape. Others were arrested in their flight, one being knocked down with the butt of a musket. An officer fired at one of the runaways with his navy revolver, and the shot, instead of taking effect upon the deserter, struck Mr. L. P. Whitney, a workman in the navy yard, who chanced to be standing on the sidewalk and glancing, entered Mr. Whitney's left foot, causing a bad wound. Two of the deserters were subsequently arrested by the Charlestown police.

☞ The third Lyceum entertainment, Tuesday evening, passed off with the usual success; the attendance was a trifle larger than before, 795 tickets being taken, besides Band and speaker—of which more anon, when we have more time.

Prof. Clark's lecture on Corals was a very learned and valuable treatise, well illustrated with fine diagrams; but the orator is not a pleasing speaker, nor was his lecture a "popular" one for the common mass. In these stirring times, it lacked sensation.

Mrs. Whipple's readings, or rather recitations, were finely given and well received. The lady appears easy and well on the stage, gives every word distinctly; and never once halted or hesitated, nor looked at a book. Her rendering of selections from Shakespeare was especially satisfactory; and Holmes' stirring ode, which was "illustrated" by a well-known extra-patriotic lady waving her tri-colored parasol, was rapturously received and encored.—Were we going to criticize, we should suggest that if Mrs. W. would use her natural tone when announcing her selections, instead of elevating her voice, it would be an improvement.

The Band were not present to open the ball, on account of being unable to leave an engagement at Newburyport in season for the 5 o'clock train, but made up for lost time afterwards, by some extra fine playing.

☞ While boarding for men in this city, we believe, is from $5 to $7 per week, at the lowest; and for women $2.50 to $4—the rate for the host of workmen from our Navy Yard, who live at Great Falls now, we are told is to be $3.50, including washing. They bring dinner down with them, of course.—We are also told that at Amesbury Mills, men pay but $3, and women $1.80 and $1.90.

☞ The Monitor's report of the arrest of Thomas and Knapp, for enticing Benton to desert and re-enlisting him, was inaccurate in stating that Capt. Kent discovered Benton's discharge papers and drew a confession of the circumstances from him. It was Marshal Dresser of this city who performed that service.

☞ The good order of our city of late is worthy of note. There have been but one or two cases before the Police Court for nearly a month, and those were "simple drunks." Our police regulations must be of the best when they can show such a clean record as this.

☞ A man passed us an evening or two since, who from his rendering of a popular chorus had evidently got things mixed. This was his refrain.

"Down with the stars, up with the traitor!
Rally round the flag, boys!"

The Constitution provides for the 'elevation' of traitors, and his reference to the stars was probably an allusion to the traditional badge of all policemen. In a few minutes more we heard him skating over a distant pavement with a pair of heavy boots, and turned away to reflect on the various kinds of pleasure that constitute the world's enjoyment.

☞ An item is going the rounds of the press, stating that "The mansion in Portsmouth, occupied by Daniel Webster during the first years of his practice, is now an oyster saloon,"—meaning we suppose, the house on the corner of Congress and Chestnut (formerly Prison) streets, now Mr. Carter's saloon; and "the house in which Washington and Lafayette tarried for a night, is said to be the home of the strange woman," referring, probably to the old house on Hanover, near High street.

☞ Another house is advertised for this morning—by an estimable woman, for a boarding-house, if large enough, or a small tenement to accommodate her family until she can find such an one. She will be a good tenant, without doubt; and ought to be able to find a house somewhere.

☞ Our item should have stated, that the Great Falls special train began to run last Monday to and from this city.

Berlin horse soup is pronounced very racy.

TEMPLE OF AMUSEMENT.—A great bill is offered by Bidwell & Pike's company this evening, consisting of the ever popular drama of Jack Sheppard, with Miss Dollie Bidwell as Jack, and Mr. McDonald as Blueskin, and the laughable farce entitled the "5 fast women" in which Mrs. McDonald, Bidwell, Pike, Jones, &c., will appear. Full houses continue to greet this popular company. Go early to-night. D.

☞ The great steamer Contoocook, built at our Navy Yard, will be launched on Saturday at half past 2 o'clock.

☞ Mr. E. A. Joy commences a new Term of Juvenile Singing School, at Mercantile Hall, this Saturday afternoon at 2 o'clock.

☞ Meeting of Lyceum Committee at Chronicle Counting Room, on Saturday evening, Dec. 3d, at 7 o'clock.

WHAT IS FAME.—A gentleman of this city, passing through Boston Common a week or two since, asked a well-dressed, intelligent looking man what that tent was for. The reply was "Oh, that's an exhibition of the ship *Kerosene*, that sunk the Alabama." If kerosene didn't sink the Alabama, petroleum will most surely sink some speculators unless they fight the slippery stuff more shyly than is the style now.

— Gold closed in New York on Friday at 2 30 3-4 bid, 2.30 7-8 asked.

IMPORTANT ORDER TO NAVAL OFFICERS.—An officer of a ship at the Brooklyn Navy Yard has been severely reprimanded, for allowing an enlisted man to remain on shore for a longer time than the law or custom allows. Orders have now been issued "that no enlisted man shall be granted permission to leave his vessel by any other than the commanding officer of such vessel, and that in the absence of the commanding officer no leave shall be given to an enlisted man unless specially directed in writing by the commanding officer, and the names of such as are to receive such leave given under his signature before absenting himself from his command."

TO OUR PATRONS.—We would again remind our readers that this season of the year is a time when they are constantly liable to sudden attacks of croup, sore throat, &c., while the children are in constant danger from croup, throat and lung complaints. It is important that every head of a family should provide a remedy that is ready at all times for immediate use, whether assailed at the dead hour of night, with the breaking out of a hard cold, the racking of a violent cough, or the children with that most dangerous of all diseases—croup—or at the midday hour, you should always be prepared. In Coe's Cough Balsam you will find a ready and effectual remedy. It grapples and controls instantaneously the most stubborn coughs, while in croup it is a sovereign cure. The price is but forty cents per bottle the bottle twice the size of any other at the same price. Delays are dangerous. You should always have it in the house. It can be found at all our drug stores. d5-lawlm 2

It is but simple justice to the Manufacturer of the J. Monroe Taylor Gold Medal Soap, to award him the credit of being far ahead of all competitors in catering to the luxury of the ladies who prize nice, clean, white hands (and what lady does not?). Our wife says she could not keep house without it. It is decidedly the Soap of the world. It is a peculiar institution of itself, and such a luxury to use it, that after one trial it is always found to be one of the most useful articles in the household. Depot, 112 Liberty street, New York. 31

He is the happiest who does most to make others happy. The inventor of Herrick Allen's Gold Medal Saleratus must be the happiest man in existence, for we hazard nothing in saying that the use of the Gold Medal Saleratus cannot fail to make a happy household. Our better half says she does not lose of our ever frowning, as long as she can get the genuine Herrick Allen's. We say success to the inventor, and if everybody knew how good it is, no other would be used. A good many of our Merchants have it. Their depot is 112 Liberty Street, New York.

☞ Special attention is asked to Hunnewell's preparations, advertised on our inside columns. They are based on true medical laws, used very largely by Physicians, and most undoubted testimonials are in the hands of the proprietor, always open to inspection. Let Portsmouth and its vicinity bear testimony by a confidence to test them, which will be sacred

CITY COUNCIL.

On Thursday evening an Ordinance was passed, providing for the payment of $300 City bounty, and for cashing the assignments of State bounties.

CITY OF PORTSMOUTH.

In the year of our Lord one thousand eight hundred and sixty-four.

An Ordinance providing for the Payment of a Bounty to Volunteers.

Be it ordained, by the City Council of the City of Portsmouth, as follows:

SECTION 1. There shall be paid out of the Treasury of this city to any person who may hereafter be mustered into the service of the United States, upon or in anticipation of any call of the United States Government for troops during the present war, and allowed on the quota of this City, upon presentation of a certificate thereof to the Mayor, the sum of three hundred dollars for three years enlistment, and a proportionate sum for any less term of service; *Provided*, that no Bounty shall be paid to any man above the grade of Master's Mate in the Navy, or to any commissioned officer in the Army or Marine Corps.

SEC. 2. Any portion of any loan heretofore authorized to be negotiated by the issuing of City Bonds for the Payment of Bounties to Volunteers, not needed for the purposes for which the said Bonds were authorized, shall be, and the same hereby is, transferred and appropriated to pay the Bounties provided for in this Ordinance, and shall be raised for such purpose.

Passed Dec. 1, 1864.

A true copy, attest,
MARCELLUS BUFFORD, City Clerk.

Resolved by the City Council,

That the Mayor be authorised to advance the cash by his draft on the City Treasurer, for assignments of State bounties if it shall be deemed expedient, and for the interest of the City to advance the same.

IN BOARD OF ALDERMEN, the Com. on weights and measures, reported that they had purchased an entire new set of standard weights and measures.

Langdon M. Perkins, resigns the office of Street Commissioner, and Hon. Jonathan Dearborn was appointed in his stead.

A resolution was adopted, "That the Board of Mayor and Aldermen, having examined the route for a road in Portsmouth petitioned for by Nathan Jones and others, are of opinion that the expense of building the road would exceed the public benefit to be derived therefrom, and therefore decide that it is illegal and inexpedient to lay out said road."

The Com. to whom was referred the subject of location of Steam Fire Engines, reported, "That the 'Portsmouth,' to run by horses, should be located where No. 3 is at present, and that No. 3 should be placed in the building now occupied by No. 1. That No. 1 should be placed in No. 5 sold at auction. In regard to the 'Sagamore,' Hand Steamer, we would recommend she be placed in the Brick House on Court-street, now occupied by No. 2, and that the street in front of the house be graded up—and that No. 2 be sent to the Alms-House to be used for a relief tub, or otherwise, as the emergency of any occasion would require.

THE HURRICANE AT CALCUTTA.

We are permitted to take the following extract from a private letter, (dated Oct. 7,) just received from Mr. WILLIAM NOWELL of this city, first officer of Ship Eastern Belle, who was an eye witness of the late destructive hurricane at Calcutta.

"You will doubtless already have heard of the terrible cyclone which visited Calcutta and its vicinity day before yesterday. It has caused a fearful amount of damage, particularly among the shipping;—in fact nearly all the ships in the river are wrecked. I never saw such a sight in all my life. Wrecks strew both banks of the river as far as the eye can reach. There is not a ship here but what has sustained more or less damage. A great many of them are sunk entire. The 'Eastern Belle' is piled up on the banks of the river, with most of her yards and masts gone, and her hull damaged. Some of the ships are big and dry, others partly submerged;—in fact, they lie in every conceivable shape and situation. It is impossible to convey with pen and ink an adequate idea of this dreadful scene of devastation. Many lives have been lost, and some days must necessarily elapse before full details of the disaster are received. It must be a long time ere any of the ships are restored to a seaworthy condition.

I do not doubt that there are upwards of an hundred ships which will prove a total loss. What we are all going to do is more than I can tell at present.

There were as many vessels destroyed in a few hours by this unexampled hurricane, as the 'Alabama' burnt in her whole piratical career, and most of them are English property. I am seriously inclined to deem it a judgment upon them for ungraciously allowing the 'Alabama,' to slip through their fingers."

PROFITABLE INVESTMENT.—In recently auditing the account of A. T. Joy, the Treasurer of the Mechanic Association, we were curious to ascertain the result of $1000 investment made in the purchase of ten shares in the Mechanics and Trade Bank, July 7, 1845. In the 19 years we find the the actual receipts in dividends, surplus, and capital has been $4515,12 cts.—and as $25, per share will yet probably be paid—the return will be $4800.12 cts.—or not far from 20 per cent. per year for the whole time. As the above dividends have been invested elsewhere from time to time the interest on them has not been far from another $1000.

RENOMINATION OF MARCY.—The Democratic Convention for this Congressional District met at Dover on Thursday last week, and nominated Daniel Marcy for re-election.

It is of no use, Sebastopool is taken, and Capt. Marcy will never again be elected, however freely he be made to bleed.

QUITE A HAUL!—Seventy bounty-jumpers who had deserted, but re-captured, have been sent in irons by Gen. Patrick to City Point, to be tried by Court Martial. Ten, twenty years, or for life in the Penitentiary, will cure them.

WASHINGTON, DEC. 1.—The report of the Postmaster General is the only one yet completely in type. It is expected the reports of the other heads of Departments will be printed by Sunday.

THE PRESIDENT'S MESSAGE.

From present appearances, no advance copies of the President's message will be sent to the newspaper press, and therefore that document will be communicated to the country as last year, by telegraph, probably on Monday.

Hon. Henry F. French, formerly of Exeter, this State, and once a Judge of our Court of Common Pleas, was on Tuesday last elected President of the Massachusetts Agricultural College, Mr. French now lives in Cambridge.

Morning Chronicle.

NO HEART ALONE.

"I have learned," says the melancholy Pestalozzi, "that in this wide world no one heart is able or willing to help another."

Oh! say not we through life must struggle,
Must toil and mourn alone;
That no one human heart can answer
The beatings of our own.
The stars look down from the silent Heaven
Into the quiet stream,
And see themselves from its dewy depths
In fresher beauty gleam.
The sky with its pale or glowing hues
Ever painteth the wave below;
And the sea sends up its mist to form
Bright clouds and the heavenly bow.
Thus each does of the other borrow
A beauty not its own,
And tells us that no thing in nature
Is for itself alone.
Alone, amid life's grief and parts,
The strongest soul may quail;
Left to its own unaided efforts,
The strongest arm may fail.
And, though all strength still comes from Heaven,
All light from God above,
Yet we may sometimes be his angels,
The *Apostles of his love*.
Then let us learn to help each other,
Hoping unto the end;
Who sees in every man, a brother,
Shall find in each a friend.

— The reason women so seldom stammer is because they talk so fast—a stammer has no chance to get in. People stammer because they hesitate. But whoever knew a woman to hesitate about anything!

— The Republicans of Middleton being unable to hire any one of the four halls in that town owned by Democrats, went to work and in one week had a new hall up, boarded and shingled.

— A private letter from Sydney, C. B., states that upon an adjoining island the inhabitants had succeeded in driving ashore forty-two whales, averaging two tons each in weight.

— A child three years old was recently killed by a vicious ram in Lansing Co., Iowa. Although tied hand and foot, the ram literally crushed in her ribs and killed her on the spot.

THE MAGEE
COOKING STOVE.

The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the
CELEBRATED AND UNEQUALLED
MAGEE COOK STOVE,
as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. The oven plates are covered with plaster, which renders it equal to the old-fashioned brick oven for perfection in baking.

There is a new style and very superior broiler and cut-iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the extension top there is a large copper Reservoir for hot water; also a large tin warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.

The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shoveling up of the ashes is entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.

For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.

We would refer to the following purchasers:

Portsmouth.

"MAGEE'S PATENT"
VENTILATING & AIR-WARMING FURNACES.
The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.
For economy, purity of air and ease of management it has no equal, producing a current of warm air, pleasant and agreeable—and as none of the air which comes in contact with the fire-pot is used for respiration, the tendency to produce headache so much complained of in other Furnaces, is entirely obviated.
The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.
To accomplish this many complicated and expensive heating arrangements have been constructed, some possessing but little improvement over former modes, while many have proved a total failure. The reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This difficulty, so common in other Furnaces, is obviated in the
MAGEE FURNACE.
The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of cold air through the fire-pot, which ignites them as they pass off from the coal, thus saving at least 20 per cent. of the properties of the heat in the fuel.
No heating apparatus with the smoke-pipe or flue on the top of the cone can be made to consume the gases of the coal, as they pass off with a large amount of the heat generated, making the chimney the hottest part of your dwelling.
This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.
These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.
For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.
They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of the best Furnace in the world,—and would refer them to the following named gentlemen, who have them now in use:

Samuel Cleaves, Esq.,	Albert R. Hatch, Esq.,

DR. W. R. MERWIN & CO.'S COLUMN
FOR THE
CHEROKEE MEDICINES.

Cherokee Cure, the great Indian Medicine,

ROOTS, BARKS AND LEAVES.

An unfailing cure for Spermatorrhea, Seminal Weakness, Nocturnal Emissions, and all diseases caused by self-pollution; such as Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Trembling, Wakefulness, Eruptions on the Face, Pale Countenance, Insanity, Consumption, and all the direful complaints caused by departing from the path of nature.

☞ This medicine is a simple vegetable extract and one on which all can rely, as it has been used in our practice for many years, and with thousands treated it has not failed in a single instance. Its curative powers have been sufficient to gain victory over the most stubborn cases.

☞ To those who have trifled with their constitution, until they think themselves beyond the reach of medical aid, we would say, *Despair not!* the CHEROKEE CURE will restore you to health and vigor, and after all quack doctors have failed!

☞ For full particulars, get a circular from any drug store in the country, or write the proprietors, who will mail free to any one desiring the same, a full treatment in pamphlet form.

☞ Prices, $2 per bottle or three bottles for $5, and forwarded by express to all parts of the world.

Sold by all respectable druggists everywhere.

No. 63 Liberty street, New York.

Glad News for the Unfortunate!
The Long Sought For Discovered at Last.
Cures in from one

to three days.
CHEROKEE REMEDY
—AND—
CHEROKEE INJECTION,
Compounded from Roots, Barks & Leaves.

CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys, Stone in the Bladder, Stricture, Gravel, Gleet, Gonorrhœa, and is especially recommended in those cases of Fluor Albus (or Whites in females) where all the old nauseous medicines have failed.

It is prepared in a highly concentrated form, the dose only being from one to two tablespoonfuls three times per day.

It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all of its original purity and vigor; thus removing from the system all pernicious causes which have induced disease.

CHEROKEE INJECTION is intended as an ally or assistant to the CHEROKEE REMEDY, and should be used in connection with that medicine in all cases of Gonorrhœa, Gleet, Fluor Albus or Whites. Its effects are *healing, soothing and demulcent*; removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the *cheap quack injections.*

☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to full vigor and strength.

For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.

Price—CHEROKEE REMEDY, $2 per bottle or three bottles for $5.

Price—CHEROKEE INJECTION, $2 per bottle, or three bottles for $5.

Sent by Express to any address on receipt of price. Sold by all druggists everywhere.

The Cherokee Remedy, Cherokee Injection, and Cherokee Cure,
Are sold by all enterprising Druggists in the civilized world. Some unprincipled dealers, however, try to sell worthless compounds in place of these: those which they can purchase at a cheap price, and make more money by selling, than they can on these medicines. As you value your health, aye, the health of your future offspring, do not be deceived by such unprincipled Druggists, *ask for these medicines and take no others.* If the Druggists will not buy them for you, enclose the money in a letter, and we will send them to you by Express, securely sealed and packed free from observation.

Ladies or Gentlemen can address us in perfect confidence, stating fully and plainly their diseases and symptoms, as we treat all diseases of a chronic nature in male or female. Patients need not hesitate because of their inability to visit us, as we have treated patients successfully in all portions of the civilized globe, by correspondence.

Patients addressing us will please state plainly all the symptoms of their complaints, and write Postoffice, County, State and name of writer, plain, and inclose postage stamp for reply.

We send our 32 page pamphlet free to any address. Address all letters for Pamphlets or advice to the proprietors,

AN OLD MUSKRAT. — The Cairo correspondent of the St. Louis Republican tells this story:

"At one point on the Tennessee river there is a place that has become a terror to steamboat men, and in passing it they always find some place to secure themselves until the boat passes. At this point, an old man, sixty odd years of age, has made his headquarters for a long time, and the peculiar crack of his gun is familiar to river men, and sends a thrill of terror wherever it is heard. He has a long, heavy-barrelled gun, which has been bored out three different times, until now the largest thumb can be easily turned in the muzzle, and the aim of the old man is one of deadly certainty. The murderous sentinel is always faithfully on the watch, and his retreat has baffled all attempts to catch him, from the fact that he is so surrounded with dense swamps and deep ravines. Well-informed river men estimate that this old man has murdered in this way not less than sixty persons; and yet he performs his murderous work with as much earnestness and vigor as when he first commenced.

MOSBY IN WANT OF A SURGEON. — A recent letter from Sheridan's army contains the following:

"A well known surgeon connected with this army, who was recently a prisoner in the hands of Mosby, was offered by that distinguished guerrilla $1,000 bonus in greenbacks if he would accept the position of surgeon. Mosby must be hard pushed for medical men when he seeks to obtain them from the Union army. Mosby's cool manner of transacting business, the capture of the surgeon referred to above will illustrate: The surgeon was riding along with a train; he did not know that the train had been attacked, or even that any one had been captured, when a man, who subsequently proved to be Mosby himself, rode up and told him that a wounded soldier at the rear of the train required his attendance. It was not until the wounds had been dressed, and the train had passed on, that Mosby made himself known."

SERVED 'EM RIGHT.—A large number of boulder bitters, thieves and pick-pockets from New York and Boston, passed through Portland Wednesday to Augusta, at which place they expected to reap a large harvest in robbing the soldiers—those who are being paid off. On their arrival at Augusta, as they stepped from the cars, they found themselves surrounded by a file of soldiers, and were immediately marched off to the guard house, where they were detained until yesterday, when they took the "back track" and returned to Boston and New York, bitterly cursing all the officers at Augusta, and mournfully bewailing their own bad luck.

— In Windsor, Canada, recently a barber poisoned four of his children, and cut the throat of a fifth, and then performed the latter operation on himself.

— Two clergymen, one Methodist, the other Universalist, are among the workmen who have taken situations vacated by strikers in the Traveller office.

— A farmer named Farnham, 75 years old, living 12 miles from Lewiston, visited that city for the first time in his life on the 3d ult.

— A woman in Newark, N. J., seventeen years old, gave birth to twins a few weeks ago, and was so astonished that she abandoned them.

— New York city has furnished 133,310 men for the war, of which number 96,215 received no bounty. The city has expended in all fifteen millions for the war.

— We don't believe the statement going the rounds of the papers, that all babies born after the 4th of March next must be stamped" to be legitimate.

— The consumption of water in Boston 90 gallons per day for every man, woman and child. That's what we call an intemperate use of water.

— Lynn is agitating the question of supplying that city with pure water, at an estimated cost of $252,000.

American and Foreign Patents.
R. H. EDDY,
SOLICITOR OF PATENTS,
Late Agent of U. S. Patent Office, Washington, (under the Act of 1837.)
76 State street, opposite Kilby street,
Boston.
After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.
The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by if not immeasurably superior to, any which can be offered elsewhere. The following testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that no other office of the kind are the charges for professional service so moderate.
The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.
These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.
All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.
TESTIMONIALS.
"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.
"I have no hesitation in assuring inventors that they cannot employ a person *more competent and trustworthy*, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents.
Mr. R. H Eddy has made for me THIRTEEN applications, on all but one of which patents have been granted, that is now *pending*. Such unmistakeable proof of great talent and ability on his part leads me to recommend *all* inventors to apply to him to procure their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."
JOHN TAGGART.
During eight months, the describer, in course of his large practice, made on *twice* rejected applications SIXTEEN APPEALS, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents.

MONDAY, DECEMBER 5, 1864.

A FALLACY EXPOSED.—The Vice President of the Confederacy, Mr. Stevens, in a late letter, assumes that, because the Democrats of the Free States were accustomed to assent to platforms indorsing the notorious Kentucky and Virginia resolutions of '98 and '9—therefore they agree with the rebels in maintaining the right of each State to defy or desert the Union at pleasure.

A loyal paper replies to this:

There never was a graver misapprehension. Apart from the fact that Messrs. Jefferson and Madison, who severally drafted the resolves in question, never themselves believed in the right or rightfulness of State secession, it is demonstrable that the great mass of the Northern people concur entirely in Henry Clay's lucid averment: "I owe a *paramount* allegiance to the United States: I owe a *subordinate* allegiance to the State of Kentucky."

Mr. Clay was right: but the resolutions, in spite of the eminence of their authors, are and have been as mischievous as they are fallacious: with them as the text, treason and rebellion have been preached and put in practice, till we see the bitter fruit in the civil war, not yet ended.

Pres. Buchanan's statement, that while the rebel States had no right to secede, yet the United States could not coerce a State,—was no more miserable than the weak and wavering policy which most prevail wherever credence is given to the Kentucky resolutions.

The People of the United States, by their votes and acts, show that they do not believe them,—but they do believe with Henry Clay, in a *paramount* allegiance to the Union, and a subordinate one to their own State.

This is now our national, general, undoubting faith. It has just been clearly embodied in the new Constitution of Free Maryland. It is destined to be distinctly incorporated into the Constitution of every loyal State. The amazing fallacy that puts the Nation under the heel of even the pettiest State is now, in view of the ruin it has wrought, to be emphatically scouted and reprobated. If there was room hitherto for doubt that the United States constitute a Nation, there must be none after the close of our great struggle.

☞ A dispatch from McConnellsburg, Pa., Dec. 3, states that a fight occurred on Friday at Timber Bridge, between a portion of Co. F, 201st Pa. mounted infantry and some conscripts and deserters, who had congregated at a shooting match. Provost Marshal Haupt tried to hold conversation with the conscripts, but they refused to listen to him and immediately commenced to fire at him: no shot took effect however. The soldiers then opened fire, when a general fight ensued, lasting about an hour.—The conscripts were driven two miles, with a loss of 1 killed, 2 wounded and 100 prisoners. The remainder escaped.

— Gov. Vance, of South Carolina, in his recent message to the Legislature, confirms the reports that the laws cannot be enforced in the interior of the State, owing to the existence of bands of desperadoes consisting of rebel deserters. They make raids upon the mountain frontier, and murder, burn and destroy with savage cruelty. He recommends outlawing and driving them from the State.

— Franz Muller was hanged in front of Newgate Jail in London, on Monday morning, November 14. At the last moment he confessed the murder of Mr. Briggs. An immense number of spectators, estimated at no less than one hundred thousand persons, assembled to witness the execution. Garrotting and highway robbery were carried on in the most open and wholesale manner, and according to the Times' account the scenes in the crowd were horrible.

☞ A friend of ours brought a young contraband with him from Newbern, and committed him to the tender mercies of some lady friends in a thriving Massachusetts town. Not long after he visited the house, and the young damsels brought their protege forward to exhibit his progress. Bobby had a gutta percha doll in his hand, which emitted a squeak on being squeezed. "Will your doll cry, Bobby?" asked one of the ladies. "Oh! yes." "How do you make it cry?" "Just mash 'im in the bellah, 'mash 'im in the bellah." The exhibition closed here.

— By order of Admiral Porter, the iron clads in the James River have been provided with a large-sized locomotive lantern, which is placed on the bow; and its rays thrown ahead on the water, enable the men to see if the Rebels send down infernal machines, or make any attempts to board them.

— The 12th Maine will be mustered out at Portland to-day. Their baggage arrived at that city on Friday, and on opening their knapsacks it was found that all their clothing had been stolen while in transmission to that place.

THE REBELLION.

A dispatch from Gen. Meade, on the evening of the 1st, gives the following account of a cavalry reconnoissance made by Gen. Gregg that day:

I have just heard from Gen. Gregg. His despatch is dated 3.45 P. M. He reports having captured Stony Creek Station, which was defended by infantry and cavalry in the works, with artillery. He captured two pieces of artillery, but had no means to bring them off, so he spiked them and destroyed the carriages. He had 190 prisoners, 3 wagons and 30 mules. He burned the depot with 3000 sacks of corn, 500 bales of hay, a train of cars, a large amount of bacon, clothing, ammunition and other Government stores, and destroyed all the shops and public buildings. He is now returning to camp.

Richmond papers of Dec. 1st, fully admit the truth of their statement on Wednesday, to the effect that Sherman's advance is below Augusta and will reach the seacoast in safety. The Enquirer states that Sherman's force, of which the cavalry that cut the railroad between Savannah and Waynesboro' was the vanguard, have all crossed the Oconee river. Direct information from Col. Mulford is to the effect that one thousand men per day will be received until the exchange is completed. Col. Mulford, now at Savannah, reports "Sherman all right."

The Richmond Examiner of the 30th says part of Sherman's cavalry sent in the direction of the sea coast struck the railroad between Savannah and Augusta and is said to have plundered a train. It was reported that they were intercepted on the 29th, part of them captured, and the rest driven back on the main body. The object of the movement was to carry information of Sherman's position and condition to his Government.

The Richmond Whig thinks Sherman is making his way to Beaufort as fast as he can, with the ulterior view of joining his forces with those of Grant, and does not fear that he will take either Charleston, Savannah or Augusta.

A dispatch to rebel papers from Macon, Ga., Nov. 25, says:

A severe fight occurred near Griswoldville to-day. Our troops attacked and drove the Yankees intrenchments, two miles this side of the town. Our forces behaved with great gallantry. The militia fought like veterans. Our loss was severe, amounting to between 300 and 400. The picket line of the enemy is now three miles east of Griswoldville, and his infantry is still moving in the direction of Augusta. We are in a position to repulse any attack that the enemy may make on Macon.

On the 26th of Nov. the citizens of Jackson, Miss., were much alarmed at an apprehended raid by Gen. M. L. Smith, who with 2500 Federal troops, had crossed Big Black river the day previous.

Anxiety prevails at Charleston, where a naval attack is anticipated.

A letter from Nashville in the Louisville Journal states that on Wednesday evening a brigade of cavalry, consisting of four regiments, was surrounded by the rebels and escaped only by the most desperate fighting. They cut their way through the rebel lines and joined Gen. Thomas. The number of prisoners and loss in killed and wounded was not slight. The same evening a train of cars was captured by the rebels at Brentwood, 9 miles from Nashville.

An expedition from Memphis, under Col. Karge, captured on the 30th ult. 40 of Taylor's and Adams' men 15 miles from Memphis on the Arkansas side of the river. Among the prisoners are three rebel Captains, a Lieutenant, Brig. Gen. Adams and an Adjutant.

A dispatch from the Army of the Potomac says there was heavy firing on the Jerusalem Road on Thursday.

The Louisville Journal of Friday says:

"Gen. Thomas has abandoned his strong position at Franklin, and formed his line of battle within 3 miles of Nashville. Yesterday evening the two hostile armies were engaged in heavy skirmishing, and the rattle of musketry was heard in the streets of Nashville. A battle of terrible fury is imminent. We do not believe that Gen. Thomas has any fears for the result; he is not as weak as he would make the rebels belive. He can offer battle rather to better advantage to himself in front of Nashville than at any other point.

It farther says that Thomas has led Hood into a trap, and has no fears of the final result.

It is believed that Hood's main army is threatening Murfreesboro. Forrest's rebel cavalry is demonstrating on our front and right flank.

Commander Fitch is at Nashville with a fleet of boats and iron-clads. Sufficient forces have arrived to insure not only the safety of that city, but another Union victory, in case of battle under any circumstances.

— About as mean a thing as we have read of for some time took place near Auburndale, Mass., on the night of the 1st, when three highwaymen attacked a poor disabled soldier, on his way to the Adams Farm Home, dreadfully mangled him with sling shots and left him for dead, after robbing him of $15, all the poor fellow had in the world. When found he was senseless. He was taken to the Home where he was tenderly cared for.

Gold closed at the evening exchange at 227 3-4.

By Telegraph—Sunday noon.

WASHINGTON, Dec. 3.—Full files of Richmond papers up to yesterday morning, including the Evening Whig of Thursday, fully confirm the account in the Examiner that Sherman has passed nearly to the seacoast without any great opposition. It appears from these papers that he has had no fighting with his infantry. An article in the Examiner of Tuesday concludes as follows: "It is evident now that Sherman can reach the seacoast, and the concentration of troops, though sufficient to guarantee the security of Macon and Augusta, is not sufficient to prevent his escape from Georgia. If he should succeed in taking the closed ports of Charleston and Savannah he will be magnified by the mob of New York, but he will not diminish the strength of the Confederacy." The Enquirer of the 1st says: "It can be no harm to state that the enemy have 14 gunboats and transports near Port Royal, S. C., which is 35 miles from Savannah and about 50 from Charleston." The Augusta Sentinel of the 29th ult. says: "On Sunday last the Federals attacked East Macon. They succeeded in capturing one of our batteries, which was retaken and the enemy signally repulsed. It is supposed the force making the attack was not very large, and that the movement was a feint." The Richmond Examiner of Thursday has the following in regard to affairs around Richmond: "A considerable movement of troops appears to have been made by the enemy night before last, his trains running constantly, and a large body of troops are said to have moved from near Petersburg towards the James River." The Dispatch says: "It was reported yesterday, Nov. 30, that Grant was massing his troops on the north side of the James." There is nothing more likely than that the present spell of fine weather may afford him an opportunity he has been seeking to burst upon the rebel capital, in which case the north side of the river will most probably be the theatre of his first operations. The Dispatch says: "Intelligence has been received from East Tennessee that Sherman issued an order similar to that issued by Grant to Sheridan in the Shenandoah Valley.——SECOND DISPATCH.—Advices have been received that Richmond papers of Friday fully confirm the previous advices that Sherman is marching on without any serious interruption. They are still puzzled to know whether he will bring up at Savannah or Beaufort. They claim that Sherman has burned several towns, including Cassville, Ga. There have been large arrivals of Senators and Members to-day, and there will undoubtedly be a quorum on Monday. The President's message is the chief topic of conversation. It is generally regarded by the most prominent administration men that it will endorse on the slavery question the "To whom it may concern" letter. News from the army of the Potomac is unimportant. Early's troops have undoubtedly left the Shenandoah Valley, and are reinforcing Lee.

LOUISVILLE, KY., Dec. 3.—The Journal has the following:—

NASHVILLE, TENN., Dec. 2.—The rebels have been wary to-day, and have demonstrated with great caution against our outer line, which is carefully constructed and extends from river to river, with a radius of 2 1-2 miles from the Capitol on the roads south of the city. The rebels have been in plain view all day on the Franklin Pike. Just before dark our cavalry pushed out toward the enemy, causing them to retire. Some skirmishing subsequently occurred, neither party suffering any loss. No rebel infantry has yet been developed. The defences are being hourly strengthened, and no apprehensions need be felt for the safety of the city.

NEW YORK, Dec. 3.—The Post's Washington dispatch says rebel papers announce the capture of Millen, Ga., and express apprehensions that Gen. Sherman has liberated all the prisoners there. The Post prints the following extract of a letter just received in this city, dated 6 miles below Savannah: "Gen. Sherman is reported near Savannah and the rebels are trembling in their shoes. Signed, Geo. W. Woods, Capt. steamer Gen. Lyon."

— New London is responsible for "wooden nutmegs." Many years ago a small trader sent from there a few nutmegs to Beaufort, S. C. A planter named Bogart, seeing the nutmegs, bought them at a good price; pleased with his purchase, and being especially vain of having choice delicacies at his table, he produced for his guests those rare and somewhat costly nuts. But the nuts wouldn't crack, and when broken open were found to contain no meat, and the honest Connecticut Yankee was cursed by the Carolina chivalry as a cheat for selling nutmegs without meat, and which they therefore supposed were made of wood. When our troops entered Beaufort they found the same prejudice existing against nutmegs and Yankees.

— In New York, on the morning of the 2d inst., two prisoners were murdered in the Tombs by a man named John Donovan, who was laboring under delirium tremens. The names of the victims are Jas. McDowell and Wm. Kennedy. The deed was perpetrated with an iron stove poker.

Why is a cow's tail like a swan's breast? Because it grows down.

THE VERNATELLA
LIQUID BLACKING
Gives to the Leather not only a
Splendid Jet Black Polish,
But an elegant and Fashionable Perfume.
The neatness and convenience of using Liquid Blacking and the superior polish which it gives over other kinds, has heretofore been in a great measure counterbalanced by its disagreeable vinegar odor and the trouble of fitting something into the stopper of each bottle in order to apply it to the brush, but the Vernatella Blacking has only the most DELIGHTFUL PERFUME, which remains with the leather as long as the blacking lasts, and each bottle has a stick ready fitted in the stopper. The Vernatella Blacking also softens and benefits the leather.
Be sure and inquire for the VERNATELLA Blacking.
Price, 12 Cents per Bottle.
Manufactured in the Chemical Department of the Cahoon Manufacturing Co., and for sale by Boot and Shoe Dealers everywhere.

HALE'S

Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound brought within the means of all. At last after a long course of chemical experiments, he found that by adding to these *five* other ingredients, each one valuable in itself, he not only obtained the desired result but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the central public as a safe, pleasant and infallible remedy.

PRICE, 50 CENTS PER BOTTLE.

For sale, by B. Hutchings, Portsmouth, and all Druggists.

"A Wonderful Discovery."

DR. TEBBETTS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "DYE," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new HAIR in all cases of BALD HEADS, where the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With it every "GRAY HEAD" in New England can be restored in less than sixty days.

A Card to Invalids.

A Clergyman, while residing in South America as a missionary, discovered a safe and simple remedy for the Cure of Nervous Weakness, Early Decay, Diffidence of the Urinary and Seminal Organs, and the whole train of disorders brought on by baneful and vicious habits. Great numbers have been already cured by this noble remedy. Prompted by a desire to benefit the afflicted and unfortunate, I will send the recipe for preparing and using this medicine, in a sealed envelope, to any one who needs it, *Free of Charge*.

Please inclose a stamped envelope, addressed to yourself.

Local.

☞ The body of a man named Isaac Palmer, an engineer in the Spool Factory at the North End, was found lying under the freight train, just outside the Eastern Depot, at about half-past eight o'clock on Sunday morning. The track being lower than the street prevented the discovery at an earlier hour. From appearances we should judge that several of the cars must have run over him, just above his hips, after he had fallen upon the track, and death must have been almost instantaneous, as his features were but slightly distorted.

It is said that he had been drinking freely during the evening, and it is probable that in the darkness he missed his way, and fell upon the track.

The body was removed to the Ward House near by, where an inquest was held by M. Bufford, Esq., resulting in a verdict of accidental death by being run over by the cars.

☞ The alarm of fire on Saturday evening, about 7 o'clock, was caused by the partial burning of an outbuilding in the rear of house No. 1 Russell street, and we must say that, between the prevailing mud, the pelting rain, and the pitchy darkness, it was one of the most disagreeable fires we ever attended. The portion of the building where the fire broke out was used as a cow stable. The bovine animal was rescued in good condition, which is more than can be said of the hay intended for her consumption.

POLICE COURT, Dec. 3.—George Bellows, for an assault, was fined $500 and costs $4,80, which he paid.

A man accused of committing adultery, waived examination and was held in $500 bonds for appearance at the April Court to be holden at Exeter. The woman implicated also waived examination, and was held in same bonds to appear at the same court.

☞ It doesn't do to praise some people. Our little item congratulating our citizens on the good order in our city, published Saturday morning, was followed by three cases in the Police Court before noon of that day.

☞ The U. S. steamer Contoocook was successfully launched at the Navy Yard on Saturday afternoon, no accident of any kind occurring to mar the interest of the occasion. The rainstorm and mud however prevented many from being present who otherwise would have done so, had the weather been favorable.

The repairs on the little ferry-boat are completed, and she will soon commence her regular trips to and from the Yard.

TEMPLE OF AMUSEMENT.—A new and attractive bill is offered at the Temple tonight. The great drama of Wm. Tell, the Hero of Switzerland, will be brought out with beautiful costumes properties, &c. Also an entire new farce, making altogether one of the most attractive bills of the season.

NEW-HAMPSHIRE.

——The official statement of the vote for Electors in this State gives the following totals:

Republican—W. H. Y. Hackett 36,400, Danl. M. Christie 36,401, A. H. Dunlap 36,239, Allen Griffin 36,040, Henry O. Kent 36,418, Soldiers' vote 2018.

Democratic—Albert R. Hatch 32,871, Abel Haley 32,874, George Stark 32,869, George Huntington 32,742, Harry Bingham 32,867, Soldiers' vote 671.

—— The owners of the Littleton Slate Quarry are now doing a good business. After considerable expenditure of time and money they have removed an immense amount of earth and have now got into good slate. There are many hands employed upon the quarry and boarding-houses are being erected for them.

—— "Father John Roby," of Weare, long distinguished for his zeal in the temperance cause, recently died at the age of 81 years.

—— A deaf mute, named Sylvester Clough, belonging to Wentworth was run over on the railroad at that place, a few days since, and instantly killed.

Democratic papers are remarking upon the fact that some twenty-seven thousand votes, "properly distributed," would have changed the recent Presidential Election. That is not a new fact in elections—indeed, is a frequent if not an ever present one. Henry Clay would have been chosen President in 1844 if in the State of New York 3000 votes had been changed from the Democratic to the Republican column. If the people can ever reach the question, they will dispense with boards of electors, and the President be chosen by direct vote.—*Statesman.*

☞ As Price in all his wanderings has not made much use of the spade, it may not be uninteresting to know the bluff old rebel general's opinion of fortifications. At Corinth, Miss., in 1862, when Price arrived with his forces, — Beauregard, while showing him about the place, asked him, "what do you think of my earthworks?" Unhesitatingly the answer came: "I don't know that I'm a judge,—I never saw any but twice before, and *I took them!*" There was no room for further converse in that direction.

—The new $20,000,000 loan negotiated on Thursday between the Sub-Treasury and the bankers is looked upon as a very injudicious departure from the only fair policy of offering the loans for public competition.

— U. S. Commissioner Osborn has held a Brooklyn ferry-master to bail in the sum of five hundred dollars to answer to an indictment of the Grand Jury for compelling a passenger to take tickets instead of change. The penalty in this case is a fine of $500.

— It was announced in the New York Chamber of Commerce on Thursday that the Committee on presenting a testimonial to Capt. Winslow, of the Kearsarge, had raised the sum of $22,350 toward a testimonial, and were confident that they could raise the sum of $25,000.

— The arrival in Richmond of Geo. D. Prentice, editor of the Louisville Journal, caused a sensation, the people generally thinking he was a peace commissioner.

— In the rebel Congress, the resolutions declaring that the South will accept no terms of peace save on the basis of independence, were referred to the Committee on Foreign Relations.

— Tom Thumb is said to be very penurious, but he can never be truly called a great miser.

—— George B. McClellan is now at Camp Gilmore, Concord, a substitute in one of our regiments.

—— Nearly forty defenders of the old flag are said to have gone forth from the Reform School since the war began.

We are indebted to A. Speer, Esq., of New Jersey, for a specimen of Sambuci Port Wine. It comes to us with the highest and most respectable commendations of medical men who have prescribed it for their patients, and is said to be superior to any wine now in the market. The Sambuci Wine manufactured by Mr. Speer is well known throughout New England for its medical qualities. It is pure juice of the Port grape, cultivated by him, and in this is said to exist its excellencies. Druggists nearly all keep it.—*Traveller.*

It is but simple justice to the Manufacturer of the J. Monroe Taylor Gold Medal Soap, to award him the credit of being far ahead of all competitors in catering to the luxury of the ladies, who prize nice, clean, white clothes (and what lady does not?). Our wife says she could not keep house without it. It is decidedly the Soap of the world. It is a peculiar institution of itself, and such a luxury to use it, that after one trial it is always found to be one of the most useful articles in the household. Depot, 112 Liberty street, New York. 31

He is the happiest who does most to make others happy. The inventor of Herrick Allen's Gold Medal Saleratus must be the happiest man in existence, for we hazard nothing in saying that the use of the Gold Medal Saleratus cannot fail to make a happy household. Our better half says she does not fear of our ever frowning, as long as she can get the genuine Herrick Allen's. We say success to the inventor, and if everybody knew how good it is, no other would be used. A good many of our Merchants have it. Their depot is 112 Liberty Street, New York

TO OUR PATRONS.—We would again remind our readers that this season of the year is a time when they are constantly liable to sudden coughs, influenza, sore throat, &c., while the children are in constant danger from croup, throat and lung complaints. It is important that every head of a family should provide a remedy that is ready at all times for immediate use, whether assailed at the dead hour of night, with the breaking out of a hard cold, the racking of a violent cough, or the children with that most dangerous of all diseases—croup—or at the midday hour, you should always be prepared. In Coe's Cough Balsam you will find a ready and effectual remedy. It grapples and controls instantaneously the most stubborn coughs, while in croup it is a sovereign cure. The price is but forty cents per bottle—the bottle twice the size of any other at the same price. Delays are dangerous. You should always have it in the house. It can be found at all our drug stores. d5dawlm 2

SAVE YOUR FUEL:

THE MODEL COOK.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

The subscriber has reduced the prices of the Model Cook Stoves FIVE DOLLARS each, to conform to the decline in gold.

Morning Chronicle.

☞ The St. Louis Republican says that in Price's army were a number of negro cooks and servants, who were as fierce rebels as their masters. At Glasgow, Price captured negro soldiers, upon whom the rebel negroes fell with jeers and curses, calling them "nigger Yankees," and finally they painted their faces with white paint, declaring that they disgraced the negroes and should no longer be of their color. The readiness with which the blacks of the South become secesh, but shows that the negro has a fair quantity of human nature in him, as well as his master. Fred. Douglas on one occasion, referring to the objection against his race that they were not of the human species, said he had seen a great many negroes who could lie, steal, get drunk and commit all manner of crimes, just as white people would; and these facts induced him to believe that they both had the same origin.

THE MAGEE
COOKING STOVE.

The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the
CELEBRATED AND UNEQUALLED
MAGEE COOK STOVE,
as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. The oven plates are covered with plaster, which renders it equal to the old-fashioned brick oven for perfection in baking.
There is a new style and very superior broiler and sad-iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the extension top there is a large copper Reservoir for hot water; also a large tin warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.
The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shovelling up of the ashes is entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.
For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.
We would refer to the following purchasers:

"MAGEE'S PATENT"
VENTILATING & AIR-WARMING
FURNACES.
The subscriber, being the Sole Agent in this vicinity for the manufacture and use of this valuable Furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.
For economy, purity of air and ease of management it has no equal, producing a current of warm air moist and agreeable;—and as none of the air which comes in contact with the fire-pots is used for respiration, the tendency to produce headache so much complained of in other Furnaces, is entirely obviated.
The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.
To accomplish this many complicated and expensive heating arrangements have been constructed, some possessing but little improvement over former methods, while many have proved a total failure. The reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the
MAGEE FURNACE.
The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of atmospheric air through the fire-pot, which ignites them as they pass off from the coal, thus saving at least 20 per cent. of the properties of the heat in the fuel.
No heating apparatus with the smoke-pipe or flue on the top of the cone can be made to consume the gases of the coal, as they pass off with a large amount of the heat generated, making the chimney the hottest part of your dwelling.
This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.
These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.
For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.
They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of the best Furnace in the world,—and would refer them to the following named gentlemen, who have them now in use:
Samuel Cleaves, Esq., Albert E. Hatch, Esq., Aaron H. Hill, Charles H. Mendum, Henry F. Wendell, John Sise, and others.

DR. W. R. MERWIN & CO.'S COLUMN
FOR THE
CHEROKEE MEDICINES.

Cherokee Cure, the great Indian Medicine,

ROOTS, BARKS AND LEAVES.
An unfailing cure for Spermatorrhœa, Seminal Weakness, Nocturnal Emissions, and all diseases caused by self-pollution; such as Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Trembling, Wakefulness, Eruptions on the Face, Pale Countenance, Insanity, Consumption, and all the direful complaints caused by departing from the path of nature.
☞ This medicine is a simple vegetable extract and one on which all can rely, as it has been used in our practice for many years, and with thousands treated it has not failed in a single instance. Its curative powers have been sufficient to gain victory over the most stubborn cases.
☞ To those who have trifled with their constitution, until they think themselves beyond the reach of medical aid, we would say, *Despair not!* the CHEROKEE CURE will restore you to health and vigor, and after all quack doctors have failed!
☞ For full particulars, get a circular from any drug store in the country, or write the proprietors, who will mail free to any one desiring the same, a full treatment in pamphlet form.
☞ Prices, $2 per bottle or three bottles for $5, and forwarded by express to all parts of the world.
Sold by all respectable druggists everywhere.

Glad News for the Unfortunate!
The Long Sought For Discovered at Last.
Cures in from one

to three days.
CHEROKEE REMEDY
—AND—
CHEROKEE INJECTION,
Compounded from Roots, Barks & Leaves.
CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys, Stone in the Bladder, Stricture, Gravel, Gleet, Gonorrhœa, and is especially recommended in those cases of Fluor Albus (or Whites in females) where all the old nauseous medicines have failed.
It is prepared in a highly concentrated form, the dose only being from one to two tablespoonfuls three times per day.
It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all of its original purity and vigor; thus removing from the system all pernicious causes which have induced disease.
CHEROKEE INJECTION is intended as an ally or assistant to the CHEROKEE REMEDY, and should be used in conjunction with that medicine in all cases of Gonorrhœa, Gleet, Fluor Albus or Whites. Its effects are *healing, soothing and detersive;* removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the *cheap quack injections.*
☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to full vigor and strength.
For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.
Price—CHEROKEE REMEDY, $2 per bottle or three bottles for $5.
Price—CHEROKEE INJECTION, $2 per bottle, or three bottles for $5.
Sent by Express to any address on receipt of price. Sold by all druggists everywhere.

No. 63 Liberty street, New York.

The Cherokee Remedy, Cherokee Injection, and Cherokee Cure,
Are sold by all enterprising Druggists in the civilized world. Some unprincipled dealers, however, try to sell worthless compounds in place of these: those which they can purchase at a cheap price, and make more money by selling, then they can on these medicines. As you value your health, aye, the health of your future offspring, do not be deceived by such unprincipled Druggists, *ask for these medicines and take no others.* If the Druggists will not buy them for you, enclose the money in a letter, and we will send them to you by Express, securely sealed and packed free from observation.
Ladies or Gentlemen can address us in perfect confidence, stating fully and plainly their diseases and symptoms, as we treat all diseases of a chronic nature in male or female. Patients need not hesitate because of their inability to visit us, as we have treated patients successfully in all portions of the civilized globe, by correspondence.
Patients addressing us will please state plainly all the symptoms of their complaints, and write Postoffice, County, State and name of writer, plain, and inclose postage stamp for reply.
We send our 32 page pamphlet free to any address. Address all letters for Pamphlets or advice to the proprietors,

SPEER'S
SAMBUCI WINE,
PURE AND FOUR YEARS OLD,
OF CHOICE OPORTO FRUIT,
For Physician's Use, Females, Weakly Persons and Invalids.
AS A DIURETIC, it imparts a healthy action to the Glands and Kidneys, and is a valuable remedy in Dropsy, Gout and Rheumatic Affections.
SPEER'S SAMBUCI WINE is not a mixture or manufactured article, but is pure from the juice of the Portugal Sambucus, cultivated in New Jersey, recommended by physicians and chemists as possessing medical properties superior to any other Wines in use, and an excellent article for all weak and debilitated persons, and the aged and infirm, improving the appetite, and benefiting ladies and children.
A LADIES' WINE, because it will not intoxicate as other wines, as it contains no mixture of spirits or other liquors, and is admired for its rich peculiar flavor and nutritive properties, imparting a healthy tone to the digestive organs, and a blooming, soft and healthy skin and complexion.
☞ None genuine unless the signature of "ALFRED SPEER, Passaic, N. J.," is over the cork of each bottle.

PERSONAL.— Col. John Travis, inventor of the celebrated "Travis gun," used by Forrest's men, and the most famous pistol-shot in the world, is at present in Montgomery.

"Uncle Billy Allen," a decrepid veteran 103 years of age, is noticed among the arrivals at Selma, Alabama. He was Gen. Jackson's body-servant at New Orleans, and is now childish, lame and almost blind.

Gen. Fessenden is quite ill in consequence of the hemorrhage of the wound caused by amputation of his leg.

— The postal revenue for the year ending on the 30th of June last was about twelve and a half millions. The excess of expenditures over the receipts was a little over $800,000. The amount of receipts was four million dollars more than in the first year of the rebellion. The whole number of our Post Offices is 28,878. 4713 Postmasters were appointed last year.

We understand that the convicts in the State Prison are almost unanimous in condemnation of the unkind, discourteous and denunciatory spirit in which the press of the State speaks of crime and abandoned criminals. They think that this class of citizens is sufficiently numerous and respectable to be treated with more consideration.

— The value of Milton's house, which was wanted by the Metropolitan Railway Company in London, to make room for their tracks, was assessed at £3250. The sum asked for it was £3700. In the course of arguing the matter, it appeared that land in the city had been bought at the rate of two millions pounds sterling per acre.

— A severe tornado occurred in Rio Janeiro, Oct. 13, damaging the city severely, capsizing and sinking the bark Leighton, damaging the bark Lapwing, and capsizing several vessels, with the loss of life. It lasted but fifteen minutes.

— Seven fruitless attempts have been made in as many weeks, to throw the outward 6 o'clock evening train from the track on the Saugus Branch Railroad. $200 reward is all that is offered for the detection of the rascals.

☞ A friend of ours, riding in a stage coach last summer, mentioned the then recent death of a distinguished author. "Is *he* dead?" asked an old lady from the back of the coach, "well I haven't seen any *arbitrary* notice of his death."

— The venerable Nathaniel Willis, who began to set type in 1790, and who published a paper in Virginia seventy-one years ago, called at the Transcript office, and offered his services.

— Somebody has found a singular statement in the report of the English Register General, in a volume of statistics, to the effect that in 1861 there were more women than men married in England.

— A letter from a traveller in the new oil regions of Pennsylvania says: "We were paddled across the creek by an oil prince, aged fifteen, heir to a million, coatless and hatless, and with but one suspender to keep his trowsers up."

— The Androscoggin mill at Lewiston has 40,000 spindles, is 534 feet in length and 75 feet in width. The weight of the bell attached to this mill is said to be 11,000 pounds.

— The President approves the civil policy of Gen. Banks, and he returns to New Orleans at the request of the Executive.

— Among the valuable gifts at the Sailors' Fair, was an elegant ladies' toilet table, from Beal & Hooper, worth $175.

A Democratic editor in Iowa says his party in that State has taken the degree of L. L. D.,—"Licked Like the Devil"

— A little boy in Hartford thought it pretty to drink burning fluid, and would have died, but his thoughtful parents put a wick in him and burnt it out.

— The Philadelphia friends of the late Gen. Birney, have raised $32,000 for the benefit of his widow and children. Who says Republics are ungrateful?

— The stockholders in the German gambling houses make money. One of them has just declared a dividend of 24 per cent.

— Two of Moseby's spies were arrested at Georgetown, D. C., on Wednesday night.

— Volunteering is very brisk in New York.

— The draft is still going on in Wisconsin.

— He who lives for himself alone, lives for a mean fellow.

— There are 50,000 Chinese in America.

American and Foreign Patents.
R. H. EDDY.
SOLICITOR OF PATENTS,
Late Agent of U. S. Patent Office, Washington, (under the Act of 1837.)
76 State street, opposite Kilby street,
Boston.
After an extensive practice of upwards of twenty years, continues to secure Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds and Assignments, and the whole business relating to Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.
The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The Testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and does believe, that at no other office of the kind are the charges for professional service so moderate.
The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.
These, together with the library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.
All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.
TESTIMONIALS.
"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.
"I have no hesitation in assuring inventors that they cannot employ a person *more competent* and *trustworthy*, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents.
Mr. R. H. Eddy has made for me THIRTEEN applications, on all but one of which patents have been granted, and that is *now pending*. Such unmistakeable proof of great talent and ability on his part leads me to recommend all inventors to apply to him to procure their patents; as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."
JOHN TAGGART.
During eight months, the subscriber, in course of his large practice, made on *twice* rejected applications SIXTEEN APPEALS, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents.

Morning Chronicle.

Portsmouth, N. H.

TUESDAY, DECEMBER 6, 1864.

THE TIDE IS RISING. — The National Intelligencer of Washington City, contains editorial statements that slavery as a political and social institution, is passing, and will inevitably pass away from the United States; and the Intelligencer, as a well known conservative journal, is anxious now about reconstruction without slavery, — fearful, probably, that some, ex-slaveholder may suffer some diminution of his property.

The Louisville Journal, which, since the re-election of Mr. Lincoln, has learned that Kentucky would have been much better off had she adopted the advice of Henry Clay, and a cliched Slavery; — has an editorial, recommending that its political friends go in for emancipation.

A similar article appears in the Staats Zeitung of New York city, the leading German Democratic paper of the United States. It takes for granted that "the institution of Slavery is shaken or utterly broken in the States of Missouri, Tennessee, Kentucky, Maryland, Delaware, West Virginia, Arkansas, Louisiana, Georgia, Alabama, Mississippi, North Carolina, East Virginia, and the District of Columbia." The Missouri slaveholders according to its opinion, have already missed the opportunity of recovering compensation for the loss of their slaves, and the Delawarians have to make haste if they are not to be surprised by a similar turn of affairs in their State. The Staats Zeitung quotes the article of the Louisville Journal, and remarks approvingly that this "formerly pro-Slavery organ" has adopted its own often-expressed opinion that "the slaveholders, to save themselves from loss, ought to have taken an active part in the anti-Slavery movement; or in States where it is not already too late, as in Missouri, ought to do this now without further delay."

The Staats Zeitung is a paper of good standing in the Democracy, which elected its editor delegate to the Chicago Convention, and nominated him for Presidential Elector. If papers like it and the Louisville Journal lead the way, we may expect that many others will follow.

We deem the change in the language of these papers a cheering sign of the times, though thus far the conversion is intellectual merely, and not moral. They abandon Slavery because its defense is hopeless.

☞ It is an ascertained fact, that in New Hampshire our actual voting population has not been diminished by the war. This will appear from the following figures:

In 1860 the heaviest vote ever thrown in New Hampshire was given for Governor:

Gov. Goodwin had	33,037
In 1864, Hackett, for Elector, had	32,400
	1637

In 1861, the year the rebellion broke out,

Berry, for Governor, had	35,467
In 1864, Hackett, for Elector, had	36,400
Being more than Berry	933

In the Democratic party, in 1861,

Stark, for Governor, had	31,452
In 1864, Stark, for Elector, had	32,869
Being a gain of	1417
Total vote in 1861	66,919
Total vote in 1864	69,269
Increase	2350

— The Navy Department is very well supplied with men at the present time, and can get as many men as it wants now.

— A garrotor has been sentenced to twenty years imprisonment in New York.

— In the rebel Senate last Wednesday, resolutions denouncing the seizure of the pirate Florida were introduced. They say it is the duty of the Brazilian Government to protect Confederate property within its territory. They demand a restoration of the ship, and have provided for the appointment of a commission to Brazil on the subject.

— Good dog for a printer: A setter and pointer.

— Chas. H. Gesner has been arrested in New York and taken to Baltimore, on a charge of having been connected with the late heavy forgeries there, by which between $60,000 and $70,000 were obtained from the banks.

— It will be remembered that Mrs. Rose Greenhow, the female rebel, who has attracted so much attention during the war, was lately drowned near Wilmington. A Richmond paper says that her drowning was caused by her having six hundred pounds sterling, in gold, about her person.

— It is estimated that the receipts during the present year from the internal revenue exceed two hundred and sixty five millions of dollars.

— The east wing of the penitentiary at Baton Rouge, La., was burned on the night of the 22d ult., in consequence of the carelessness of contrabands quartered in the building. One hundred and forty mules, fifty horses and seventy-five sets of harnesses belonging to the Government were consumed. The value of the Government property burned was about $70,000.

— With 21,616 more families than Philadelphia, New York had, in 1860, 23,601 fewer dwellings to shelter them in.

THE REBELLION.

The Richmond Examiner of Friday says: "A cavalry fight took place in East Georgia on Tuesday. The Yankee cavalry under Kilpatrick were attempting to cross the Savannah river, when they were attacked by Wheeler, and after an obstinate fight were driven back in the direction of Millen, losing very heavily. Kilpatrick himself was at one time so closely pressed as to lose his hat. Sherman's main army is moving towards the coast and a battle is expected." The Savannah river is thirty miles east of Millen, which shows the falsity of the report that the Union forces had not occupied that place, which is an important railroad centre.

There had been an engagement at Grahamsville, 30 miles northeast of Savannah, in which our troops were routed and driven five miles. They were evidently sent up from Port Royal.

Gen. Gregg's reconnoissance was made on account of a report that the rebels were about to evacuate Petersburg.

Gregg captured 200 men at Stony Creek, 30 mules, 8 wagons, arms, ammunition, &c. Thence he suddenly fell upon and routed the rebels at Duval's Station, capturing and destroying 3,000 sacks of corn, 500 bales of hay, one train of cars laden with commissary stores, alarge amount of bacon, carbines, depots, shops and public stores.

Late Southern papers have concluded that Sherman will reach the coast without serious opposition. He is living off of the country, and leaving that portion in his rear devastated and desolate.

The Richmond Dispatch says 700 prisoners had reached Augusta, having been captured while foraging for Sherman.—Heavy cannonading was heard in the direction of Macon on the 1st inst., believed to be a battle.

The Richmond Whig of the 3d inst. says Price, with a large army, is within striking distance of Little Rock.

The rebel line of battle was within just two miles of Nashville on the 3d.

Beauregard telegraphs to Richmond that the Union forces evacuated Decatur on the 26th, after burning the large store houses filled with provisions. His officers rescued from the burning buildings 15 pontoon boats and afterwards pressed the enemy closely.

Perley telegraphs that the captain of a transport which left Savannah on the 2d reports Sherman's cavalry within six miles of that city on the evening of the 1st.

So fearful is the panic in Georgia, and so sorely are the rebels pressed for men to make a show against the advancing national columns, that the Governor has pardoned the convicts in the State penitentiary, armed them and put them into the military service.

A dispatch from Louisville says that Gen. Burbridge with his command has reached Bean Station, and Gen. Breckinridge, apparently declining battle, has fallen back towards Virginia. Gen. Stoneman will, if necessary, aid Breckinridge's backward movement.

☞ Congress met on Monday. There were upwards of 150 members present at roll call in the House, and a quorom in the Senate. All the members were in the best possible humor. No great amount of business was transacted, and it was understood that the President's message would not be communicated until Tuesday.

The credentials of the five gentlemen from Louisiana, signed by Michael Hahn, Governor, purporting to be elected members of the House, in pursuance of the recently adopted constitution of that State, were referred to the committee on elections. The privileges of the hall were accorded to them. Mr. Davis presented a protest against their being admitted.

— Gold closed at 228 5-8 in New York on Monday.

If you think your opportunities are not good enough you had better improve them.

— The English firm of Halleday, Fox & Co. recently failed for about $10,000,000.

— The pirate Semmes arrived at Matamoras, from Havana, Nov. 10, and started for Richmond via Brownsville.

— The arrest of 60 Southerners at the principal New York hotels on Sunday, by order of Gen. Dix, caused considerable fluttering among the rest. After an examination some were released, but the majority were detained and will probably rusticate for a while in Fort Lafayette.

— The blockade runner Beatrice, with a cargo of coals, arms, ammunition, &c., was chased ashore on Sullivan's Island, on the 26th ult., by our blockading vessels and destroyed. She was valued, with her cargo, at $225,000.

— A draft now going on in Washington, is conducted in secrecy, so that those whose names are drawn shall have no chance to run away. It is intimated that the enrollment law may be so amended as to make this mode of drafting the general practice.

— The new monitors Kickapoo and Milwaukee have arrived in Mobile Bay. They are of much lighter draught than any Admiral Farragut has had in his squadron at any time. The Kickapoo was built at St. Louis, and is 976 tons burden, and has two turrets. The Milwaukee is a sister ship, and was built at the same place.

NEW HAMPSHIRE.

—— Lt. Frank S. Bean, of Ehfield, died in that town on the 25th ult., of a wound received in front of Petersburg.

—— A farmer in Wilmot, N. H., has offered to furnish 600 bushels of potatoes for the Manchester "Low Price Association," for 50 cents a bushel.

—— The Nashua Stock Company, with a capital of $60,000, is now doing an active business, giving employment to one hundred and fifty hands, and using one hundred and fifty tons of pig iron and one hundred tons of brass and copper yearly.

—— Capt. Ruthven W. Houghton, 3d N. H., has been dismissed from the service for absence without leave.

DR. DIO. LEWIS' "Normal Institute for Physical Education," located in Boston, incoporated in 1861, and employing several eminent Professors, will open its Winter Term for 1865 on the 2nd of January Already nearly two hundred graduates of this institution are at work in the cities and towns of the northern States. Of these, about two-thirds are ladies. Ladies and gentlemen who would enter the New Profession, and become teachers of the popular system of Gymnastics, can send to Dr. Dio Lewis for a circular. The old Knickerbocker says: "Success to Dr. Lewis. Gentlemen or ladies who would do real *good* in this world, and would learn a calling whose practioners are every day in more request, should qualify themselves to become teachers at the Normal Institute."

— The London papers of Nov. 18th announce the arrival of Gen. Tom Thumb and family in that city. They are holding daily levees in a hotel near St. James' palace. The Star says: "The baby is a pretty little girl with light silken hair and a vicacious disposition. She will be a year old next month; and it may interest our readers to know that she weighs precisely seven pounds and three-quarters."

Snails are eaten at Parisian taverns and public houses, not in hundreds or in thousands but in myriads, and *gourmets* assert that they possess a delicacy of flavor which exceeds that of the oyster.—*Exchange.*

We have often seen them exposed for sale in the French portion of New Orleans, and though their flavor may be delicate, we think their odor anything but such.

— There is great activity on foot in the boot and shoe market.

THE BATTLE AT FRANKLIN.— Full accounts of the late battle at Franklin and its antecedents have been received. It was one of the most brilliant victories in its general results of the war. For three days sharp skirmishing was kept up during the retirement of our army from Duck river to Franklin. Gen. Cox conducted the rear guard, and on the 29th ult. achieved a splendid victory over the rebels at Spring Hill, while Gen. Wilson's cavalry gained a series of important successes over Forrest's advance under Roddy, on the pike between Turner's and Spring Hill. During the afternoon of the 30th the rebel army was screened behind a wooded under Hood, who had Cheatham's and Stewart's corps and a portion of Dick Taylor's command, numbering in all over 22,000 men. Owing to Cox's gallant check at Spring Hill, a portion of the 4th and 23d corps were enabled to gain Franklin early in the day, where they threw up a line of breastworks, extending from one end to the other of the curve in the river behind which our infantry command took position.

At precisely four o'clock in the afternoon, the entire rebel force made a charge, and succeeded in effecting a temporary break in our centre, commanded by Wagner. With characteristic impetuosity the soldiers composing Cheatham's corps dashed into our breastworks, and, co-operating with an attacking party on their left, attempted to envelope and destroy our right. In the nick of time the troops of Gen. Wagner were rallied, and throwing their whole force on the rebel columns drove back the storming party in great disorder, and capturing several hundred prisoners. Four times the rebels charged on these lines, but were repulsed each time with great slaughter.

The rebels numbered at least two to our one, as nearly half of the 23d and 4th corps were in reserve. The rebel loss in killed is three times that of ours, while their wounded is at least six times that of ours. The artillery fire of the enemy was made with great precision, but their ammunition consisted chiefly of shot and shell, while for two hours immense quantities of more murderous missiles were hurled with fearful fury into the rebel lines. All attempts of the rebels to gain a permanent advantage were frustrated, and at dark the Federal position was unchanged. The rebels retired under the cover of woods south of Columbia pike.

An artillery duel was kept up until nearly midnight, when our troops commenced crossing Harpeth river, bringing all our trains and paraphernalia over in safety before daylight. The army then retired to within four miles of the city, at which point our front line confronts the enemy. The falling back of the army is in accordance with the programme, and the battle at Franklin, although of a most brilliant character, was an impromptu affair, and was brought about by the necessity of checking the rebel advance to secure the safe crossing of the river by our troops.

Thirty stands of colors were captured by the Union forces. The 49th Indiana regiment captured five, the 88th Illinois three, Reilly's old brigade eighteen, and the 23d corps four. Gen. Stanley, commanding the 4th corps, had a very narrow escape, having been shot in the right shoulder, the ball traversing his back and going out of the left shoulder. He also had a horse shot under him. It is confirmed that Gen. Pat Chadbourne of Tenn. is killed.

The only profitable kind of strike is ascertained to be an "oil strike." We suppose because it "goes down" better.

THE UNPRECEDENTED POPULARITY

Which has attended the introduction of our brands of

CALIFORNIA WINES

Is a flattering tribute to their purity and fine qualities.

THE STATE FAIR

At Indianapolis, where our Wines came into competition with all the best WESTERN WINES, have just awarded us a *SILVER MEDAL.*

At the OHIO STATE FAIR we took *Five Premiums* out of six.

Surgeon General Dale, after a careful and searching chemical analysis of our wines, pronounces them PURE.

The leading portion of the American Press have extolled their merits; and the unanimous verdict of those who use them is, that

THE VERNATELLA

LIQUID BLACKING

Gives to the Leather not only a

Splendid Jet Black Polish,

But an elegant and Fashionable Perfume.

The neatness and convenience of using Liquid Blacking and the superior polish which it gives over other kinds, has heretofore been in a great measure counterbalanced by its disagreeable vinegar odor and the trouble of fitting something into the stopper of each bottle in order to apply it to the brush, but the Vernatella Blacking has only the most DELIGHTFUL PERFUME, which remains with the leather as long as the blacking lasts, and each bottle has a stick ready fitted in the stopper. The Vernatella Blacking also softens and benefits the leather.

Be sure and inquire for the VERNATELLA Blacking.

Price, 12 Cents per Bottle.

Manufactured in the Chemical Department of the Cahoon Manufacturing Co., and for sale by Boot and Shoe Dealers everywhere.

HALE'S

Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the means of all. At last after a long course of chemical experiments, he found that by adding to these *five* other ingredients, each only valuable by itself, he not only obtained the desired results but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the general public as a safe, pleasant and infallible remedy.

PRICE, 50 CENTS PER BOTTLE.

"A Wonderful Discovery."

DR. TEBBETTS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "DYE," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new Hair in all cases on BALD HEADS, when the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With it every "GRAY HEAD" in New England can be restored in less than sixty days.

A Card to Invalids.

A Clergyman, while residing in South America as a missionary, discovered a safe and simple remedy for the Cure of Nervous Weakness, Early Decay, Diseases of the Urinary and Seminal Organs, and the whole train of disorders brought on by baneful and vicious habits. Great numbers have been already cured by this noble remedy. Prompted by a desire to benefit the afflicted and unfortunate, I will send the recipe for preparing and using this medicine, in a sealed envelope, to any one who needs it, *Free of Charge*.

☞ How easy it is to "fill" a hall, isn't it—with the prevailing outrageous and absurd balloon fixings of the women? Last year, for instance, the Lyceum Committee were able somehow to crowd a thousand persons into the Temple. This year but 800 tickets were issued, and they are not all used; but the house *looks* about as full as ever, though it is not, for the people paid nominally (but not really) a higher price for their tickets, and doubtless think they are entitled to more room.

As to the precise number present, the first night it was by actual count (not guess) of tickets, a little less than 800; the second, something under 700; and last Tuesday, exactly 795, besides the Band and speakers. So there are a few more tickets yet to be sold, either as wholes, or separately, as the Committee may elect—and the indications are, that instead of making lots of money out of it, as some people absurdly suppose, they will need all and more too, to pay the bills. And speaking of this, we will only say now, that *never* was there a cent made out of a Lyceum Course here, so far as we know; on the contrary, they have usually failed to pay their bills.

And yet, with the Temple considerably enlarged, there is the same lack of room as before. This can be explained only by the fact that the ladies, so called, "make broad the borders of their garments" to the widest practicable extent, regardless whether or not they occupy room, anywhere, which does not belong to them, but does to others who are crowded out. We say "so called" ladies, because we have our doubts about its being ladylike or civil, not to say polite, for anybody to occupy, needlessly, room which they know others desire and are entitled to, even when requested to occupy less.

It is rather a thankless task to manage a Lyceum, any way; and the wonder is, that competent business men, already too busy, can be found to do it, as a mere matter of public benefit—for all they get besides, is the right to be criticised and found fault with by any booby who chooses. And appreciative, well-intentioned people among the ticket-holders, should aid the ushers all they can, in seating the audience compactly as they should be.

OUR AMERICAN COUSIN.—This great sensational drama which had a run of 350 consecutive nights at Laura Keene's Theatre in New York and has also been played with immense success in every city in the Union, will be produced in fine style by Bidwell & Pike's Company at the Temple this evening. Let no one miss this opportunity of seeing the greatest sensation of the age. DRAMA.

☞ According to a recent order received from the Bureau at the Portsmouth Navy Yard to discharge ten per cent. of the workmen employed thereon, a large number were discharged on Saturday and another batch on Monday. This arrangement lessens the number of men about two hundred and seventy-five.

☞ The new steamer Emerald made one trip from and to the Yard on Monday afternoon, and worked admirably. She is not calculated, however, for hard service, and must be — like certain kinds of packages conveyed by rail — "handled carefully.

☞ A correspondent informs us that neither Marshal Dresser nor Capt. Kent found Benton's discharge, but a private citizen, and that Benton confessed to Officer Kent. It is a matter of no great interest to the public who discovered it, so that the ends of justice are obtained, but still we believe in rendering honor to whom honor is due; for which reason we made the statement which our correspondent objects to, on information furnished us. The discharge was handed Marshal Dresser, and by him carried to the Provost Marshal's office, after which our informant says, the case was worked out by Mr. Kent.

☞ "What is that granite circle on Middle street?" asked a stranger a few days since. "Oh, that is Haymarket *Square*."

☞ Collection was taken in the Court St. Christian Chapel on Thanksgiving day, for the Christian Commission, amounting to $31.41.

A short time since a keeper of a sailor boarding house in this city, took a man to Portsmouth and enlisted him in the navy, receiving therefor $600. The recruit was to receive $400, and he was paid $200, with the promise that the other $200 should be brought to him on board the vessel. But some how or other the promise slipped from the memory of the recruiter, and he came away without sending the money. After waiting for it some time, and not receiving it, the sailor made known the facts to the authorities in Portsmouth, and on Saturday an officer came to this city in quest of the defaulting recruiter. Officer Hume arrested him, and he paid over $200, and promised to go to Portsmouth Monday, and settle the matter.—*Portland Press.*

FACTORY KINDLINGS.—What are they? Answer,—they are the condemned Spools of the spool manufactory, with other small pieces of hard wood which are cut off in making spools. Being packed in barrels, they are handy; and being dry, they burn like a house a-fire.

Messrs. Editors:— Among the candidates prominently named for nomination of Representative to Congress from this District, no Portsmouth man is seriously talked of, although we have several gentlemen in our midst as able and popular as those who are named from other places. Our popular ex-mayor, Hon. Horton D. Walker, whom the people delight to honor, and whose noble qualities of mind and heart have endeared him to his fellow citizens, who can appreciate his Christian virtues, and strict integrity; would be a strong candidate for the suffrages of the people, and receive the votes of many in our city who otherwise might vote against the Union nominee. Hon. W. H. Y. Hackett, and Rev. A. J. Patterson, who did yeoman's service in the late Campaign, have hosts of friends who would gladly vote to send them to Congress. Let the delegates to the Convention, to be chosen on Wednesday evening, unite on one of these candidates and go into the Convention unanimously, and if either cannot receive the nomination, let the *unanimous* Portsmouth vote be transferred to a person from another place. It is all important to the workingmen of this city that our influence be not frittered away by division and contention; if our whole influence is to be given in the way that the successful candidate will feel under obligations to Portsmouth, our claims in the future will not be ignored, and Portsmouth men will not be compelled to give way to those from the country. "A word to the wise is sufficient." W.

NAVAL.—Lieut. C. S. McDonough has been detached from the receiving ship North Carolina, and ordered to the recruiting ship Vandalia, at this port.

Carpenter Wm. F. Laighton has been detached from the Sabine, and ordered to the Hartford, West Gulf Squadron.

Acting Master Chas. C. Jones, has been ordered to medical survey at this naval station.

John Slack has been appointed 3d Assistant Engineer and ordered to the Albatross.

☞ On the morning of the 30th ult. a force under Gen. Foster and Com'r Preble left Port Royal to make an attack on Pocotaligo—the intention being to destroy the railroad bridge there and thus cut the communication between Charleston and Savannah. The marines with the expedition were under command of Lieut. George G. Stoddard, formerly stationed at the Portsmouth Navy Yard. The latest news received from the raiders is that they had landed about seven miles from the anchorage, and had marched four miles into the interior, without resistance. About a year ago, an attack was made on Pocotaligo, and we were repulsed with heavy loss.

— A locomotive with steam up was left standing on a turn-table at Newport a few ago, when by some accident the machinery was set in motion, and the engine tore off swiftly into a neighboring field.

There is no soap that will begin to compare with the J. Monroe Taylor Gold Medal Soap, and probably no other manufacturer begins to expend one-half as much money to make it worthy of the community, and the maker is richly deserving the patronage bestowed on him. It is a God-send to the world, and all who use it will agree with us that what we say is true. 32

SYMPATHY.—Sympathy is a lovely and beautiful thing, for it exhibits the angelic part of human nature. We deeply sympathize with those who cannot obtain Herrick Allen's Gold Medal Saleratus, for they are deprived of one of the greatest luxuries the world afords. But we have no sympathy with any family who will use any other Saleratus or soda, if this article can be purchased. We see most of our Merchants have it. One trial will convince any one. Their depot is 112 Liberty Street, New York.

SAVE YOUR FUEL:

THE MODEL COOK.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

The subscriber has reduced the prices of the Model Cook Stoves FIVE DOLLARS each, to conform to the decline in gold.

Morning Chronicle.

THE FAMILY IN HEAVEN AND EARTH.

'Tis but one family—the sound is balm—
A seraph-whisper to the wounded heart;
It lulls the storm of sorrow to a calm,
And draws the venom from the avenging dart.
'Tis but one family—the accents come
Like light from heaven to break the height of
woe—
The banner-cry to call the spirit home,
The shout of victory o'er a fallen foe.
Death cannot separate—is memory dead?
Has thought, too, vanished, and has love grown
chill?
His every rite and memory fled,
And are the living only with us still?
No! in our hearts the lost we mourn remain,
Objects of love and ever-fresh delight;
And fancy leads them to her fairy train
In half-seen transports past the mourner's sight.
Yes! in ten thousand ways or far or near,
The called by love, by meditation brought
In heavenly visions; yet they haunt us here—
The sad companions of our sweetest thoughts.
Death never separates; the golden wire
That ever trembled to their names before
Will vibrate still, though every form expires,
And those we love we look upon no more.
No more indeed in sorrow and in pain,
But even memory's need are long will cease;
For we shall join the band of love again
In endless bands, and in eternal peace.
—*Edmaston.*

☞ An article on the "First Cigar Smoker" in the U. S. Service Magazine has this "puff" for pipes:

There is a wild romance in the briar-wood pipe, borne through thirteen battles, and that has drawn in the air of burning powder, and blood, and fire, and strong tobacco; that has cheered the clergyman on lone picket, and been beef and bread to him when rations were short, and a consolation in the few minutes' halt that will end with a mount and charge with sabres, smack into the rebel horde.

It iz highly important that when a man makes up his mind to bekum a raskal, that he should examine hizself closly, and see if he ain't better konstructed for a phool.

There iz onla one advantage, that i kan see, in going to the Devil, and that iz, the rode iz easy, and yu are sure to git thare.

Don't mistake arroganse for wisdom; meany people have thought they wuz wize, when tha waz onla windy.—*Josh Billings.*

THE MAGEE
COOKING STOVE.
The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the
CELEBRATED AND UNEQUALLED
MAGEE COOK STOVE,
as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. The oven plates are covered with plaster, which renders it equal to the old-fashioned brick oven for perfection in baking.
There is a new style and very superior broiler and sad-iron heater combined, by which the odor of broiling meats are prevented from creeping into the room. With the extension top there is a large copper Reservoir for hot water; also a large tin warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.
The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove in use, as no dust can possibly escape into the room, and the shoveling up of the ashes is entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.
For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.
We would refer to the following purchasers:

"MAGEE'S PATENT"
VENTILATING & AIR-WARMING
FURNACES.
The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.
For economy, purity of air and ease of management it has no equal, producing a current of warm air, moist and agreeable;—and as none of the air which comes in contact with the fire-pot is used for respiration, the tendency to produce headache so much complained of in other Furnaces, is entirely obviated.
The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel and to prevent the escape of heat to the smoke pipe or chimney.
To accomplish this many complicated and expensive heating arrangements have been constructed, some possessing but little improvement over former methods, while many have proved a total failure. The reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the
MAGEE FURNACE.
The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are turned up by the admission of cold air through the fire-pot, which ignites them as they pass off from the coal, thus saving at least 30 per cent. of the properties of the heat in the fuel.
No heating apparatus with the smoke-pipe or flue on the top of the cone can be made to consume the gases of the coal, as they pass off with a large portion of the heat generated, making the chimney the hottest part of your dwelling.
This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus amplifying, while it increases the surface of radiation.
These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.
For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.
They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of the best Furnace in the world,—and would refer them to the following named gentlemen, who have them now in use:

Samuel Chevers, Esq.,	Albert R. Hatch, Esq.,
Aaron H. Hill,	Charles H. Mendum,
Henry F. Wendell,	John Sise, and others.

CHEROKEE REMEDY
—AND—
CHEROKEE INJECTION,
Compounded from Roots, Barks & Leaves.
CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys, Stone in the Bladder, Stricture, Gravel, Gleet, Gonorrhœa, and is especially recommended in those cases of Fluor Albus (or Whites in females) where all the old nauseous medicines have failed.
It is prepared in a highly concentrated form, the dose only being from one to two tablespoonfuls three times per day.
It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all of its original purity and vigor; thus removing from the system all pernicious causes which have induced disease.
CHEROKEE INJECTION is intended as an allyer assistant to the CHEROKEE REMEDY, and should be used in conjunction with that medicine in all cases of Gonorrhœa, Gleet, Fluor Albus or Whites. Its effects are healing, soothing and *demulcent;* removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the *cheap quack injections.*
☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to full vigor and strength.
For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.
Price—CHEROKEE REMEDY, $2 per bottle or three bottles for $5.
Price—CHEROKEE INJECTION, $2 per bottle, or three bottles for $5.
Sent by Express to any address on receipt of price. Sold by all druggists everywhere.

The Cherokee Remedy, Cherokee Injection, and Cherokee Cure,
Are sold by all enterprising Druggists in the civilized world. Some unprincipled dealers, however, try to sell worthless compounds in place of these: those which they can purchase at a cheap price, and make more money by selling, than they can on these medicines. As you value your health, aye, the health of your innocent offspring, do not be deceived by such unprincipled Druggists, *ask for these medicines and take no others.* If the Druggists will not buy them for you, enclose the money in a letter, and we will send them to you by Express, securely sealed and packed free from observation.
Ladies or Gentlemen can address us in perfect confidence, stating fully and plainly their diseases and symptoms, as we treat all diseases of a chronic nature in male or female. Patients need not hesitate because of their inability to visit us, as we have treated patients successfully in all portions of the civilized globe, by correspondence.
Patients addressing us will please state plainly all the symptoms of their complaints, and write Postoffice, County, State and name of writer, plain, and inclose postage stamp for reply.
We send our 32 page pamphlet free to any address. Address all letters for Pamphlets or advice to the proprietors,

SPEER'S
SAMBUCI WINE,
PURE AND FOUR YEARS OLD,
OF CHOICE OPORTO FRUIT,
For Physician's Use, Females, Weakly Persons and Invalids.
AS A DIURETIC, it imparts a healthy action to the Glands and Kidneys, and Urinary Organs; very beneficial in Dropsy, Gout and Rheumatic Affections.
SPEER'S SAMBUCI WINE is not a mixture or manufactured article, but is pure from the juice of the Portugal Sambucus, cultivated in New Jersey, recommended by physicians and chemists as possessing medical properties superior to any other Wines in use, and an excellent article for all weak and debilitated persons, and the aged and infirm, improving the appetite, and benefitting ladies and children.
A LADIES' WINE, because it will not intoxicate as other wines, as it contains no mixture of spirits or other liquors, and is admired for its rich peculiar flavor and nutritive properties, imparting a healthy tone to the digestive organs, and a blooming, soft and healthy skin and complexion.
☞ None genuine unless the signature of "ALFRED SPEER, Passaic, N. J.," is over the cork of each bottle.

The Chronicle.

— A Physician at Cincinnati, had for some time been annoyed by depredators who drank up the milk left at his door at an early hour. One day recently, he put an emetic in the pitcher, and soon after the milkman had passed, the doctor found a policeman in a neighboring alley, "making his returns."

— New York city is so overflowing with people that houses are almost unobtainable, and rents are enormous, while the hotels are crowded with boarders at four dollars per day. Furnished houses in select localities rent at prices varying from $200 to $1000 *per month.*

— An opponent of Old Abe who was asked by a boy how long the President holds office, replied snappishly, "judging from the present style, I think they will keep old Abe there until hell freezes over," when up spoke the lad, "I guess, then, when Abraham leaves the chair, you'll be found under the ice."

— Mrs. Sarah Thompson, the lady who caused the rebel guerrilla John Morgan to be cut off in the flower of his career of brigandage, is now in Cincinnati with her two fatherless children. She is homeless and penniless.

— Governor Vance of North Carolina, in his annual message, says that all the efforts to bring back renegade North Carolinians by offering pardon have proved fruitless, and he recommends that they be driven from the State.

— The library of Congress has received an addition of about 4,000 books during the present year. They treat of a variety of topics, but especially of the discovery, settlement, and topography of this continent.

— A society is being formed in New Haven having for its object the establishment of a "central office" where all street beggars and those in poor circumstances can be sent for relief. It is to be supported by voluntary contributions or membership.

— W. W. Pratt, of Boston, well known to the public as an actor and a writer of plays, died on Monday evening, at Rochester, N. Y., where he was playing an engagement. He was the author of "Ten Nights in a Bar-room."

— A curiosity in the shape of 21 nuts in the centre of a large English oak was discovered at a saw mill in England, recently. Not the least flaw could be discovered in the timber, and the nuts were sound and of a mahogany color.

— William Barr, the inventor of the casemate iron clad system, died a few days since at Greenfield Hill, Conn. It was from the stolen plans of Mr. Burr that the rebel ram Merrimac was built.

— The ladies of Paris, not content with dyeing their hair red, now dye their lapdogs to match the color of their dresses. Green dogs, yellow dogs and sky-blue pups are all the rage.

— Joshua Hobart, who wheeled a barrel of oysters weighing 300 pounds from Providence, on an election bet, arrived in Boston on Saturday afternoon.

— The rebel House of Representatives, on Wednesday, had under consideration a bill for the employment of slave and free negroes in the army.

— Mr. Wm. Keen, of Mechanic Falls, Me., has recently sold a horse to parties in New York, for $2500. He made 2:37 on the Lewiston track a short time since.

— Two Asiatic leopards of remarkable ferocity have just arrived in New York. One of them broke from their cage and created a great confusion before she was secured.

— Milk has gone up in New Haven to ten cents per quart, and it goes down at the same rate in Hartford.

— Spain has undertaken to assert that commanders of forts in her possessions will fire on any U. S. war vessels that may follow rebel cruisers within three miles of the shore.

— During a recent cannonade between federal and rebel batteries the novel sight of a collision between two immense bombs in mid air was witnessed by thousands of spectators.

— To the desperate bravery of Gen. Stanley at Franklin is attributed the turning of what threatened to be a disastrous battle into a glorious victory.

— Roger A. Pryor, having been freely furnished with money, presents a great contrast to our prisoners in the South.

—No more printers are wanted in Boston.

American and Foreign Patents.
R. H. EDDY,
SOLICITOR OF PATENTS,
Late Agent of U. S. Patent Office, Washington, (under the Act of 1837.)
76 State street, opposite Kilby street,
Boston.
After an extensive practice of upwards of twenty years, continued in Patents in the United States; also in Great Britain, France and other foreign countries. Caveats, Specifications, Bonds Assignments, and all Papers or Drawings for Patents, executed on liberal terms, and with dispatch. Researches made into American or Foreign works, to determine the validity or utility of patents or inventions—and legal or other advice rendered in all matters touching the same. Copies of the claims of any Patent furnished by remitting One Dollar. Assignments recorded at Washington.
The Agency is not only the largest in New England, but through it inventors have advantages for securing Patents, or ascertaining the patentability of inventions unsurpassed by, if not immeasurably superior to, any which can be offered them elsewhere. The testimonials below given prove that none is MORE SUCCESSFUL AT THE PATENT OFFICE than the subscriber; and as SUCCESS IS THE BEST PROOF OF ADVANTAGES AND ABILITY, he would add that he has abundant reason to believe, and can prove, that at no other office of the kind are the charges for professional service so moderate.
The immense practice of the subscriber during twenty years past, has enabled him to accumulate a vast collection of specifications and official decisions relative to patents.
These, besides his extensive library of legal and mechanical works, and full accounts of patents granted in the United States and Europe, render him able, beyond question, to offer superior facilities for obtaining Patents.
All necessity of a journey to Washington, to procure a patent, and the usual great delay there, are here saved inventors.
TESTIMONIALS.
"I regard Mr. Eddy as one of the *most capable and successful* practitioners with whom I have had official intercourse."
CHARLES MASON,
Commissioner of Patents.
"I have no hesitation in assuring inventors that they cannot employ a person *more competent and worthy*, and in order to secure the benefit of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office."
EDMUND BURKE,
Late Commissioner of Patents.
Mr. R. H. Eddy has made for me THIRTEEN applications, on all but ONE of which patents have been granted, and that one pending. Such unmistakeable proof of great talent and ability on his part leads me to recommend *all* inventors to apply to him for securing their patents, as they may be sure of having the most faithful attention bestowed on their cases, and at very reasonable charges."
JOHN TAGGART.
During eight months, the subscriber, in course of his large practice, made on *twice* rejected applications SIXTEEN APPEALS, EVERY ONE of which was decided in *his favor*, by the Commissioner of Patents.

The Old Established Hospital.
No. 5 Beaver Street, Albany, N. Y.
QUICK CURES AND LOW PRICES.
Over Twenty Thousand Patients Cured Annually!
DR. J. TELLER continues to be confidentially and successfully consulted on all forms of private diseases, at his old, Established Hospital, No. 5 Beaver Street, Albany, N. Y. Twenty years devoted to this one particular branch of practice, enables him to perform cures such as no other Physician can, and his facilities are such (being in correspondence with the most eminent Physicians of the Old World,) of obtaining the safest as well as the latest remedies for these diseases, offer inducements to the unfortunate of a quick and rapid cure, to be obtained at no other office in America.
In Syhilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and Spermatic Cords, Bubo, Ulcerated Throat, Nose, Tender Pains in Bones, Cutaneous Eruptions, Biles, Ulcers, Abscesses, and all other impurities of the system, are perfectly under the control of the Doctor's Medicines, and have been tested in more than 20,000 cases annually, with immense Success.
YOUNG MEN.
Young Men addicted to secret habits, who have impaired their healths and destroyed the vigor of their minds, thus depriving themselves of the pleasure of the Married Life, are notified that in consulting Dr. J. Teller, they will find a friend to console and a Physician who has cured thousands, in almost every part of the United States, who applied to Dr. J. broken down in health, now rejoice in all that makes life desirable and man happy. The reader is of course aware that the delicacy of the subject will prevent a more minute description of this terrible disease.
DR. TELLER'S GREAT WORK.
A book for everybody.—Startling disclosures. Dr. J. Teller's great work, entitled the Married or those contemplating marriage—200 pages—full of plates—price 25 cts. Sent to all parts, under seal, by mail, post paid, 50,000 copies sold in the past year. The single Married and the Married Happy. A lecture on Love, or how to choose a Partner—a complete work on Midwifery, it contains hundreds of secrets, never before published. Warranted to be worth three times the amount asked for it. 25 cents, in specie or postage stamps, inclosed, will secure a copy by return mail. Dr Teller has devoted a lifetime to the cure of those diseases upon which his books treat.
TO THE LADIES.
Dr. Teller still remains the only Agency in America, for the sale of Dr. Nichol's Italian Female Monthly Pills. The sale of more than 20,000 boxes establishes their reputation as a female remedy, unapproached, and far in advance of every other medicine—for stoppages, irregularities, and other obstructions in females.
CAUTION.—Married ladies in certain delicate situations should avoid their use. For reasons see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent, by mail or express, to any part of the world, secure from curiosity or damage.
Office hours from 8 A.M. to 8 P.M., and on Sundays from 9 to 5 P.M.
N. B.—Persons at a distance can be cured at home by addressing a letter to Dr. J. Teller, enclosing a remittance. Medicines securely packed from observation, sent to any part of the world. All cases warranted. No charge for advice.—N. B.—No students or boys employed. Notice this, address all letters to

Morning Chronicle.

Portsmouth, N. H.

WEDNESDAY, DECEMBER 7, 1864.

TIMELY PREPARATION. — In view of the probability of another draft, the select-men of many towns in this State are making preparations to meet the new demand of the government for men, and with good promise of success. The partial decline in manufacturing business of various kinds since last year, has led to the discharge of a considerable number of operative, some of whom will probably volunteer, while many of the returned soldiers would not be averse to another brief campaign.

☞ One of our correspondents has treated the subject of "high prices" in this city in a number of articles requiring a considerably outlay of time in the collection of material. We notice, by the N. Y. Evening Post that turkeys were sold in that market last week as low as 12 cents per pound, and chickens as low as 10 cents. The ruling prices were 18 to 20c. for turkies, and 16 to 18c. for chickens, of the best quality. The Manchester Low Price Association is now delivering its wood at a price which renders its cost to the consumer, including the cost of surveying and hauling, $7.60 per cord. Heads of families will readily perceive that these rates are far below those prevailing in this city.

☞ There is to be a Fair at Springfield, Mass., from Dec. 19th to 22d, in aid of the "Soldiers' Rest," a temporary hospital and home for the relief of soldiers passing through that city. From 1863 up to the present time, there have been received and cared for at the Rest about ten thousand men, and more than $10,000 have been expended in buildings, labor, supplies, food, medicines and medical attendance for the relief of these men, which expense has hitherto been mainly borne by the citizens of Springfield. Scarcely any of these men have been their own townsmen; over 5,000 have been Vermont soldiers, the rest soldiers of New Hampshire, Maine, Northern New York and Western Massachusetts. The demand continues unabated, and at no point can more good be done. For the people are friends of the Soldier, and are confidently appealed to to aid in the enterprise. Articles of any sort can be sent, and should reach Springfield by Dec. 15, and may be sent by railroad or express, (free of charge,) to the "Soldiers' Fair;" letters of inquiry concerning the Fair and any correspondence may be addressed to "Charles Marsh, Springfield, Mass."

THE DUTCH GAP CANAL.—A James river correspondent of the Newark Advertiser says there are now four monitors in the river which are expected to go through Dutch Gap Canal as soon as it is completed. When that will be it is at present hard to decide, as the rebels, by means of mortar shells, have sunk the dredging-machine which has been used for some time past to clear out the channel. The negroes still keep digging away, however, and the writer has strong hopes of spending the holidays in Richmond. Information has been received that the rebels are fitting out a torpedo to destroy the iron-clads. In the recent encounter between the monitors and Howlett's Battery, not one of the shots from the battery struck the vessels.

The Philadelphia Age says: "We understand that the Keystone Club are making preparations for a sumptuous dinner, to take place on the 9th day of January next. Major General George B. McClellan, Governor Seymour, of New York, Governor Parker, of New Jersey, ex-Governor Bigler, of Pennsylvania, and other distinguished gentlemen will be invited, and it is expected, will be present. The occasion will doubtless, be a brilliant one, and the flow of soul such as must linger in the recollection of those participating in the festivity, long after it shall have become a dream of the past."

Ex-President Pierce ought to be there, and repeat his famous fourth-of-July speech about building the Mausoleum of Hearts. Uncle Tobey suggests that the Corner Stone should be laid then and there.

☞ One "I. J. Bonnett & Co's. Advertising Agency" requests us, from New York, to do a lot of advertising of liquors, and take our pay in a due-bill for liquors for sale. Now we are always ready to do almost anything for a bonnet; but we don't care to go into the liquor business just yet; and we never give due-bills, and don't take them when we can get anything better. Our only terms are cash, as everybody's should be, especially now-a-days.

— Later accounts from the country districts in India, which were desolated by the cyclone in October, show that the loss of life was very large—five thousand persons having probably perished. In Calcutta, 2 Europeans and 41 natives were killed. Of the 32 inland steamers and flats at Calcutta, 19 are complete wrecks, and the remaining 13 seriously injured. Of the 30 tug steamers, 10 are completely destroyed, 2 very seriously injured, and the remaining 18 at work as before.

THE REBELLION.

The Richmond Examiner, of the 3d, says the news from Georgia is encouraging, and declares that if Sherman gets through to the coast now, which it thinks doubtful it will be with the loss of half his army.

The rebel Gen. Gracie was killed by one of our shells on Friday.

Persons from Charleston believe the fleet of 200 vessels at Hilton Head to be Sherman's supply fleet.

The pirate Tallahassee is still at Wilmington.

The rebels on Monday were erecting earthworks within half a mile of our lines at Nashville.

The serious damaging effect of Gregg's expedition to Lee's army is conceded, and has a military importance beyond the mere capture of prisoners and destruction of property. It is said that Grant's men in front of Petersburg are preparing winter quarters.

An expedition under Gen. Merritt, absent about a week in Loudon Valley, has just returned with 2000 head of cattle, sheep and hogs, and left the whole region over which he passed without hay or forage of any kind. All barns containing hay were burned and the haunts of Mosby and his gang thoroughly cleaned out. These results in Loudon Valley, which has been Mosby's lurking place, are of the utmost importance.

The Richmond Enquirer of the 1st believes Sherman's army has reached Milledgeville, and separated into two columns, one marching toward Savannah, and the other returning toward Augusta. The latter movement is undoubtedly a feint to protect his rear. It is too late to menace Augusta, and Sherman's main body is too far south. He has met with very little resistance on his march through Georgia. Every negro and cart in Savannah were at work on the fortifications of that city. Four trains with rebel soldiers had arrived on the Gulf Road. Our loss at Griswoldville, the Macon Telegraph sets down as 614 in killed, wounded and missing. There is a famine at Milledgeville.

A letter from New Orleans states that Gen. Canby is rapidly recovering from his severe wound, and is now able to attend to his official business daily. Gen. Ullman is now in chief command of all our forces at Morganzia.

On the 25th ult., Acting Lieut. Thatcher, commanding the gunboat Gazelle, was murdered by the rebels while ashore on an island below the mouth of Red river, and his body horribly mangled.

A successful raid by East Tennessee Unionists into Western North Carolina on the 20th ult., is reported by the rebels.—They carried off considerable property.

A Nashville letter, of the 1st inst., says 80 steamboat loads of men from Memphis, and about 10,000 men from Chattanooga, had reached that place within 24 hours.—The country about Nashville is well supplied with forage and provisions, and Hood will have a chance to keep his army at the expense of rebel sympathizers.

☞ The following is a telegraphic synopsis of the President's Message:

The message recommends that provision be made for effectually preventing foreign slavetraders from acquiring domicil and facilities for their criminal occupation in this country.

It has been thought proper to give notice that after the expiration of six months, the period conditionally stipulated in the existing arrangement with Great Britain, the United States must hold themselves at liberty to increase their naval armament upon the Lakes, if they shall find that proceeding necessary.

He suggests whether it might not be both competent and expedient for Congress to provide that a limited amount of some future issue of public securities might be held by a bona fide purchaser exempt from taxation and from seizure for debt, under such restrictions and limitations as might be necessary to guard against abuse of so important a privilege. This would enable every prudent person to set aside a small annuity against a possible day of want.

Since the last annual message, all the important lines and positions then held by our forces have been maintained, and our arms have steadily advanced.

He recommends the passage of an amendment to the Constitution abolishing slavery throughout the United States. The next Congress will pass it if the present does not.

On careful consideration of all the evidence accessible, it seems evident to the President that no attempt at negotiations with the insurgent leaders would result in any good, as the rebels would accept nothing short of a severance of the Union—precisely what we cannot and will not give. He retracts nothing he has heretofore said on slavery, and will not modify the emancipation proclamation. The war will cease on the part of the Government whenever it shall cease on the part of those who began it.

— The New York papers report another police station house murder. Three colored women and an Irish woman, all of whom had been arrested on Saturday night for drunkenness and disorderly conduct on the street, were locked up together in a cell of the Sixth precinct station house. About three o'clock Sunday morning one of the negro women, named Elizabeth Savakoe, commenced an assault on the Irish woman, named Mary Bean, whom she beat, kicked, and mutilated in a most shocking manner, not relinquishing her violence till life was extinct.

— Lieut. Gen. Scott, in his auto-biography, notices the fact that a junior officer in the Mexican war complained because his command was taken from him to aid in operations on the Vera Cruz base, and speaks of his army. Gen. Scott very properly suggests that the army does not belong to the General commanding, but is the army of the nation. A General in more recent times has fallen into the same error.

☞ The Steamship North Star, from Aspinwall, Nov. 18, brings the following news under Panama dates of the 16th:

There has been much excitement in Panama the past week, caused by the following incidents: — On the 25th of Oct. the American Consul at Panama received a dispatch from Consul Shufedt at Havana, stating that the same steamer bringing the dispatch would also take to Aspinwall a party of rebel pirates, intending to seize the steamer Guatemala. The agent of the Company was notified of the fact, and sent the Guatemala to sea before the arrival of the pirates, across the Isthmus, consequently they were obliged to remain at Panama until the 10th of November, the day of sailing of the next steamer, the Salvador. In the meantime further information was obtained, and a plan for the capture of the whole gang matured. Whilst waiting, the rebels purchased 300 pounds of powder, put it in tin cans, and shipped it out on the same steamer they intended to take passage on. On the 10th the passengers embarked on the Salvador as usual with their baggage. Immediately on going aboard they were taken into the main saloon, ostensibly to have their tickets examined. Previous to this all the port holes, windows, state rooms, and doors had been closed in order that no opportunity could be presented for skedaddling or for hiding papers, &c. As soon as they were collected, a preconcerted signal was made, when Commander Davenport, of the U. S. frigate Lancaster, sprung on board with several fully armed boats' crews, and announced to the astonished passengers that he had taken possession of the steamer.

Sufficient evidence was at once discovered to prove the validity of the plot, when the Salvador was taken to sea over three marine miles, accompanied by the Lancaster. Papers revealing the whole affair with instructions from the rebel Secretary of the Navy, small arms of all kinds, handcuffs, &c., were found in possession of the pirates, who were then transferred to the Lancaster and the Salvador proceeded on her voyage.

The Lancaster returned to Panama with the prisoners. Before reaching Panama the leader of the pirates, F. E. Hogg, made a full confession.

Hogg was recently captured on the Tristram Shandy, while running the blockade at Wilmington. His instructions from Mallory show that he has a rebel commission, and sailed from Wilmington for Havana, where he made up his gang of pirates. They have conferees all along the coast who were to join them. Hogg's instructions were, after getting possession of the steamer, to capture a California steamer, with its treasure, and if not able to get the treasure across the Isthmus, to deposit it with a reliable English house in Valparaiso or send it to Europe by a French man-of-war.

On the 12th, Admiral Pearson, commanding the Squadron in the Pacific, accompanied by Consul McKee of Panama, and Consul Rice of Aspinwall, waited on the President of Grenada, in Panama, to ask permission to pass the prisoners across the isthmus in order to send them to New York. The President refused permission, on the ground that he was not empowered to grant it, but it is presumed they will be taken across on the responsibility of the American officials.

☞ Special attention is asked to Hunnewell's preparations, advertised on our inside columns. They are based on true medical laws, used very largely by Physicians, and most undoubted testimonials are in the hands of the proprietor, always open to inspection. Let Portsmouth and its vicinity bear testimony by a confidence to test them, which will be sacred.

HALE'S
Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the means of all. At last after a long course of chemical experiments, he found that by adding to these *five* other ingredients, each of value in itself, he not only obtained the desired results but greatly increased the curative power of the compound. This having been thoroughly tested by practice, he now offers it to the general public as a safe, pleasant and infallible remedy.

PRICE, 50 CENTS PER BOTTLE.

For sale by B. Hutchings, Portsmouth, and all Druggists.

"A Wonderful Discovery."

DR. TEBBETTS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "Dye," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new HAIR in all cases on BALD HEADS, when the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not injured by medicine. Will it cure every "GRAY HEAD" in New England can be restored in less than sixty days.

POLICE COURT,—Tuesday, Dec. 6. George H. Anderson, for truancy was sent to the Reform School.

John Leavitt, for being drunk, was fined $3 and costs $3,86. Committed to the House of Correction.

Daniel Leary, for breaking glass, held to answer to the complaint at the Supreme Judicial Court in April in the sum of $50.

Hatty O'Conner, for larceny, fined $2, and $4 (being treble the cost of goods stolen), and costs $4,08. Committed to jail.

☞ Mr. M. Bozzaris Goodrich, of this city, has returned home this week, after an absence of sixteen years in California—whither he went with a company of twenty-four, most or all of them from this city, and the first party from this vicinity we believe. Of that party, about half are dead; and of the others, all have returned here before this, and but one or two are now in California; and after his long absence, Mr. Goodrich returns to find himself almost a stranger in his old haunts. It is safe to say that that party, like most others from New England, could have "done better" at home.

☞ Mr. E. A. Joy commences a new Term of Juvenile Singing School, at Mercantile Hall, this Wednesday afternoon at 2 o'clock.

Mr. Joy also proposes to open an Evening School this (Wednesday) evening, at the same place, provided a sufficient number are present on the occasion. The "Harp of Judah" will be used.

Ed. Chronicle:—In relation to the suggestion of your correspondent W. in yesterday's paper, allow me to say that I have no political aspirations. I do not wish my name to be used in connection with any political office. If I have any "friends who would gladly vote to send me to Congress," I thank them for their confidence and good will. But I have no other ambition than to serve humanity and my country, as well as I can, in the capacity of a christian minister and citizen. A. J. PATTERSON.

☞ Where are the Factory Kindlings? See advertisement of F. W. Rogers.—We told *what* they were, yesterday.

☞ Commander E. G. Parrott, of the iron-clad Canonicus, has been detached from that vessel and takes command of the iron-clad Monadnock, a very superior vessel, of two turrets, with a battery of four fifteen-inch guns.

☞ Carpenter Joseph G. Myers has recently been detached from the Portsmouth Navy Yard, to await orders, and Charles W. Babbitt ordered to this yard.

☞ Mr. Edward W. Hall, of this city, has been appointed Surgeon's Steward on board the U. S. ship Shawmut lying at the Navy Yard.

TEMPLE OF AMUSEMENT.—The great drama of the "Idiot of the Castle", and the spectacular romance of the "40 Thieves" will be presented this evening. Let all lovers of fun and the marvellous be on hand early. DRAMA.

—— A barn owned by Franklin Low, in Concord, occupied by John Ducey, was burned on Sunday night, together with four cows and four or five tons of hay. Mr. Ducey attempted to save his cows, but in his effort was badly burned. The loss will fall heavily upon him, as the cows were valuable ones, and he relied upon the sale of milk partly for his substance.

—— There is good reason to believe that Lieut. Virgil H. Cate of Manchester, who was reported killed at the assault on Fort Wagner, is alive and a prisoner at Charleston, S. C.

— The Copperheads loudly style this "a negro war," and then make a great outcry when the negroes are permitted to fight in it.

— The "Esparto" grass, which is now much used for the manufacture of paper in England, is very abundant on the Isthmus of Panama.

☞ The large granite building known as the "Fitchburg Depot," has the merit of being the largest and most showy structure in its external effect of any of the Boston depots. It has also borne the reputation of being the most thoroughly ill-judged and uncomfortably contrived building internally for the objects for which it was designed.

Since the completion, however, of the improvements to the depots of the Eastern, Worcester and Providence Roads, the remodelling of their expensive and inconvenient Fitchburg Station has been taken in hand with vigor by the President and Directors of the road. So fully and thoroughly have the necessary changes been carried out, that it must now we think be conceded that to these gentlemen belongs the credit of having authorized the most commodious and convenient, as well as the most elegant and striking interior plan of any Railroad Station in the city, if not in the country, and it may now be regarded as nearly a model building in all these essential particulars.

In addition to the enlargement of its area, the immense and useless hall in the second story has been discontinued by the removal of its floor, thus securing to the now noble car-house a clear height of 45 feet, with a length of covered track of 300 feet. The design for remodelling this depot, embraced also the further idea of an extension to the north of about 300 feet. It is believed that this increase of length—so as to bring the whole of the longest passenger trains under cover of the roof—will be made at no distant day. Whenever this is completed, the Fitchburg Depot will have a total length of 600 feet, with a width, as at present, of 80 feet, and a clear inside height of 45 feet to the ceiling.

There is no soap that will begin to compare with the J. Monroe Taylor Gold Medal Soap, and probably no other manufacturer begins to expend one-half as much money to make it worthy of the community, and the maker is richly deserving the patronage bestowed on him. It is a God-send to the world, and all who use it will agree with us that what we say is true. 32

SYMPATHY.—Sympathy is a lovely and beautiful thing, for it exhibits the angelic part of human nature. We deeply sympathize with those who cannot obtain Herrick Allen's Gold Medal Saleratus, for they are deprived of one of the greatest luxuries the world affords. But we have no sympathy with any family who will use any other Saleratus or soda, if this article can be purchased. We see most of our Merchants have it. One trial will convince any one. Their depot is 112 Liberty Street, New York.

SAVE YOUR FUEL!

THE MODEL COOK,

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

The subscriber has reduced the prices of the Model Cook Stoves FIVE DOLLARS each, to conform to the decline in gold.

THE MAGEE,
COOKING STOVE.

The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the
CELEBRATED AND UNEQUALLED
MAGEE COOK STOVE,
as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. The oven plates are covered with plaster, which renders it equal to the old-fashioned brick oven for perfection in baking.
There is a new style and very superior broiler and sad-iron heater combined, by which the odor of broiling meats are prented from escaping into the room. With the extension top there is a large copper Reservoir for hot water; also a large tin warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.
The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shoveling up of the ashes is entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.
For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.
We would refer to the following purchasers:

"MAGEE'S PATENT"
VENTILATING & AIR-WARMING
FURNACES.
The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.
For economy, purity of air and ease of management it has no equal, producing a current of warm air, moist and agreeable;—and as none of the air which comes in contact with the fire-pots used for respiration, the tendency to produce headache so much complained of in other Furnaces, is entirely obviated.
The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.
To accomplish this many complicated and expensive heating arrangements have been constructed, some possessing but little improvement over former methods, while many have proved a total failure. The reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the
MAGEE FURNACE.
The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are therefore burned up by the admission of cold air through the fire-pot, which ignites them as they pass off from the coal, thus saving at least 20 per cent. of the properties of the heat in the fuel.
No heating apparatus with the smoke-pipe or flue on the top of the cone can be made to consume the gases of the coal, as they pass off with a large amount of the best generated, making the chimney the hottest part of your dwelling.
This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.
These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 20 to 50 per cent. of fuel over common Furnaces.
For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.
They give entire satisfaction wherever used.
We have in store three different sizes, Brick and Portable, to which we invite the attention of those in want of the best Furnace in the world.—and would refer them to the following named gentlemen, who have them now in use:
Samuel Cleaves, Esq., Albert R. Hatch, Esq.,
Aaron Hills, Charles H. Mendum,
Henry F. Wendell, John Sise, and others.

DR. W. R. MERWIN & CO.'S COLUMN
FOR THE
CHEROKEE MEDICINES.

Cherokee Cure, the great Indian Medicine,

ROOTS, BARKS AND LEAVES.

An unfailing cure for Spermatorrhœa, Seminal Weakness, Nocturnal Emissions, and all diseases caused by self-pollution; such as Loss of Memory, Universal Lassitude, Pains in the Back, Dimness of Vision, Premature Old Age, Weak Nerves, Difficult Breathing, Trembling, Wakefulness, Eruptions on the Face, Pale Countenance, Insanity, Consumption, and all the direful complaints caused by departing from the path of nature.

☞ This medicine is a simple vegetable extract and one on which all can rely, as it has been used in our practice for many years, and with thousands treated it has not failed in a single instance. Its curative powers have been sufficient to gain victory over the most stubborn cases.

☞ To those who have trifled with their constitution, until they think themselves beyond the REACH of medical aid, we would say, *Despair not!* the CHEROKEE CURE will restore you to health and vigor, and after all quack doctors have failed!

☞ For full particulars, get a circular from any drug store in the country, or write the proprietors, who will mail free to any one desiring the same, a full treatment in pamphlet form.

☞ Price, $2 per bottle or three bottles for $5, and forwarded by express to all parts of the world.

Sold by all respectable druggists everywhere.

CHEROKEE REMEDY
—AND—
CHEROKEE INJECTION,
Compounded from Roots, Barks & Leaves.
CHEROKEE REMEDY, the great Indian Diuretic, cures all diseases of the urinary organs, such as Incontinence of the Urine, Inflammation of the Bladder, Inflammation of the Kidneys, Stone in the Bladder, Stricture, Gravel, Gleet, Gonorrhœa, and is especially recommended in those cases of Fluor Albus (or Whites in females) where all the old nauseous medicines have failed.
It is prepared in a highly concentrated form, the dose only being from one to two tablespoonfuls three times per day.
It is diuretic and alterative in its action; purifying and cleansing the blood, causing it to flow in all of its original purity and vigor; thus removing from the system all pernicious causes which have induced disease.
CHEROKEE INJECTION is intended as an allyr assistant to the CHEROKEE REMEDY, and should be used in conjunction with that medicine in all cases of Gonorrhœa, Gleet, Fluor Albus or Whites. Its effects are *healing, soothing and demulcent;* removing all scalding, heat, chordee and pain, instead of the burning and almost unendurable pain that is experienced with nearly all the *cheap quack injections.*
☞ By the use of the CHEROKEE REMEDY and CHEROKEE INJECTION—the two medicines at the same time—all improper discharges are removed, and the weakened organs are speedily restored to full vigor and strength.
For full particulars get our pamphlet from any drug store in the country, or write us and we will mail free, to any address, a full treatise.
Price—CHEROKEE REMEDY, $2 per bottle or three bottles for $5.
Price—CHEROKEE INJECTION, $2 per bottle, or three bottles for $6.

The Cherokee Remedy, Cherokee Injection, and Cherokee Cure,
Are sold by all enterprising Druggists in the civilized world. Some unprincipled dealers, however, try to sell worthless compounds in place of these: those which they can purchase at a cheap price, and make more money by selling, than they can on these medicines. As you value your health, aye, the health of your future offspring, do not be deceived by such unprincipled Druggists, *ask for these medicines and take no others.* If the Druggists will not buy them for you, enclose the money in a letter, and we will send them to you by Express, securely sealed and packed free from observation.
Ladies or Gentlemen can address us in perfect confidence, stating fully and plainly their diseases and symptoms, as we treat all diseases of a chronic nature in male or female. Patients need not hesitate because of their inability to visit us, as we have treated patients successfully in all portions of the civilized globe, by correspondence.
Patients addressing us will please state plainly all the symptoms of their complaints, and write Postoffice, County, State and name of writer, plain, and inclose postage stamp for reply.
We send our 32 page pamphlet free to any address. Address all letters for Pamphlets or advice to the proprietors,

SPEER'S
SAMBUCI WINE,
PURE AND FOUR YEARS OLD,
OF CHOICE OPORTO FRUIT,
For Physician's Use, Females, Weakly Persons and Invalids.
AS A DIURETIC, it imparts a healthy action to the Glands and Kidneys, and Urinary Organs; very beneficial in Dropsy, Gout and Rheumatic Affections.
SPEER'S SAMBUCI WINE is not a mixture or manufactured article, but is pure from the juice of the Portugal Sambucus cultivated in New Jersey, recommended by physicians and chemists as possessing medical properties, superior to any other Wine in use, and an excellent article for all weak and debilitated persons, and the aged and infirm, improving the appetite, and benefitting ladies and children.
A LADIES' WINE, because it will not intoxicate as other wines, as it contains no mixture of spirits or other liquors, and is admired for its rich peculiar flavor and nutritive properties, imparting a healthy tone to the digestive organs, and a blooming, soft and healthy skin and complexion.
☞ None genuine unless the signature of "ALFRED SPEER, Passaic, N. J.," is over the cork of each bottle.

The Chronicle.

WORTH, THE WOMEN'S TAILOR, has returned to Paris, and commenced his season. Do not wonder if I mention him next after divorces,—he has caused more divorces than any other man in Paris; for if your wife's ball dress is not made and *put on* by him, she is disgraced, — and if he does make them, you are ruined. Is it his fault that his rates of charging are so high? Make the days forty-eight hours long and relieve him of the vulgar wants of sleeping and eating, he will abate 50 per cent. of his prices. Seduce his customers into paying cash and he will make a further reduction. The Empress has owed him $40,000, The Princess Clotilde, $10,000. The Prince de Metternich, $20,000. A debt of $1000 makes no more figure on his books than the one year's subscription of a delinquent patron of your paper does in the Gazette office.

I should not like to say what rent he pays—you would be sure to make an ironical gesture not very complimentary to my regard for truth. The state saloon of the Tuileries are not more splendid. Gilding is lavished on them, the door curtains are Beauvais tapestry, the window curtains and furniture are of the finest brocade, and the furniture is Boule, each console between the windows being worth $600. He has in one of his many rooms a bullet constantly spread, where the best sandwiches, the choicest sherry and Maderia, and the most delicate cakes are served in profusion to his customers.

He is constantly surrounded by twelve beautiful young girls selected for the perfection of their shape as well as face. They are attired in the height of the mode in silk dresses which cost four dollars a yard, costly Etruscan ear-rings, bracelets and rings They are part of the *furniture* of the place; they are here what osier mannikins are in inferior shops; the dresses are hung on them that Worth's patrons may see the effect produced.

No dress ever quits his establishment priced less than $200—in gold mind ye! we don't take your greenbacks here! Whenever a ball is given at the Tuileries or at any of the embassies you may count two hundred carriages at his door from as early as six o'clock in the evening. Each lady receives a number and is called in turn. They come with their hair dressed, their petticoats and corset on wrapped in a second rate dress until he is ready to dress them.

You may wonder that ladies should consent to expose their persons to the fingers and eyes of a man. He is not a man in their eyes—he is nothing but a tailor, a tradesman—and what high born person ever stooped to inquire to what sex such a plebian belonged. One had as soon think of inquiring into the sex of the dog with which his wife went into the woods for a walk, or of the cat which sleeps in my lady's chamber.

Worth, a few years since, was a mere shopman in Gangerlin's shop in the Rue de Richelieu. He saw there the extent of feminine folly and determined to profit by experience. He has now a beautiful country seat which cost him $80,000, and on which he has spent $50,000. He keeps a carriage and pair equal to anything in the imperial stables. He has a first rate cook, on a cellar which is daily improving, and is making money as fast as possible. You may see from this example that Columbus did not break all the eggs in the world, and we, each of us, may select from the basket by our side an egg and by making it stand on end win a fortune. The man who invented the sewing machine was nothing but a skillful egg-breaker. He who vulcanized india rubber was nothing but a skillful egg-breaker. He who put steel hoops in the in the place of crinoline was nothing but a skillful egg-breaker. The whole secret of wealth lies in making one's egg stand on end before our neighbor succeeds in the feat.—*Cor. Bos Sat. Gaz.*

Some newspaper letter-writer tells a very funny story about a bet between Joshua Bates, banker, London, and Lord John Russell, that Mr. B. could produce an ear of Indian corn with twenty-four rows of kernels. He sent to New York, and his correspondent procured from Lafayette, Ind., six ears of horse-tooth corn, two of which had twenty-nine rows, two thirty-one and two thirty-two. The funny part of the story is the ears with odd numbers of rows. It has been a sort of "settled fact," ever since we were old enough to eat roasting-ears, that an ear of corn never grow with an odd number of rows.—*Tribune.*

THE REBEL GENERAL HOOD is the most unfortunate able general of the war. He has seemingly all the qualities which go to make up a good commander,—largeness of thought to form good plans, quickness of thought to meet unexpected emergencies, physical and moral fearlessness, and power to infuse his own intrepid spirit into the souls of his soldiers; yet the "slow" Joe Johnston whom he superceded, must be considered a more successful general, for he has saved as many divisions as Hood has lost. The last attack on Franklin, evidently planned with skill and executed with daring, has but added another to Hood's bloody repulses. — *Boston Transcript.*

The head of a turtle, for several days after its separation from the body, retains and exhibits animal life and sensation. An Irishman had decapitated one, and some days afterwards was amusing himself by putting sticks in its mouth, which it bit violently. A lady who saw the proceeding, exclaimed: "Why, Patrick, I thought the turtle was dead?" "So he is, ma'm, but *the crayther's not sensible of it.*"

THE VERNATELLA
LIQUID BLACKING
Gives to the Leather not only a
Splendid Jet Black Polish,
But an elegant and Fashionable Perfume.
The neatness and convenience of using Liquid Blacking and the superior polish which it gives over other kinds, has heretofore been in a great measure counterbalanced by its disagreeable vile odor and the trouble of fitting something into the stopper of each bottle in order to apply it to the brush, but the Vernatella Blacking has only the most DELICIOUS PERFUME, which remains with the leather as long as the blacking lasts, and each bottle has a stick ready fitted in the stopper. The Vernatella Blacking also softens and benefits the leather.
Be sure and inquire for the VERNATELLA Blacking.
Price, 12 Cents per Bottle.
Manufactured in the Chemical Department of the Cahoon Manufacturing Co., and for sale by Boot and Shoe dealers everywhere.

The Old Established Hospital.
No. 5 Beaver Street, Albany, N. Y.
QUICK CURES AND LOW PRICES.
Over Twenty Thousand Patients Cured Annually!
DR. J. TELLER continues to be confidentially and successfully consulted on all forms of private diseases, at his old Established Hospital, No. 5 Beaver Street, Albany, N. Y. Twenty years devoted to this one particular branch of practice, enables him to perform cures such as no other Physician can, and his facilities are such (being in correspondence with the most eminent Physicians of the old World,) of obtaining the safest as well as the latest remedies for these diseases, offer inducements to the unfortunate of a quick and rapid cure, to be obtained at no other office in America.
In Syphilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and Spermatic Cords Bubo, Ulcerated Throat, Sore Nose, Tender Shin Bones, Cutaneous Eruptions, Biles, Ulcers, Abscesses, and all other impurities of the system, are perfectly under the control of the Doctor's Medicines, and have been tested in more than 20,000 cases annually, with immense success.
YOUNG MEN.
Young Men addicted to secret habits, who have impaired their healths and destroyed the vigor of their minds, by indulging themselves or the pleasures of the Married Life, are notified that in consulting Dr. J. Teller, they will find a friend to console and a Physician who has cured thousands in almost every part of the United States, who applied to Dr. T. broken down in health, now rejoice in all that makes life desirable and happy. Disorder is of course aware that the delicacy of this subject will prevent a more minute description of this terrible disease.
DR. TELLER'S GREAT WORK.
A book for everybody.—Startling disclosures. Dr. TELLER's great work for the Married or those contemplating marriage—200 pages—full of plates—price 25 cts. Sent to all parts, under seal, by mail, post paid. 50,000 copies sold the past year. The single Married and the Married Happy. A lecture on Love, or how to choose a Partner—a complete work on Midwifery. It contains hundreds of secrets, never before published.—Warranted to be worth three times the amount asked for it. 25 cents, in specie or postage stamps, inclosed, will secure a copy by return mail. Dr TELLER has devoted a lifetime to the cure of those diseases upon which his books treat.
TO THE LADIES.
DR. TELLER still remains the only Agency in America, for the sale of Dr. Vicholi's Italian Female Monthly Pills. The sale of more than 20,000 boxes establishes their reputation as a female remedy, unapproached, and far in advance of every other medicine—for stoppages, irregularities, and other obstructions in females.
CAUTION.—Married ladies in certain delicate situations should avoid their use. For reasons see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent, by mail or express, to any part of the world, secure from curiosity or damage.
Office hours from 8 A.M. to 8 P.M., and on Sundays from 2 to 5 P.M.
N. B.—Persons at a distance can be cured at home by addressing a letter to Dr. J. Teller, enclosing a remittance. Medicines securely packed from observation, sent to any part of the world. All cases warranted. No charge for advice. N. B.—No students or boys employed. Notice this, address all letters to

Morning Chronicle.

Portsmouth, N. H.

THURSDAY, DECEMBER 3, 1864.

☞ The Report of the Postmaster General contains much valuable data. The expenditures up to June 30th exceeded the receipts $206,532 42, and this indicates an improving financial condition of the department. During the fiscal year 334,054,610 postage stamps, of the value of $10,187,227; 26,644,800 stamped envelopes, amounting to $765,312 50, and 1,574,500 newspaper wrappers, amounting to $31,490, were issued. The total value of these issues was $10,974,329 50, which, compared with the issue of the previous year, shows an increase of $635,569 50, or about 6 1-2 per cent. The value of the stamps and stamped envelopes *sold* was $10,776,589 58, and the amount used in the prepayment of postage was $9,878,155 61. Notwithstanding this enormous issue, the losses of stamps in the mails amounted only to $1206, and of envelopes to but $31 80.

Existing arrangements for supplying our armies with mails are entirely satisfactory.

The number of dead letters of every description received and examined during the year was 3,508,823, being an increase of 358,400 over the preceding year, attributable mainly to the return of large numbers of army and navy letters, which it was found impracticable to deliver.

In speaking of the Postal money order system, the Postmaster General says its establishment in this country will no doubt lead to arrangements for the interchange of international money orders with the several foreign countries with which we have direct postal relations.

☞ The Secretary of the Treasury, in his Report, estimates the receipts for the fiscal year at $396,000,000, of which $300,000,000 are from internal revenue, and the expenditures at $1,168,258,005, of which there is for the War Department $531,753,191, for the Navy Department $112,219,666, for interest on the public debt $127,000,000, and the balance of former unexpended appropriations $350,000,000. This latter amount is likely to remain unexpended at the close of the year, reducing the total to $818,256,005. Deducting therefrom the estimated receipts and $422,256,005 remain to be provided for by loans. The debt at the close of the fiscal year is estimated at $2,645,320,684.

He does not believe in foreign loans nor an over issue of paper money, and hopes Congress may devise means to secure more proportionate returns from the public land, especially that portion of it abounding in precious and other metals.

☞ The Report of the Commissioner of Internal Revenue makes the following exhibit: Receipts of the office for the fiscal year ending June 30th, $106,200,000. He expresses the opinion that the present year's revenue, including the additional income tax, will be at least $295,000,000. If it is desirable to increase this to $300,000,000, he recommends a tax on sales of one half of one per cent. to make up the deficiency, to be imposed for one year only, as after that the present tax lists will yield the required amount. The only important changes recommended by the Commissioner are taxes on petroleum and on tobacco in the leaf, with corresponding reductions in the refined and manufactured products. The estimated receipts of the special income tax authorized by joint resolution of July 4th, 1864, are $35,000,000. The tax paid by National Banks during the first seven months of the current fiscal year, amounts to $164,461.21.

☞ Secretary Welles' report shows the following facts: The Navy on the 1st inst. consisted of 671 vessels, having a tonnage of 510,396, and carrying 4510 guns. There is an increase of 83 vessels and 167 guns since December, 1863. The vessels constructed for the Navy since March 4, 1861, number 203, carrying 1631 guns not counting those that have been constructed within the same period and lost in battle or by shipwreck. The officers and men now on duty number 51,000—officers 6000, men 45,000. There are six squadrons on duty, viz.: West Gulf, Admiral Farragut; East Gulf, Scribbling; South Atlantic, Dahlgren North Atlantic, Porter; Mississippi, Lee; and Pacific, Pearson. There is also the Potomac flotilla, commanded by Lee. The West India squadron as an organization has been discontinued. The consumption of coal in the Navy last year amounted to 500,000 tons.

The blockade extends along a coast line of 3549 miles, a greater length than the whole coast of Europe from Trafalgar to Cape North.

The iron-clad fleet has increased to 71 vessels. They carry 275 guns, all of heavy metal. The number of prizes captured during the year is 354, eighty-eight of which were steamers. The gross proceeds from the sales of condemned prizes were $14,396,250, and the expenses $1,237,153. The balance of $13,190,841 was divided equally between the captors as prize money and the Government as a naval pension fund.

There are 1609 persons on the naval pension roll. They receive $189,656 a year. The pension fund on the 1st of Jan. next will amount to $7,000,000, yielding an annual income of $420,000, sufficient for the payment of the entire pension roll.

The Navy Department has cost $280,647,261 in four years. Of this an aggregate of $85,733,297 were expended last year. The available resources for the fiscal year ending June 30th, 1865, are $139,489,058. The balance on hand at the beginning of the fiscal year $30,035,244.

Mr. Welles enlarges upon the satisfactory condition of the Navy, commends its officers for sustaining discipline and efficiency, and adverts with emphasis to the extraordinary growth of the service since the first year of the war.

The building of large and imposing vessels, such as would be formidable, not only for home defence, but for foreign service, is suggested.

THE REBELLION.

Fresh Southern papers show a continuance of the fight both in Sherman's front and in South Carolina. The Macon Telegraph of the 25th says "Sherman's situation is daily growing more precarious, and we may confidently hope for his complete overthrow and destruction." The central road is said to be entirely destroyed between Gryswold and McIntyre.

The Savannah Republican of the 1st gives particulars of the fighting with Gen. Foster's expedition, near Grahamsville. It says the rebels with 1400 muskets and 7 pieces of artillery, attacked our force of 5000 men and 16 cannon, fought them till dark, repulsed every attack, and finally drove them right and centre, but the left stood unmoved at the close of the action. The rebels received reinforcements, but notwithstanding their boasting they admit that it was a drawn battle.

A New York dispatch of the 7th says Hood attacked our forces at Murfreesboro', and was repulsed with the loss of six guns.

At Nashville, on the 6th, there was heavy firing from Fort Negley to prevent the rebels from erecting batteries in our front, otherwise the situation was very quiet.

The attack on Murfreesboro' was made on two block houses. Gens. Milroy and Rousseau are in command there.

☞ The Commercial Bulletin having published an article to the effect that some wealthy shipowners are not over careful as to the quality of food furnished their sailors, and that they had also "seen a wealthy shipowner sell bad beef to a captain who was sailing his ship on shares, knowing that he would use it as ship stores, and also believes that a large proportion of the Eastern and Cape Cod ships are sailed in this way, the master furnishing his provisions, and the owner quieting his conscience by the fact, &c," a writer in the Advertiser disposes of the reference to poor food as unreasonable, from the fact that it would not be profitable, and says:

"I do not wish to *deny* the assertion, but will venture to "*guess*" that there is not a single ship (that is ship-rigged) down East, at Cape Cod, or even in the United States, that is sailed by the master on shares where he has the furnishing of the supplies."

No ship owned in this port has ever been sailed in such a manner, (we have it from one of our largest shipowners,) and as for provisioning ships, the best has ever been found the cheapest by our merchants. The Bulletin, we should hardly have supposed, would publish an article evidently so fallacious in some points.

— Gen. Rousseau has been relieved of the command of the department of Missouri.

— Senator Grimes is placed at the head of the Naval Committee, in place of Senator Hale.

— Information of an intended rebel raid upon Detroit from Canada has been received, and preparations made to repel it.

— Gold in New York on Wednesday rose as high as 243 3-4. On Mr. Fessenden's report, and the rejection of the gold bill, it subsequently fell to 241 1-2.

— The Philadelphia Saturday Post is $2 a year. The editor asks us to advertise $10 worth of his prospectus, for a copy of his paper. We don't propose to do it—not liking any such prospectus.

— Forty-five cotton speculators were arrested on White River by Gen. Buford, who were armed with permits from an agent. The latter sent an agent to investigate the cause of the arrests, and Gen. Buford ordered him to leave in the first boat.

— William Logg, a French Canadian, was hung at Harper's Ferry on Saturday for desertion. The rope broke and he fell on his feet and shouted to shoot him quickly, but this his sentence would not allow, and the rope was knotted and he was hung up and died of strangulation.

— They have commenced testing a double-barreled gun called the "Kellog gun," at Hartford, which will be a terrible instrument of warfare, as it is said to be capable of firing 400 shots a minute.

A LITTLE WHILE.

Beyond the smiling and the weeping
I shall be soon;
Beyond the waking and the sleeping,
Beyond the sowing and the reaping
I shall be soon.
Love, rest and home!
Sweet home!
Lord, tarry not, but come.

Beyond the blooming and the fading
I shall be soon;
Beyond the shining and the shading,
Beyond the hoping and the dreading
I shall be soon.
Love, rest and home!
Sweet home!
Lord, tarry not, but come.

Beyond the rising and the setting
I shall be soon;
Beyond the calming and the fretting,
Beyond remembering and forgetting
I shall be soon.
Love, rest and home!
Sweet home!
Lord, tarry not, but come.

Beyond the parting and the meeting
I shall be soon;
Beyond the farewell and the greeting,
Beyond the pulse's fever beating
I shall be soon.
Love, rest and home!
Sweet home!
Lord, tarry not, but come.

Beyond the frost chain and the fever
I shall be soon;
Beyond the rock-waste and the river,
Beyond the ever and the never
I shall be soon.
Love, rest and home!
Sweet home!
Lord, tarry not, but come.

—REV. DR. BONAR.

NEW HAMPSHIRE ITEMS

—— The Keene Sentinel gives a rumor that two companies are about to open the lead vein in Surry mountain.

—— Messrs. White and Warner are making a thousand yards of checked flannel per day at Holderness. Holderness is quite a business place, there being four or five different mills making straw or manilla paper; also a large peg factory producing from seventy-five to one hundred barrels of pegs per day. The water power is excellent, being the outlet of Squam Lake—a beautiful sheet of water about ten miles long and from three to four miles wide.

—— The Manchester Mirror gives the following account of an unsuccessful raid of horse thieves in that city on Monday night:

Near midnight, Capt. J J. Ladd, who lives on the river road, two miles south of the city, heard a noise at his barn and got up and went out. Three of his horses, used for teaming, were gone, and preparations had evidently been made to get the two left. He and his partner by a light were able to follow the direction of the horses by their tracks and put on after them. After going about fifty rods they found them. The thieves saw they were pursued, and had not the right kind of horses to run away with. One pair were very heavy, and would not go faster than five miles an hour, and the other was a five-year colt that would not easily be compelled to leave the other horses. The noise of getting them out of the stable probably roused Capt. Ladd, though the thieves had taken every precaution. They had got down a lot of hay and scattered it behind and under the horses to deaden the sound. Hay had been put under and behind the two horses left.

☞ The steamer Costa Rica has arrived at New York, from Aspinwall, Nov. 28:

Nothing further has transpired in regard to the rebel conspiracy to capture the Central American and California steamers. The rebel prisoners are still on board the Lancaster, the Governor of the State of Panama having positively refused to pass them over the Isthmus.

☞ In the Senate, on Tuesday, a resolution was adopted requesting the President to furnish information concerning any proposition or overture recently made by British subjects in aid of the rebellion.

In the House, the following resolution was adopted:

Resolved, That the Committee on Ways and Means be instructed to inquire into the expediency of exempting from taxation all estates and interests of widows.

A bill was introduced to prohibit the exportation of gold and silver coin.

In Missouri, in prospect of the State Convention to amend the Constitution, the radicals, headed by Senator Gratz Brown, who have the majority, have begun to agitate in favor of extending the elective franchise to negroes. They might as well go it at once; to that it is to come at last; revolutions do not go backward. We are to try anew the equality of races. To be sure it has failed everywhere else; but it has never been tried here, and since we have done some things that no other nation ever did, we may make this go. It is to be tried any way.—*Newburyport Herald.*

In New Hampshire the elective franchise is not to be extended. Our present constitution gives it to all citizens, without regard to complexion.

☞ Our special detective has discovered that the reason the rebel incendiaries in New York used phosphorus for their nefarious purpose, was because they disliked to pay the heavy tax on matches.

☞ The official returns of the vote for Coroner in the city of New York show that the republican candidate was elected by a majority of twenty in a vote of over 75,000. This is the only person elected by the republicans on the county ticket.

— It is said a ton of peat, freed from extraneous matter, can be sold for $8 per ton, and will yield as much heat as a ton and a half of anthracite coal.

Why should more marriages take place in winter than in summer? Because in winter the gentlemen require comforters, and the ladies muffs.

☞ We have received from the publisher of the Newport (R. I.) Mercury, a copy of the fac simile of the first number of that paper—issued Dec. 19, 1778, [two years and two-and-a-half months after the N. H. Gazette,] by James Franklin, who was famous chiefly as being the brother of the immortal Benjamin. So the Mercury is the second oldest American newspaper living.

HALE'S
Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the reach of all. At last after a long course of chemical experiments, he found that by adding to these *five* other ingredients, each one valuable in itself, he not only obtained the desired object, but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the general public as a safe, pleasant and infallible remedy.

PRICE, 50 CENTS PER BOTTLE.

For sale by B. Hutchings, Portsmouth, and all Druggists.

"A Wonderful Discovery."

DR. TEBBETTS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and the modern vegetable Chemistry. It is not a "DYE," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes luxuriant growth of new HAIR in all cases on BALD HEADS, when the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With it every "GRAY HEAD" in New England can be restored in less than sixty days.

A Card to Invalids.

A Clergyman, while residing in South America as a missionary, discovered a safe and simple remedy for the Cure of Nervous Weakness, Early Decay, Diseases of the Urinary and Seminal Organs, and the whole train of disorders brought on by lawless and vicious habits. Great numbers have been already cured by this noble remedy. Prompted by a desire to benefit the afflicted and unfortunate, I will send the recipe for preparing and using this medicine, in a sealed envelope, to any one who needs it, *Free of Charge*.

☞ On Tuesday morning, about half past one o'clock, J. M. Tredick, Esq., was awakened by his watch-dog, and on looking from his window discovered a man leaving his premises. Seizing his pistol from a drawer, he ordered the man to halt. The offender remained stationary under fear of the pistol until Mr. Tredick's voice brought the night watch, who lodged the man in the lockup. The following morning, when Mr. Tredick appeared to prefer his complaint, the man had been discharged.

DIGNITY OF THE PRESS.—The editor of the Ballot well says—"Our readers will excuse us if we do not give them all the senseless rumors got up for sensation purposes and to make sale for the city daily papers." Yes, we should think they would be glad to —and isn't it astonishing that the largest and richest papers in the country should employ such clap-trap to swell their sales? Why, we think it a disgrace to the profession to have papers hawked about the streets at all. Why should newspapers be peddled round, and shoved in every body's face, any more than other articles? The whole system is a nuisance, more intolerable than beggars, hand-organs or dogs.

☞ The morning newspapers everywhere are complaining of paper-thieves; and they agree with us, that "if subscribers will have a place made in the door of their respective stores or residences, the paper can thus be slipped inside and be free from thieves." The carriers are careless, no doubt, but the thieves are troublesome too; and speaking of thieves—we will give $5 for evidence to convict any person of taking a Chronicle from the door of a subscriber; no matter whether they "were going to put it back," after reading or not. Papers deposited at doors are sacred, and should not be touched by outsiders.

HOW THEY DO IT IN CONCORD.— A notice in the Daily Monitor requests "the subscribers to the financial guarantee for the said paper, to meet for the consideration of business of the utmost importance" concerning the enterprise. Down this way Dailies have to flourish by individual effort, if at all.

☞ We have received the following slip from Capt. Crowley, but he omits to state where his vessel is from or whither bound:

"Portsmouth, Dec. 6.— Arrived brig Sarah Goodwin, Crowley master, with four men sick. Melvin Conley very sick; will have to be put ashore."

☞ The spile driver has been constantly on Portsmouth Bridge for the last twenty years. It is a piece of architecture that will be completed at about the same time as the New Orleans Customhouse.

☞ The barn of Mr. Asa Gunnison, in Eliot, was burned on Friday night last.

☞ "Mac, have you heard of that burglar's breaking into Mr. F——'s house, the other night?"

"No, did he get anything?"

"Get anything? yes, he got caught."

☞ The police of Portland, on Tuesday night, found Mr. Littlejohn of Cape Elizabeth, weltering in blood. He had strength enough to tell the officers that he had been set upon by three of the crew of schooner Otter Rock of Rockland, and that the smallest one of them had struck him with a knife. He had a gash an inch long in the neck, severing one of the jugular veins. His recovery is doubtful.

— One hundred clerks are detailed every night from the War Department Rides, at Washington for guard duty, since the incendiary alarms. They are exempt from desk work the next day.

— A pretty young girl named Cooper, just arrived in Portland from Liverpool on Monday, was abducted by a fellow passenger in the Damascus, named McDonald. He was arrested and the girl was found at a hotel with her name registered as Mrs. McDonald. She is but 15 years of age, and was restored to her parents on Tuesday.

GEN. HANCOCK'S CORPS.— Gov. Gilmore issues a circular to the veteran soldiers of New Hampshire offering a bounty of $100, $200, and $300 to veterans for one, two and three years in Gen. Hancock's new volunteer army corps, who may be accredited to the quota of New Hampshire.

☞ Prof. Dubois, the Frenchman, will deliver his famous lecture on "French and English" blunders, at the Christian Church, Kittery Foreside, on Thursday evening Dec. 8. Tickets 15 cts.

Prof. Dubois also announces to open his "budget of blunders," in this city, at Mercantile Hall, next Monday evening.

☞ Special attention is asked to Hunnewell's preparations, advertised on our inside columns. They are based on true medical laws, used very largely by Physicians, and most undoubted testimonials are in the hands of the proprietor, always open to inspection. Let Portsmouth and its vicinity bear testimony by a confidence to test them, which will be sacred.

U. S. INTERNAL REVENUE,
COLLECTOR'S OFFICE.

THE UNDERSIGNED, COLLECTOR FOR the First Collection District in the State of New Hampshire, hereby gives notice to all persons concerned in the County of Rockingham,

That he has received for Collection the Special Income Collection List within said District, made and committed to him for collection by the Assessor thereof, in accordance with the Joint Resolution of Congress imposing a Special Income duty, approved July 4th, 1864, that the several duties and taxes assessed, enumerated and contained in said Special List have become due and payable, and that the undersigned, Collector for said district, personally or by deputy, will attend for the purpose of collecting and receiving the aforesaid duties and taxes, assessed and payable within said County of Rockingham, at the places within said county, and at the times designated as follows:

At NEWMARKET, at the Newmarket Bank, November 22d, 1864, from 10 o'clock A. M. to 12 M., and from 2 to 4 P. M., for the purpose of receiving the amounts assessed and payable within the said town of Newmarket, and the towns of South Newmarket, Deerfield, Nottingham, Northwood and Raymond.

At SALEM, at the Depot, November 28th, 1864, from 9 to 12 A. M., and at DERRY, at the Depot, from 2 to 4 P. M., for the purpose of receiving the amounts assessed and payable within the said towns of Salem and Derry, and the towns of Londonderry, Chester, Auburn, Sandown, Hampstead and Windham.

At EXETER, at the office of said Collector, December 1st, 2d, 5th, 6th, 7th, 8th, 9th and 10th, 1864, from 9 o'clock A. M. to 12 M., and from 2 to 4 P. M., for the purpose of receiving the amounts assessed and payable within the said town of Exeter, and the towns of Stratham, Hampton, Kensington, North Hampton, Hampton Falls, Seabrook, East Kingston, Kingston, Epping, Brentwood, Fremont, Danville, Plaistow, Atkinson, Newton, South Hampton, Sandown, Hampstead, South Newmarket, Raymond, Candia, Nottingham, Northwood, Deerfield, Salem, Derry, Londonderry, Chester, Auburn, Windham and Newmarket.

At PORTSMOUTH, at the Naval and Surveyor's Office in the Custom House, December 9th and 10th, 1864, from 10½ o'clock A. M. to 4 P. M., for the purpose of receiving the amounts assessed and payable within the said city of Portsmouth, and the towns of Rye, Newcastle, Greenland, Newington and Gosport.

Notice is also hereby further given that all persons who shall neglect to pay the duties and taxes assessed upon them as aforesaid, to said Collector or his deputy within the times above specified, will be liable, under the provisions of Section 28 and 119 of the Act of Congress approved June 30, 1864, to pay ten per centum additional upon the amount thereof.

It is very desirable that persons having taxes to pay should remember the day and hour, as the Collector is instructed to enforce the law in all cases of delinquency.

Tax payers will provide themselves with Government Currency, as only such will be received.

SAVE YOUR FUEL!

THE MODEL COOK.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

The subscriber has reduced the prices of the Model Cook Stoves FIVE DOLLARS each, to conform to the decline in gold.

GRIEF FOR THE DEAD.

Oh hearts that never cease to yearn,
O brimming tears that ne'er are dried!
The dead, though they depart, return,
As if they had not died!

The living are the only dead—
The dead live—nevermore to die;
And often when we mourn them fled,
They never were so nigh.

And though they lie beneath the waves,
Or sleep within the churchyard dim—
(Ah, through how many different graves
God's children go to him!)

Yet every grave gives up its dead
Ere it is overgrown with grass!
Then why should unpolluted tears be shed,
Or need we cry, Alas!

Or why should memory rolled with gloom,
And like a sorrowing mourner draped,
Sit weeping o'er an empty tomb
Whose captives have escaped.

'Tis but a mound—and will be mossed
When ev'ry summer grass appears;—
The loved, though wept, are never lost—
We only lose our tears.

Nay, Hope may whisper with the dead,
By bending forward where they are;
But Memory, with a backward tread,
Communes with them afar.

The joys we lose are but foretast.
And we shall find them all once more;
We look behind us for the past,
But lo! 'tis all before.

☞ "Stoddard," formerly news editor of the New Orleans Crescent, had a bead of hair that would be in the extreme of fashion were he now in Paris. While Beauregard's forces were evacuating Corinth, Stoddard passed a group of Tennesseeans by the side of the road. "Jerusalem, fellers!" said one of the butternuts, "just look at that chap's head; if he should break one of his hairs, he'd bleed to death."

HORSEFLESH.—The talk about making horseflesh an article of diet is all humbug. Whether good or not, horseflesh lacks the first element which would be likely to bring it into use, viz: cheapness. A sound horse is worth twice as much per pound as an ox and would be the dearest meat which could be used. Venison and wild fowl would be cheap in comparison.—*Journal.*

GOLDEN SHEAF WHISKEY.
C. A. RICHARDS,
99 WASHINGTON STREET,
Boston,

Would most respectfully invite the attention and examination of all Grocers, Druggists, Apothecaries and Private Individuals, desiring to sell or USE STRICTLY PURE
Liquors, Wines, Cordials or Bitters,
to the list of choice goods enumerated below, which are constantly on hand in large quantities in his Large and Spacious
Wine Store and Bottling Establishment,
99 Washington street, Boston.

First on the list, as a reliable pure stimulant, stands the celebrated and widely-known
Golden Sheaf Bourbon Whiskey,
made from Wheat, Rye and Corn, warranted for five years old. Put up in unique style, each bottle in a paper box, in cases of one dozen each, the large and increasing sales of which convince the proprietor that no extended advertisement is needed to extol its real merits. It will recommend itself on trial.

Golden Sheaf Cordial.
A delightful and healthful beverage, aromatic, with a rich ginger cordial, made from the pure Golden Sheaf Bourbon.

Golden Sheaf Bitters.
The best Tonic Bitter ever offered to the public. Mingled with the rich flavor of the Bourbon are a number of other ingredients for restoring the appetite and imparting life and vigor to the whole system.

Golden Sheaf Punch.
Made from fresh, ripe lemons, and other articles, combined as a whole into a fine rich
Bourbon Whiskey Punch.

All the above put up full strength of the whiskey, and in cases of one dozen each. These articles *improve* by age, and no exposure of climate can affect them.

JOHN AND ROBERT DUNSTER'S CELEBRATED
LONDON DOCK SPIRITS AND WINES,
imported solely by C. A. R., in wood, from the London Docks, and bottled by him in America. The distinguished and world-wide reputation of these articles has induced the subscriber to seek and obtain the Sole Agency in this country.—They are sold only in Bottles, *entirely pure, and without adulteration*, and comprise the four kinds, as follows:
LONDON DOCK GIN,
LONDON DOCK BRANDY,
LONDON DOCK SHERRY,
LONDON DOCK PORT.

All in cases of one dozen each, in strong shipping order for immediate transportation, and are sold lower than any other liquors and wines in the market, of equal quality.

Pure California Wines.
The large demand for the pure wines of California has made it a fixed fact that no well selected stock of Wines is complete without these. C. A. R. has made arrangements for the entire production of
The Largest Vineyard in California!
and is now bottling, and offers for sale, the finest CALIFORNIA WINES ever seen in this market, of four qualities, in splendid style of labels, bottles and cases—such as
ANGELICA—Sweet.
PORT—Rich.
HOCK—Dry.
STILL CHAMPAGNE—Delicious.

Parties attracted by this advertisement, or who have already become acquainted with the qualities of these articles, can have a price list sent by mail, or samples by express, when desired, by addressing the subscriber.
C. A. RICHARDS,
99 Washington street, - - - Boston.

NOTE.—C. A. Richards would also beg leave to state that the above are only a part of the list of articles for sale and imported by him. He has, in addition, one of the largest stocks in America of **Fine Bottled Wines and Spirits**, of every variety and kind, together with a fine assortment of Liquors and Wines in original packages, for sale by the cask or gallon. Also, **Fine Cigars, Sardines, Pickles, Sauces**, and every kind of table luxury usually found in a first-class wine store in this country or in Europe.
Orders are most respectfully solicited.

THE MAGEE COOKING STOVE.

The subscriber, having received his Fall stock of Stoves, would especially call the attention of the public to the
CELEBRATED AND UNEQUALLED
MAGEE COOK STOVE,
as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the oven larger than usual. The oven plates are covered with plaster, which renders it equal to the old-fashioned brick oven for perfection in baking.

There is a new style and very superior broiler and sad iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the extension top there is a large copper Reservoir for hot water; also a large tin warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.

The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shovelling up of the ashes is entirely dispensed with. The fire is regulated in the same manner as in the MAGEE PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.

For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove. Hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.

We would refer to the following purchasers:

"MAGEE'S PATENT"
VENTILATING & AIR-WARMING
FURNACES.

The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.

For economy, purity of air and ease of management it has no equal, producing a current of warm air, moist and agreeable;—and as none of the air which comes in contact with the fire-pots is used for respiration, the tendency to produce headache so much complained of in other furnaces, is entirely obviated.

The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.

To accomplish this many complicated and expensive heating arrangements have been constructed, some possessing but little improvement over former methods, while many have proved a total failure. The reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the

MAGEE FURNACE.

The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of cold air through the fire-pot, which ignites them as they pass off from the coal, thus saving at least 20 per cent. of the properties of the heat in the fuel.

No heating apparatus with the smoke-pipe or flue on the top of the cone can be made to consume the gases of the coal, as they pass off with a large amount of the heat generated, making the chimney the hottest part of your dwelling.

This Furnace does away with the great number of pipes and angles for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.

These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.

For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire-may be kept the entire season without once going out.

They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of the best Furnace in the world,—and would refer them to the following named gentlemen, who have them now in use:

Samuel Cleaves, Esq., Albert R. Hatch, Esq., Aaron H. Hill, Charles H. Mendum, Henry F. Wendell, John Sise, and others.

MACARONE AND THE DESERTER.—The amusing war correspondent of the New York Leader, writing "from the front," on the Potomac or James, says:

A little further on I came to a reliable deserter, who lay on a sand heap scratching himself. These deserters are very nice fellows.

As I approached he rose and saluted.

"Jes' came f'm' tother side, Gin'ral," says he.

"What do you want?" says I.

"I'm powerful dry," says he.

"I called an orderly and bade him fetch some whiskey."

"Now," says I, "how's things over on your side?"

"Wall," says he, "pretty bad. Old Lee, he ain't got no men whatsomever."

"I guess you lie," says I. "We felt his line the other day, and it didn't feel good. You might just as well tell the truth."

"Oh!" says he, "I was only speaking figuratively like. He ain't got no men to speak of—fifty or sixty hundred thousand, a nebbe."

"H'm, that's enough, says I."

"Yes, only they ain't good for nothing. They ain't got no ammunition."

"They keep up a d—l of a firing," says I, "for men without ammunition."

"Wall, yes," says he, "that's what's run the blockade. Thar's a power of ammunition runs the blockade."

"Short of rations?" says I.

"Dreaf'l short," says he. "We didn't get only a cracker every three days."

"Why, I killed a lot of you up yonder a while ago with their knapsacks full."

"O, yes, that's what they got from the Shandoah Walley. They got a heap of good up yander. Fact, they has all they want to eat, jes now."

"H'm, you're bound to suit, arn't you?" says I. "How are you off for ordnance?"

"O, our ordnance is ort'l," says he.

"Yes," says I, "I s'pose so. But, young man, I've got an ordnance, too, about offal, and I kept it pretty well cleared out of these lines. Now, you'd better clear out. I go in for treating my fellow men well, but when it comes to rebels, and lying deserters, at that, I can't say I see it. What do you expect to do round here?"

"Wall," says he, "I kinder thort I'd go North and play Union refugee. I'm told it pays fust rate at Lincoln meetin's."

"And how are you going to get to the North?"

"I s'pect you'll send me."

"Do you?"

"Yas; if you don't I'll jes' go back ag'in to old Lee, and tell him all I seen in your lines."

"This is what I call a good specimen of a rebel. He went in for dictating his own terms.

I sent him up to headquarters and had him hanged.

WHISKEY AND NEWSPAPERS.—A glass of whiskey, says an exchange, is manufactured from perhaps a dozen grains of mashed corn, the value of which is too small to be estimated. A pint of this mixture sells at retail for one shilling, and if of a good brand, is considered by its consumers well worth the money. It is drunk off in a minute or two; it fires the brain, rouses the passions, sharpens the appetite, and derranges and weakens the physical system. It is gone, and swollen eyes, parched lips, and aching head are its followers. On the same sideboard upon which this is served lies a newspaper, the new, white paper of which costs about two cents. This is covered with a hundred thousand types; it brings intelligence from the four quarters of the globe; it has in its clearly printed columns all that is strange or new at home; it tells you the state of the markets; gives accounts of the war, the execution of the last murderer, the last steamboat explosion or disaster, articles on philosophy, government, religion, &c., and yet for all this, the newspaper costs less than the glass of grog, the juice of a few grains of corn.

It is no less strange than true, that there are a large portion of the community who think the corn juice cheap and the newspaper dear, and the printer has hard work to collect his dimes, when the liquor dealers are paid cheerfully. How is this? Is the body a better paymaster than the head; are things of the moment more prized than things of the future? Is the transient tricking of the stomach of more consequence than the improvement of the mind, and the information that is essential to a rational being? If this had its real value, would not a newspaper be worth many pints of whiskey?—*British Standard.*

PERSONAL.—Major James M. Wilson, United States Paymaster at St. Louis, of California, and formerly of Derry, is in the city to-day, having been granted a thirty days' furlough to come East. He has been a life-long Democrat, but loved country more than party and joined in aiding those most hated by the rebels, and cut loose from rebel sympathizers. He says the less people know about the rebels and the course of the war, the more Coppery they become, and hence in New Hampshire the bitterest opponents of the government are found and the strongest friends of the South, while in Missouri, close by the hot-bed of treason, the opposite is true.—*Mirror.*

— In Dauphine, France, they make bread but once in six months, and bake it with the refuse of the fields. In the winter it becomes so hard that they cut it with an axe, and soak it for twenty-four hours before they can eat it.

THE UNPRECEDENTED POPULARITY
Which has attended the introduction of our brands of
CALIFORNIA WINES
Is a flattering tribute to their purity and fine qualities.
THE STATE FAIR
At Indianapolis, where our Wines came into competition with all the best WESTERN WINES, have just awarded us a *SILVER MEDAL.*
At the OHIO STATE FAIR we took *Five Premiums* out of six.
Surgeon General Dale, after a careful and searching chemical analysis of our wines, pronounces them PURE.
The leading portion of the American Press have extolled their merits; and the unanimous verdict of those who use them is, that

THE VERNATELLA
LIQUID BLACKING
Gives to the Leather not only a
Splendid Jet Black Polish,
But an elegant and Fashionable Perfume.
The neatness and convenience of using Liquid Blacking and the superior polish which it gives over other kinds, has heretofore been in a great measure counterbalanced by its disagreeable vinegar odor and the trouble of fitting something into the stopper of each bottle in order to apply it to the brush. The Vernatella Blacking has only the most DELIGHTFUL PERFUME, which remains with the leather as long as the blacking lasts, and each bottle has a nice ready fitted in the stopper. The Vernatella Blacking also softens and benefits the leather.
Be sure and inquire for the VERNATELLA Blacking.
Price, 12 Cents per Bottle.
Manufactured in the Chemical Department of the Calcena Manufacturing Co., and for sale by Boot and Shoe Dealers everywhere.

The Vernatella,
For making the Soles of Boots and Shoes water proof and wear longer, is also for sale as above.

PAINT! PAINT!
Winter's Metallic Brown Paint
RECOMMENDS ITSELF.
It is a pure oxide of Iron and Manganese. It mixes readily with Linseed Oil, taking two gallons less per 100 lbs. than any mineral, and possesses more body than any other paint. It forms a glossy, unfading, durable *metallic coat*, protecting wood from decay, and iron or other metals from rust or corrosion.
☞ It does not require grinding, and is warranted to give satisfaction for painting Railway Cars, Iron Bridges, Houses, Barns, Hulls and Decks of Ships, Tin and Shingle Roofs, &c.

The Old Established Hospital.
No. 5 Beaver Street, Albany, N. Y.
QUICK CURES AND LOW PRICES.
Over Twenty Thousand Patients Cured Annually!
DR. J. TELLER continues to be confidentially and successfully consulted on all forms of private diseases, at his old Established Hospital, No. 5 Beaver Street, Albany, N. Y. Twenty years devoted to this one particular branch of practice, enables him to perform cures such as no other Physician can, and his facilities are such (being in correspondence with the most eminent Physicians of the Old World,) of obtaining the safest as well as the best remedies for these diseases, offer inducements to the unfortunate of a quick and rapid cure, to be obtained at no other office in America.
In Syhilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and Spermatic Cords, Bubo, Ulcerated Throat, Sore Nose, Tender Shin Bones, Cutaneous Eruptions, Blles, Ulcers, Abscesses, and all other impurities of the system, are perfectly under the control of the Doctor's Medicines, and have been tested in more than 20,000 cases annually, with immense Success.
YOUNG MEN.
Young Men addicted to secret habits, who have impaired their constitutions, destroyed their vigor, and blasted their hopes, depriving themselves of the pleasure of the Married Life, are notified that in consulting Dr. J. Teller, they will find a friend to console and a Physician who has cured thousands, in almost every part of the United States, who applied to Dr. J. broken down in health, now rejoice in all that makes life desirable and man happy. The reader is of course aware that the delicacy of this subject will prevent a more minute description of this terrible disease.
DR. TELLER'S GREAT WORK.
A book for everybody.—Startling disclosures. Dr. TELLER's great work for the Married or those contemplating marriage—200 pages—full of plates—price 25 cts. Sent to all parts, under seal, by mail, post paid. 50,000 copies sold the past year. The single Marriel and the Married Female Monthly Pills. The sale of more than 20,000 boxes establishes their reputation as a female remedy, unapproached, and far in advance of every other medicine—for stoppages, irregularities, and other obstructions in females.
CAUTION.—Married ladies in certain delicate situations should avoid their use. For reasons see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent, by mail or express, to any part of the world, secure from curiosity or damage.
Office hours from 8 A.M. to 8 P.M., and on Sundays from 9 to 5 P.M.
N. B.—Persons at a distance can be cured at home by addressing a letter to Dr. J. Teller, enclosing a remittance. Medicines securely packed from observation, sent to any part of the world. All cases warranted. No charge for advice.
N. B.—No students or boys employed. Notice this, address all letters to

FRIDAY, DECEMBER 9, 1864.

A BRAVE PEOPLE.—Speaking of the Dominicans, who do not submit to Spanish domination without stubborn resistance, a friendly paper says:

This is not the first time that a small people on that island have defied a great power. After the independence of Hayti, Napoleon, then master of nearly all Europe, attempted to reduce the self-emancipated negroes to slavery again; and for that purpose, sent his fleets and armies, as Spain now sends hers, but the African chiefs fought and won against him. His army perished, and all his efforts were vain.

True, as to the vain effort of Bonaparte to reduce the Haytiens to Slavery; true in the main, as to their being *self*-emancipated,—but not strictly *accurate*; as it is difficult to state their case *plainly* in few words,—and as their history has been deliberately and persistently belied.

In truth, the American Revolution was the parent of that in France; and the French Revolution was the parent of that in Hayti. The whites on the island agreed with the Republicans in France and sent deputies to the National Assembly in Paris, where a decree was passed, that in Hayti as well as at home, "liberty, equality and fraternity," should be the law. The Haytian Deputies *meant* it for whites only,—but the decree did not *say* so. The free and educated mullattoes claimed it for themselves—bloodshed ensued, and great cruelty was practiced on the mulattoes by their white brethren. Next the home government extended the *terms* of their law to the mulatto. But now the white planters rebelled; and in the midst of their commotion, the slaves, who were black, rose in insurrection, Aug. 25, 1791. The white planters now admitted the mulattoes to equality,—but some planters wrote home in distress, and the home government *repealed* the decree! Now the mulattoes took up arms: and not only were there three armies, of the three colors, but the whites were divided,—and the English and Spaniards invaded Hayti.

The French Commissioners in August 1793, proclaimed freedom to all in the island, which was confirmed by the French National Convention in 1794. Now Toussant L'Ouverture, the negro, and his fellow slaves just freed, came forward, and drove the English and Spaniards from the island. He was appointed commander-in-chief by the French government,—and he really governed the island well,—the planters and people of all colors holding their property and prospering,—till in an evil hour, Napoleon Bonaparte, First Consul, resolved to *restore slavery* in the island, and his legislature *voted* to do so. He sent 56 ships and 20,000 men to do it. But they failed! During a *truce* they seized Toussant and sent him to France, where he died in prison, it has been said by starvation.*

The indignant negroes renewed the war in earnest, and amid the "horrors of St. Domingo" cleared the island of whites;—and declared their independence Jan. 1, 1804. This they have ever since maintained, with various fortunes; and appear as likely to do so as any of their neighbors.

They, like other nations, have their defects and their disadvantages: their full share of both: but no people have ever been more shamefully and systematically belied: and they must live a good while yet, to live down all prejudice. V. T.

☞ At the late bar meeting of the U. S. Supreme Court, a Washington writer says:

Reverdy Johnson made an attempt to explain away Judge Taney's remark that "a negro had no rights that a white man was bound to respect" by saying that he alluded to the revolutionary period.

The deceased judge certainly *did* allude to the revolutionary period, and to a time before it, when he said that it was universally considered that "those unfortunate people had no rights that a whit man was bound to respect." Judge T. without *formally* adopting the sentiment, went on to deny to Dred Scott the *only right* claimed for him in the suit then pending—on the ground that he being of African descent had not *acquired* any rights, and therefore could not sue in that court. So that he really based his decision on that old barbarous falsehood. It is of no force now—though that decision helped to bring on the present war, by splitting the Democratic party on the Rock of Lecompton-Kansas.

— In the trial of the copperhead conspirators at Indianapolis, a daughter of Rev. Richard Curran Williams testified that he said he would as soon have her marry a negro as an abolitionist, and that he drove her out of the house and choked her because she persisted in marrying a Union man or republican. Williams was a prominent witness on the side of the conspirators.

— News from Brazil says that an order has been issued by the Government commanding that all the ports of the country be shut against the United States steamer Wachusett, for the violation of the neutrality laws of Bahia by its captain.

☞ Fair Quotation is due to every author whom we quote.—The Boston Post of Wednesday, in commenting on the President's Message and the war, says:—

"Indeed, the President says he can maintain the contest indefinitely."

We thought this a very remarkable saying, and looking at the Message itself, as printed in the same Post, perceived that the President *did not say* so, but something very different, *viz*:

The important fact demonstrated is that we have more men now, than when the war began; that we are not exhausted, nor in process of exhaustion; that we are gaining strength, and may if need be, maintain the contest indefinitely. This as to men. Material resources are now more complete and abundant than ever. The material resources then are unexhausted, and as we believe, unexhaustable. The public purpose to re-establish and maintain the national authority, is unchanged, and is, we believe unchangeable.

The difference in the connexion, between *He* or *I*, and *We*, as the Nation, is very great. The former would be arrogant assumption; the latter is a plain and true statement of the fact, and of the peoples' will.

☞ The appointment of Hon. Salmon P. Chase to be Chief Justice of the United States, was eminently fit to be made, and will give general satisfaction to loyal citizens.

It is a sufficient commentary on the sagacity of Washington correspondents of the press that the majority of them have been assuring their readers, during the last fortnight, that Mr. Chase stood no chance whatever of being appointed Chief Justice of the United States. They were of the same opinion Tuesday morning, and probably continued so, till the appointment was made and confirmed by the Senate. People, perhaps, will conclude from this—if they have not learned it before—that President Lincoln makes his own appointments, that he is not controlled by any clique, and that he is not swayed in the discharge of public duties by fancied personal and political prejudices.

NEW HAMPSHIRE ITEMS.

—— Scarlet fever prevails to a considerable extent in Manchester.

—— Mr Charles P. Ricker, for a number of years a resident of Lowell, died in Philadelphia, on the 19th ult., after a brief illness, of small pox. Mr. Ricker was a printer, and an honest, industrious, capable man. He was a native of Rochester, and was about thirty-two years of age.

—— The Straw Board Company, at Lancaster, offer $8 per ton for straw.

—— An attempt was made to rob the Savings Bank at Laconia, last Saturday night. The outer door was broken open, and a hole drilled through the outside casing of the safe and through the filling, but not through the inside casing. It would seem that from some cause the burglars were frightened when they had done this much and decamped.

☞ At a meeting of the officers of the Horse Guards, held at the Phenix Hotel, Concord, Monday evening, it was voted unanimously to hold their annual ball on the evening of the 11th of January next; and the determination was expressed to make it an occasion of more than usual brilliancy.

— Gold closed in New York, on Thursday, at 239 7-8.

LOCAL ITEMS.

☞ A large number of recruits for the Army and Navy are now being enlisted in this city—but count mostly for the Second District, or at any rate very few for this city and vicinity. The towns above outbid us here, and take all the men. This being the only Naval rendezvous in the State, necessarily throws a great deal of extra work on the very efficient First District Board of Enrollment; and for various reasons, many Army Volunteers for the 2d District are also enlisted here. A gentleman well informed in the matter stated to us, a few days since, that with proper arrangements and exertions, New Hampshire's quota for an anticipated (not expected) call for 300,000 more men, might be filled in thirty days. Let us have them—the more good men the better.

☞ The Ballot correspondent states that a contract made by Toby & Littlefield with a Boston man for a ship constructing here, has been annulled by the merchant paying $15,000 to be let off from his bargain.

A BAND.—Manchester once had a Band she was very proud of, with Walter Dignam, Leader. She can have the same Leader and a better Band now, if her citizens will subscribe liberally enough to keep the Leader. Most of the Band have had a long experience with the army and can play better, of course, than years ago. Mr. Dignam is offered large pay to return to the army, but consents to stay here, would prefer to stay here, if he can be assured of a good living. To make him stay here our people are subscribing liberally, and we trust the desired result may be reached. Subscription books are now open.—*Mirror.*

Portsmouth has now the best Band we ever had, without doubt; and let all concerned see to it that they make the most of it—for it is a public benefit as well as a private delight.

THE REBELLION.

Information is received that Sherman has passed Millen, Ga., the last point where his march to the sea-coast could be interrupted by the rebels.

The rebels lost ten general officers at Franklin.

The steamers Prima Donna, Prairie State and Magnet, captured on the Cumberland river by the rebels, on the 5th, were recaptured on the next day by the gunboat Carondelet.

A sutler's schooner and tug Lizzie Freeman, while anchoring off Warwick river, about 7 miles above Newport News, were captured on the night of the 6th, by a party of rebels, purporting to be a portion of the crew of the Florida. There were 12 of them under the leadership of an officer dressed in the uniform of the rebel navy. The schooner was first captured and her crew being surprised in their berths made no resistance. The rebels then captured the Lizzie Freeman in the same manner. The crews were parolled.

The rebel papers say that Sherman appears puzzled where to go, and confounds all calculation by his eccentric movements. He seems to have very effectually puzzled them, as they cannot decide whether he is making for Savannah, Brunswick, Port Royal or Darien.

The Richmond Sentinel reviews Sherman's movements, and hopes for the largest measure of success. It claims that he can do nothing serious to the Confederacy, that he will lose a large part of his army, and that he has left Hood to win success in the West.

It appears by a letter from the Captain, now a prisoner, that the ship Arcole was captured by the Olustee during her visit off Sandy Hook early last month.

The Richmond papers claim that Hood won a victory at Franklin, citing the fact that our forces fell back at night to the defences of Nashville as proof.

A dispatch from Paducah says it was reported there that the rebels had planted a battery at Harpeth Shoals, Tennessee river, and a gunboat has been sent there. Meantime transports are not permitted to go above Smithland.

☞ The Message of Gov. Brown to the Georgia Legislature, which was in course of preparation when it suddenly adjourned, on Gen. Sherman's approach, is published. The Governor takes strong ground against the recommendation of Jeff. Davis to the rebel congress to repeal entirely exemptions of all classes and to vest in Davis the discretion to detail such persons as he may think fit to pursue exempted professions.—Gov. Brown shows that no man could carry on any business without the consent of Davis, and the liberty of the press would be entirely destroyed.

☞ Perley writes to the Boston Journal from Washington, that the meeting of the bar of the Supreme Court to pay funeral honors to Chief Justice Taney did not realize the expectations of those who had endeavored to make it an imposing affair. The only good speech was made by Chas. O'Connor of New York.

☞ The San Francisco American Flag says "J. W. E. Townsend, a partner of H. M. Blumenthal in the publication of the Grass Valley (California) Union, a night or two before the election, entered into an arrangement with John R. Ridge, of the National, to bring the paper out for McClellan next morning. The types were all set up for the purpose, when Mr. Blumenthal (who advanced the money to establish the paper,) went into the office and detected it." This was better than John Phenix did, for when he was absent from Sacramento one week, his wife who was a democrat, shifted the politics of the Whig newspaper to suit *her* political persuasion, and came out for the loco-foco candidates and measures!

— The investigation of the Red River disaster will doubtless delay Gen. Banks' departure for New Orleans.

BRIGHTON CATTLE MARKET.

WEDNESDAY, Dec. 7.

At market 1842 beef cattle, 2322 Sheep and Lambs, 2556 swine. Number of Western Cattle, 174; Eastern Cattle, 282; Working Oxen and Northern Cattle, 632; Cattle left over from last week, 49.

PRICES.—Beef Cattle—Extra, $12 75 a 13 75; first quality, $12 00 a 12 50; second quality, $10 00 a 11 50; 3d quality, $7 00 a 9 25, per 100 lbs., (the total weight of hides, tallow and dressed beef.)

There is a fair supply of cattle at market and some few very good ones. One lot of 30 was sold at 14 cents per lb., 30 per cent. shrink, which was the best large lot in. The quality of most of the cattle is rather ordinary, and prices have declined 25 a 50 cents per hundred from last week. But the trade was not so active as it is some Tuesdays, and there is quite a large lot on sale to-day.

HIDES—8c. a 9½ per lb.

TALLOW—10c per lb.

Calf Skins 16 a 17c per lb.

Lamb Skins $1 75 a $2 25. Sheep Skins 1 75 a $2 25.

STORES—Yearlings $13 00 a 20 00; Two years old $20 a 40; Three-years old $25 a 55.

WORKING OXEN—Large number at market.—Sales at $220 to 225 per pair. In good demand.

MILCH COWS—Sales at $25 a $40 for ordinary, extra $70 a 80. The prices of milch cows depend altogether upon the fancy of the purchaser.

SHEEP AND LAMBS—There is not so large a supply at market as there was last week, and the quality is poorer. Prices have advanced and the demand is active. Prices 8c a 8½ per lb., and from $4 to 7 per head. Some poor ones at $3 a 3 50 per head.

SWINE—Wholesale 12½ to 13½c per lb; retail 13 a 15c per lb; Fat Hogs, 12 a 12c per lb; 6564 at market.

$200 Reward.

A LARCENY having been committed on board the U. S. Steamer DESOTO, while lying in quarantine in the lower harbor of this port, the last summer and autumn, a reward of TWO HUNDRED DOLLARS will be paid for the detection of the perpetrators of said larceny.

For further information, apply to the Commandant of the Navy Yard, Portsmouth, N. H.

HALE'S
Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*, or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be within the means of all. At last after a long course of chemical experiments, he found that by adding to these *five* other ingredients, each one valuable in itself, he not only obtained the desired results but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the general public as a safe, pleasant and infallible remedy.

PRICE, 50 CENTS PER BOTTLE.

For sale by B. Hutchings, Portsmouth, and all Druggists.

"A Wonderful Discovery."

DR. TEBBETTS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "DYE," and will not stain a particle. It will "RESTORE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of new hair in all cases of BALD HEADS, when the glands or roots of the hair are not completely disorganized. It cleanses the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and perfectly healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With it every "GRAY HEAD" in New England can be restored in less than sixty days.

A Card to Invalids.

A Clergyman, while residing in South America as a missionary, discovered a safe and simple remedy for the Cure of Nervous Weakness, Early Decay, Diseases of the Urinary and Seminal Organs, and the whole train of disorders brought on by baneful and vicious habits. Great numbers have been already cured by this noble remedy. Prompted by a desire to benefit the afflicted and unfortunate, I will send the recipe for preparing and using this medicine, in a sealed envelope, to any one who needs it, *Free of Charge*.

A MODEL SUBSCRIBER.—We don't believe any paper is blessed with better lists of subscribers than ours. When we call for pay, we almost always get it—and generally before that. But of course some are better than others. A few days since a gentleman entered our counting room, and inquired the price of the Daily Chronicle now? $8 a year. Because, said he, I was thinking whether I had paid enough for it. Well, sir, said we, you have paid for your paper up to January next; and however hard it may be, we believe we have never failed to keep a contract yet. But, replied he, I don't want anybody else to pay for *my* paper; and I wish *you* would make out a bill for the difference between your present charge and my payment last winter.

So we did—and that $3 thus generously paid did us more good than three hundred taken in the common course of business. That man, besides possessing a truly independent spirit, must shape his actions by the golden rule, which is far better than even a specie basis.

And this very pleasant incident brings to our mind another of a different character—no less honest perhaps, as the world has it, but not so liberal at any rate—which also occurred to us last winter. One of our best subscribers, about the middle of December, sent us in a note, $4 for the year 1864; and, as he had designed sometime before,—in a few days after, we announced our terms for the new year at $5;—which were very soon again increased to $6 and then $8. So, as we rather expected to receive another instalment from the same source, we did not send a receipt for a day or two, as we were very busy—until we received another very polite note, requesting said receipt, and justly claiming that the payment was made before our announcement. Our first idea was to return the money, and decline the bargain, as we did many like it afterwards, but we thought that would hardly be liberal or business-like on our side; so we have furnished that paper for much less than the white paper actually costs us.

We should probably never have mentioned this first case, but for the occurrence of the other; but since we are on the subject, we will improve the occasion to say that everybody who gets this Chronicle for less than $8 (as many a hundred advance-paying subscribers do) gets it too cheap—though we neither ask nor expect them to help us out as this one friend has done in his case, unless they volunteer it as he did. Only we would not lose the chance to point so satisfactory a moral, and adorn so novel a tale—which we hope our model subscriber will excuse in us.

PRICES.— Respecting certain communications we have published about the prices of produce, &c., here and elsewhere, the Concord Patriot says:

"We should like to employ the editor of the Chronicle to purchase our winter's supply of these articles, at the prices named. We could make money by paying him a fair commission and all necessary expenses besides. Good butter sells here for 52 to 55 cents; cheese for 22 to 25, and prime potatoes for 60."

Now all the talk about prices was made by our correspondents, and little if any of it was editorial. For our part we believe in "live and let live," and don't think much of anybody or associations selling goods at cost. Neither do we believe that prices can permanently vary greatly, in places adjacent to each other, in these days of railroads and telegraphs.

☞ We notice that some persons (geologists, we presume,) have been digging in some of our streets as if in search of something. In one or two instances they have been successful in exposing to view—after removing the superincumbent strata of mud—curious formations of flat rocks, forming a sort of causeway from one side of the street to the other. We would advise others to dig in front of their residences and see if some discovery does not await them in this line.

☞ Of that draft of 272 recruits sent last week by the Eastern R. R. to Boston, on the passage through Salem tunnel thirty-four of the subs left through the window as the cars were running. Pity they hadn't all broken their worthless necks.

DANIEL MARCY secured his election to Congress in March, 1863, by about 70 majority, while Ward 3 in Portsmouth, where he resides, gave him a majority of 84. That same ward at the late municipal election gave a Union majority of 26, and as the check list will be revised and corrected, will no doubt give a larger Union majority in March. Daniel will be repudiated by his neighbors, as well as by a majority of the people of the district. His official career is near its close.

The Dover Gazette says the convention that renominated Daniel Marcy for Congress was very small, there being "not a delegate from Carroll County, and but a few from Rockingham, Strafford, or Belknap, the counties composing the District." The Gazette says the few that were present were about equally divided as to the propriety of adjourning until after the holding of the State Convention, and does not conceal its regret that such a course was not adopted. Marcy was nominated by acclamation.—*Ballot.*

TEMPLE OF AMUSEMENT.—A great bill is offered to the patrons of this popular establishment this evening. An entire new drama entitled the "Pirate's Legacy" or the "Wrecker's Fate" together with a roaring farce, will be presented. "See the players well bestowed." D.

☞ Do not forget that the Collector of Internal Revenue will be in the city to-day at his usual place for receiving such Government dues.

☞ Prof. Duboisannounces to open his "budget of blunders," in this city, at Mercantile Hall, next Monday evening.

There is no soap that will begin to compare with the J. Monroe Taylor Gold Medal Soap, and probably no other manufacturer begins to expend one-half as much money to make it worthy of the community, and the maker is richly deserving the patronage bestowed on him. It is a God-send to the world, and all who use it will agree with us that what we say is true. 32

SYMPATHY.—Sympathy is a lovely and beautiful thing, for it exhibits the angelic part of human nature. We deeply sympathize with those who cannot obtain Horrick Allen's Gold Medal Saleratus, for they are deprived of one of the greatest luxuries the world affords. But we have no sympathy with any family who will use any other Saleratus or soda, if this article can be purchased. We see most of our Merchants have it. One trial will convince any one. Their depot is 112 Liberty Street, New York.

☞ Special attention is asked to Hunnewell's preparations, advertised on our inside columns. They are based on true medical laws, used very largely by Physicians, and most undoubted testimonials are in the hands of the proprietor, always open to inspection. Let Portsmouth and its vicinity bear testimony by a confidence to test them, which will be sacred.

U. S. INTERNAL REVENUE,
COLLECTOR'S OFFICE.

THE UNDERSIGNED, COLLECTOR FOR the First Collection District in the State of New Hampshire, hereby gives notice to all persons concerned in the County of Rockingham,

That he has received for Collection the Special Income Collection List within said District, made and committed to him for collection by the Assessor thereof, in accordance with the Joint Resolution of Congress imposing a Special Income duty, approved July 4th, 1864, that the several duties and taxes assessed, enumerated and contained in said Special List have become due and payable, and that the undersigned, Collector for said district, personally or by deputy, will attend for the purpose of collecting and receiving the aforesaid duties and taxes, assessed and payable within said County of Rockingham, at the places within said county, and at the times designated as follows:

At PORTSMOUTH, at the Naval and Surveyor's Office in the Custom House, December 9th and 10th, 1864, from 10½ o'clock A. M. to 4 P. M., for the purpose of receiving the amounts assessed and payable within the said city of Portsmouth, and the towns of Rye, Newcastle, Greenland, Newington and Gosport.

Notice is also hereby further given that all persons who shall neglect to pay the duties and taxes assessed upon them as aforesaid, to said Collector or his deputy within the times above specified, will be liable, under the provisions of Section 23 and 119 of the Act of Congress approved June 30, 1864, to pay ten per centum additional upon the amount thereof.

It is very desirable that persons having taxes to pay should remember the day and hour, as the Collector is instructed to enforce the law in all cases of delinquency.

Tax payers will provide themselves with Government Currency, as only such will be received.

RYE, N. H., Feb. 20, 1846. "I hereby certify that my daughter has had the salt rheum for a number of years—some of the time so badly as to prevent her labor, or even rest—as it affected her hands very much. A large sum had been expended to the most celebrated physicians, for Sarsaparilla Syrup, &c., &c., but she obtained no relief until I procured some ten or twelve bottles of DR. SWEET'S PANACEA, and several bottles of his Humor Wash, which have effected a cure. There can be no mistake, as this cure was effected more than three years ago. No other medicines can equal Dr. Swett's in removing the various kinds of humors. I have sold it to a number of my acquaintances, who were afflicted, and witnessed many full cures effected by it since I have acted as agent for the sale of it. JOSIAH JENNESS."

PORTSMOUTH, April 21st, 1862.

I have for several years been afflicted with distress at my stomach, loss of appetite, and often vomited up all of my food immediately after eating it, and all medicine failed to give any relief until about a year ago, when I took one bottle of DR. S. SWEET'S PANACEA, which fully cured me, so that I have not had the least trouble from any of these complaints since, and I enjoy good health. M. LOWD.

From ELDER I CRESLEY, *Lee, May* 31, 1841.

DR. SWETT: Permit me to testify, as I feel in duty bound to do, that my daughter was afflicted with scrofulous humor, and that previous to your visiting our house in the spring of 1840, she had been confined for a number of months, without her natural rest by day or night. She had applied to a number of physicians, but continued to grow weaker till she commenced using your PANACEA and HUMOR WASH. Since then, she has recovered her health so far as to rest quietly by night, and labor by day. I esteem your medicine one of the best that can be found for the disease above named." ISRAEL CRESLEY

☞ Any one returning the remainder of a bottle or box of Dr. Swett's medicines shall have pay for it, if it do not agree with his case, or if not worth the price. All orders directed to DR. S. SWEET, No. 7 High street, Portsmouth, N. H., promptly attended to. may20

THE MODEL COOK.

IS, IN FACT,

The Best Stove Out,

for economy, convenience and dispatch.

Many people think it best to use an old stove as long as possible, but it is far better to throw it away and purchase a MODEL COOK, than to keep it at the present high price of fuel.

One of our shrewdest citizens who purchased a MODEL COOK STOVE a year since, says he has saved more than its cost already.

A careful, prudent farmer purchased one, and after it had been in operation some days his son came into the store and said, "something was wrong at their house;" his father and himself used wood off the same pile, he burned three baskets full a day, and his father only one! We sold him a Stove before he left, and there has been no complaint since.

These Stoves are in use in many hotels and boarding houses, and in hundreds of private families in this city and vicinity, and give the best of satisfaction.

PRICES REDUCED.

The subscriber has reduced the prices of the Model Cook Stoves FIVE DOLLARS each, to conform to the decline in gold.

ANOTHER GREAT ORGAN.—While in Boston, a few days since, we had the pleasure of attending an Organ Concert or exhibition, at the So. Cong. Church, (Rev. E. E. Hale's) Union Park St. Mr. Lang and Mr. Willcox were the performers—the latter altogether the more acceptable, to our taste, and apparently to the audience generally.

This instrument, the last of the three immense Organs manufactured by the Messrs. Hook during the past year, takes precedence in size over any to be found in Protestant churches in the United States; and in quality and style of finish, is in no case surpassed, if equalled. Though so large, only four months were occupied in its construction. It was built by specifications drawn up by Mr. Lang, and comprises three Manuals, each of fifty-eight notes, and a Pedale of thirty notes; fifty-two stops, and two thousand two hundred and sixty Pipes.

The marked feature of this organ, contained in no other of American manufacture in New England, except the celebrated Tremont Temple organ, also made by the Messrs. Hook,—is the thirty-two feet Bourdon Stop, giving tones low and deep, beyond the power of the ear to discriminate, which are felt rather than heard. It forms a foundation for the grand harmony of the whole, wonderfully pervading and sublime.

The Case, built by J. F. Paul, from a design by Mr. Hammatt Billings, is of black walnut, beautiful and elaborate, with emblematical decorations, elegantly carved, and enriched with gold. The front pipes are of a new composition, surpassing in richness and color anything before used. They are highly polished, giving a brilliant silvery appearance, in beautiful contrast with the dark woodwork. The instrument is located in the gallery, and fills a space twenty-three feet high, eighteen and a half feet deep, with a total breadth inside of over thirty feet.

☞ Alvah Clark Esq., of Cambridge, has just completed an immense refracting telescope for the Chicago University. The object glass is 18 1-2 inches in diameter, cost $2,000 in its rough state, and $11,000 now that it is finished.

There is an instrument now building in Europe which has an object-glass two feet in diameter, but as it has not yet been tried, this must be considered without a rival in the world. The telescope will be put up in the tower during the month of December. The sum paid for the instrument is $18,187. Its weight is about 6000 pounds. The length of the great tube is twenty-two feet. Magnifying lenses will be used ranging in power from 80 to 1800. The great refractor at Harvard College Observatory is 15 1-4 inches aperature, 22 feet long, and cost $20,000.

VETERAN VOTERS.—The Dover Enquirer says that three of the oldest men in Tanworth, N. H., attended town meeting on Presidential election day, and all voted for Father Abraham. Their names and ages are as follows: Mr. Stephen G. Philbrick, age 94, walked four miles to attend the meeting. He waited for the result, took a Boston Journal, and started for home apparently fifteen years younger than when he came. Mr. Henry Wiggin 93; Mr. William P. Hidden, brother of the late Rev. Samuel Hidden, aged 93.

— The Richmond Enquirer of the 3d thus concludes an editorial on the late fires in New York:

"We are very glad to see that all our Southern refugees are required to register their names. If Gen. Dix will hang them he will do service to our cause. A set of cowardly sneaks, who deserted their country, are not above burning hotels. We hope Gen. Dix will hang every mother's son of them."

— It is said that the fine cut tobacco, which is so popular with chewers, is made up of 50 per cent. peat to 50 per cent. tobacco, thus: Embryo is composed of fine, hair-like fibres, that, when dried, have the color and look of tobacco. This, saturated with a solution of strong tobacco, is mixed with good tobacco, which, together make a very nice article.

— A New York broker's boy was passing through an entry way with a bag of gold on his shoulder, when an individual slapped a plaster over his face and made off with the gold. The boy was instructed to get a certified check, and not a plaster, so he managed to get one eye out and made chase after the thief, finally recovering the gold.

MATRIMONY.—When a young tradesman in Holland or Germany goes a courting, the first question the young woman asks him is: "Are you able to pay the charges?" That is to say, in plain English: "Are you able to keep a wife when you have got her?" What a world of misery it would prevent if the young women of all countries would stick to the wisdom of that question! "Marriage is not made of mushrooms, but of good round cake," is one of the pithy sayings by which our ancestors conveyed the same prudence.

— A wildcat was killed in Weston, Conn., on the 19th ult. The first killed there for over forty years.

GOLDEN SHEAF WHISKEY.

C. A. RICHARDS,

99 WASHINGTON STREET,

Boston,

Would most respectfully invite the attention and examination of all Grocers, Druggists, Apothecaries and Private Individuals, desiring to sell or USE STRICTLY PURE

Liquors, Wines, Cordials or Bitters,

to the list of choice goods enumerated below which are constantly on hand in large quantities in his Large and Spacious

Wine Store and Bottling Establishment,

99 Washington street, Boston.

First on the list, as a reliable pure stimulant, stands the celebrated and widely-known

Golden Sheaf Bourbon Whiskey,

made from Wheat, Rye and Corn, warranted for five years old. Put up in unique style, each bottle in a paper box, in cases of one dozen each, the large and increasing sales of which convince the proprietor that no extended advertisement is needed to extol its real merits. It will recommend itself on trial.

Golden Sheaf Cordial.

A delightful and healthful beverage, aromatic, with a rich ginger cordial, made from the pure Golden Sheaf Bourbon.

Golden Sheaf Bitters.

The best Tonic Bitter ever offered to the public. Mingled with the rich flavor of the Bourbon are a number of other ingredients for restoring the appetite and imparting life and vigor to the whole system

Golden Sheaf Punch.

Made from fresh, ripe lemons, and other articles, combined as a whole into a fine rich

Bourbon Whiskey Punch.

All the above put up full strength of the whiskey, and in cases of one dozen each. These articles improve by age, and no exposure of climate can affect them.

JOHN AND ROBERT DUNSTER'S CELEBRATED

LONDON DOCK SPIRITS AND WINES,

Imported solely by C. A. R., in wood, from the London Docks, and bottled by him in America. The distinguished and world-wide reputation of these articles has induced the subscriber to seek and obtain the Sole Agency in this country.—They are sold only in Bottles, *entirely pure, and without adulteration*, and comprise the four kinds, as follows:

LONDON DOCK GIN,
LONDON DOCK BRANDY,
LONDON DOCK SHERRY,
LONDON DOCK PORT.

All in cases of one dozen each, in strong shipping order for immediate transportation, and are sold lower than any other liquors and wines in the market, of equal quality.

Pure California Wines.

The large demand for the pure wines of California has made it a fixed fact that no well selected stock of Wines is complete without them. C. A. R. has made arrangements for the entire production of

The Largest Vineyard in California!

and is now bottling, and offers for sale, the finest CALIFORNIA WINES ever seen IN THIS MARKET, of four qualities, in splendid style of labels, bottles and cases—such as

ANGELICA—Sweet.
PORT—Rich.
HOCK—Dry.
STILL CHAMPAGNE—Delicious.

Parties attracted by this advertisement, or who have already become acquainted with the qualities of these articles, can have a price list sent by mail, or samples by express, when desired, by addressing the subscriber.

C. A. RICHARDS,

99 Washington street, - - - Boston.

NOTE.—C. A. Richards would also beg leave to state that the above are only a part of the list of articles for sale and imported by him. He has, in addition, one of the largest stocks in America of Fine Bottled Wines and Spirits, of every variety and kind, together with a fine assortment of Liquors and Wines in original packages, for sale by the cask or gallon. Also, Fine Cigars, Sardines, Pickles, Sauces, and every kind of table luxury usually found in a first-class wine store in this country or in Europe.

Orders are most respectfully solicited.

THE MAGEE COOKING STOVE.

The subscriber, having received his Fall Stock of Stoves, would especially call the attention of the public to the

CELEBRATED AND UNEQUALLED

MAGEE COOK STOVE,

as the very best Stove yet made, and would invite those about purchasing or exchanging Stoves, to examine this, believing it to be far superior to any other Stove yet invented, the castings being heavier, and the ovens larger than usual. The oven plates are covered with plaster, which renders it equal to the old-fashioned brick oven for perfection in baking.

There is a new style and very superior broiler and sad-iron heater combined, by which the odor of broiling meats are prevented from escaping into the room. With the extension top there is a large copper Reservoir for hot water; also a large warming-closet attached, in which any article can be kept warm, while the other parts of the Stove are occupied for other purposes.

The arrangements for sifting the coal and cleaning the grate are far superior to those of any other Stove now in use, as no dust can possibly escape into the room, and the shoveling up of the ashes is entirely dispensed with. The fire is regulated from the MAIN BOARD in the PARLOR STOVE, and can be continued day and night for weeks together, thus saving the expense of re-kindling every day.

For economy, durability, ease of management, cleanliness and perfection in cooking, it cannot be surpassed by any other Stove, as hundreds of families in this city and vicinity, who are now using them, are willing to testify, and speak of them in the highest terms of praise.

We would refer to the following purchasers:

"MAGEE'S PATENT"

VENTILATING & AIR-WARMING

FURNACES.

The subscriber, being the Sole Agent in this vicinity for the manufacture and sale of this valuable Furnace, would ask those about remodelling or erecting buildings to examine this truly valuable invention.

For economy, purity of air and ease of management it has no equal, producing a current of warm air, healthy and agreeable;—and as none of the air which comes in contact with the fire-pots is used for respiration, the tendency to produce headache so much complained of in other Furnaces, is entirely obviated.

The objects aimed at by the constructors of heating apparatus have been to obtain the greatest amount of heat from a given amount of fuel, and to prevent the escape of heat to the smoke pipe or chimney.

To accomplish this many complicated and expensive heating arrangements have been constructed, some possessing but little improvement over former methods, while many have proved a total failure. The reason for this is obvious. The combustible gases being lighter than the air, pass off into the pipe or chimney without being consumed. This objection, so common in other Furnaces, is obviated in the

MAGEE FURNACE.

The flue or pipe in this Furnace being below the fire-pot, the gases, from their specific gravity, cannot descend, and are burned up by the admission of cold air through the fire-pot, which ignites them as they pass off from the coal, thus saving at least 20 per cent. of the properties of the heat in the fuel.

No heating apparatus with the smoke-pipe or flue on the top of the cone can be made to consume the gases of the coal, as they pass off with a large amount of the heat generated, making the chimney the hottest part of your dwelling.

This Furnace does away with the great number of pipes and surface for the radiation of heat, which are so liable to fill up and get out of order, thus simplifying, while it increases the surface of radiation.

These Furnaces consume all the coal, make no clinkers, the sifting of coal is entirely dispensed with, and they will save from 30 to 50 per cent. of fuel over common Furnaces.

For ease of management, economy and purity of air these Furnaces have no equal. They can be regulated so as to give any amount of heat required, and the fire may be kept the entire season without once going out.

They give entire satisfaction wherever used. We have in store the different sizes, Brick and Portable, to which we invite the attention of those in want of the best Furnace in the world,—and would refer them to the following named gentlemen, who have them now in use:

Samuel Cleaves, Esq.,	Albert R. Hatch, Esq.,
Aaron H. Hill,	Charles H. Mendum,
Henry F. Wendell,	John Sise, and others.

The Chronicle.

☞ "Jute," the fibre of an East Indian weap, of which so much is said now-a-days, s used to adulterate silks and is mixed with he cotton warps of cheap broadcloths, and rom its lustre can scarcely be detected. A recent English writer says that, thanks to ste, there is scarcely a piece of sound gen-ine silk woven in the country, and the con-equence is, that so called silk fabrics, in-tead of lasting for generations—as they id in the times of our grandmothers and reat grandmothers—barely last the brief eriod of the latest new fashion. The rea-on of this is evident—for in preparing this bre for the market it is necessary to cause o almost putrefy, in order to develope he fine silky character so much valued in he jute intended for export. In India the loth made from the fibre is much stronger nd more durable, because they do not take uch care in steeping it for home con-umption.

— The death of Professor Silliman, on hanksgiving morning, was as fitting to the an, as was the departure of Socrates to he other world to that eminent philosopher. He awoke in the morning after a more an usually comfortable rest. He uttered brief prayer, as was his wont, repeated wo hymns, which he followed with a few words of affection to his wife, unconcious f the signification of each act, and then ss in a moment translated to that state hose very life and atmosphere are contin-ed adoration and perfected love.

— Mr. N. T. True, of Bethel, writes to he Maine Farmer that he saw on the farm f J. Metcalf of Monmouth, an upland bed f cranberries. He chose a cold barren look-g spot in his field, set out the cranberries nd let them take care of themselves. They have nearly crowded out the native rasses; and last year he gathered about wenty bushels of nice cranberries. The resent year the crop was injured by the routh.

— We learn from the Bath Times that ch mines of iron have been partially open-d in Arrowsic—near Bath, and that a com-any has been organized to work them. The ore has been analyzed and is found to e of the usual richness. The Times says om convenience of transportation, it is ated that the ore can be quarried and car-ed to the landing on the Kennebec river, t a cost of one dollar per ton.

THE SINKING OF THE FLORIDA.— The fficial report to the Navy Department ows that extraordinary efforts were made y the Atlanta as well as those on board he Florida to save the latter vessel, and it as only when the impossibility of prevent-g her from sinking became apparant that urther attempts were abandoned.

— A domestic in Newport, R. I., while baking a carpet on Saturday, fell out of a indow twenty-eight feet high. She lay tunned for a while, but finally got up, icked up the carpet, and is now about her ork same as if the accident had not hap-ened.

— The following epitaph may be seen in he cemetery of a parish in the environs f Paris: "Here lies Madame N——, wife f M. N——, master blacksmith. The ailing around this tomb was manufactured y her husband."

— Farini, the famous rope-walker has btained in marriage an heiress, of Halifax, orth $30,000. The couple passed through ortland the other day. The bride is de-idedly pretty.

☞ Sheltering cattle saves fodder! We dislike to see disconsolate cows or oxen rouched under the lee of a wall on a cold, reary winter's day, or horses tied to a treet post.

— The latest novelty in the presentatio ine is a Newfoundland dog, presented to Miss Avonia Jones in the new Memphis heatre.

— Great Britain has paid in interest on er debt over ten thousand millions of dol-ars, which is over two and a half times as uch as the debt itself.

— The potato-producing powers of land, t is said, can be increased one third by us-ng large seed. Try it, farmers, we have 'small potatoes" enough.

— In North Monmouth, Me., they take a roughly blocked piece of wood, and in less than a minute make a finished shovel handle of it.

— The aggregate reported capital of pe-troleum companies already formed is $160,-000,000.

— It is said kerosene oil will free fowls from lice.

THE UNPRECEDENTED POPULARITY
Which has attended the introduction of our brands of
CALIFORNIA WINES
Is a flattering tribute to their purity and fine qualities.
THE STATE FAIR
At Indianapolis, where our Wines came into competition with all the best WESTERN WINES, have just awarded us a *SILVER MEDAL.*
At the OHIO STATE FAIR we took *Five Premiums* out of six.
Surgeon General Dale, after a careful and searching chemical analysis of our wines, pronounces them PURE.
The leading portion of the American Press have extolled their merits; and the unanimous verdict of those who use them is, that
They are the Best.

THE VERNATELLA
LIQUID BLACKING
Gives to the Leather not only a
Splendid Jet Black Polish,
But an elegant and Fashionable Perfume.
The neatness and convenience of using Liquid Blacking and the superior polish which it gives over other kinds, has heretofore been in a great measure counterbalanced by its disagreeable vinegar odor and the trouble of fitting something into the stopper of each bottle in order to apply it to the brush, but the Vernatella Blacking has only the MOST DELIGHTFUL PERFUME, which remains with the leather as long as the blacking lasts, and each bottle has a stink ready fitted in the stopper. The Vernatella Blacking also softens and benefits the leather.*
Be sure and inquire for the VERNATELLA Blacking.
Price, 12 Cents per Bottle.
Manufactured in the Chemical Department of the Cahoon Manufacturing Co., and for sale by Boot and Shoe Dealers everywhere.

82 Water St., Boston, Mass.

The Vernatella,
For making the Soles of Boots and Shoes water proof and wear longer, is also for sale as above.

PAINT! PAINT!
Winter's Metallic Brown Paint
RECOMMENDS ITSELF.
It is a pure oxide of Iron and Manganese. It mixes readily with Linseed Oil, taking two gal lons less per 100 lbs. than any mineral, and possesses more body than any other paint. It forms a glossy, unfading, durable *metallic coat*, protect ing wood from decay, and iron or other metals from rust or corrosion.
☞ It does not require grinding, and is warranted to give satisfaction for painting Railway Cars, Iron Bridges, Bolt Structures, Mills and Decks of Ships, Tin and Shingle Roofs, &c.

The Old Established Hospital.
No. 5 Beaver Street, Albany, N. Y.
QUICK CURES AND LOW PRICES.
Over Twenty Thousand Patients Cured Annually!
DR. J. TELLER, continues to be confidentially and successfully consulted on all forms of private diseases, at his old Established Hospital, No. 5 Beaver Street, Albany, N. Y. Twenty years devoted to this one particular branch of practice, enables him to perform cures such as no other Physician can, and his facilities are such (being in communication with the most eminent Physicians of the Old World,) of obtaining the latest as well as the latest remedies for these diseases, offer independent to the afflicted a quick and rapid cure, to be obtained at no other office in America.
In Syphilis, Gonorrhœa, Gleet, Stricture, Enlargement of the Testicles and Spermatic Cords Bubo, Ulcerated Throat, Sore Nose, Tender Shin Bones, Cutaneous Eruptions, Blies, Ulcers, Abscesses, and all other disorders of the system, are perfectly under the control of the Doctor's Medicines, and have been tested in more than 20,000 cases annually with the most immense success.
YOUNG MEN.
Young Men addicted to secret habits, who have impaired their healths and destroyed the vigor of their minds, thus depriving themselves of the pleasure of the Married Life, are notified that in consulting Dr. J. Teller, they will find a friend to counsel and a Physician who has cured thousands, in almost every part of the United States, who applied to Dr. T. broken down in health, now rejoice in all that makes life desirable and man happy. The youth under is of course aware that the deficiency of this subject will prevent a more minute description of this terrible disease.
DR. TELLER'S GREAT WORK
A book for everybody.—Startling disclosures. Dr. TELLER's great work for the Married or those contemplating marriage—200 pages—full of plates—price 25 cts. Sent to all parts, under seal, by mail, post paid. 50,000 copies sold the past year. The single Married and the Married happy. A lecture on Love, or how to choose a Partner—a complete work on Midwifery. It contains hundreds of secrets, never before published.—Warranted to be worth three times the amount asked for it. 25 cents, in specie or postage stamps inclosed, will secure a copy by return mail. Dr TELLER has devoted a lifetime to the cure of those diseases upon which his books treat.
TO THE LADIES.
Dr. TELLER still remains the only Agency in America, for the sale of Dr. Talbot's Italian Female Monthly Pills. The sale of more than 30,000 boxes establishes their reputation as a female remedy, unapproached, and far in advance of every other medicine—for stoppages, irregularities, and other obstructions in females.
CAUTION.—Married ladies in certain delicate situations should avoid their use. For reasons see directions which accompany each package, for the guidance of patients. On the receipt of $1, (the price per box,) these Pills will be sent, by mail or express, to any part of the world, secure from curiosity or damage.
Office hours from 8 A.M. to 8 P.M., and on Sundays from 9 to 12 P.M.
N. B.—Persons at a distance can be cured at home by addressing a letter to Dr. J. Teller, enclosing a remittance. Medicines securely packed from observation, sent to any part of the world. All cases warranted. No charge for advice.—N. B.—No students or boys employed. Notice this, address all letters to

SATURDAY, DECEMBER 10, 1864.

THE REBELLION.

The impression gains strength at Nashville that the rebels are raising the siege of that place and evacuating the vicinity. If it be so the march on Kentucky may be said to have commenced. Forrest with his cavalry is said to be across the Cumberland rives. The rebels have established a battery on a bluff 14 miles down the river from Nashville. On the night of the 7th, seven gunboats went down and engaged the battery, but without dislodging the rebels from their position. The gunboats returned next day, one of them considerably damaged.

The residents of Port Royal were still doing guard duty, on the 3d, in consequence of Gen. Foster having taken all the available troops to co-operate with Gen. Sherman, who is soon expected on the coast. A number of Gen. Foster's wounded had been brought to Hilton Head, from which place heavy firing could be heard. Our loss in the engagement at Grahamsville is variously estimated at from 600 to 1000.

Richmond papers say Grant is massing troops on the extreme right of the Army of James, and an attack by him there and by the left of the Army of the Potomac, were expected.

Rebel papers of the 6th say that Sherman's whole army was south of Millen, marching steadily toward the coast. A battle is expected northwest of Savannah. Another fight between Kilpatrick and Wheeler is said to have occurred last Sunday. It is reported that the Yankees lost heavily, and that Kilpatrick was wounded.

Southern papers state that Sherman broke camp at Louisville on the 2d, abandoning the shortest route to Augusta, and moving by a new route in the direction of Savannah.

Active operations by the army of the Potomac have been hindered by a rain storm.

☞ The Provost Marshal General has issued the following circular:

Reliable information has been received that a large number of evil disposed persons, consisting of rebel sympathizers, secessionists, marauders and other outlaws, who have collected in Canada with a view to enter the commercial cities of the North, and particularly those on the Canadian frontier, with the ostensible purpose of seeking employment, but who are in reality intent upon the destruction of life and property, will shortly arrive in the United States.

All officers of this Bureau are instructed to place all persons suspected to be of this class under strict surveillance, and to arrest such as evidently belong to it. Provost Marshals will confer with the municipal authorities with a view to preventing the mischief contemplated, and will aid the civil authorities in discovering these persons and causing their arrest.

DISTRICT NO. 1.—The Convention at Rochester, which nominated Hon. Daniel Marcy for re-election to Congress, passed resolutions declaring the country to have been involved in war "by a disregard of constitutional obligations;" that "the conflict has raged for three years and a half without accomplishing the purpose for which it was professedly commenced and with no hope of securing anything by its continuance but ruin to the country;" and that it is their "solemn conviction" that "this bloody and fratricidal strife ought to be arrested by an armistice, and steps taken by a commission or a convention of the States to secure peace by *compromise* and *concession*," &c.

They also denounce the Administration for what they call "its unparalleled corruptions, its tyranny and oppression, its wanton trampling upon individual liberties and rights, its *enormous crimes* of every kind," and much more of the same sort. Not a word is uttered against the rebellion or any of the traitors who for three years and a half have been making war upon the country.

It will be seen that this is the Ben. Wood platform. A letter in the N. H. Patriot, signed Daniel Marcy, says:

"The resolutions of your Convention, I hardly need say, meet, in their enunciation of principles, *my most hearty and conscientious approval*." "My past political course, and the record of my votes in Congress, are well known to the people. By these I stand and expect to be judged."

He also charges those who are in favor of prosecuting the war until the traitors are subdued and the Union restored, whom he styles "Army and Navy contractors, plunderers of the treasury," &c., with being governed by "a spirit of revenge, or cupidity, or fanaticism, delighting in the revelry of blood," &c., while "thoughtful patriots," like himself are profoundly anxious only for peace.

Those who make a platform of course will vote for the candidate who stands upon it. But as a majority of the voters in the District have just expressed their opinion against it,—they may probably do so again in March.

— Thomas J. Durant, one of the leading lawyers of Louisiana, and others, have filed a strong protest against the admission of the Congressional delegation from that State.

NOTES OF FORMER DAYS.

BY UNCLE TONY.

Dr. Belknap's remarks on the French and Indian War, which closed in 1749, are so much to the purpose, that we copy them here.

There was a striking difference in the manner in which this war was managed on the part of the English and on the part of the French. The latter kept out small parties continually engaged in killing, scalping, and taking prisoners, who were sold in Canada and redeemed by their friends at a great expense. By this mode of conduct, the French made their enemies pay the whole charge of their predatory excursions, besides reaping a handsome profit to themselves. On the other hand, the English attended only to the defence of the frontiers; and that in such a manner as to leave them for the most part insecure. No parties were sent to harass the settlements of the French. If the whole country of Canada could not be subdued, nothing less could be attempted. Men were continually kept in pay, and in expectation of service; but spent their time either the garrisons, or camps, or in guarding provisions when sent to the several forts. Though large rewards were promised for scalps and prisoners, scarcely any were obtained unless by accident. A confusion of councils, and a multiplicity of directors, caused frequent changes of measures, and delays in the execution of them. The forts were ill supplied with ammunition, provisions, clothing and snow-shoes. When an alarm happened, it was necessary, either to bake bread, or dress meat, or cast bullets, before a pursuit could be made. The French gave commissions to none but those who had distinguished themselves by some exploit. Among us, people frequently obtained preferment for themselves or their friends, by making court to governors, and promoting favorite measures in town meetings, or general assemblies.

A community recovering from a war, like an individual recovering from sickness, is sometimes in danger of a relapse. This war was not decisive, and the causes which kindled it were not removed. One of its effects was, that it produced a class of men, who, having been for a time released from laborious occupations, and devoted to the parade of military life, did not readily listen to the calls of industry. To such men, peace was burdensome, and the more so, because they had not the advantage of half pay. The interval between this and the succeeding war was not long. The peace took place in 1749, and in 1754 there was a call to resume the sword.

Portsmouth Town Clock—Pest House—Rev. Job Strong.—The honorable George Jaffrey was born at Great Island, and received a public education at Harvard College, where he was graduated in 1702. He removed to this town and engaged in trade; he was appointed Counsellor in 1716, and Treasurer of the province after the death of Mr. Penhallow in 1726. He was appointed Chief Justice of the Judicature; and he retained that office as well as that of Counsellor until his death, which took place the beginning of 1749.

Daniel Peirce, Esq., and several other gentlemen, purchased a clock by subscription, which they presented to the town the 25th of March, 1749, and which was accepted by the town and placed in the steeple of the north meeting-house.

The constant communication with foreign places by sea, kept the town continually exposed to the small-pox. To prevent its spreading they had occasionally hired houses, situated at a distance from the compact part of the town, to which persons infected with this contagious disorder were removed. This year they purchased a small island in the river, just below the town, on which they built a house, with a suitable accommodations for a hospital. A family resided in the house to attend upon the sick that were brought there. It was called the pest-house.

Rev. Job Strong was ordained over the South Parish, 28th June, 1749. He was a native of Northampton Massachusetts, and was graduated at Yale College, in 1747. It is much to the honour of this young Melancthon, that he was one, of the two, particularly recommended by the pious David Brainerd to the commissioners at Boston, as a promising character for missionary labours among the Indians. He set out for Ohonoquaugo the last of 1747; but, having reached Schoharie, he was taken unwell, and stopped four days' journey short of the place of destination. However, he spent about six months on this tour, and returned so full of the expectation of future usefulness among the poor natives of the wilderness, that he was determined, having put his hand to the plough, not to look back. The people of Portsmouth had heard an excellent account of Mr. Strong, and delegated Matthew Livermore and Henry Sherburne, esquires, to Northampton, to invite him to this place. Mr. Edwards, supposing him to be raised up in providence to water the seed, which Brainerd had successfully sown, was unwilling he should go to Portsmouth, but upon the express condition that he should shortly resume his missionary labors. The gentlemen who went after him were obliged to promise Mr. Edwards that they would not use their influence for his establishment in this place. However, though they kept their word, the people here soon gave Mr. Strong an invitation to settle with them. He gave a negative answer, and went to the commissioners in order to receive his directions as to his further services among the aborigines; but his health was so impaired, they were fearful of his inability for the task, and relinquished their claim to him. The call at Portsmouth was renewed and accepted; but the people had opportunity to rejoice in his light only for a little while. He died after a short and painful illness, 30th Sept., 1751, in the age of 27. His baptisms were one hundred and four, and his admissions eleven.

A letter, preserved in Brainerd's life, addressed to his parents, in some measure evinces the piety of his heart, and the interest he took in the religious welfare of the poor Indian tribes. He was buried under the South Meeting House—re-buried in the Proprietors' Ground, 1863.

NEW HAMPSHIRE ITEMS.

—— Mrs. Choate, widow of Ron. Rufus Choate, and daughter of the late Hon. Miles Olcott, of Hanover, died in Dorchester, Mass., on Friday, after a brief illness.

—— Capt. J. J. Ladd, of the 8th Regt., dismissed from the service for speaking disrespectfully of his superior officer, has been reinstated by the Secretary of War, and ordered back to the regiment at Natchez.

—— Ruel Durkee is the euphonious application of the successful candidate for sion counterfeits on the Bay State Bank, Lawrence; Union Bank, Boston; Weybosset Bank, Providence; Merchants' Bank, Springfield—the whole representing $179. They had passed sundry bad bills in the city and were held for examination.

THE NORTHERN MONTHLY for December is published. The table of contents has a good appearance. The Military record contains several papers of real value. The Northern Monthly begins a new volume in January; and we hope that the publishers will be enabled to announce a large accession of new patrons on the opening of the new year. Published by Bailey & Noyes, Portland.

☞ Godey's Lady's Book for January 1865, has for its frontispiece, May and December; fashions; and other rich embellishments.

☞ Peterson's Magazine, for January has a large amount of reading, patterns, &c., interesting to lady readers.

☞ In his reply, refusing the request made through Mr. Adams, that an agent might be allowed to visit the military prisons at the North and distribute £17,000 of British gold, the proceeds of a fair held in Liverpool for that purpose, among the rebel prisoners, Sec. Seward says:—

The American public will be well aware that while the United States have ample means for the support of prisoners as well as for every other exigency of the war in which they are engaged, the insurgents who have blindly rushed into that condition are suffering no privation that appeals for relief to charity either at home or abroad. The American people will be likely to reflect that the sum thus insidiously tendered in the name of humanity constitutes no large portion of the profits which its contributors may be justly supposed to have derived from the insurgents by exchanging with them arms and munitions of war for the coveted productions of immoral and enervating slave labor. Nor will any portion of the American people be disposed to regard the sum thus ostentatiously offered for the relief of captured insurgents as too generous an equivalent for the devastation and desolation which a civil war, promoted and protected by British subjects, have spread throughout the States which before were eminently prosperous and happy.

— Harding, the husband of the notorious Belle Boyd, was captured Friday last at Martinsburg and sent to the Old Capital Prison.

— There was a destructive fire at Indiantown, one of the suburbs of St. John, Friday morning. About 90 dwelling-houses were burned. At least 300 people were rendered houseless by the conflagration.

— Gold closed in New York on Friday at 2.40 1-2 to 2.40 3-4.

— Recent proceedings in the South Carolina Legislature look as if that State was about to secede from the empire of Jeff. Davis. Resolutions had been introduced denouncing as unconstitutional Davis' proposition to emancipate the slaves, and to abridge the freedom of the press, declaring that the States are not amenable to the Richmond government, and advising other States not to submit to its usurpations.

— The Navy Department has recovered the treasure box from the Florida, with $12,000 in gold in it.

— The Senate on Thursday confirmed Ex-Gov. Dennison as Postmaster general.

— In the House, on Thursday, the Judiciary Committee were instructed to inquire into the expediency of passing a law denationalizing persons who go abroad to escape the draft, and requiring application for naturalization to be restored to citizenship. Congress adjourned over until Monday.

— It was reported at Southampton, Eng., on the 22d ult., that Semmes' ship Sea King was wrecked off Madeira.

— There was an unusual demand for cotton in Liverpool, Nov. 21 and 22, an aggregate of 40,000 bales changing hands, and prices advancing 1 1-2 a 2d per pound for American.

— A dispatch to the St. Louis Democrat, from Paducah, Nov. 7, says all stories about disasters on the Cumberland River are untrue.

☞ A dispatch from Denver City, Dec. 8th, says:

Detachments of the 1st and 3d Cavalry have had a fight with the Indians near Fort Lyon, and killed between 400 and 500 of them, and captured about 500 ponies and mules. The Chiefs Blaskettle, White Antelope and little Rob were killed. Our loss was nine killed and thirty-eight wounded.

HALE'S
Honey of Horehound Tar,

For the cure of Coughs, Colds, Influenza, Hoarseness, Difficult Breathing, and all Affections of the Throat, Bronchial Tubes and Lungs, leading to Consumption.

This sovereign remedy is compounded from the favorite recipe of an illustrious Physician and Chemist, who for many years used it with the most complete success in his extensive private practice.

He had long been profoundly impressed with the wonderful virtue of the honey of the plant Horehound, in union with the Cleansing and Healing properties of Tar extracted from the Life Principle of the forest tree *Abies Balsamea*; or Balm of Gilead. For years he was baffled in his attempts to blend these great medicinal forces into such a union that the original power of each would be preserved, the disagreeable qualities of common tar removed, and the price of the compound be placed within the means of all. At last after a long course of chemical experiments, he found that by adding to these *five* other ingredients, each one valuable in *itself*, he not only obtained the desired results but greatly increased the curative power of the compound. This having been thoroughly tested by practice, is now offered to the general public as a safe, pleasant and infallible remedy.

PRICE, 50 CENTS PER BOTTLE.

"A Wonderful Discovery."

DR. TEBBETTS' "PHYSIOLOGICAL HAIR REGENERATOR" is compounded in strict accordance with the well known laws of Physiology and modern vegetable Chemistry. It is not a "DYE," and will not stain a particle. It will "REGENERATE GRAY HAIR" in all cases to its original color. It promotes a luxuriant growth of NEW HAIR in all cases on BALD HEADS, when the glands or roots of the hair are not completely disorganized. It prevents the hair from falling off and removes all dandruff, heat, humors and itching from the scalp. It keeps the hair soft, moist and gloriously healthy, and gives it a glossy and beautiful appearance. It is highly perfumed, and as a Dressing it has no superior. The "REGENERATOR" is warranted to produce the above results in all cases, if not the money to be refunded. With it every "GRAY HEAD" in New England can be restored in less than sixty days.

A Card to Invalids.

A Clergyman, while residing in South America as a missionary, discovered a safe and simple remedy for the Cure of Nervous Weakness, Early Decay, Diseases of the Urinary and Seminal Organs, and the whole train of disorders brought on by baneful and vicious habits. Great numbers have been already cured by this noble remedy. Prompted by a desire to benefit the afflicted and unfortunate, I will send the recipe for preparing and using this medicine, in a sealed envelope, to any one who needs it, *Free of Charge*.

IN BOARD OF ALDERMEN, on Thursday evening, the Committee on the Fire Department was authorized to dispose of Engine No. 5, it having been put out of commission,—and also to erect a building in rear of Engine House No. 2, for storage necessary for Steamer Sagamore, at a cost of $150.

The Committee on Streets reported in favor of allowing a crosswalk on Market Street at junction of Hanover; a sidewalk eastern side of North Church; relaying sidewalk in front of Cyrus Plummer's, Church street; of accepting Dover street as a public street—all adopted.

A petition for Gas light at corner of Market and Hanover streets,—not granted; a petition for Gas light corner Cabot and Middle streets,—referred.

Ordered that the mayor elect be notified in writing of his election.

The Mayor was appointed a committee to enquire by what right and authority the Gas and Acqueduct Co.'s dig up and mutilate the public streets.

D. W. Twombly's property sold for taxes the amount was remitted to the purchaser.

Andrew J. Ayers was appointed Lamplighter.

John F. Shillaber was appointed sealer of weights and measures.

The Committee on revision of the enrollment was authorized to take all necessary measures to have list corrected.

Ald. Brown's report as one of the recruiting committee for last draft and his bill for services and expenses amounting to $686.25 referred to auditing committee, Ald. Hadley, Wiggin and Wendell.

A complaint of Daniel M. Foss against Dr. Goodwin, for exorbitant charges as Health officer, was referred to committee on claims, with Ald. Broughton added.—Adjourned.

A BEAUTIFUL LITTLE BOY BITTEN BY A DOG.— Last Tuesday a child four years old whose Father is absent in the service of our country, while passing down Vaughan street to school, was cruelly lacerated in the cheek by a dog belonging to a gentleman whose residence was near by. A whole family is hereby thrown into affliction and at least one member of it is seriously injured for life. It is lamentable that there is not moral force enough in the public mind to discountenance the low practice of keeping these worthless, dangerous and poverty making animals in our midst.

In the present case, the owner of the dog, after understanding the affair generously gave him up to be killed. We pray that our authorities may take some action to kill every dog in the city, thereby save daily annoyance, much provision, and danger.

TEMPLE OF AMUSEMENT.—All those who wish to enjoy a good, hearty laugh should visit the temple this evening, on which occasion a rare bill is offered, consisting of 3 glorious pieces, interspersed with singing and dancing. The management know how to cater for their numerous patrons. Such a bill should fill the house to overflowing. D.

☞ Those of our readers who are at a loss to know what to give as a Christmas present should secure a set of Meinerth's local album views. They are far more lasting in interest than any fancy sketches.

☞ Mr. Langdon M. Perkins, of this city, has purchased a farm in Hartford, Vt., whither he has removed, for the purpose of sheep raising and wool growing.

☞ Mons. Dubois is *not* at Mercantile Hall with his *Lecture*, next Monday evening, after all; but finding that he can have the Temple on Wednesday evening, will improve that occasion. But he announces a Class in French, to open Monday evening, at Mercantile Hall.

☞ The Fall River News, noticing the arrival of there the body of Isaac Palmer, (found on the track at the Eastern Depot, in this city, last Sunday morning,) after remarking that Mr. P. had been paid off the previous evening, says: "The supposition is that he was robbed and then thrown on the track, as the pockets were found turned inside out."

☞ The report of the Secretary of the Navy shows that the expenditures at the Portsmouth Navy Yard for the fiscal year are as follows: Completed works, $33,793.05; uncompleted works, $169,338.62; contigent expenses, $83,817.23.

RELIGIOUS.—Rev. M. H. Tarbox will speak at the Pearl Street Free Baptist Church, to-morrow; and will give a familiar talk of his experience with the sick and wounded soldiers, as a delegate of the Christian Commission,—at 7 o'clock, P. M.

☞ Rev. A. J. Patterson, of this city, will give the address before the "Samaritan Society," of Salem, on Sunday evening, at their annual visit.

☞ A slight alarm of fire on Friday afternoon, about 2 o'clock, was caused by a burning chimney in Dover street.

It appears to us that Admiral Pearson deserves as much praise for capturing the Panama pirates as though he had sunk a pirate ship.—*Ex.*

Portsmouth sends out the Admiral that captured the one, and the ship that sunk the other.

☞ Do not forget that the Collector of Internal Revenue will be in the city to-day at his usual place for receiving such Government dues.

There is no soap that will begin to compare with the J. Monroe Taylor Gold Medal Soap, and probably no other manufacturer begins to expend one-half as much money to make it worthy of the community, and the maker is richly deserving the patronage bestowed on him. It is a God-send to the world, and all who use it will agree with us that what we say is true. 32

SYMPATHY.—Sympathy is a lovely and beautiful thing, for it exhibits the angelic part of human nature. We deeply sympathize with those who cannot obtain Herrick Allen's Gold Medal Saleratus, for they are deprived of one of the greatest luxuries the world affords. But we have no sympathy with any family who will use any other Saleratus or soda, if this article can be purchased. We see most of our Merchants have it. One trial will convince any one. Their depot is 112 Liberty Street, New York.

☞ Special attention is asked to Hunnewell's preparations, advertised on our inside columns. They are based on true medical laws, used very largely by Physicians, and most undoubted testimonials are in the hands of the proprietor, always open to inspection. Let Portsmouth and its vicinity bear testimony by a confidence to test them, which will be sacred.

MARRIAGES.

U. S INTERNAL REVENUE,
COLLECTOR'S OFFICE.

THE UNDERSIGNED, COLLECTOR FOR the First Collection District in the State of New Hampshire, hereby gives notice to all persons concerned in the County of Rockingham;

That he has received for Collection the Special Income Collection List within said District, made and committed to him for collection by the Assessor thereof, in accordance with the Joint Resolution of Congress imposing a Special Income duty, approved July 4th, 1864, that the several duties and taxes assessed, enumerated and contained in said Special List have become due and payable, and that the undersigned, Collector for said district, personally or by deputy, will attend for the purpose of collecting and receiving the aforesaid duties and taxes, assessed and payable within said County of Rockingham, at the places within said county, and at the times designated as follows:

At PORTSMOUTH, at the Naval and Surveyor's Office in the Custom House, December 9th and 10th, 1864, from 10½ o'clock A. M. to 4 P. M., for the purpose of receiving the amounts assessed and payable within the said city of Portsmouth, and the towns of Rye, Newcastle, Greenland, Newington and Gosport.

Notice is also hereby further given that all persons who shall neglect to pay the duties and taxes assessed upon them as aforesaid, to said Collector or his deputy within the times above specified will be liable, under the provisions of Sections 23 and 119 of the Act of Congress approved June 30, 1864, to pay ten per centum additional upon the amount thereof.

It is very desirable that persons having taxes to pay should remember the day and hour, as the Collector is instructed to enforce the law in all cases of delinquency.

Tax payers will provide themselves with Government Currency, as only such will be received.
